

Stephan Lewandowsky

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7973389/stephan-lewandowsky-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
225	The psychological drivers of misinformation belief and its resistance to correction 2022 , 1, 13-29		25
224	Believing in nothing and believing in everything: The underlying cognitive paradox of anti-COVID-19 vaccine attitudes.. <i>Personality and Individual Differences</i> , 2022 , 189, 111522	3.3	2
223	Social sampling and expressed attitudes: Authenticity preference and social extremeness aversion lead to social norm effects and polarization.. <i>Psychological Review</i> , 2022 , 129, 18-48	6.3	0
222	Papers please: Factors affecting national and international COVID-19 immunity and vaccination passport uptake as determined by representative national surveys.. <i>JMIR Public Health and Surveillance</i> , 2022 ,	11.4	1
221	When Science Becomes Embroiled in Conflict: Recognizing the Public's Need for Debate while Combating Conspiracies and Misinformation. <i>Annals of the American Academy of Political and Social Science</i> , 2022 , 700, 26-40	2.8	0
220	Losses, hopes, and expectations for sustainable futures after COVID. <i>Humanities and Social Sciences Communications</i> , 2021 , 8,	2.8	2
219	Climate Change Disinformation and How to Combat It. <i>Annual Review of Public Health</i> , 2021 , 42, 1-21	20.6	22
218	Unwillingness to engage in behaviors that protect against COVID-19: the role of conspiracy beliefs, trust, and endorsement of complementary and alternative medicine. <i>BMC Public Health</i> , 2021 , 21, 684	4.1	43
217	Public attitudes towards algorithmic personalization and use of personal data online: evidence from Germany, Great Britain, and the United States. <i>Humanities and Social Sciences Communications</i> , 2021 , 8,	2.8	9
216	Boosting people's ability to detect microtargeted advertising. <i>Scientific Reports</i> , 2021 , 11, 15541	4.9	3
215	Fearing the disease or the vaccine: The case of COVID-19. <i>Personality and Individual Differences</i> , 2021 , 172, 110590	3.3	138
214	The acceptability and uptake of smartphone tracking for COVID-19 in Australia. <i>PLoS ONE</i> , 2021 , 16, e0244827	3.7	29
213	Information overload for (bounded) rational agents. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021 , 288, 20202957	4.4	6
212	Young Adults View Smartphone Tracking Technologies for COVID-19 as Acceptable: The Case of Taiwan. <i>International Journal of Environmental Research and Public Health</i> , 2021 , 18,	4.6	14
211	Inoculating against the spread of Islamophobic and radical-Islamist disinformation. <i>Cognitive Research: Principles and Implications</i> , 2021 , 6, 57	2.7	3
210	Psychological factors shaping public responses to COVID-19 digital contact tracing technologies in Germany. <i>Scientific Reports</i> , 2021 , 11, 18716	4.9	7
209	Worldview-motivated rejection of science and the norms of science. <i>Cognition</i> , 2021 , 215, 104820	3.5	5

208	Liberty and the pursuit of science denial. <i>Current Opinion in Behavioral Sciences</i> , 2021 , 42, 65-69	4	3
207	Conspiracist cognition: chaos, convenience, and cause for concern. <i>Journal for Cultural Research</i> , 2021 , 25, 12-35	0.3	5
206	Public acceptance of privacy-encroaching policies to address the COVID-19 pandemic in the United Kingdom. <i>PLoS ONE</i> , 2021 , 16, e0245740	3.7	24
205	Correction format has a limited role when debunking misinformation.. <i>Cognitive Research: Principles and Implications</i> , 2021 , 6, 83	2.7	1
204	COVID-19 vaccine hesitancy in the UK: the Oxford coronavirus explanations, attitudes, and narratives survey (Oceans) II. <i>Psychological Medicine</i> , 2020 , 1-15	6.9	249
