#	ARTICLE	IF	CITATIONS
1	Optimal impulsive harvesting strategy of a stochastic Gompertz model in periodic environments. <i>Applied Mathematics Letters</i> , 2022, 125, 107733.	1.5	11
2	Optimal Harvesting of Stochastic Population Models with Periodic Coefficients. <i>Journal of Nonlinear Science</i> , 2022, 32, 1.	1.0	15
3	Dynamical bifurcation and explicit stationary density of a stochastic population model with Allee effects. <i>Applied Mathematics Letters</i> , 2021, 111, 106662.	1.5	18
4	Stationary distribution of a stochastic ratio-dependent predator-prey system with regime-switching. <i>Chaos, Solitons and Fractals</i> , 2021, 142, 110462.	2.5	26
5	Long-time behaviors of two stochastic mussel-algae models. <i>Mathematical Biosciences and Engineering</i> , 2021, 18, 8392-8414.	1.0	7
6	Analysis of a stochastic tumor-immune model with regime switching and impulsive perturbations. <i>Applied Mathematical Modelling</i> , 2020, 78, 482-504.	2.2	40
7	Stationary distribution of a stochastic hybrid phytoplankton-zooplankton model with toxin-producing phytoplankton. <i>Applied Mathematics Letters</i> , 2020, 101, 106077.	1.5	33
8	Analysis of a stochastic hybrid population model with Allee effect. <i>Applied Mathematics and Computation</i> , 2020, 364, 124582.	1.4	32
9	Dynamics of a nutrient-phytoplankton model with random phytoplankton mortality. <i>Journal of Theoretical Biology</i> , 2020, 488, 110119.	0.8	12
10	Invariant measure of a stochastic food-limited population model with regime switching. <i>Mathematics and Computers in Simulation</i> , 2020, 178, 16-26.	2.4	13
11	Optimal harvesting of a stochastic mutualism model with regime-switching. <i>Applied Mathematics and Computation</i> , 2020, 373, 125040.	1.4	27
12	Persistence and extinction of a stochastic predator-prey model with modified Leslie-Gower and Holling-type II schemes. <i>Advances in Difference Equations</i> , 2020, 2020, .	3.5	8
13	Dynamics of a stochastic population model with Allee effects under regime switching. <i>Advances in Difference Equations</i> , 2020, 2020, .	3.5	1
14	Survival analysis of a stochastic service-resource mutualism model in a polluted environment with pulse toxicant input. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2019, 521, 591-606.	1.2	6
15	Optimal harvesting of a stochastic commensalism model with time delay. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2019, 527, 121284.	1.2	13
16	Permanence and extinction of a stochastic hybrid model for tumor growth. <i>Applied Mathematics Letters</i> , 2019, 94, 66-72.	1.5	34
17	Dynamics of a stochastic regime-switching predator-prey model with modified Leslie-Gower Holling-type II schemes and prey harvesting. <i>Nonlinear Dynamics</i> , 2019, 96, 417-442.	2.7	58
18	Persistence and extinction of a modified Leslie-Gower Holling-type II stochastic predator-prey model with impulsive toxicant input in polluted environments. <i>Nonlinear Analysis: Hybrid Systems</i> , 2018, 27, 177-190.	2.1	56

#	ARTICLE	IF	CITATIONS
19	Persistence and extinction of an n-species mutualism model with random perturbations in a polluted environment. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2018, 491, 313-324.	1.2	5
20	Dynamics of a stochastic regime-switching predator-prey model with harvesting and distributed delays. <i>Nonlinear Analysis: Hybrid Systems</i> , 2018, 28, 87-104.	2.1	80
21	Stability of a budworm growth model with random perturbations. <i>Applied Mathematics Letters</i> , 2018, 79, 13-19.	1.5	33
22	Stationary distribution and ergodicity of a stochastic hybrid competition model with Lévy jumps. <i>Nonlinear Analysis: Hybrid Systems</i> , 2018, 30, 225-239.	2.1	60
