#	ARTICLE	IF	CITATIONS
1	Epidemiology of non-vaccine serotypes of <i>Streptococcus pneumoniae</i> before and after universal administration of pneumococcal conjugate vaccines. <i>Human Vaccines and Immunotherapeutics</i> , 2024, 17, 5628-5637.	1.4	16
2	Identification and molecular epidemiology of routinely determined <i>Streptococcus pneumoniae</i> with negative Quellung reaction results. <i>Journal of Clinical Laboratory Analysis</i> , 2022, 36, e24293.	0.9	5
3	Clinical characteristics, antimicrobial resistance, and risk factors for mortality in paediatric invasive pneumococcal disease in Beijing, 2012–2017. <i>BMC Infectious Diseases</i> , 2022, 22, 338.	1.3	3
4	Clinical characteristics of herpes zoster in a pediatric hospital in China from 2007 to 2020. <i>World Journal of Pediatrics</i> , 2022, , 1.	0.8	0
5	Case Report: Various Clinical Manifestations Caused by Varicella-Zoster Virus in a Family. <i>Frontiers in Pediatrics</i> , 2022, 10, .	0.9	1
6	One single-center cross-sectional investigation on varicella antibody level of all age groups in Chinese people. <i>Human Vaccines and Immunotherapeutics</i> , 2021, 17, 358-362.	1.4	2
7	Molecular characteristics of the new emerging global clone ST1193 among clinical isolates of <i>Escherichia coli</i> from neonatal invasive infections in China. <i>European Journal of Clinical Microbiology and Infectious Diseases</i> , 2021, 40, 833-840.	1.3	27
8	Decline of serologic immunity to diphtheria, tetanus and pertussis with age suggested a full life vaccination in mainland China. <i>Human Vaccines and Immunotherapeutics</i> , 2021, 17, 1757-1762.	1.4	4
9	Retrospective analysis of bacterial culture-confirmed pertussis cases in Beijing Children's hospital from 2014 to 2019 reveals prevention and control of the grim situation in mainland China. <i>Expert Review of Vaccines</i> , 2021, 20, 577-583.	2.0	0
10	Clinical characteristics and serotype distribution of invasive pneumococcal disease in pediatric patients from Beijing, China. <i>European Journal of Clinical Microbiology and Infectious Diseases</i> , 2021, 40, 1833-1842.	1.3	3
11	Clinical and molecular characteristics of <i>Staphylococcus aureus</i> isolated from Chinese children: association among the agr groups and genotypes, virulence genes and disease types. <i>World Journal of Pediatrics</i> , 2021, 17, 180-188.	0.8	4
12	One cross-sectional investigation revealed that non-vaccine serotypes of <i>Streptococcus pneumoniae</i> could be identified more frequently in elderly Chinese people. <i>Vaccine</i> , 2021, 39, 3304-3309.	1.7	4
13	One single-center serological survey on measles, rubella and mumps antibody levels of people in Youyang, China. <i>Human Vaccines and Immunotherapeutics</i> , 2021, 17, 4203-4209.	1.4	5
14	Properties of Mucoïd Serotype 3 From Children in China. <i>Frontiers in Cellular and Infection Microbiology</i> , 2021, 11, 648040.	1.8	0
15	Antibiotic Resistance and Molecular Biological Characteristics of Non-13-Valent-Pneumococcal Conjugate Vaccine Serogroup 15 <i>Streptococcus pneumoniae</i> Isolated From Children in China. <i>Frontiers in Microbiology</i> , 2021, 12, 778985.	1.5	3
16	Molecular characteristics and antimicrobial susceptibility of <i>Staphylococcus aureus</i> among children with respiratory tract infections in southwest China. <i>World Journal of Pediatrics</i> , 2020, 16, 284-292.	0.8	4
17	Identification of hemolytic activity and hemolytic genes of Methicillin-resistant <i>Staphylococcus aureus</i> isolated from Chinese children. <i>Chinese Medical Journal</i> , 2020, 133, 88-90.	0.9	3