203	How behavioural sciences can promote truth, autonomy and democratic discourse online. <i>Nature Human Behaviour</i> , 2020 , 4, 1102-1109	12.8	35
202	Ten considerations for effectively managing the COVID-19 transition. <i>Nature Human Behaviour</i> , 2020 , 4, 677-687	12.8	133
201	Using the COVID-19 economic crisis to frame climate change as a secondary issue reduces mitigation support. <i>Journal of Environmental Psychology</i> , 2020 , 70, 101464	6.7	21
200	Can corrections spread misinformation to new audiences? Testing for the elusive familiarity backfire effect. <i>Cognitive Research: Principles and Implications</i> , 2020 , 5, 41	2.7	23
199	Genesis or Evolution of Gender Differences? Worldview-Based Dilemmas in The Processing of Scientific Information. <i>Journal of Cognition</i> , 2020 , 3, 9	3.2	8
198	Low replicability can support robust and efficient science. <i>Nature Communications</i> , 2020 , 11, 358	17.4	15
197	Using the president's tweets to understand political diversion in the age of social media. <i>Nature Communications</i> , 2020 , 11, 5764	17.4	17
196	Trait reactance and trust in doctors as predictors of vaccination behavior, vaccine attitudes, and use of complementary and alternative medicine in parents of young children. <i>PLoS ONE</i> , 2020 , 15, e0236527	3.7	11
195	Citizens Versus the Internet: Confronting Digital Challenges With Cognitive Tools. <i>Psychological Science in the Public Interest: A Journal of the American Psychological Society</i> , 2020 , 21, 103-156	18.6	37
194	They Might Be a Liar But They're My Liar: Source Evaluation and the Prevalence of Misinformation. <i>Political Psychology</i> , 2020 , 41, 21-34	3.6	37
193	Is bad news on TV tickers good news? The effects of voiceover and visual elements in video on viewers' assessment. <i>PLoS ONE</i> , 2020 , 15, e0231313	3.7	2
192	Addressing the theory crisis in psychology. <i>Psychonomic Bulletin and Review</i> , 2019 , 26, 1596-1618	4.1	86
191	Influence and seepage: An evidence-resistant minority can affect public opinion and scientific belief formation. <i>Cognition</i> , 2019 , 188, 124-139	3.5	20

190	Science by social media: Attitudes towards climate change are mediated by perceived social consensus. <i>Memory and Cognition</i> , 2019 , 47, 1445-1456	2.2	39
189	Polarity and attitude effects in the continued-influence paradigm. <i>Journal of Memory and Language</i> , 2019 , 108, 104028	3.8	4
188	Statistical Language Backs Conservatism in Climate-Change Assessments. <i>BioScience</i> , 2019 , 69, 209-219	5.7	13
187	Keeping track of 'alternative facts': The neural correlates of processing misinformation corrections. <i>NeuroImage</i> , 2019 , 193, 46-56	7.9	14
186	Does 'When' really feel more certain than 'If'? Two failures to replicate Ballard and Lewandowsky (2015). <i>Royal Society Open Science</i> , 2019 , 6, 180475	3.3	2
185	The association between vaccination confidence, vaccination behavior, and willingness to recommend vaccines among Finnish healthcare workers. <i>PLoS ONE</i> , 2019 , 14, e0224330	3.7	47
184	Refutations of equivocal claims: No evidence for an ironic effect of counterargument number.. <i>Journal of Applied Research in Memory and Cognition</i> , 2019 , 8, 98-107	2.3	3
183	Simple measurement models for complex working-memory tasks. <i>Psychological Review</i> , 2019 , 126, 880-933	3.3	5
182	Understandings of the component causes of harm from cigarette smoking in Australia. <i>Drug and Alcohol Review</i> , 2019 , 38, 807-817	3.2	3
181	Why Higher Working Memory Capacity May Help You Learn: Sampling, Search, and Degrees of Approximation. <i>Cognitive Science</i> , 2019 , 43, e12805	2.2	3
180	Refutations of Equivocal Claims: No Evidence for an Ironic Effect of Counterargument Number. <i>Journal of Applied Research in Memory and Cognition</i> , 2019 , 8, 98-107	2.3	20