23	Dynamics of a stochastic delay competitive model with harvesting and Markovian switching. <i>Applied Mathematics and Computation</i> , 2018, 337, 335-349.	1.4	36
24	Permanence and extinction in a stochastic service-resource mutualism model. <i>Applied Mathematics Letters</i> , 2017, 69, 1-7.	1.5	14
25	Stability of a stochastic one-predator-two-prey population model with time delays. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2017, 53, 65-82.	1.7	41
26	Permanence of Stochastic Lotka-Volterra Systems. <i>Journal of Nonlinear Science</i> , 2017, 27, 425-452.	1.0	95
27	Stationary distribution and ergodicity of a stochastic food-chain model with Lévy jumps. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2017, 482, 14-28.	1.2	47
28	ANALYSIS OF A STOCHASTIC TWO-PREDATORS ONE-PREY SYSTEM WITH MODIFIED LESLIE-GOWER AND HOLLING-TYPE $\alpha$ ...; SCHEMES. <i>Journal of Applied Analysis and Computation</i> , 2017, 7, 713-727.	0.2	5
29	Population dynamical behavior of a two-predator one-prey stochastic model with time delay. <i>Discrete and Continuous Dynamical Systems</i> , 2017, 37, 2513-2538.	0.5	51
30	Optimal harvesting of a stochastic delay competitive model. <i>Discrete and Continuous Dynamical Systems - Series B</i> , 2017, 22, 1493-1508.	0.5	15
31	Modeling and analysis of a non-autonomous single-species model with impulsive and random perturbations. <i>Applied Mathematical Modelling</i> , 2016, 40, 5510-5531.	2.2	17
32	Analysis of a stochastic tri-trophic food-chain model with harvesting. <i>Journal of Mathematical Biology</i> , 2016, 73, 597-625.	0.8	115
33	Dynamics of a stochastic one-prey two-predator model with Lévy jumps. <i>Applied Mathematics and Computation</i> , 2016, 284, 308-321.	1.4	41
34	Global asymptotic stability of stochastic competitive system with infinite delays. <i>Journal of Applied Mathematics and Computing</i> , 2016, 50, 93-107.	1.2	2
35	Analysis of stochastic two-prey one-predator model with Lévy jumps. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2016, 445, 176-188.	1.2	28
36	Optimal harvesting of a stochastic mutualism model with Lévy jumps. <i>Applied Mathematics and Computation</i> , 2016, 276, 301-309.	1.4	46

#	ARTICLE	IF	CITATIONS
37	Survival analysis of a stochastic single-species population model with jumps in a polluted environment. <i>International Journal of Biomathematics</i> , 2016, 09, 1650011.	1.5	10
38	A remark on a stochastic logistic model with Lévy jumps. <i>Applied Mathematics and Computation</i> , 2015, 251, 521-526.	1.4	6
39	Stability of a stochastic logistic model under regime switching. <i>Advances in Difference Equations</i> , 2015, 2015, .	3.5	4
40	Global asymptotic stability of stochastic Lotka–Volterra systems with infinite delays. <i>IMA Journal of Applied Mathematics</i> , 2015, 80, 1431-1453.	0.8	14
41	Analysis of a stochastic logistic model with diffusion. <i>Applied Mathematics and Computation</i> , 2015, 266, 169-182.	1.4	19
42	Optimal Harvesting of a Stochastic Logistic Model with Time Delay. <i>Journal of Nonlinear Science</i> , 2015, 25, 277-289.	1.0	53
43	Survival analysis of a cooperation system with random perturbations in a polluted environment. <i>Nonlinear Analysis: Hybrid Systems</i> , 2015, 18, 100-116.	2.1	10
44	Dynamical behavior of a one-prey two-predator model with random perturbations. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2015, 28, 123-137.	1.7	37
45	The Evolutionary Dynamics of Stochastic Epidemic Model with Nonlinear Incidence Rate. <i>Bulletin of Mathematical Biology</i> , 2015, 77, 1705-1743.	0.9	97
46	Dynamics of a stochastic Holling II one-predator two-prey system with jumps. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2015, 421, 571-582.	1.2	44