18	Abundance of the nasopharyngeal microbiome effects pertussis diagnosis and explains the sensitivity difference between bacterial culture and real-time PCR. <i>European Journal of Clinical Microbiology and Infectious Diseases</i> , 2020, 39, 501-507.	1.3	6

#	ARTICLE	IF	CITATIONS
19	Widespread of non-typeable <i>Haemophilus influenzae</i> with high genetic diversity after two decades use of Hib vaccine in China. <i>Journal of Clinical Laboratory Analysis</i> , 2020, 34, e23145.	0.9	11
20	Serotype distribution and antimicrobial resistance patterns of invasive pneumococcal disease isolates from children in mainland China—a systematic review. <i>Brazilian Journal of Microbiology</i> , 2020, 51, 665-672.	0.8	9
21	Serotype distribution of <i>Streptococcus pneumoniae</i> isolated from children hospitalized in Beijing children's hospital (2013–2019). <i>Vaccine</i> , 2020, 38, 7858-7864.	1.7	13
22	Clonal and drug resistance dynamics of methicillin-resistant <i>Staphylococcus aureus</i> in pediatric populations in China. <i>Pediatric Investigation</i> , 2019, 3, 72-80.	0.6	6
23	The changing phenotypes and genotypes of invasive pneumococcal isolates from children in Shenzhen during 2013–2017. <i>Vaccine</i> , 2019, 37, 7248-7255.	1.7	8
24	High Prevalence of Macrolide-Resistant <i>Bordetella pertussis</i> and <i>ptxP1</i> Genotype, Mainland China, 2014–2016. <i>Emerging Infectious Diseases</i> , 2019, 25, 2205-2214.	2.0	33
25	The maternal antibody against diphtheria, tetanus and pertussis showed distinct regional difference in China. <i>BMC Pediatrics</i> , 2019, 19, 480.	0.7	8
26	Serotype distribution, antibiotic resistance pattern, and multilocus sequence types of invasive <i>Streptococcus pneumoniae</i> isolates in two tertiary pediatric hospitals in Beijing prior to PCV13 availability. <i>Expert Review of Vaccines</i> , 2019, 18, 89-94.	2.0	16
27	A General Lack of IgG Against Pertussis Toxin in Chinese Pregnant Women and Newborns. <i>Pediatric Infectious Disease Journal</i> , 2018, 37, 934-938.	1.1	8
28	Antimicrobial susceptibility and fluctuations in clonal complexes of serogroup 6 <i>Streptococcus pneumoniae</i> isolates collected from children in Beijing, China, between 1997 and 2016. <i>Brazilian Journal of Microbiology</i> , 2018, 49, 891-899.	0.8	2
29	Serotype distribution, antibiotic resistance patterns and molecular characteristics of serogroup 6 <i>Streptococcus pneumoniae</i> isolates collected from Chinese children before the introduction of PCV13. <i>Journal of Global Antimicrobial Resistance</i> , 2018, 14, 23-28.	0.9	2
30	Rubella seroprevalence among pregnant women in Beijing, China. <i>BMC Infectious Diseases</i> , 2018, 18, 130.	1.3	15
31	“Cleaved Lymphocytes” Could Be Induced by Pertussis Toxin Injection in Mice, and Are Actually Not Lymphocytes. <i>Clinical Infectious Diseases</i> , 2018, 66, 639-640.	2.9	4
32	Seroprevalence of diphtheria and pertussis immunoglobulin G among children with pneumonia in Jiannan, China. <i>BMC Pediatrics</i> , 2018, 18, 383.	0.7	8
33	Seroprevalence of Maternal and Cord Antibodies Specific for Diphtheria, Tetanus, Pertussis, Measles, Mumps and Rubella in Shunyi, Beijing. <i>Scientific Reports</i> , 2018, 8, 13021.	1.6	24
34	β -Lactamase production and antibiotic susceptibility pattern of <i>Moraxella catarrhalis</i> isolates collected from two county hospitals in China. <i>BMC Microbiology</i> , 2018, 18, 77.	1.3	14
35	A systematic review about <i>Streptococcus Pneumoniae</i> serotype distribution in children in mainland of China before the PCV13 was licensed. <i>Expert Review of Vaccines</i> , 2017, 16, 997-1006.	2.0	21
