

Nancy G Klimas

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7879416/nancy-g-klimas-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
84	Sex-specific differences in plasma lipid profiles are associated with Gulf War Illness.. <i>Journal of Translational Medicine</i> , 2022 , 20, 73	8.5	1
83	The impact of post-traumatic stress on quality of life and fatigue in women with Gulf War Illness.. <i>BMC Psychology</i> , 2022 , 10, 42	2.8	0
82	Post-traumatic stress impact on health outcomes in Gulf War Illness. <i>BMC Psychology</i> , 2021 , 9, 57	2.8	3
81	Gulf War Illness Clinical Trials and Interventions Consortium (GWICTIC): A collaborative research infrastructure for intervention and implementation. <i>Life Sciences</i> , 2021 , 278, 119636	6.8	1
80	Sex-specific plasma lipid profiles of ME/CFS patients and their association with pain, fatigue, and cognitive symptoms. <i>Journal of Translational Medicine</i> , 2021 , 19, 370	8.5	5
79	Myalgic Encephalomyelitis/Chronic Fatigue Syndrome: Essentials of Diagnosis and Management. <i>Mayo Clinic Proceedings</i> , 2021 , 96, 2861-2878	6.4	15
78	Modeling Neuroimmune Interactions in Human Subjects and Animal Models to Predict Subtype-Specific Multidrug Treatments for Gulf War Illness. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	3
77	Evaluation of natural killer cell assay performance on shipped blood specimens. <i>Journal of Immunological Methods</i> , 2021 , 495, 113049	2.5	0
76	A common language for Gulf War Illness (GWI) research studies: GWI common data elements. <i>Life Sciences</i> , 2021 , 290, 119818	6.8	1
75	Brain-Immune Interactions as the Basis of Gulf War Illness: Clinical Assessment and Deployment Profile of 1990-1991 Gulf War Veterans in the Gulf War Illness Consortium (GWIC) Multisite Case-Control Study. <i>Brain Sciences</i> , 2021 , 11,	3.4	1
74	Neurotoxicant exposures and rates of Chronic Multisymptom Illness and Kansas Gulf War Illness criteria in Gulf War deployed women veterans. <i>Life Sciences</i> , 2021 , 280, 119623	6.8	4
73	The effect of stress on the transcriptomes of circulating immune cells in patients with Gulf War Illness. <i>Life Sciences</i> , 2021 , 281, 119719	6.8	
72	Elevated somatic mutation and evidence of genomic instability in veterans with Gulf War illness. <i>Life Sciences</i> , 2021 , 281, 119746	6.8	
71	A randomized phase II remote study to assess Bacopa for Gulf War Illness associated cognitive dysfunction: Design and methods of a national study. <i>Life Sciences</i> , 2021 , 282, 119819	6.8	2
70	Sex-Based Differences in Plasma Autoantibodies to Central Nervous System Proteins in Gulf War Veterans versus Healthy and Symptomatic Controls. <i>Brain Sciences</i> , 2021 , 11,	3.4	3
69	Towards a Treatment for Gulf War Illness: A Consensus Docking Approach. <i>Military Medicine</i> , 2020 , 185, 554-561	1.3	1
68	Leveraging Prior Knowledge to Recover Characteristic Immune Regulatory Motifs in Gulf War Illness. <i>Frontiers in Physiology</i> , 2020 , 11, 358	4.6	0

67	Prevalence and Patterns of Symptoms Among Female Veterans of the 1991 Gulf War Era: 25 Years Later. <i>Journal of Women's Health</i> , 2020 , 29, 819-826	3	9
66	Targeting sirtuin activity with nicotinamide riboside reduces neuroinflammation in a GWI mouse model. <i>NeuroToxicology</i> , 2020 , 79, 84-94	4.4	12
65	Post-exertional malaise is associated with greater symptom burden and psychological distress in patients diagnosed with Chronic Fatigue Syndrome. <i>Journal of Psychosomatic Research</i> , 2020 , 129, 109893 ¹	4.1	4
64	Plasma proteomic profiling suggests an association between antigen driven clonal B cell expansion and ME/CFS. <i>PLoS ONE</i> , 2020 , 15, e0236148	3.7	12
