

# Monomoy Goswami

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/7841664/monomoy-goswami-publications-by-year.pdf>  
**Version:** 2024-04-11

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.  
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

8 papers	241 citations	6 h-index	8 g-index
8 ext. papers	262 ext. citations	3.7 avg, IF	2.64 L-index

#	Paper	IF	Citations
8	Combined Use of Selected UX Research Techniques and Creation of User Persona for Design and Evaluation of Sustainable e-Commerce Apps: A Case Study. <i>Lecture Notes in Networks and Systems</i> , <b>2022</b> , 1481-1493	0.5	0
7	Generating design flood hydrographs by parameterizing the characteristic flood hydrograph at a site using only flow data. <i>Hydrological Sciences Journal</i> , <b>2020</b> , 1-19	3.5	1
6	Rainfall-Runoff Modelling Across Southeast Australia: Datasets, Models and Results. <i>Australian Journal of Water Resources</i> , <b>2011</b> , 14, 101-116	1.2	46
5	A monster that made the SMAR conceptual model fight for the wrong reasons. <i>Hydrological Sciences Journal</i> , <b>2010</b> , 55, 913-927	3.5	11
4	Real-time flow forecasting in the absence of quantitative precipitation forecasts: A multi-model approach. <i>Journal of Hydrology</i> , <b>2007</b> , 334, 125-140	6	26
3	Development of regionalisation procedures using a multi-model approach for flow simulation in an ungauged catchment. <i>Journal of Hydrology</i> , <b>2007</b> , 333, 517-531	6	69
2	Comparative assessment of six automatic optimization techniques for calibration of a conceptual rainfall-runoff model. <i>Hydrological Sciences Journal</i> , <b>2007</b> , 52, 432-449	3.5	29
1	Assessing the performance of eight real-time updating models and procedures for the Brosna River. <i>Hydrology and Earth System Sciences</i> , <b>2005</b> , 9, 394-411	5.5	59
