#	ARTICLE	IF	CITATIONS
1	The Paradox of a Phagosomal Lifestyle: How Innate Host Cell-Leishmania amazonensis Interactions Lead to a Progressive Chronic Disease. <i>Frontiers in Immunology</i> , 2021, 12, 728848.	4.8	7
2	Protective CD4+ Th1 cell-mediated immunity is reliant upon execution of effector function prior to the establishment of the pathogen niche. <i>PLoS Pathogens</i> , 2021, 17, e1009944.	4.7	9
3	Resistance Against Leishmania major Infection Depends on Microbiota-Guided Macrophage Activation. <i>Frontiers in Immunology</i> , 2021, 12, 730437.	4.8	7
4	Obesity impairs resistance to Leishmania major infection in C57BL/6 mice. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0006596.	3.0	9
5	Th1-Th2 Cross-Regulation Controls Early Leishmania Infection in the Skin by Modulating the Size of the Permissive Monocytic Host Cell Reservoir. <i>Cell Host and Microbe</i> , 2020, 27, 752-768.e7.	11.0	45
6	ER-stress mobilization of death-associated protein kinase-1 α -dependent xenophagy counteracts mitochondria stress α -induced epithelial barrier dysfunction. <i>Journal of Biological Chemistry</i> , 2018, 293, 3073-3087.	3.4	35
7	NOX2-Derived Reactive Oxygen Species Control Inflammation during <i>Leishmania amazonensis</i> Infection by Mediating Infection-Induced Neutrophil Apoptosis. <i>Journal of Immunology</i> , 2018, 200, 196-208.	0.8	39
8	Use of two-photon microscopy to study Leishmania major infection of the skin. <i>Methods</i> , 2017, 127, 45-52.	3.8	16
9	Divergent roles for Ly6C+CCR2+CX3CR1+ inflammatory monocytes during primary or secondary infection of the skin with the intra-phagosomal pathogen Leishmania major. <i>PLoS Pathogens</i> , 2017, 13, e1006479.	4.7	77
10	Arginine Supplementation Induces Arginase Activity and Inhibits TNF- α Synthesis in Mice Spleen Macrophages After Intestinal Obstruction. <i>Journal of Parenteral and Enteral Nutrition</i> , 2016, 40, 417-422.	2.6	12
11	The Aryl Hydrocarbon Receptor Modulates Production of Cytokines and Reactive Oxygen Species and Development of Myocarditis during Trypanosoma cruzi Infection. <i>Infection and Immunity</i> , 2016, 84, 3071-3082.	2.2	33
12	The Multifaceted Role of Commensal Microbiota in Homeostasis and Gastrointestinal Diseases. <i>Journal of Immunology Research</i> , 2015, 2015, 1-14.	2.2	33
13	IL-18 contributes to susceptibility to Leishmania amazonensis infection by macrophage-independent mechanisms. <i>Cytokine</i> , 2015, 74, 327-330.	3.2	16
14	IFN- γ -Dependent Recruitment of CD4 ⁺ T Cells and Macrophages Contributes to Pathogenesis During <i>Leishmania amazonensis</i> Infection. <i>Journal of Interferon and Cytokine Research</i> , 2015, 35, 935-947.	1.2	34
15	Short-term protection conferred by Leishvacin α against experimental Leishmania amazonensis infection in C57BL/6 mice. <i>Parasitology International</i> , 2014, 63, 826-834.	1.3	12
16	Site-Dependent Recruitment of Inflammatory Cells Determines the Effective Dose of Leishmania major. <i>Infection and Immunity</i> , 2014, 82, 2713-2727.	2.2	63
17	A Defective TLR4 Signaling for IFN- γ Expression Is Responsible for the Innately Lower Ability of BALB/c Macrophages to Produce NO in Response to LPS as Compared to C57BL/6. <i>PLoS ONE</i> , 2014, 9, e98913.	2.5	12
18	Low and high-dose intradermal infection with Leishmania major and Leishmania amazonensis in C57BL/6 mice. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2010, 105, 736-745.	1.6	29