179	Stability of democracies: a complex systems perspective. <i>European Journal of Physics</i> , 2019 , 40, 014002	0.8	14
178	Computational Modeling in Cognition and Cognitive Neuroscience 2018 , 1-35		1
177	The Alice in Wonderland mechanics of the rejection of (climate) science: simulating coherence by conspiracism. <i>Synthese</i> , 2018 , 195, 175-196	0.8	18
176	Critique of conflict and climate analysis is oversimplified. <i>Nature</i> , 2018 , 555, 587	50.4	3
175	Benchmarks provide common ground for model development: Reply to Logie (2018) and Vandierendonck (2018). <i>Psychological Bulletin</i> , 2018 , 144, 972-977	19.1	
174	Computational Modeling of Cognition and Behavior 2018 ,		59
173	Benchmarks for models of short-term and working memory. <i>Psychological Bulletin</i> , 2018 , 144, 885-958	19.1	110

172	A fluctuation in surface temperature in historical context: reassessment and retrospective on the evidence. <i>Environmental Research Letters</i> , 2018 , 13, 123008	6.2	18
171	The 'pause' in global warming in historical context: (II). Comparing models to observations. <i>Environmental Research Letters</i> , 2018 , 13, 123007	6.2	13
170	Does truth matter to voters? The effects of correcting political misinformation in an Australian sample. <i>Royal Society Open Science</i> , 2018 , 5, 180593	3.3	31
169	Internet Blogs, Polar Bears, and Climate-Change Denial by Proxy. <i>BioScience</i> , 2018 , 68, 281-287	5.7	33
168	Processing political misinformation: comprehending the Trump phenomenon. <i>Royal Society Open Science</i> , 2017 , 4, 160802	3.3	164
167	Climate science: The 'pause' unpacked. <i>Nature</i> , 2017 , 545, 37-39	50.4	10
166	Harnessing the uncertainty monster: Putting quantitative constraints on the intergenerational social discount rate. <i>Global and Planetary Change</i> , 2017 , 156, 155-166	4.2	4
165	Reminders and Repetition of Misinformation: Helping or Hindering Its Retraction?. <i>Journal of Applied Research in Memory and Cognition</i> , 2017 , 6, 185-192	2.3	107
164	Exploring the neural substrates of misinformation processing. <i>Neuropsychologia</i> , 2017 , 106, 216-224	3.2	35
163	Beyond Misinformation: Understanding and Coping with the Post-Truth Era. <i>Journal of Applied Research in Memory and Cognition</i> , 2017 , 6, 353-369	2.3	455
162	Neutralizing misinformation through inoculation: Exposing misleading argumentation techniques reduces their influence. <i>PLoS ONE</i> , 2017 , 12, e0175799	3.7	291
161	Transient response of the global mean warming rate and its spatial variation. <i>Weather and Climate Extremes</i> , 2017 , 18, 55-64	6	8
160	Inoculating against misinformation. <i>Science</i> , 2017 , 358, 1141-1142	33.3	44
159	Culture versus cognition is a false dilemma. <i>Nature Climate Change</i> , 2017 , 7, 457-457	21.4	22
158	Letting the Gorilla Emerge From the Mist: Getting Past Post-Truth. <i>Journal of Applied Research in Memory and Cognition</i> , 2017 , 6, 418-424	2.3	12
157	Reminders and repetition of misinformation: Helping or hindering its retraction?. <i>Journal of Applied Research in Memory and Cognition</i> , 2017 , 6, 185-192	2.3	19
156	The role of familiarity in correcting inaccurate information. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2017 , 43, 1948-1961	2.2	104
155	Learning from mistakes in climate research. <i>Theoretical and Applied Climatology</i> , 2016 , 126, 699-703	3	31

154	Control of information in working memory: Encoding and removal of distractors in the complex-span paradigm. <i>Cognition</i> , 2016 , 156, 106-128	3.5	17
153	The Pause In Global Warming: Turning a Routine Fluctuation into a Problem for Science. <i>Bulletin of the American Meteorological Society</i> , 2016 , 97, 723-733	6.1	72
