

Karin de Bruijn

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7877081/karin-de-bruijn-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

37
papers

866
citations

#	Paper	IF	Citations
37	Impact of hydraulic model resolution and loss of life model modification on flood fatality risk estimation: Case study of the Bommelerwaard, The Netherlands. <i>Journal of Flood Risk Management</i> , 2021 , 14, e12713	3.1	2
36	Experimental determination of pressure coefficients for flood loading of walls of Dutch terraced houses. <i>Engineering Structures</i> , 2020 , 216, 110647	4.7	7
35	Efficient or Fair? Operationalizing Ethical Principles in Flood Risk Management: A Case Study on the Dutch-German Rhine. <i>Risk Analysis</i> , 2020 , 40, 1844-1862	3.9	9
34	Large-scale stochastic flood hazard analysis applied to the Po River. <i>Natural Hazards</i> , 2020 , 104, 2027-2049	3.9	4
33	Influence of water level duration on dike breach triggering, focusing on system behaviour hazard analyses in lowland rivers. <i>Georisk</i> , 2020 , 14, 26-40	1.9	9
32	Impact of including interdependencies between multiple riverine flood defences on the economically optimal flood safety levels. <i>Reliability Engineering and System Safety</i> , 2019 , 191, 106475	6.3	8
31	Flood Resilience of Critical Infrastructure: Approach and Method Applied to Fort Lauderdale, Florida. <i>Water (Switzerland)</i> , 2019 , 11, 517	3	9
30	Large Scale Flood Hazard Analysis by Including Defence Failures on the Dutch River System. <i>Water (Switzerland)</i> , 2019 , 11, 1732	3	3
29	Systemic Flood Risk Management: The Challenge of Accounting for Hydraulic Interactions. <i>Water (Switzerland)</i> , 2019 , 11, 2530	3	10
28	Accounting for the uncertain effects of hydraulic interactions in optimising embankments heights: Proof of principle for the IJssel River. <i>Journal of Flood Risk Management</i> , 2019 , 12, e12532	3.1	8
27	Validation of flood risk models: Current practice and possible improvements. <i>International Journal of Disaster Risk Reduction</i> , 2019 , 33, 441-448	4.5	36
26	Evolutionary leap in large-scale flood risk assessment needed. <i>Wiley Interdisciplinary Reviews: Water</i> , 2018 , 5, e1266	5.7	38
25	Assessing quick wins to protect critical urban infrastructure from floods: a case study in Bangkok, Thailand. <i>Journal of Flood Risk Management</i> , 2018 , 11, S17-S27	3.1	12
24	Assessment of Critical Infrastructure Resilience to Flooding Using a Response Curve Approach. <i>Sustainability</i> , 2018 , 10, 3470	3.6	26
23	Flood Catastrophe Model for Designing Optimal Flood Insurance Program: Estimating Location-Specific Premiums in the Netherlands. <i>Risk Analysis</i> , 2017 , 37, 82-98	3.9	16
22	Resilience in practice: Five principles to enable societies to cope with extreme weather events. <i>Environmental Science and Policy</i> , 2017 , 70, 21-30	6.2	67
21	Uncertainty in flood damage estimates and its potential effect on investment decisions. <i>Natural Hazards and Earth System Sciences</i> , 2016 , 16, 1-14	3.9	68

20	Economically optimal safety targets for riverine flood defence systems. <i>E3S Web of Conferences</i> , 2016 , 7, 20004	0.5	2
19	Hydrodynamic system behaviour: its analysis and implications for flood risk management. <i>E3S Web of Conferences</i> , 2016 , 7, 11001	0.5	6
18	Flood vulnerability of critical infrastructure in Cork, Ireland. <i>E3S Web of Conferences</i> , 2016 , 7, 07005	0.5	5
17	Methods and tools to support real time risk-based flood forecasting - a UK pilot application. <i>E3S Web of Conferences</i> , 2016 , 7, 18019	0.5	2
16	The storyline approach: a new way to analyse and improve flood event management. <i>Natural Hazards</i> , 2016 , 81, 99-121	3	17
15	Importance sampling for efficient modelling of hydraulic loads in the RhineMeuse delta. <i>Stochastic Environmental Research and Risk Assessment</i> , 2015 , 29, 637-652	3.5	12
14	Flood fatality hazard and flood damage hazard: combining multiple hazard characteristics into meaningful maps for spatial planning. <i>Natural Hazards and Earth System Sciences</i> , 2015 , 15, 1297-1309	3.9	15
13	An advanced method for flood risk analysis in river deltas, applied to societal flood fatality risk in the Netherlands. <i>Natural Hazards and Earth System Sciences</i> , 2014 , 14, 2767-2781	3.9	34
12	Application and validation of mortality functions to assess the consequences of flooding to people. <i>Journal of Flood Risk Management</i> , 2012 , 5, 92-110	3.1	10
11	Quantitative methods for estimating flood fatalities: towards the introduction of loss-of-life estimation in the assessment of flood risk. <i>Natural Hazards</i> , 2012 , 63, 1083-1113	3	29
10	Assessment of the Netherlands flood risk management policy under global change. <i>Ambio</i> , 2012 , 41, 180-92	6.5	47
9	A stepwise approach for flood risk and vulnerability assessment for urban flood critical infrastructures 2012 ,		2
8	The meaning of system robustness for flood risk management. <i>Environmental Science and Policy</i> , 2011 , 14, 1121-1131	6.2	67
7	Casualty risks in the discussion on new flood protection standards in The Netherlands 2010 ,		7
6	Risky places in the Netherlands: a first approximation for floods. <i>Journal of Flood Risk Management</i> , 2009 , 2, 58-67	3.1	37
5	Assessment of flood risk accounting for river system behaviour. <i>International Journal of River Basin Management</i> , 2007 , 5, 93-104	1.7	21
4	Evolving Concepts in Flood Risk Management: Searching for a Common Language 2007 , 61-75		8
3	Resilience indicators for flood risk management systems of lowland rivers. <i>International Journal of River Basin Management</i> , 2004 , 2, 199-210	1.7	59

2	Resilience strategies for flood risk management in the Netherlands. <i>International Journal of River Basin Management</i> , 2003 , 1, 33-40	1.7	150
1	Protecting the Rhine-Meuse delta against sea level rise: What to do with the river's discharge?. <i>Journal of Flood Risk Management</i> ,	3.1	1