47	Optimal harvesting policy of a stochastic predator–prey model with time delay. <i>Applied Mathematics Letters</i> , 2015, 48, 102-108.	1.5	43
48	Persistence and extinction of a stochastic cooperative model in a polluted environment with pulse toxicant input. <i>Filomat</i> , 2015, 29, 1329-1342.	0.2	5
49	Dynamics of a Stochastic Delayed Competitive Model with Impulsive Toxicant Input in Polluted Environments. <i>Abstract and Applied Analysis</i> , 2014, 2014, 1-8.	0.3	0
50	Optimal harvesting policy for a stochastic predator–prey model. <i>Applied Mathematics Letters</i> , 2014, 34, 22-26.	1.5	24
51	A remark on stochastic Logistic model with diffusion. <i>Applied Mathematics and Computation</i> , 2014, 228, 141-146.	1.4	9
52	Dynamics of a stochastic Lotka-Volterra model with regime switching. <i>Journal of Applied Mathematics and Computing</i> , 2014, 45, 327-349.	1.2	2
53	Global asymptotic stability of a stochastic delayed predator–prey model with Beddington–DeAngelis functional response. <i>Applied Mathematics and Computation</i> , 2014, 226, 581-588.	1.4	15
54	Asymptotic stability of a two-group stochastic SEIR model with infinite delays. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2014, 19, 3444-3453.	1.7	39

#	ARTICLE	IF	CITATIONS
55	Can protection zone potentially strengthen protective effects in random environments?. Applied Mathematics and Computation, 2014, 231, 26-38.	1.4	3
56	Optimal harvesting policy of a stochastic food chain population model. Applied Mathematics and Computation, 2014, 245, 265-270.	1.4	16
57	On a stochastic delayed predator-prey model with Lévy jumps. Applied Mathematics and Computation, 2014, 228, 563-570.	1.4	20
58	Stochastic Lotka-Volterra systems with Lévy noise. Journal of Mathematical Analysis and Applications, 2014, 410, 750-763.	0.5	140
59	Stochastic Lotka-Volterra systems under regime switching with jumps. Filomat, 2014, 28, 1907-1928.	0.2	4
60	Stability analysis of a stochastic logistic model with infinite delay. Communications in Nonlinear Science and Numerical Simulation, 2013, 18, 2289-2294.	1.7	9
61	Dynamics of a non-autonomous stochastic Gilpin-Ayala model. Journal of Applied Mathematics and Computing, 2013, 43, 351-368.	1.2	1
62	The threshold between permanence and extinction for a stochastic Logistic model with regime switching. Journal of Applied Mathematics and Computing, 2013, 43, 329-349.	1.2	6
63	Dynamics of a Two-Prey One-Predator System in Random Environments. Journal of Nonlinear Science, 2013, 23, 751-775.	1.0	84
64	Analysis of a stochastic autonomous mutualism model. Journal of Mathematical Analysis and Applications, 2013, 402, 392-403.	0.5	60
65	Dynamics of a Leslie-Gower Holling-type II predator-prey system with Lévy jumps. Nonlinear Analysis: Theory, Methods & Applications, 2013, 85, 204-213.	0.6	114
66	Dynamics and simulations of a logistic model with impulsive perturbations in a random environment. Mathematics and Computers in Simulation, 2013, 92, 53-75.	2.4	17
67	A note on a delay Lotka-Volterra competitive system with random perturbations. Applied Mathematics Letters, 2013, 26, 589-594.	1.5	19
68	A note on stability of stochastic logistic equation. Applied Mathematics Letters, 2013, 26, 601-606.	1.5	24
69	Stability of a stochastic logistic model with distributed delay. Mathematical and Computer Modelling, 2013, 57, 1112-1121.	2.0	22
70	Persistence and extinction of a stochastic delay Logistic equation under regime switching. Applied Mathematics Letters, 2013, 26, 140-144.	1.5	21
71	A remark on a stochastic predator-prey system with time delays. Applied Mathematics Letters, 2013, 26, 318-323.	1.5	40