63	Alterations in high-order diffusion imaging in veterans with Gulf War Illness is associated with chemical weapons exposure and mild traumatic brain injury. <i>Brain, Behavior, and Immunity</i> , 2020 , 89, 281-290	16.6	9
62	Obesity Worsens Gulf War Illness Symptom Persistence Pathology by Linking Altered Gut Microbiome Species to Long-Term Gastrointestinal, Hepatic, and Neuronal Inflammation in a Mouse Model. <i>Nutrients</i> , 2020 , 12,	6.7	9
61	Host Abundance Correlates With Gulf War Illness Symptom Persistence via NLRP3-Mediated Neuroinflammation and Decreased Brain-Derived Neurotrophic Factor. <i>Neuroscience Insights</i> , 2020 , 15, 2633105520942480	3	16
60	Using Plasma Autoantibodies of Central Nervous System Proteins to Distinguish Veterans with Gulf War Illness from Healthy and Symptomatic Controls. <i>Brain Sciences</i> , 2020 , 10,	3.4	9
59	TLR Antagonism by Sparstolonin B Alters Microbial Signature and Modulates Gastrointestinal and Neuronal Inflammation in Gulf War Illness Preclinical Model. <i>Brain Sciences</i> , 2020 , 10,	3.4	7
58	Preliminary Evidence for a Hormetic Effect on DNA Nucleotide Excision Repair in Veterans with Gulf War Illness. <i>Military Medicine</i> , 2020 , 185, e47-e52	1.3	3
57	Unravelling myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS): Gender-specific changes in the microRNA expression profiling in ME/CFS. <i>Journal of Cellular and Molecular Medicine</i> , 2020 , 24, 5865-5877	5.6	9
56	The Gut-Microbiome in Gulf War Veterans: A Preliminary Report. <i>International Journal of Environmental Research and Public Health</i> , 2019 , 16,	4.6	23
55	Genetic Predisposition for Immune System, Hormone, and Metabolic Dysfunction in Myalgic Encephalomyelitis/Chronic Fatigue Syndrome: A Pilot Study. <i>Frontiers in Pediatrics</i> , 2019 , 7, 206	3.4	18
54	Treatment Avenues in Myalgic Encephalomyelitis/Chronic Fatigue Syndrome: A Split-gender Pharmacogenomic Study of Gene-expression Modules. <i>Clinical Therapeutics</i> , 2019 , 41, 815-835.e6	3.5	5
53	Alterations in DNA Methylation Status Associated with Gulf War Illness. <i>DNA and Cell Biology</i> , 2019 , 38, 561-571	3.6	12
52	Pharmaceutical Interventions in Chronic Fatigue Syndrome: A Literature-based Commentary. <i>Clinical Therapeutics</i> , 2019 , 41, 798-805	3.5	12
51	Leveraging Prior Knowledge of Endocrine Immune Regulation in the Therapeutically Relevant Phenotyping of Women With Chronic Fatigue Syndrome. <i>Clinical Therapeutics</i> , 2019 , 41, 656-674.e4	3.5	4
50	Relationship satisfaction, communication self-efficacy, and chronic fatigue syndrome-related fatigue. <i>Social Science and Medicine</i> , 2019 , 237, 112392	5.1	4

49	A permethrin metabolite is associated with adaptive immune responses in Gulf War Illness. <i>Brain, Behavior, and Immunity</i> , 2019 , 81, 545-559	16.6	27
48	Dysbiosis-Associated Enteric Glial Cell Immune-Activation and Redox Imbalance Modulate Tight Junction Protein Expression in Gulf War Illness Pathology. <i>Frontiers in Physiology</i> , 2019 , 10, 1229	4.6	17
47	Gut DNA Virome Diversity and Its Association with Host Bacteria Regulate Inflammatory Phenotype and Neuronal Immunotoxicity in Experimental Gulf War Illness. <i>Viruses</i> , 2019 , 11,	6.2	23
46	Neuropsychological Findings in Gulf War Illness: A Review. <i>Frontiers in Psychology</i> , 2019 , 10, 2088	3.4	21
45	Sex Differences in Gulf War Illness: A Reanalysis of Data From the CDC Air Force Study Using CDC and Modified Kansas Case Definitions. <i>Journal of Occupational and Environmental Medicine</i> , 2019 , 61, 610-616	2	9
44	Corticosterone and pyridostigmine/DEET exposure attenuate peripheral cytokine expression: Supporting a dominant role for neuroinflammation in a mouse model of Gulf War Illness. <i>NeuroToxicology</i> , 2019 , 70, 26-32	4.4	27
43	Psychoneuroimmunology and Natural Killer Cells: The Chromium-Release Whole-Blood Assay. <i>Methods in Molecular Biology</i> , 2018 , 1781, 209-220	1.4	
