#	ARTICLE	IF	CITATIONS
1	Convergence of asymptotically almost negatively associated random variables with random coefficients. Communications in Statistics - Theory and Methods, 2023, 52, 2931-2945.	0.6	2
2	Complete convergence and complete moment convergence for weighted sums of extended negatively dependent random variables. Communications in Statistics - Theory and Methods, 2022, 51, 3847-3863.	0.6	8
3	Complete convergence and complete integral convergence of partial sums for moving average process under sub-linear expectations. AIMS Mathematics, 2022, 7, 9694-9715.	0.7	12
4	Complete convergence and complete integral convergence for weighted sums of widely acceptable random variables under the sub-linear expectations. AIMS Mathematics, 2022, 7, 8430-8448.	0.7	1
5	Complete and complete moment convergence for weighted sums of arrays of rowwise negatively dependent random variables under the sub-linear expectations. Communications in Statistics - Theory and Methods, 2021, 50, 594-608.	0.6	9
6	Several Different Types of Convergence for ND Random Variables under Sublinear Expectations. Discrete Dynamics in Nature and Society, 2021, 2021, 1-9.	0.5	0
7	Complete Convergence for Weighted Sums of Widely Acceptable Random Variables under Sublinear Expectations. Discrete Dynamics in Nature and Society, 2021, 2021, 1-10.	0.5	2
8	Complete Convergence for END Random Variables under Sublinear Expectations. Discrete Dynamics in Nature and Society, 2021, 2021, 1-10.	0.5	2
9	Complete integration convergence for arrays of rowwise extended negatively dependent random variables under the sub-linear expectations. AIMS Mathematics, 2021, 6, 12166-12181.	0.7	3
10	Complete integral convergence for arrays of row-wise extended independent random variables under Sub-linear expectations. Communications in Statistics - Theory and Methods, 2020, 49, 5613-5626.	0.6	8
11	Another form of Chover's law of the iterated logarithm under sub-linear expectations. Revista De La Real Academia De Ciencias Exactas, Fisicas Y Naturales - Serie A: Matematicas, 2020, 114, 1.	0.6	6
12	Complete convergence theorem for negatively dependent random variables under sub-linear expectations. Communications in Statistics - Theory and Methods, 2020, , 1-14.	0.6	0
13	Precise Asymptotics for Complete Integral Convergence under Sublinear Expectations. Mathematical Problems in Engineering, 2020, 2020, 1-13.	0.6	11
14	Complete convergence and complete moment convergence for negatively dependent random variables under sub-linear expectations. Filomat, 2020, 34, 1093-1104.	0.2	10
15	Theorems of complete convergence and complete integral convergence for END random variables under sub-linear expectations. Journal of Inequalities and Applications, 2019, 2019, .	0.5	10
16	Complete convergence for arrays of row-wise ND random variables under sub-linear expectations. Communications in Statistics - Theory and Methods, 2019, 48, 3165-3176.	0.6	3
17	On Some Conditions for Strong Law of Large Numbers for Weighted Sums of END Random Variables under Sublinear Expectations. Discrete Dynamics in Nature and Society, 2019, 2019, 1-8.	0.5	5
18	Some Types of Convergence for Negatively Dependent Random Variables under Sublinear Expectations. Discrete Dynamics in Nature and Society, 2019, 2019, 1-7.	0.5	21

#	ARTICLE	IF	CITATIONS
19	Complete convergence for weighted sums of extended negatively dependent random variables under sub-linear expectations. Communications in Statistics - Theory and Methods, 2018, 47, 4741-4750.	0.6	4
20	Complete convergence and complete moment convergence for arrays of rowwise negatively superadditive dependent random variables. Communications in Statistics - Theory and Methods, 2018, 47, 3910-3922.	0.6	6
21	SOME LIMITING BEHAVIOR FOR ASYMPTOTICALLY NEGATIVE ASSOCIATED RANDOM VARIABLES. Probability in the Engineering and Informational Sciences, 2018, 32, 58-66.	0.6	5
22	Strong law of large numbers and Chover's law of the iterated logarithm under sub-linear expectations. Journal of Mathematical Analysis and Applications, 2018, 460, 252-270.	0.5	55
23	Almost sure central limit theorem for self-normalized products of partial sums of negatively associated sequences. Communications in Statistics - Theory and Methods, 2017, 46, 2593-2606.	0.6	4
