1610  
citing authors

#	ARTICLE	IF	CITATIONS
1	Constraining organic matter composition and dynamics as a dominant driver of hypoxic blackwater risk during river Murray floodplain inundation. <i>Hydrological Processes</i> , 2022, 36, .	2.6	5
2	Environmental Flows to Estuaries and Coastal Lagoons Shape the Salinity Gradient and Generate Suitable Fish Habitat: Predictions From the Coorong, Australia. <i>Frontiers in Environmental Science</i> , 2022, 10, .	3.3	7
3	An integrated model to predict and prevent hypoxia in floodplain-river systems. <i>Journal of Environmental Management</i> , 2021, 286, 112213.	7.8	10
4	Ecological condition of the Lower Lakes and Coorong. , 2021, , 95-108.		2
5	Comparison of the alternative models SOURCE and SWAT for predicting catchment streamflow, sediment and nutrient loads under the effect of land use changes. <i>Science of the Total Environment</i> , 2019, 662, 254-265.	8.0	37
6	Framework for developing hybrid process-driven, artificial neural network and regression models for salinity prediction in river systems. <i>Hydrology and Earth System Sciences</i> , 2018, 22, 2987-3006.	4.9	33
7	State updating and calibration period selection to improve dynamic monthly streamflow forecasts for an environmental flow management application. <i>Hydrology and Earth System Sciences</i> , 2018, 22, 871-887.	4.9	30
8	A simplified approach to produce probabilistic hydrological model predictions. <i>Environmental Modelling and Software</i> , 2018, 109, 306-314.	4.5	25
9	Integrated science informs forest and water allocation policies in the South East of Australia. <i>Inland Waters</i> , 2017, 7, 358-371.	2.2	5
10	Putting the "river" back into the Lower River Murray: quantifying the hydraulic impact of river regulation to guide ecological restoration. <i>Transactions of the Royal Society of South Australia</i> , 2017, 141, 108-131.	0.4	14
11	A hybrid approach to monthly streamflow forecasting: Integrating hydrological model outputs into a Bayesian artificial neural network. <i>Journal of Hydrology</i> , 2016, 540, 623-640.	5.4	178
12	Linking spatial inundation indicators and hydrological modelling to improve assessment of inundation extent. <i>Ecological Indicators</i> , 2016, 60, 1298-1308.	6.3	9
13	Using characteristics of the optimisation problem to determine the Genetic Algorithm population size when the number of evaluations is limited. <i>Environmental Modelling and Software</i> , 2015, 69, 226-239.	4.5	30
14	Assessment of the ability to meet environmental water requirements in the Upper South East of South Australia. <i>Stochastic Environmental Research and Risk Assessment</i> , 2014, 28, 39-56.	4.0	5
15	An evaluation framework for input variable selection algorithms for environmental data-driven models. <i>Environmental Modelling and Software</i> , 2014, 62, 33-51.	4.5	163
16	Evolutionary algorithms and other metaheuristics in water resources: Current status, research challenges and future directions. <i>Environmental Modelling and Software</i> , 2014, 62, 271-299.	4.5	477
17	A generic framework for regression regionalization in ungauged catchments. <i>Environmental Modelling and Software</i> , 2012, 27-28, 1-14.	4.5	35
18	Relationship between problem characteristics and the optimal number of genetic algorithm generations. <i>Engineering Optimization</i> , 2011, 43, 349-376.	2.6	26

#	ARTICLE	IF	CITATIONS
19	Evaluation of parameter setting for two GIS based unit hydrograph models. Journal of Hydrology, 2010, 393, 197-205.	5.4	9
20	Comparison of Genetic Algorithm Parameter Setting Methods for Chlorine Injection Optimization. Journal of Water Resources Planning and Management - ASCE, 2010, 136, 288-291.	2.6	28
21	Calibration and Optimization of the Pumping and Disinfection of a Real Water Supply System. Journal of Water Resources Planning and Management - ASCE, 2010, 136, 493-501.	2.6	20
22	The response of freshwater plants to salinity pulses. Aquatic Botany, 2010, 93, 59-67.	1.6	27
23	A genetic algorithm calibration method based on convergence due to genetic drift. Information Sciences, 2008, 178, 2857-2869.	6.9	44
24	Calibration of Rainfall Runoff Models in Ungauged Catchments: Regionalization Relationships for a Rainfall Runoff Model. , 2008, , .		1
25	Investigation into the relationship between chlorine decay and water distribution parameters using data driven methods. Mathematical and Computer Modelling, 2006, 44, 485-498.	2.0	70
26	Selection of Genetic Algorithm Parameters for Water Distribution System Optimization. , 2005, , 1.		1
27	Optimizing System Operations and Water Quality. , 2003, , 1.		4
28	Minimum Number of Generations Required for Convergence of Genetic Algorithms. , 0, , .		9
