#	ARTICLE	IF	CITATIONS
1	A 3-D conjugated bond-pair-based peridynamic formulation for initiation and propagation of cracks in brittle solids. <i>International Journal of Solids and Structures</i> , 2018, 134, 89-115.	1.3	250
2	Numerical simulation of propagation and coalescence of flaws in rock materials under compressive loads using the extended non-ordinary state-based peridynamics. <i>Engineering Fracture Mechanics</i> , 2016, 163, 248-273.	2.0	234
3	The modeling of crack propagation and coalescence in rocks under uniaxial compression using the novel conjugated bond-based peridynamics. <i>International Journal of Mechanical Sciences</i> , 2017, 128-129, 614-643.	3.6	181
4	Experimental investigation of progressive cracking processes in granite under uniaxial loading using digital imaging and AE techniques. <i>Journal of Structural Geology</i> , 2019, 126, 129-145.	1.0	170
5	Experimental Study on the Growth, Coalescence and Wrapping Behaviors of 3D Cross-Embedded Flaws Under Uniaxial Compression. <i>Rock Mechanics and Rock Engineering</i> , 2018, 51, 1379-1400.	2.6	167
6	Numerical simulation of crack propagation and coalescence in pre-cracked rock-like Brazilian disks using the non-ordinary state-based peridynamics. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2016, 89, 235-249.	2.6	141
7	Failure behavior and crack evolution mechanism of a non-persistent jointed rock mass containing a circular hole. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2019, 114, 101-121.	2.6	137
8	The Effects of Crack Openings on Crack Initiation, Propagation and Coalescence Behavior in Rock-Like Materials Under Uniaxial Compression. <i>Rock Mechanics and Rock Engineering</i> , 2016, 49, 3481-3494.	2.6	128
9	Three-dimensional numerical study on the failure characteristics of intermittent fissures under compressive-shear loads. <i>Acta Geotechnica</i> , 2019, 14, 1161-1193.	2.9	127
10	AE event rate characteristics of flawed granite: from damage stress to ultimate failure. <i>Geophysical Journal International</i> , 2020, 222, 795-814.	1.0	116
11	Fracturing Behavior Study of Three-Flawed Specimens by Uniaxial Compression and 3D Digital Image Correlation: Sensitivity to Brittleness. <i>Rock Mechanics and Rock Engineering</i> , 2019, 52, 691-718.	2.6	103
12	Progressive failure of brittle rocks with non-axi-symmetric flaws: Insights from acousto-optic mechanical (AOM) data. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2019, 42, 1787-1802.	1.7	102
13	An improved coupled thermo-mechanic bond-based peridynamic model for cracking behaviors in brittle solids subjected to thermal shocks. <i>European Journal of Mechanics, A/Solids</i> , 2019, 73, 282-305.	2.1	102
14	Numerical simulation of crack curving and branching in brittle materials under dynamic loads using the extended non-ordinary state-based peridynamics. <i>European Journal of Mechanics, A/Solids</i> , 2016, 60, 277-299.	2.1	96
15	A coupled thermo-mechanical bond-based peridynamics for simulating thermal cracking in rocks. <i>International Journal of Fracture</i> , 2018, 211, 13-42.	1.1	84
16	A novel conjugated bond linear elastic model in bond-based peridynamics for fracture problems under dynamic loads. <i>Engineering Fracture Mechanics</i> , 2018, 188, 151-183.	2.0	78
17	Damage progression and acoustic emission in brittle failure of granite and sandstone. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2021, 143, 104789.	2.6	70
18	Numerical simulations of propagation, bifurcation and coalescence of cracks in rocks. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2015, 80, 241-254.	2.6	66

#	ARTICLE	IF	CITATIONS
19	Numerical simulation of initiation, propagation and coalescence of cracks using the non-ordinary state-based peridynamics. <i>International Journal of Fracture</i> , 2016, 201, 213-234.	1.1	65
20	Peridynamic investigation on thermal fracturing behavior of ceramic nuclear fuel pellets under power cycles. <i>Ceramics International</i> , 2018, 44, 11512-11542.	2.3	65
21	Peridynamic simulation of thermal failure behaviors in rocks subjected to heating from boreholes. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2019, 117, 31-48.	2.6	64