24	An extension of almost sure central limit theorem for the maximum of stationary Gaussian random fields. Communications in Statistics - Theory and Methods, 2017, 46, 3667-3675.	0.6	0
25	Almost sure central limit theorem for self-normalized partial sums of negatively associated sequences. Statistics and Probability Letters, 2017, 129, 17-27.	0.4	7
26	Equivalent conditions of complete moment convergence for extended negatively dependent random variables. Journal of Inequalities and Applications, 2017, 2017, 125.	0.5	4
27	Complete convergence and complete moment convergence for weighted sums of extended negatively dependent random variables under sub-linear expectation. Journal of Inequalities and Applications, 2017, 2017, 261.	0.5	38
28	Complete Moment Convergence for Negatively Dependent Sequences of Random Variables. Discrete Dynamics in Nature and Society, 2016, 2016, 1-6.	0.5	1
29	A note on the almost sure central limit theorems for the maxima of strongly dependent nonstationary Gaussian vector sequences. Journal of Inequalities and Applications, 2016, 2016, .	0.5	0
30	Complete convergence and complete moment convergence for negatively associated sequences of random variables. Journal of Inequalities and Applications, 2016, 2016, .	0.5	16
31	Almost sure central limit theorem for self-normalized partial sums and maxima. Revista De La Real Academia De Ciencias Exactas, Fisicas Y Naturales - Serie A: Matematicas, 2016, 110, 699-710.	0.6	1
32	Further study of complete convergence for weighted sums of PNQD random variables. Journal of Inequalities and Applications, 2015, 2015, .	0.5	4
33	The improved results in almost sure central limit theorem for the maxima of strongly dependent stationary Gaussian vector sequences. Journal of Inequalities and Applications, 2015, 2015, .	0.5	2
34	Improved results in almost sure central limit theorems for the maxima and partial sums for Gaussian sequences. Journal of Inequalities and Applications, 2015, 2015, .	0.5	1
35	Further Study on the Marcinkiewicz Strong Laws for Linear Statistics of \tilde{I}^* -Mixing Sequences of Random Variables. Communications in Statistics - Theory and Methods, 2015, 44, 125-134.	0.6	0
36	A Note on the Almost Sure Central Limit Theorem for Partial Sums of \tilde{I}^* -Mixing Sequences. Applied Mathematics, 2015, 06, 1574-1580.	0.1	1

#	ARTICLE	IF	CITATIONS
37	An improved result in almost sure central limit theorem for self-normalized products of partial sums. Journal of Inequalities and Applications, 2013, 2013, .	0.5	8
38	Strong representation results of the Kaplan-Meier estimator for censored negatively associated data. Journal of Inequalities and Applications, 2013, 2013, .	0.5	4
39	A Berry-Esseen Type Bound in Kernel Density Estimation for Negatively Associated Censored Data. Journal of Applied Mathematics, 2013, 2013, 1-9.	0.4	4
40	The Almost Sure Local Central Limit Theorem for the Negatively Associated Sequences. Journal of Applied Mathematics, 2013, 2013, 1-9.	0.4	2
41	Limiting Behavior of the Maximum of the Partial Sum for Linearly Negative Quadrant Dependent Random Variables under Residual CesÀro Alpha-Integrability Assumption. Journal of Applied Mathematics, 2012, 2012, 1-10.	0.4	0
42	Sufficient and Necessary Conditions of Complete Convergence for Weighted Sums of PNQD Random Variables. Journal of Applied Mathematics, 2012, 2012, 1-10.	0.4	6
43	The Rate of Strong Consistency of the Nearest Neighbor Density Estimator for Negatively Dependent Random Variables. ISRN Applied Mathematics, 2012, 2012, 1-10.	0.5	1
44	An improved result in almost sure central limit theory for products of partial sums with stable distribution. Chinese Annals of Mathematics Series B, 2012, 33, 919-930.	0.2	7
45	A complete convergence theorem for weighted sums of arrays of rowwise negatively dependent random variables. Journal of Inequalities and Applications, 2012, 2012, .	0.5	27
46	Central limit theorem for stationary linear processes generated by linearly negative quadrant-dependent sequence. Journal of Inequalities and Applications, 2012, 2012, .	0.5	7