42	Exploring the Diagnostic Potential of Immune Biomarker Co-expression in Gulf War Illness. <i>Methods in Molecular Biology</i> , 2018 , 1781, 101-120	1.4	3
41	Increasing Resilience to Traumatic Stress: Understanding the Protective Role of Well-Being. <i>Methods in Molecular Biology</i> , 2018 , 1781, 87-100	1.4	2
40	Depression, evening salivary cortisol and inflammation in chronic fatigue syndrome: A psychoneuroendocrinological structural regression model. <i>International Journal of Psychophysiology</i> , 2018 , 131, 124-130	2.9	18
39	Breaking Away: The Role of Homeostatic Drive in Perpetuating Depression. <i>Methods in Molecular Biology</i> , 2018 , 1781, 121-144	1.4	0
38	Identification of Myalgic Encephalomyelitis/Chronic Fatigue Syndrome-associated DNA methylation patterns. <i>PLoS ONE</i> , 2018 , 13, e0201066	3.7	22
37	The Multiple Hit Hypothesis for Gulf War Illness: Self-Reported Chemical/Biological Weapons Exposure and Mild Traumatic Brain Injury. <i>Brain Sciences</i> , 2018 , 8,	3.4	24
36	Using a Consensus Docking Approach to Predict Adverse Drug Reactions in Combination Drug Therapies for Gulf War Illness. <i>International Journal of Molecular Sciences</i> , 2018 , 19,	6.3	9
35	A Logic Model of Neuronal-Glial Interaction Suggests Altered Homeostatic Regulation in the Perpetuation of Neuroinflammation. <i>Frontiers in Cellular Neuroscience</i> , 2018 , 12, 336	6.1	7
34	Oleylethanolamide treatment reduces neurobehavioral deficits and brain pathology in a mouse model of Gulf War Illness. <i>Scientific Reports</i> , 2018 , 8, 12921	4.9	26
33	Insights into myalgic encephalomyelitis/chronic fatigue syndrome phenotypes through comprehensive metabolomics. <i>Scientific Reports</i> , 2018 , 8, 10056	4.9	48
32	Fecal metagenomic profiles in subgroups of patients with myalgic encephalomyelitis/chronic fatigue syndrome. <i>Microbiome</i> , 2017 , 5, 44	16.6	92

31	Myalgic encephalomyelitis/chronic fatigue syndrome and gulf war illness patients exhibit increased humoral responses to the herpesviruses-encoded dUTPase: Implications in disease pathophysiology. <i>Journal of Medical Virology</i> , 2017 , 89, 1636-1645	19.7	21
30	Telephone-administered versus live group cognitive behavioral stress management for adults with CFS. <i>Journal of Psychosomatic Research</i> , 2017 , 93, 41-47	4.1	8
29	Poor sleep quality is associated with greater circulating pro-inflammatory cytokines and severity and frequency of chronic fatigue syndrome/myalgic encephalomyelitis (CFS/ME) symptoms in women. <i>Journal of Neuroimmunology</i> , 2017 , 303, 43-50	3.5	40
28	Phospholipid profiling of plasma from GW veterans and rodent models to identify potential biomarkers of Gulf War Illness. <i>PLoS ONE</i> , 2017 , 12, e0176634	3.7	34
27	Recent research on Gulf War illness and other health problems in veterans of the 1991 Gulf War: Effects of toxicant exposures during deployment. <i>Cortex</i> , 2016 , 74, 449-75	3.8	238
26	Translational potential of long-term decreases in mitochondrial lipids in a mouse model of Gulf War Illness. <i>Toxicology</i> , 2016 , 372, 22-33	4.4	37
25	Tracking post-infectious fatigue in clinic using routine Lab tests. <i>BMC Pediatrics</i> , 2016 , 16, 54	2.6	7
24	Gastric Enterovirus Infection: A Possible Causative Etiology of Gastroparesis. <i>Digestive Diseases and Sciences</i> , 2016 , 61, 2344-2350	4	10
23	Perceived Fatigue Interference and Depressed Mood: Comparison of Chronic Fatigue Syndrome/Myalgic Encephalomyelitis Patients with Fatigued Breast Cancer Survivors. <i>Fatigue: Biomedicine, Health and Behavior</i> , 2015 , 3, 142-155	2.3	11
22	Using gene expression signatures to identify novel treatment strategies in gulf war illness. <i>BMC Medical Genomics</i> , 2015 , 8, 36	3.7	16