22	Visco-plastic deformation analysis of rock tunnels based on fractional derivatives. <i>Tunnelling and Underground Space Technology</i> , 2019, 85, 209-219.	3.0	62
23	Fracture damage prediction in fissured red sandstone under uniaxial compression: acoustic emission value analysis. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2020, 43, 175-190.	1.7	62
24	Forecasting Catastrophic Rupture in Brittle Rocks Using Precursory AE Time Series. <i>Journal of Geophysical Research: Solid Earth</i> , 2020, 125, e2019JB019276.	1.4	61
25	Extended finite element simulation of step-path brittle failure in rock slopes with non-persistent en-echelon joints. <i>Engineering Geology</i> , 2019, 250, 65-88.	2.9	60
26	Evaluation of fracture mode classification in flawed red sandstone under uniaxial compression. <i>Theoretical and Applied Fracture Mechanics</i> , 2020, 107, 102528.	2.1	60
27	Analysis of the localization of deformation and the complete stress-strain relation for mesoscopic heterogeneous brittle rock under dynamic uniaxial tensile loading. <i>International Journal of Solids and Structures</i> , 2004, 41, 1725-1738.	1.3	56
28	Compression-induced crack initiation and growth in flawed rocks: A review. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2021, 44, 1681-1707.	1.7	54
29	Analysis of deformation localization and the complete stress-strain relation for brittle rock subjected to dynamic compressive loads. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2004, 41, 311-319.	2.6	53
30	Experimental study on effects of freeze-thaw fatigue damage on the cracking behaviors of sandstone containing two unparallel fissures. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2019, 42, 1322-1340.	1.7	52
31	Real-time experiment investigations on the coupled thermomechanical and cracking behaviors in granite containing three pre-existing fissures. <i>Engineering Fracture Mechanics</i> , 2020, 224, 106797.	2.0	50
32	State-of-the-Art Review on the Progressive Failure Characteristics of Geomaterials in Peridynamic Theory. <i>Journal of Engineering Mechanics - ASCE</i> , 2021, 147, .	1.6	46
33	Quasi-static fracturing in double-flawed specimens under uniaxial loading: the role of strain rate. <i>International Journal of Fracture</i> , 2018, 211, 75-102.	1.1	44
34	Time-dependent jamming mechanism for Single-Shield TBM tunneling in squeezing rock. <i>Tunnelling and Underground Space Technology</i> , 2017, 69, 209-222.	3.0	42
35	The enhanced extended finite element method for the propagation of complex branched cracks. <i>Engineering Analysis With Boundary Elements</i> , 2019, 104, 46-62.	2.0	42
36	3D Numerical Study on the Growth and Coalescence of Pre-existing Flaws in Rocklike Materials Subjected to Uniaxial Compression. <i>International Journal of Geomechanics</i> , 2016, 16, .	1.3	41

#	ARTICLE	IF	CITATIONS
37	3D numerical simulation of initiation, propagation and coalescence of cracks using the extended non-ordinary state-based peridynamics. <i>Theoretical and Applied Fracture Mechanics</i> , 2019, 101, 254-268.	2.1	39
38	Numerical Simulation of Failure Process of Rock-Like Materials Subjected to Impact Loads. <i>International Journal of Geomechanics</i> , 2017, 17, .	1.3	38
39	Fracture Analysis in Brittle Sandstone by Digital Imaging and AE Techniques: Role of Flaw Length Ratio. <i>Journal of Materials in Civil Engineering</i> , 2020, 32, .	1.3	38
40	An integrated method for 3D reconstruction model of porous geomaterials through 2D CT images. <i>Computers and Geosciences</i> , 2019, 123, 83-94.	2.0	37
41	Numerical studies on thermal shock crack branching instability in brittle solids. <i>Engineering Fracture Mechanics</i> , 2018, 204, 157-184.	2.0	35
42	Size effect of thermal shock crack patterns in ceramics: Insights from a nonlocal numerical approach. <i>Mechanics of Materials</i> , 2019, 137, 103-133.	1.7	35
43	An experimental study of the mechanical and fracturing behavior in PMMA specimen containing multiple 3D embedded flaws under uniaxial compression. <i>Theoretical and Applied Fracture Mechanics</i> , 2019, 101, 207-216.	2.1	35
