#	ARTICLE	IF	CITATIONS
1	Even patients with mild COVID-19 symptoms after SARS-CoV-2 infection show prolonged altered red blood cell morphology and rheological parameters. <i>Journal of Cellular and Molecular Medicine</i> , 2022, 26, 3022-3030.	3.6	32
2	Does endurance training improve red blood cell aging and hemorheology in moderate-trained healthy individuals?. <i>Journal of Sport and Health Science</i> , 2020, 9, 595-603.	6.5	26
3	Impact of Type of Sport, Gender and Age on Red Blood Cell Deformability of Elite Athletes. <i>International Journal of Sports Medicine</i> , 2018, 39, 12-20.	1.7	19
4	Deformability of different red blood cell populations and viscosity of differently trained young men in response to intensive and moderate running. <i>Clinical Hemorheology and Microcirculation</i> , 2018, 69, 503-514.	1.7	16
5	Ischemic Preconditioning Enhances Performance and Erythrocyte Deformability of Responders. <i>International Journal of Sports Medicine</i> , 2018, 39, 596-603.	1.7	8
6	Brachial and central blood pressure and arterial stiffness in adult elite athletes. <i>European Journal of Applied Physiology</i> , 2021, 121, 1889-1898.	2.5	8
7	Acute effects of lower and upper body-resistance training on arterial stiffness, peripheral, and central blood pressure in young normotensive women. <i>Sport Sciences for Health</i> , 2018, 14, 357-363.	1.3	7
8	Most subjectively affected joints in patients with haemophilia – what has changed after 20 years in Germany?. <i>Haemophilia</i> , 2022, 28, 663-670.	2.1	6
9	Lactate distribution in red blood cells and plasma after a high intensity running exercise in aerobically trained and untrained subjects. <i>Journal of Human Sport and Exercise</i> , 2018, 13, .	0.4	5
10	Aerobic exercise in patients with haemophilia: A systematic review on safety, feasibility and health effects. <i>Haemophilia</i> , 2022, 28, 397-408.	2.1	5
11	Exercise-induced hypoalgesia (EIH) in response to different exercise intensities. <i>European Journal of Applied Physiology</i> , 2022, 122, 2213-2222.	2.5	5
12	Influence of Whole-Body Electrostimulation on the Deformability of Density-Separated Red Blood Cells in Soccer Players. <i>Frontiers in Physiology</i> , 2019, 10, 548.	2.8	4
13	Does the acute hemodynamic response to a maximum running exercise depend on the aerobic training status of the subjects?. <i>Artery Research</i> , 2018, 23, 28.	0.6	2
14	The eEgg: Evaluation of a New Device to Measure Pain. <i>Frontiers in Physiology</i> , 2022, 13, 832172.	2.8	2
15	Effects of a highly intensive clean and jerk exercise on blood pressure and arterial stiffness in experienced non-professional weight lifters. <i>European Journal of Applied Physiology</i> , 2019, 119, 913-920.	2.5	1
16	Investigation of exercise intensity in competitive roundnet/spikeball. <i>International Journal of Physical Education Fitness and Sports</i> , 0, , 1-7.	0.2	0
17	Effects of Recurring IPC vs. rIPC Maneuvers on Exercise Performance, Pulse Wave Velocity, and Red Blood Cell Deformability: Special Consideration of Reflow Varieties. <i>Biology</i> , 2022, 11, 163.	2.8	0
18	Acute Effect of Electromyostimulation Superimposed on Running on Maximal Velocity, Metabolism, and Perceived Exertion. <i>Biology</i> , 2022, 11, 593.	2.8	0