21	Chronic fatigue syndrome and co-morbid and consequent conditions: evidence from a multi-site clinical epidemiology study. <i>Fatigue: Biomedicine, Health and Behavior</i> , 2015 , 3, 1-15	2.3	5
20	Inferring Broad Regulatory Biology from Time Course Data: Have We Reached an Upper Bound under Constraints Typical of In Vivo Studies?. <i>PLoS ONE</i> , 2015 , 10, e0127364	3.7	3
19	Distinct plasma immune signatures in ME/CFS are present early in the course of illness. <i>Science Advances</i> , 2015 , 1,	14.3	136
18	Achieving Remission in Gulf War Illness: A Simulation-Based Approach to Treatment Design. <i>PLoS ONE</i> , 2015 , 10, e0132774	3.7	22
17	Stress management skills, cortisol awakening response, and post-exertional malaise in Chronic Fatigue Syndrome. <i>Psychoneuroendocrinology</i> , 2014 , 49, 26-31	5	23
16	Gulf War Illness: Is there lasting damage to the endocrine-immune circuitry?. <i>Systems Biomedicine (Austin, Tex)</i> , 2014 , 2, 80-89		4
15	A role for homeostatic drive in the perpetuation of complex chronic illness: Gulf War Illness and chronic fatigue syndrome. <i>PLoS ONE</i> , 2014 , 9, e84839	3.7	48
14	Beyond Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS) Symptom Severity: Stress Management Skills are Related to Lower Illness Burden. <i>Fatigue: Biomedicine, Health and Behavior</i> , 2013 , 1,	2.3	7

13	Altered immune pathway activity under exercise challenge in Gulf War Illness: an exploratory analysis. <i>Brain, Behavior, and Immunity</i> , 2013 , 28, 159-69	16.6	57
12	Succumbing to the laws of attraction. <i>Systems Biomedicine (Austin, Tex)</i> , 2013 , 1, 179-194		12
11	Stress management skills, neuroimmune processes and fatigue levels in persons with chronic fatigue syndrome. <i>Brain, Behavior, and Immunity</i> , 2012 , 26, 849-58	16.6	30
10	A pilot study of immune network remodeling under challenge in Gulf War Illness. <i>Brain, Behavior, and Immunity</i> , 2011 , 25, 302-13	16.6	54
9	Myalgic Encephalomyelitis/Chronic Fatigue Syndrome. <i>The Journal of Chronic Fatigue Syndrome: Multidisciplinary Innovations in Research and Clinical Practice</i> , 2003 , 11, 7-115		525
8	Identification of ambiguities in the 1994 chronic fatigue syndrome research case definition and recommendations for resolution. <i>BMC Health Services Research</i> , 2003 , 3, 25	2.9	328
7	Autonomic and cardiovascular function in HIV spectrum disease: early indications of cardiac pathophysiology. <i>Clinical Autonomic Research</i> , 2001 , 11, 319-26	4.3	24
6	Immunologic Status Correlates with Severity of Physical Symptoms and Perceived Illness Burden in Chronic Fatigue Syndrome Patients. <i>The Journal of Chronic Fatigue Syndrome: Multidisciplinary Innovations in Research and Clinical Practice</i> , 2000 , 7, 39-52		2
5	Patterns of immune, neuroendocrine, and cardiovascular stress responses in asymptomatic HIV seropositive and seronegative men. <i>International Journal of Behavioral Medicine</i> , 1996 , 3, 135-62	2.6	10
4	Relationships of Cognitive Difficulties to Immune Measures, Depression and Illness Burden in Chronic Fatigue Syndrome. <i>The Journal of Chronic Fatigue Syndrome: Multidisciplinary Innovations in Research and Clinical Practice</i> , 1995 , 1, 23-41		20
3	Distress, denial, and low adherence to behavioral interventions predict faster disease progression in gay men infected with human immunodeficiency virus. <i>International Journal of Behavioral Medicine</i> , 1994 , 1, 90-105	2.6	125
2	A psychological assessment of chronic fatigue syndrome/chronic epstein-barr virus patients. <i>Psychology and Health</i> , 1989 , 3, 131-141	2.9	50
1	Deficient butyrate-producing capacity in the gut microbiome of Myalgic Encephalomyelitis/Chronic Fatigue Syndrome patients is associated with fatigue symptoms		2
