#	Article	IF	CITATIONS
1	Vitamin A and retinol intakes and the risk of fractures among participants of the Women's Health Initiative Observational Study. American Journal of Clinical Nutrition, 2009, 89, 323-330.	4.7	94
2	Depression and quality of life before and after breast cancer diagnosis in older women from the Women's Health Initiative. Journal of Cancer Survivorship, 2015, 9, 620-629.	2.9	79
3	Decreased interferon- \hat{l} + and interferon- \hat{l}^2 production in obesity and expression of suppressor of cytokine signaling. Nutrition, 2013, 29, 207-212.	2.4	58
4	Body shape, adiposity index, and mortality in postmenopausal women: Findings from the Women's Health Initiative. Obesity, 2016, 24, 1061-1069.	3.0	31
5	Production of interferon α and β, pro-inflammatory cytokines and the expression of suppressor of cytokine signaling (SOCS) in obese subjects infected with influenza A/H1N1. Clinical Nutrition, 2014, 33, 922-926.	5.0	25
6	Amino acid composition, score and in vitro protein digestibility of foods commonly consumed in northwest Mexico. Nutricion Hospitalaria, 2013, 28, 365-71.	0.3	25
7	Associations between mammographic density and body composition in Hispanic and non-Hispanic white women by menopause status. Menopause, 2008, 15, 319-325.	2.0	21
8	Comparative study of breast cancer in Mexican and Mexican-American women. Health, 2010, 02, 1040-1048.	0.3	20
9	Food Components and Dietary Patterns of Two Different Groups of Mexican Lactating Women. Journal of the American College of Nutrition, 2007, 26, 156-162.	1.8	18
10	Phytoestrogen Concentrations in Human Urine as Biomarkers for Dietary Phytoestrogen Intake in Mexican Women. Nutrients, 2017, 9, 1078.	4.1	18
11	Diet, physical activity and telomere length in adults. Nutricion Hospitalaria, 2019, 36, 1403-1417.	0.3	18
12	Serum levels of phytoestrogens as biomarkers of intake in Mexican women. International Journal of Food Sciences and Nutrition, 2015, 66, 819-825.	2.8	14
13	Food Security and Obesity among Mexican Agricultural Migrant Workers. International Journal of Environmental Research and Public Health, 2019, 16, 4171.	2.6	14
14	Dietary Changes and Gut Dysbiosis in Children With Type 1 Diabetes. Journal of the American College of Nutrition, 2018, 37, 501-507.	1.8	9
15	Central obesity and body fat, but not body mass index, are associated with the Pro12Ala polymorphism in the peroxisome proliferator–activated receptor γ gene in a population with a high consumption of saturated and trans-fatty acids. Nutrition Research, 2018, 57, 28-35.	2.9	8
16	No changes in weight and body fat in lactating adolescent and adult women from Mexico. American Journal of Human Biology, 2012, 24, 425-431.	1.6	7
17	A Comprehensive HPLC-DAD-ESI-MS Validated Method for the Quantification of 16 Phytoestrogens in Food, Serum and Urine. Applied Sciences (Switzerland), 2020, 10, 8147.	2.5	6
18	Comparison of Measurements of Bone Mineral Density in Young and Middle-Aged Adult Women in Relation to Dietary, Anthropometric and Reproductive Variables, Nutrients, 2018, 10, 1669.	4.1	2

#	Article	IF	CITATIONS
19	Interventions to Improve Bone Mineral Density, Muscle Mass and Fat Mass among Breast Cancer Survivors. Journal of the American College of Nutrition, 2022, 41, 94-106.	1.8	0
20	The Role of the Representativeness Heuristic in Probability Judgments of Heart Attack and Coronary Heart Disease. European Journal of Health Psychology, 0, , .	0.6	0