44	Phase field model for simulating the fracture behaviors of some disc-type specimens. <i>Engineering Fracture Mechanics</i> , 2020, 226, 106870.	2.0	34
45	Damage analysis of sandstone during the creep stage under the different levels of uniaxial stress using NMR measurements. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2021, 44, 719-732.	1.7	34
46	Effect of loading rate on fracture characteristics of rock. <i>Central South University</i> , 2010, 17, 150-155.	0.5	33
47	Non-euclidean continuum model of the zonal disintegration of surrounding rocks around a deep circular tunnel in a non-hydrostatic pressure state. <i>Journal of Mining Science</i> , 2011, 47, 37-46.	0.1	32
48	Excavation-induced zonal disintegration of the surrounding rock around a deep circular tunnel considering unloading effect. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2013, 64, 246-257.	2.6	31
49	Understanding the fracture mechanism of ring Brazilian disc specimens by the phase field method. <i>International Journal of Fracture</i> , 2020, 226, 17-43.	1.1	31
50	An experimental study of the mechanism of coal and gas outbursts in the tectonic regions. <i>Engineering Geology</i> , 2020, 279, 105883.	2.9	30
51	Pore-scale effect on the hydrate variation and flow behaviors in microstructures using X-ray CT imaging. <i>Journal of Hydrology</i> , 2020, 584, 124678.	2.3	30
52	Cracking behaviors and chaotic characteristics of sandstone with unfilled and filled dentate flaw. <i>Theoretical and Applied Fracture Mechanics</i> , 2021, 112, 102876.	2.1	30
53	A field-enriched finite element method for brittle fracture in rocks subjected to mixed mode loading. <i>Engineering Analysis With Boundary Elements</i> , 2021, 129, 105-124.	2.0	30
54	Rock burst of deep circular tunnels surrounded by weakened rock mass with cracks. <i>Theoretical and Applied Fracture Mechanics</i> , 2011, 56, 79-88.	2.1	29

#	ARTICLE	IF	CITATIONS
55	Seismic bearing capacity of shallow foundations resting on rock masses subjected to seismic loads. <i>KSCSE Journal of Civil Engineering</i> , 2016, 20, 216-228.	0.9	29
56	A continuum-kinematics-inspired peridynamic model of anisotropic continua: Elasticity, damage, and fracture. <i>International Journal of Mechanical Sciences</i> , 2021, 199, 106413.	3.6	29
57	Zonal disintegration mechanism of deep crack-weakened rock masses under dynamic unloading. <i>Acta Mechanica Solida Sinica</i> , 2009, 22, 240-250.	1.0	27
58	Dynamic splitting tensile properties of concrete and cement mortar. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2020, 43, 757-770.	1.7	27
59	Different crack sizes analyzed for surrounding rock mass around underground caverns in Jinping I hydropower station. <i>Theoretical and Applied Fracture Mechanics</i> , 2012, 57, 19-30.	2.1	26
60	A multi-dimensional space method for dynamic cracks problems using implicit time scheme in the framework of the extended finite element method. <i>International Journal of Damage Mechanics</i> , 2015, 24, 859-890.	2.4	26
61	Simple and effective approach to modeling crack propagation in the framework of extended finite element method. <i>Theoretical and Applied Fracture Mechanics</i> , 2020, 106, 102452.	2.1	26
62	Internal Morphology of Cracking of Two 3-D Pre-Existing Cross-Embedded Flaws under Uniaxial Compression. <i>Geotechnical Testing Journal</i> , 2018, 41, 329-339.	0.5	26
63	Establishment of numerical cracking constitutive models using 3D reconstruction and X-ray CT images of geomaterials. <i>International Journal of Mechanical Sciences</i> , 2020, 183, 105814.	3.6	25
64	A state-of-the-art review on creep damage mechanics of rocks. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2022, 45, 627-652.	1.7	25
65	Digital measurement of 2D and 3D cracks in sandstones through improved pseudo color image enhancement and 3D reconstruction method. <i>International Journal for Numerical and Analytical Methods in Geomechanics</i> , 2019, 43, 2565-2584.	1.7	23