47	A note on the almost sure limit theorem for self-normalized partial sums of random variables in the domain of attraction of the normal law. Journal of Inequalities and Applications, 2012, 2012, .	0.5	15
48	Almost Sure Central Limit Theory for Self-Normalized Products of Sums of Partial Sums. Journal of Applied Mathematics, 2012, 2012, 1-13.	0.4	0
49	The Strong Consistency of MEstimator in a Linear Model for Negatively Dependent Random Samples. Communications in Statistics - Theory and Methods, 2011, 40, 467-491.	0.6	33
50	Almost Sure Central Limit Theorem for Product of Partial Sums of Strongly Mixing Random Variables. Journal of Inequalities and Applications, 2011, 2011, 576301.	0.5	5
51	Almost sure limit theorems for stable distributions. Statistics and Probability Letters, 2011, 81, 662-672.	0.4	19
52	An almost sure central limit theorem for the weight function sequences of NA random variables. Proceedings of the Indian Academy of Sciences: Mathematical Sciences, 2011, 121, 369-377.	0.2	16
53	The strong law of large numbers for pairwise NQD random variables. Journal of Systems Science and Complexity, 2011, 24, 347-357.	1.6	14
54	Further study strong consistency of M estimator in linear model for α -mixing random samples. Journal of Systems Science and Complexity, 2011, 24, 969-980.	1.6	7

#	ARTICLE	IF	CITATIONS
55	A note on the complete convergence for sequences of pairwise NQD random variables. Journal of Inequalities and Applications, 2011, 2011, .	0.5	12
56	Complete Convergence for Weighted Sums of Sequences of Negatively Dependent Random Variables. Journal of Probability and Statistics, 2011, 2011, 1-16.	0.3	22
57	Strong Laws of Large Numbers for Arrays of Rowwise NA and LNQD Random Variables. Journal of Probability and Statistics, 2011, 2011, 1-10.	0.3	3
58	Chover-type laws of the k-iterated logarithm for $\langle \text{mml:math xmlns:mml="http://www.w3.org/1998/Math/MathML" altimg="si1.gif" overflow="scroll" \rangle \langle \text{mml:mover accent="true" \rangle \langle \text{mml:mi} \rangle \langle \text{mml:mi} \rangle \langle \text{mml:mo} \rangle \langle \text{mml:mo} \rangle \langle \text{mml:mover} \rangle \langle \text{mml:math} \rangle$ -mixing sequences of random variables. Journal of Mathematical Analysis and Applications, 2010, 366, 435-443.	0.5	22
59	Chover's law of the iterated logarithm for negatively associated sequences. Journal of Systems Science and Complexity, 2010, 23, 293-302.	1.6	14
60	A law of the iterated logarithm of partial sums for NA random variables. Journal of the Korean Statistical Society, 2010, 39, 199-206.	0.3	16
61	A Strong Limit Theorem for Weighted Sums of Sequences of Negatively Dependent Random Variables. Journal of Inequalities and Applications, 2010, 2010, 383805.	0.5	24
62	Complete Convergence for Negatively Dependent Sequences of Random Variables. Journal of Inequalities and Applications, 2010, 2010, 507293.	0.5	24
63	Some Strong Limit Theorems for Weighted Product Sums of ϕ -Mixing Sequences of Random Variables. Journal of Inequalities and Applications, 2009, 2009, 174768.	0.5	4
64	Some strong limit theorems for ϕ -mixing sequences of random variables. Statistics and Probability Letters, 2008, 78, 1017-1023.	0.4	38
65	Strong Consistency of M Estimator in Linear Model for Negatively Associated Samples. Journal of Systems Science and Complexity, 2006, 19, 592-600.	1.6	15
66	Strong laws of large numbers for weighted sums of extended negatively dependent random variables under sub-linear expectations. Communications in Statistics - Theory and Methods, 0, , 1-24.	0.6	3
67	Strong limit theorems of weighted sums for extended negatively dependent random variables under sub-linear expectations. Communications in Statistics - Theory and Methods, 0, , 1-13.	0.6	4
68	Complete convergence theorems for arrays of row-wise extended negatively dependent random variables under sub-linear expectations. Communications in Statistics - Theory and Methods, 0, , 1-15.	0.6	0
69	Complete integral convergence for weighted sums of widely negative dependent random variables under the sub-linear expectations. Communications in Statistics - Theory and Methods, 0, , 1-22.	0.6	0
