MADIE COUA

#	Article	IF	CITATIONS
1	Age- and dose-dependent effects of an eicosapentaenoic acid-rich oil on cardiovascular risk factors in healthy male subjects. Atherosclerosis, 2007, 193, 159-167.	0.8	61
2	Regulation of adhesion molecule expression in human endothelial and smooth muscle cells by omega-3 fatty acids and conjugated linoleic acids: Involvement of the transcription factor NF-I®B?. Prostaglandins Leukotrienes and Essential Fatty Acids, 2008, 78, 33-43.	2.2	50
3	GST-4-Dependent Suppression of Neurodegeneration in C. elegans Models of Parkinson's and Machado-Joseph Disease by Rapeseed Pomace Extract Supplementation. Frontiers in Neuroscience, 2019, 13, 1091.	2.8	36
4	Potentiation of the anti-tumour effect of docetaxel by conjugated linoleic acids (CLAs) in breast cancer cells in vitro. Prostaglandins Leukotrienes and Essential Fatty Acids, 2007, 77, 87-96.	2.2	29
5	Aerobic interval exercise improves parameters of nonalcoholic fatty liver disease (NAFLD) and other alterations of metabolic syndrome in obese Zucker rats. Applied Physiology, Nutrition and Metabolism, 2015, 40, 1242-1252.	1.9	28
6	Cyanopeptolins with Trypsin and Chymotrypsin Inhibitory Activity from the Cyanobacterium Nostoc edaphicum CCNP1411. Marine Drugs, 2018, 16, 220.	4.6	28
7	Revalorisation of rapeseed pomace extracts: An in vitro study into its anti-oxidant and DNA protective properties. Food Chemistry, 2018, 239, 323-332.	8.2	25
8	Circulating levels of angiogenesis-related growth factors in breast cancer: A study to profile proteins responsible for tubule formation. Oncology Reports, 2017, 38, 1886-1894.	2.6	23
9	Germination Improves the Polyphenolic Profile and Functional Value of Mung Bean (Vigna radiata L.). Antioxidants, 2020, 9, 746.	5.1	17
10	Impaired expression of glutathione peroxidase-4 gene in peripheral blood mononuclear cells: A biomarker of increased breast cancer risk. Cancer Biomarkers, 2010, 7, 39-46.	1.7	13
11	Bisnaphthalimidopropyl diaminodicyclohexylmethane induces DNA damage and repair instability in triple negative breast cancer cells via p21 expression. Chemico-Biological Interactions, 2015, 242, 307-315.	4.0	8
12	Novel bisnaphthalimidopropyl (BNIPs) derivatives as anticancer compounds targeting DNA in human breast cancer cells. Organic and Biomolecular Chemistry, 2016, 14, 9780-9789.	2.8	7
13	Can selenium supplementation modify oxidative stress in-vitro? A role for selenium supplementation in the prevention of cardiovascular disease. Journal of Inflammation, 2015, 12, .	3.4	4
14	Study into the polyphenol content and antioxidant activity of rapeseed pomace extracts. Proceedings of the Nutrition Society, 2016, 75, .	1.0	4
15	Impact of rapeseed pomace extract on markers of oxidative stress and DNA damage in human SHâ€SY5Y cells. Journal of Food Biochemistry, 2021, 45, e13592.	2.9	2
16	Atherosclerosis: cell biology and lipoproteins. Current Opinion in Lipidology, 2007, 18, 113-116.	2.7	1
17	Role of Vigna Radiata extracts in modulating oxidative stress in an in vitro cell system. Proceedings of the Nutrition Society, 2015, 74, .	1.0	1
18	Modulation of Angiogenesis by Inflammatory Markers and the Role of Matrix Metalloproteinases in an Endothelial Cell/Fibroblast Co-culture System. Current Angiogenesis, 2015, 3, 152-163.	0.1	1

Marie Goua

#	Article	IF	CITATIONS
19	Atherosclerosis: cell biology and lipoproteins. Current Opinion in Lipidology, 2004, 15, 491-493.	2.7	0
20	Atherosclerosis: cell biology and lipoproteins. Current Opinion in Lipidology, 2005, 16, 389-391.	2.7	0
21	Atherosclerosis: cell biology and lipoproteins. Current Opinion in Lipidology, 2006, 17, 195-198.	2.7	0
22	2018 POSTER Can differences in cellular antioxidant enzyme status predispose to breast cancer in women without a recognised increased risk?. European Journal of Cancer, Supplement, 2007, 5, 189.	2.2	0
23	The role of selenium supplementation in cardiovascular disease prevention: an in vitro study to identify the molecular mechanism(s). Proceedings of the Nutrition Society, 2015, 74, .	1.0	0