66	XFEM based node scheme for the frictional contact crack problem. <i>Computers and Structures</i> , 2020, 231, 106221.	2.4	23
67	Nonlinear Creep Model for Rocks Considering Damage Evolution Based on the Modified Nishihara Model. <i>International Journal of Geomechanics</i> , 2021, 21, .	1.3	23
68	A field-enriched finite element method for crack propagation in fiber-reinforced composite lamina without remeshing. <i>Composite Structures</i> , 2021, 270, 114074.	3.1	23
69	Study on the coalescence mechanism of splitting failure of crack-weakened rock subjected to compressive loads. <i>Mechanics Research Communications</i> , 2005, 32, 161-171.	1.0	22
70	Reliability Assessment of Tunnel Based on P -Wave Seismic Velocity. <i>International Journal of Geomechanics</i> , 2018, 18, .	1.3	22
71	A modified axisymmetric ordinary state-based peridynamics with shear deformation for elastic and fracture problems in brittle solids. <i>European Journal of Mechanics, A/Solids</i> , 2019, 77, 103810.	2.1	22
72	Fracture characterization and permeability prediction by pore scale variables extracted from X-ray CT images of porous geomaterials. <i>Science China Technological Sciences</i> , 2020, 63, 755-767.	2.0	22

#	ARTICLE	IF	CITATIONS
73	The Nonlinear Creep Behaviors of Sandstone Under the Different Confining Pressures Based on NMR Technology. <i>Rock Mechanics and Rock Engineering</i> , 2021, 54, 4889-4904.	2.6	22
74	Temporal dominant frequency evolution characteristics during the fracture process of flawed red sandstone. <i>Theoretical and Applied Fracture Mechanics</i> , 2020, 110, 102838.	2.1	22
75	3D Numerical Reconstruction of Porous Sandstone Using Improved Simulated Annealing Algorithms. <i>Rock Mechanics and Rock Engineering</i> , 2018, 51, 2135-2151.	2.6	21
76	Two-Dimensional Numerical Simulation of Rock Fragmentation by TBM Cutting Tools in Mixed-Face Ground. <i>International Journal of Geomechanics</i> , 2018, 18, .	1.3	21
77	Comprehensive study on the crack tip parameters of two types of disc specimens under combined confining pressure and diametric concentrated forces. <i>Theoretical and Applied Fracture Mechanics</i> , 2019, 103, 102317.	2.1	21
78	Smoothed peridynamics for the extremely large deformation and cracking problems: Unification of peridynamics and smoothed particle hydrodynamics. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2021, 44, 2444-2461.	1.7	21
79	Near crack line elastic-plastic analysis for a infinite plate loaded by two pairs of point tensile forces. <i>Mechanics Research Communications</i> , 2004, 31, 415-420.	1.0	20
80	A hierarchical-fractal approach for the rock reconstruction and numerical analysis. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2018, 109, 68-83.	2.6	20
81	A coupled hydro-mechanical non-ordinary state-based peridynamics for the fissured porous rocks. <i>Engineering Analysis With Boundary Elements</i> , 2021, 123, 133-146.	2.0	19
82	Dynamic mechanical properties and cracking behaviours of persistent fractured granite under impact loading with various loading rates. <i>Theoretical and Applied Fracture Mechanics</i> , 2022, 118, 103281.	2.1	19
83	The effect of the intermediate principal stress on the ultimate bearing capacity of a foundation on rock masses. <i>Computers and Geotechnics</i> , 2009, 36, 861-870.	2.3	17
84	Progressive failure processes of reinforced slopes based on general particle dynamic method. <i>Journal of Central South University</i> , 2015, 22, 4049-4055.	1.2	17
85	Analysis of fracture properties of three-dimensional reconstructed rock model using hierarchical-fractal annealing algorithm. <i>Engineering Geology</i> , 2019, 256, 39-56.	2.9	17
86	Experimental investigation of rigid confinement effects of radial strain on dynamic mechanical properties and failure modes of concrete. <i>International Journal of Mining Science and Technology</i> , 2021, 31, 939-951.	4.6	17
87	Digital evaluation of nanoscale-pore shale fractal dimension with microstructural insights into shale permeability. <i>Journal of Natural Gas Science and Engineering</i> , 2020, 75, 103137.	2.1	16