36	Clinical and Molecular Epidemiology of Invasive <i>Staphylococcus aureus</i> Infections in Chinese Children. <i>Chinese Medical Journal</i> , 2017, 130, 2889-2890.	0.9	2

#	ARTICLE	IF	CITATIONS
37	Clinical and pathogenic analysis of 507 children with bacterial meningitis in Beijing, 2010–2014. <i>International Journal of Infectious Diseases</i> , 2016, 50, 38-43.	1.5	20
38	Vaccine Serotypes of <i>Streptococcus pneumoniae</i> with High-level Antibiotic Resistance Isolated More Frequently Seven Years After the Licensure of PCV7 in Beijing. <i>Pediatric Infectious Disease Journal</i> , 2016, 35, 316-321.	1.1	24
39	Epidemiological study on the penicillin resistance of clinical <i>Streptococcus pneumoniae</i> isolates identified as the common sequence types. <i>Yi Chuan = Hereditas / Zhongguo Yi Chuan Xue Hui Bian Ji</i> , 2016, 38, 940-947.	0.1	0
40	Variation in <i>Bordetella pertussis</i> Susceptibility to Erythromycin and Virulence-Related Genotype Changes in China (1970-2014). <i>PLoS ONE</i> , 2015, 10, e0138941.	1.1	44
41	Nasopharyngeal carriage and antimicrobial susceptibility of <i>Haemophilus influenzae</i> among children younger than 5 years of age in Beijing, China. <i>BMC Microbiology</i> , 2015, 15, 6.	1.3	19
42	Dynamics of serotype 14 <i>Streptococcus pneumoniae</i> population causing acute respiratory infections among children in China (1997–2012). <i>BMC Infectious Diseases</i> , 2015, 15, 266.	1.3	17
43	Serotypes, Antibiotic Susceptibilities, and Multi-Locus Sequence Type Profiles of <i>Streptococcus agalactiae</i> Isolates Circulating in Beijing, China. <i>PLoS ONE</i> , 2015, 10, e0120035.	1.1	58
44	Comparative analysis of the virulence characteristics of epidemic methicillin-resistant <i>Staphylococcus aureus</i> (MRSA) strains isolated from Chinese children: ST59 MRSA highly expresses core gene-encoded toxin. <i>Apmis</i> , 2014, 122, 101-114.	0.9	31
45	Population biology of 225 serogroup 6 <i>Streptococcus pneumoniae</i> isolates collected in China. <i>BMC Infectious Diseases</i> , 2014, 14, 467.	1.3	7
46	Serotype Distribution and Antimicrobial Resistance of <i>Streptococcus pneumoniae</i> Isolates Causing Invasive Diseases from Shenzhen Children's Hospital. <i>PLoS ONE</i> , 2013, 8, e67507.	1.1	37
47	Pneumococcal serotype distribution and antimicrobial resistance in Chinese children hospitalized for pneumonia. <i>Vaccine</i> , 2011, 29, 2296-2301.	1.7	53
48	Serotype distribution and antibiotic resistance of 140 pneumococcal isolates from pediatric patients with upper respiratory infections in Beijing, 2010. <i>Vaccine</i> , 2011, 29, 7704-7710.	1.7	37
49	Molecular epidemiology of serotype 19A <i>Streptococcus pneumoniae</i> isolated from children in Beijing, 1997-2006. <i>Chinese Medical Journal</i> , 2011, 124, 1769-74.	0.9	6
50	Serotype Distribution and Antimicrobial Resistance of <i>Streptococcus pneumoniae</i> Isolates That Cause Invasive Disease among Chinese Children. <i>Clinical Infectious Diseases</i> , 2010, 50, 741-744.	2.9	67
51	Antimicrobial susceptibility of <i>Haemophilus influenzae</i> strains and antibiotics usage patterns in pediatric outpatients: Results from a children's hospital in China (2000–2004). <i>Pediatric Pulmonology</i> , 2008, 43, 457-462.	1.0	14
52	Antibiotic use in five children's hospitals during 2002–2006: the impact of antibiotic guidelines issued by the Chinese Ministry of Health. <i>Pharmacoepidemiology and Drug Safety</i> , 2008, 17, 306-311.	0.9	38
53	<i>Streptococcus pneumoniae</i> diseases in Chinese children: Past, present and future. <i>Vaccine</i> , 2008, 26, 4425-4433.	1.7	57