152	Science and the public: Debate, denial, and skepticism. <i>Journal of Social and Political Psychology</i> , 2016 , 4, 537-553	1.3	25
151	Research integrity: Don't let transparency damage science. <i>Nature</i> , 2016 , 529, 459-61	50.4	49
150	A blind expert test of contrarian claims about climate data. <i>Global Environmental Change</i> , 2016 , 39, 91-97	10.1	23
149	Consensus on consensus: a synthesis of consensus estimates on human-caused global warming. <i>Environmental Research Letters</i> , 2016 , 11, 048002	6.2	508
148	A test of interference versus decay in working memory: Varying distraction within lists in a complex span task. <i>Journal of Memory and Language</i> , 2016 , 90, 66-87	3.8	22
147	The Peer Reviewers' Openness Initiative: incentivizing open research practices through peer review. <i>Royal Society Open Science</i> , 2016 , 3, 150547	3.3	119
146	What limits working memory capacity?. <i>Psychological Bulletin</i> , 2016 , 142, 758-99	19.1	115
145	Motivated Rejection of Science. <i>Current Directions in Psychological Science</i> , 2016 , 25, 217-222	6.5	166
144	Rational Irrationality: Modeling Climate Change Belief Polarization Using Bayesian Networks. <i>Topics in Cognitive Science</i> , 2016 , 8, 160-79	2.5	142
143	Future Global Change and Cognition. <i>Topics in Cognitive Science</i> , 2016 , 8, 7-18	2.5	7
142	The Hebb repetition effect in simple and complex memory span. <i>Memory and Cognition</i> , 2015 , 43, 852-65	2.2	12
141	The robust relationship between conspiracism and denial of (climate) science. <i>Psychological Science</i> , 2015 , 26, 667-70	7.9	27
140	He did it! She did it! No, she did not! Multiple causal explanations and the continued influence of misinformation. <i>Journal of Memory and Language</i> , 2015 , 85, 101-115	3.8	50
139	Clarity of meaning in IPCC press conference. <i>Nature Climate Change</i> , 2015 , 5, 961-962	21.4	2
138	Betting strategies on fluctuations in the transient response of greenhouse warming. <i>Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences</i> , 2015 , 373,	3	7
137	On the definition and identifiability of the alleged "hiatus" in global warming. <i>Scientific Reports</i> , 2015 , 5, 16784	4.9	43

136	When, not if: the inescapability of an uncertain climate future. <i>Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences</i> , 2015 , 373,	3	14
135	Misinformation and How to Correct It 2015 , 1-17		26
134	Memory Without Consolidation: Temporal Distinctiveness Explains Retroactive Interference. <i>Cognitive Science</i> , 2015 , 39, 1570-93	2.2	18
133	An Introduction to Cognitive Modeling 2015 , 3-24		2
132	Seepage: Climate change denial and its effect on the scientific community. <i>Global Environmental Change</i> , 2015 , 33, 1-13	10.1	105
131	Uncertainty as knowledge. <i>Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences</i> , 2015 , 373,	3	10
130	Recurrent fury: Conspiratorial discourse in the blogosphere triggered by research on the role of conspiracist ideation in climate denial. <i>Journal of Social and Political Psychology</i> , 2015 , 3, 142-178	1.3	50
129	Rehearsal in serial recall: An unworkable solution to the nonexistent problem of decay. <i>Psychological Review</i> , 2015 , 122, 674-99	6.3	51
128	Do people keep believing because they want to? Preexisting attitudes and the continued influence of misinformation. <i>Memory and Cognition</i> , 2014 , 42, 292-304	2.2	101
127	Working memory updating involves item-specific removal. <i>Journal of Memory and Language</i> , 2014 , 74, 1-15	3.8	50
126	Scientific uncertainty and climate change: Part II. Uncertainty and mitigation. <i>Climatic Change</i> , 2014 , 124, 39-52	4.5	23
125	Scientific uncertainty and climate change: Part I. Uncertainty and unabated emissions. <i>Climatic Change</i> , 2014 , 124, 21-37	4.5	35