88	Cracking behaviors and hydraulic properties evaluation based on fractural microstructure models in geomaterials. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2020, 130, 104304.	2.6	16
89	Cracking behaviours of rock-like materials containing three preexisting flaws after high-temperature treatments. <i>Fatigue and Fracture of Engineering Materials and Structures</i> , 2021, 44, 622-635.	1.7	16
90	Failure characteristics of coarse and fine sandstone containing two parallel fissures subjected to true triaxial stresses. <i>Theoretical and Applied Fracture Mechanics</i> , 2021, 112, 102932.	2.1	16

#	ARTICLE	IF	CITATIONS
91	Forecast of time-of-instability in rocks under complex stress conditions using spatial precursory AE response rate. International Journal of Rock Mechanics and Minings Sciences, 2021, 147, 104908.	2.6	16
92	Digital Evaluation of Micro-Pore Water Effects on Mechanical and Damage Characteristics of Sandstone Subjected to Uniaxial, Cyclic Loadingâ€“Unloading Compression by 3D Reconstruction Technique. Rock Mechanics and Rock Engineering, 2022, 55, 147-167.	2.6	16
93	Drucker-Prager plasticity model in the framework of OSB-PD theory with shear deformation. Engineering With Computers, 2023, 39, 1395-1414.	3.5	16
94	Simulation of cracking behaviours in interlayered rocks with flaws subjected to tension using a phaseâ€“field method. Fatigue and Fracture of Engineering Materials and Structures, 2019, 42, 1679-1698.	1.7	15
95	The improvement of crack propagation modelling in triangular 2D structures using the extended finite element method. Fatigue and Fracture of Engineering Materials and Structures, 2019, 42, 397-414.	1.7	15
96	A coupled thermomechanical nonordinary stateâ€“based peridynamics for thermally induced cracking of rocks. Fatigue and Fracture of Engineering Materials and Structures, 2020, 43, 371-386.	1.7	15
97	Creep damage behaviors of red sandstone subjected to uniaxial compression after highâ€“temperature heat treatment using acoustic emission technology. Fatigue and Fracture of Engineering Materials and Structures, 2022, 45, 302-322.	1.7	15
98	Bounds on the complete stressâ€“strain relation for a crack-weakened rock mass under compressive loads. International Journal of Solids and Structures, 2004, 41, 6173-6196.	1.3	14
99	A stability analysis of a layered-soil slope based on random field. Bulletin of Engineering Geology and the Environment, 2019, 78, 2611-2625.	1.6	14
100	Investigation of creep damage mechanical behaviors of red sandstone considering temperature effect. Fatigue and Fracture of Engineering Materials and Structures, 2022, 45, 411-424.	1.7	14
101	Liquid metal antenna-based pressure sensor. Smart Materials and Structures, 2019, 28, 025019.	1.8	13
102	An energy-based criterion of crack branching and its application on the multidimensional space method. International Journal of Solids and Structures, 2020, 182-183, 179-192.	1.3	13
103	Three-Dimensional Stability Analysis of Bank Slopes with Reservoir Drawdown Based on Rigorous Limit Equilibrium Method. International Journal of Geomechanics, 2020, 20, .	1.3	13
104	3D Digital Analysis of Cracking Behaviors of Rocks through 3D Reconstruction Model under Triaxial Compression. Journal of Engineering Mechanics - ASCE, 2020, 146, 04020084.	1.6	13
105	Digital spatial cracking behaviors of fineâ€“grained sandstone with precracks under uniaxial compression. International Journal for Numerical and Analytical Methods in Geomechanics, 2020, 44, 1770-1787.	1.7	13
106	Continuous smoothed particle hydrodynamics for cracked nonconvex bodies by diffraction criterion. Theoretical and Applied Fracture Mechanics, 2020, 108, 102584.	2.1	13
107	A two-dimensional ordinary state-based peridynamic model for plastic deformation based on Drucker-Prager criteria with non-associated flow rule. International Journal of Rock Mechanics and Minings Sciences, 2021, 146, 104857.	2.6	13
108	Experimental study on the fracture and fatigue behaviors of flawed sandstone under coupled freezeâ€“thaw and cyclic loads. Theoretical and Applied Fracture Mechanics, 2022, 119, 103299.	2.1	13