72	Asymptotic behavior of a stochastic nonautonomous Lotka-Volterra competitive system with impulsive perturbations. Mathematical and Computer Modelling, 2013, 57, 909-925.	2.0	36

#	ARTICLE	IF	CITATIONS
73	Analysis of Stochastic Delay Predator-Prey System with Impulsive Toxicant Input in Polluted Environments. <i>Abstract and Applied Analysis</i> , 2013, 2013, 1-9.	0.3	1
74	Stochastic Differential Equations with Multi-Markovian Switching. <i>Journal of Applied Mathematics</i> , 2013, 2013, 1-11.	0.4	0
75	Population dynamical behavior of Lotka-Volterra cooperative systems with random perturbations. <i>Discrete and Continuous Dynamical Systems</i> , 2013, 33, 2495-2522.	0.5	61
76	A Generalization of Itô's Formula and the Stability of Stochastic Volterra Integral Equations. <i>Journal of Applied Mathematics</i> , 2012, 2012, 1-16.	0.4	3
77	DYNAMICAL PROPERTIES OF A STOCHASTIC TWO-SPECIES SCHOENER'S COMPETITIVE MODEL. <i>International Journal of Biomathematics</i> , 2012, 05, 1250035.	1.5	4
78	Persistence and extinction of a single-species population system in a polluted environment with random perturbations and impulsive toxicant input. <i>Chaos, Solitons and Fractals</i> , 2012, 45, 1541-1550.	2.5	27
79	Stationary distribution, ergodicity and extinction of a stochastic generalized logistic system. <i>Applied Mathematics Letters</i> , 2012, 25, 1980-1985.	1.5	52
80	Persistence, extinction and global asymptotical stability of a non-autonomous predator-prey model with random perturbation. <i>Applied Mathematical Modelling</i> , 2012, 36, 5344-5353.	2.2	57
81	Dynamics of a stochastic predator-prey system with Beddington-DeAngelis functional response. <i>Applied Mathematics and Computation</i> , 2012, 219, 2303-2312.	1.4	30
82	Stochastic logistic equation with infinite delay. <i>Mathematical Methods in the Applied Sciences</i> , 2012, 35, 812-827.	1.2	14
83	On a stochastic logistic equation with impulsive perturbations. <i>Computers and Mathematics With Applications</i> , 2012, 63, 871-886.	1.4	75
84	Analysis of an improved epidemic model with stochastic disease transmission. <i>Applied Mathematics and Computation</i> , 2012, 218, 9750-9758.	1.4	4
85	The asymptotic behaviours of an epidemic model with two correlated stochastic perturbations. <i>Applied Mathematics and Computation</i> , 2012, 218, 10520-10532.	1.4	9
86	Global asymptotic stability of a stochastic Lotka-Volterra model with infinite delays. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2012, 17, 3115-3123.	1.7	34
87	Asymptotic properties and simulations of a stochastic logistic model under regime switching II. <i>Mathematical and Computer Modelling</i> , 2012, 55, 405-418.	2.0	35
88	Persistence and extinction of a non-autonomous logistic model with random perturbations. <i>Communications in Mathematical Sciences</i> , 2012, 10, 977-987.	0.5	2
89	Asymptotic properties and simulations of a stochastic logistic model under regime switching. <i>Mathematical and Computer Modelling</i> , 2011, 54, 2139-2154.	2.0	42
90	Global stability of stage-structured predator-prey models with Beddington-DeAngelis functional response. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2011, 16, 3792-3797.	1.7	40

#	ARTICLE	IF	CITATIONS
91	Survival Analysis of Stochastic Competitive Models in a Polluted Environment and Stochastic Competitive Exclusion Principle. <i>Bulletin of Mathematical Biology</i> , 2011, 73, 1969-2012.	0.9	214
92	Global stability of a nonlinear stochastic predator-prey system with Beddington-DeAngelis functional response. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2011, 16, 1114-1121.	1.7	77