124	Reply to Quantifying the consensus on anthropogenic global warming in the scientific literature: A re-analysis <i>Energy Policy</i> , 2014 , 73, 706-708	7.2	16
123	Well-estimated global surface warming in climate projections selected for ENSO phase. <i>Nature Climate Change</i> , 2014 , 4, 835-840	21.4	86
122	Further evidence against decay in working memory. <i>Journal of Memory and Language</i> , 2014 , 73, 15-30	3.8	40
121	Removal of information from working memory: A specific updating process. <i>Journal of Memory and Language</i> , 2014 , 74, 77-90	3.8	72
120	The effects of subtle misinformation in news headlines. <i>Journal of Experimental Psychology: Applied</i> , 2014 , 20, 323-35	1.8	85
119	Working memory capacity and fluid abilities: the more difficult the item, the more more is better. <i>Frontiers in Psychology</i> , 2014 , 5, 239	3.4	22

118	Conspiratory fascination versus public interest: the case of "climategate". <i>Environmental Research Letters</i> , 2014 , 9, 111004	6.2	13
117	The effect of framing and normative messages in building support for climate policies. <i>PLoS ONE</i> , 2014 , 9, e114335	3.7	34
116	Sequential dependencies in recall of sequences: filling in the blanks. <i>Memory and Cognition</i> , 2013 , 41, 938-52	2.2	14
115	Working memory supports inference learning just like classification learning. <i>Quarterly Journal of Experimental Psychology</i> , 2013 , 66, 1493-503	1.8	5
114	The pivotal role of perceived scientific consensus in acceptance of science. <i>Nature Climate Change</i> , 2013 , 3, 399-404	21.4	267
113	Misinformation, disinformation, and violent conflict: from Iraq and the "War on Terror" to future threats to peace. <i>American Psychologist</i> , 2013 , 68, 487-501	9.5	57
112	The effects of cultural transmission are modulated by the amount of information transmitted. <i>Cognitive Science</i> , 2013 , 37, 953-67	2.2	7
111	NASA faked the moon landing--therefore, (climate) science is a hoax: an anatomy of the motivated rejection of science. <i>Psychological Science</i> , 2013 , 24, 622-33	7.9	299
110	Evidence against decay in verbal working memory. <i>Journal of Experimental Psychology: General</i> , 2013 , 142, 380-411	4.7	68
109	Recursive fury: conspiracist ideation in the blogosphere in response to research on conspiracist ideation. <i>Frontiers in Psychology</i> , 2013 , 4, 73	3.4	12
108	The role of conspiracist ideation and worldviews in predicting rejection of science. <i>PLoS ONE</i> , 2013 , 8, e75637	3.7	271
107	Models of cognition and constraints from neuroscience: A case study involving consolidation. <i>Australian Journal of Psychology</i> , 2012 , 64, 37-45	2.3	14
106	Misinformation and Its Correction: Continued Influence and Successful Debiasing. <i>Psychological Science in the Public Interest: A Journal of the American Psychological Society</i> , 2012 , 13, 106-31	18.6	1178
105	Response suppression contributes to recency in serial recall. <i>Memory and Cognition</i> , 2012 , 40, 1070-80	2.2	15
104	Modeling working memory: an interference model of complex span. <i>Psychonomic Bulletin and Review</i> , 2012 , 19, 779-819	4.1	209
103	Computational constraints in cognitive theories of forgetting. <i>Frontiers in Psychology</i> , 2012 , 3, 400	3.4	12
102	Whichever way you choose to categorize, working memory helps you learn. <i>Quarterly Journal of Experimental Psychology</i> , 2012 , 65, 439-64	1.8	35
101	Working memory does not dissociate between different perceptual categorization tasks. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2012 , 38, 881-904	2.2	32

100	Introduction to the special section on theory and data in categorization: Integrating computational, behavioral, and cognitive neuroscience approaches. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2012 , 38, 803-6	2.2	5
