## **Christos Mammides**

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/8017464/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Increasing collaboration between China and India in the environmental sciences to foster global sustainability. Ambio, 2022, 51, 1474-1484.	5.5	7
2	Editorial: Global Patterns and Drivers of Forest Loss and Degradation Within Protected Areas. Frontiers in Forests and Global Change, 2022, 5, .	2.3	0
3	Strictly protected areas are not necessarily more effective than areas in which multiple human uses are permitted. Ambio, 2021, 50, 1058-1073.	5.5	22
4	Plant apparency drives leaf herbivory in seedling communities across four subtropical forests. Oecologia, 2021, 195, 575-587.	2.0	10
5	Behavioural variables influence contact call rate more than characteristics of the vegetation in a group-living passerine species. Behavioural Processes, 2021, 185, 104345.	1.1	4
6	Socioeconomic Determinants of Crop Diversity and Its Effect on Farmer Income in Guangxi, Southern China. Agriculture (Switzerland), 2021, 11, 336.	3.1	9
7	Transparency about human diversity in transnational environmental NGOs. Biological Conservation, 2021, 256, 109027.	4.1	1
8	Global patterns and potential drivers of human settlements within protected areas. Environmental Research Letters, 2021, 16, 064085.	5.2	7
9	On the use of the acoustic evenness index to monitor biodiversity: A comment on "Rapid assessment of avian species richness and abundance using acoustic indices―by Bradfer-Lawrence et al. (2020) [Ecological Indicators, 115, 106400]. Ecological Indicators, 2021, 126, 107626.	6.3	6
10	The relationship between acoustic indices, elevation, and vegetation, in a forest plot network of southern China. Ecological Indicators, 2021, 129, 107942.	6.3	13
11	An Eco-Compensation Policy Increases Shorebird Diversity during the Non-farming Period for Aquaculture. Wetlands, 2021, 41, 1.	1.5	8
12	A review of avian experimental translocations that measure movement through human-modified landscapes. Global Ecology and Conservation, 2021, 31, e01876.	2.1	4
13	Designing an ecologically representative global network of protected areas requires coordination between countries. Environmental Research Letters, 2021, 16, 121001.	5.2	4
14	The role of protected areas in mitigating human impact in the world's last wilderness areas. Ambio, 2020, 49, 434-441.	5.5	39
15	Evidence from eleven countries in four continents suggests that protected areas are not associated with higher poverty rates. Biological Conservation, 2020, 241, 108353.	4.1	15
16	China and India: Toward a sustainable world. Science, 2020, 369, 515-515.	12.6	15
17	Food web structure in exotic eucalyptus plantations in Southern China: Stable isotope (δ13C, δ15N) analyses reveal the importance of understory and landscape-level planning. Global Ecology and Conservation, 2020, 24, e01259.	2.1	2
18	A global analysis of the drivers of human pressure within protected areas at the national level. Sustainability Science, 2020, 15, 1223-1232.	4.9	24

Christos Mammides

#	Article	IF	CITATIONS
19	Flower visitors in agricultural farms of Nilgiri Biosphere Reserve: Do forests act as pollinator reservoirs?. Journal of Apicultural Research, 2020, 59, 978-987.	1.5	4
20	An analysis of the European Union's conservation funding allocation by habitat and country. Environmental Conservation, 2020, 47, 123-129.	1.3	2
21	Reasons for the Survival of Tropical Forest Fragments in Xishuangbanna, Southwest China. Forests, 2020, 11, 159.	2.1	9
22	Changes in land-cover within high nature value farmlands inside and outside Natura 2000 sites in Europe: A preliminary assessment. Ambio, 2020, 49, 1958-1971.	5.5	22
23	Drivers of bird beta diversity in the Western Ghats–Sri Lanka biodiversity hotspot are scale dependent: roles of land use, climate, and distance. Oecologia, 2020, 193, 801-809.	2.0	5
24	A global assessment of the human pressure on the world's lakes. Global Environmental Change, 2020, 63, 102084.	7.8	45
25	The response of mixed-species bird flocks to anthropogenic disturbance and elevational variation in southwest China. Condor, 2019, 121, .	1.6	20
26	European Union's conservation efforts are taxonomically biased. Biodiversity and Conservation, 2019, 28, 1291-1296.	2.6	24
27	SELECTIVE LOGGING INTENSITY ALTERS THE POPULATION STAND STRUCTURE OF CULLENIA-MESUA-PALAQUIUM DOMINATED TROPICAL WET EVERGREEN FOREST OF THE WESTERN GHATS, SOUTH INDIA. Applied Ecology and Environmental Research, 2019, 17, .	0.5	Ο
28	Do satelliteâ€derived data on forest loss correlate with indices of smallâ€scale logging measured in the field?. African Journal of Ecology, 2018, 56, 390-394.	0.9	4
29	Measurement of species associations in mixedâ€species bird flocks across environmental and human disturbance gradients. Ecosphere, 2018, 9, e02324.	2.2	21
30	The importance of artificial wetlands for birds: A case study from Cyprus. PLoS ONE, 2018, 13, e0197286.	2.5	34
31	The effect of altitude, patch size and disturbance on species richness and density of lianas in montane forest patches. Acta Oecologica, 2017, 83, 1-14.	1.1	14
32	Mercury flow through an Asian rice-based food web. Environmental Pollution, 2017, 229, 219-228.	7.5	69
33	Topography and soil type are critical to understanding how bird and herpetofaunal communities persist in forest fragments of tropical China. Biological Conservation, 2017, 215, 107-115.	4.1	15
34	Do acoustic indices correlate with bird diversity? Insights from two biodiverse regions in Yunnan Province, south China. Ecological Indicators, 2017, 82, 470-477.	6.3	82
35	Total mercury and methylmercury concentrations over a gradient of contamination in earthworms living in rice paddy soil. Environmental Toxicology and Chemistry, 2017, 36, 1202-1210.	4.3	13
36	Exploring differences in stakeholders' perceptions of illegal bird trapping in Cyprus. Journal of Ethnobiology and Ethnomedicine, 2017, 13, 67.	2.6	9

CHRISTOS MAMMIDES

#	Article	IF	CITATIONS
37	Increasing geographic diversity in the international conservation literature: A stalled process?. Biological Conservation, 2016, 198, 78-83.	4.1	55
38	Do unpaved, low-traffic roads affect bird communities?. Acta Oecologica, 2016, 71, 14-21.	1.1	14
39	Effects of forest fragmentation on nocturnal Asian birds: A case study from Xishuangbanna, China. Zoological Research, 2016, 37, 151-8.	0.6	2
40	The effects of road networks and habitat heterogeneity on the species richness of birds in Natura 2000 sites in Cyprus. Landscape Ecology, 2015, 30, 67-75.	4.2	17
41	The effect of land-use on the diversity and mass-abundance relationships of understory avian insectivores in Sri Lanka and southern India. Scientific Reports, 2015, 5, 11569.	3.3	19
42	Does mixed-species flocking influence how birds respond to a gradient of land-use intensity?. Proceedings of the Royal Society B: Biological Sciences, 2015, 282, 20151118.	2.6	24
43	The indirect effects of habitat disturbance on the bird communities in a tropical African forest. Biodiversity and Conservation, 2015, 24, 3083-3107.	2.6	11
44	Effects of habitat disturbance and food supply on population densities of three primate species in the Kakamega Forest, Kenya. African Journal of Ecology, 2009, 47, 87-96.	0.9	73