99	Attention and working memory capacity: insights from blocking, highlighting, and knowledge restructuring. <i>Journal of Experimental Psychology: General</i> , 2012 , 141, 444-69	4.7	25
98	Influence Scholarship and Ethics. <i>Analyses of Social Issues and Public Policy</i> , 2011 , 11, 35-38	0.9	1
97	Restructuring partitioned knowledge: the role of recoordination in category learning. <i>Cognitive Psychology</i> , 2011 , 62, 81-122	3.1	45
96	Popular consensus: climate change is set to continue. <i>Psychological Science</i> , 2011 , 22, 460-3	7.9	20
95	Modeling working memory: a computational implementation of the Time-Based Resource-Sharing theory. <i>Psychonomic Bulletin and Review</i> , 2011 , 18, 10-45	4.1	90
94	Correcting false information in memory: manipulating the strength of misinformation encoding and its retraction. <i>Psychonomic Bulletin and Review</i> , 2011 , 18, 570-8	4.1	146
93	Terrorists brought down the plane!--No, actually it was a technical fault: processing corrections of emotive information. <i>Quarterly Journal of Experimental Psychology</i> , 2011 , 64, 283-310	1.8	56
92	Bayesian computation and mechanism: Theoretical pluralism drives scientific emergence. <i>Behavioral and Brain Sciences</i> , 2011 , 34, 212-213	0.9	
91	Error discounting in probabilistic category learning. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2011 , 37, 673-87	2.2	7
90	Working memory capacity and categorization: individual differences and modeling. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2011 , 37, 720-38	2.2	51
89	Computational Modeling in Cognition: Principles and Practice 2011 ,		67
88	Computational Models as Aids to Better Reasoning in Psychology. <i>Current Directions in Psychological Science</i> , 2010 , 19, 329-335	6.5	73
87	The components of working memory updating: an experimental decomposition and individual differences. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2010 , 36, 170-89	2.2	154
86	A working memory test battery for MATLAB. <i>Behavior Research Methods</i> , 2010 , 42, 571-85	6.1	91
85	Temporal isolation effects in recognition and serial recall. <i>Memory and Cognition</i> , 2010 , 38, 849-59	2.2	17
84	Explicit warnings reduce but do not eliminate the continued influence of misinformation. <i>Memory and Cognition</i> , 2010 , 38, 1087-100	2.2	206
83	Turning simple span into complex span: Time for decay or interference from distractors?. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2010 , 36, 958-78	2.2	30

82	Expertise: Acquisition, Limitations, and Control. <i>Reviews of Human Factors and Ergonomics</i> , 2009 , 5, 140-165		14
81	The Wisdom of Individuals: Exploring People's Knowledge About Everyday Events Using Iterated Learning. <i>Cognitive Science</i> , 2009 , 33, 969-98	2.2	81
80	Traveling economically through memory space: characterizing output order in memory for serial order. <i>Memory and Cognition</i> , 2009 , 37, 181-93	2.2	20
79	No temporal decay in verbal short-term memory. <i>Trends in Cognitive Sciences</i> , 2009 , 13, 120-6	14	152
78	Response to Barrouillet and Camos: Interference or decay in working memory?. <i>Trends in Cognitive Sciences</i> , 2009 , 13, 146-147	14	9
77	Response to Altmann: Adaptive forgetting by decay or removal of STM contents?. <i>Trends in Cognitive Sciences</i> , 2009 , 13, 280-281	14	5
76	Beyond nonutilization: irrelevant cues can gate learning in probabilistic categorization. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2009 , 35, 530-50	2.6	43
75	Better learning with more error: probabilistic feedback increases sensitivity to correlated cues in categorization. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2009 , 35, 1041-61	2.2	11
