citing authors

#	ARTICLE	IF	CITATIONS
1	Visual and Semantic Representations Predict Subsequent Memory in Perceptual and Conceptual Memory Tests. <i>Cerebral Cortex</i> , 2021, 31, 974-992.	2.9	22
2	Transient Neural Activation of Abstract Relations on an Incidental Analogy Task. <i>Journal of Cognitive Neuroscience</i> , 2021, 33, 77-88.	2.3	3
3	Cortical Overlap and Cortical-Hippocampal Interactions Predict Subsequent True and False Memory. <i>Journal of Neuroscience</i> , 2020, 40, 1920-1930.	3.6	24
4	Cutting out the middleman: Separating attributional biases from memory deficits. <i>Behavioral and Brain Sciences</i> , 2019, 42, e302.	0.7	0
5	Knowledge supports memory retrieval through familiarity, not recollection. <i>Neuropsychologia</i> , 2018, 113, 14-21.	1.6	19
6	Neural basis of goal-driven changes in knowledge activation. <i>European Journal of Neuroscience</i> , 2018, 48, 3389-3396.	2.6	6
7	Excitatory TMS modulates memory representations. <i>Cognitive Neuroscience</i> , 2018, 9, 151-166.	1.4	19
8	Episodic Memory Decline and Healthy Aging. <i>Journal of Neuroscience</i> , 2017, 37, 475-497.		6
9	The Role of Medial Temporal Lobe Regions in Incidental and Intentional Retrieval of Item and Relational Information in Aging. <i>Hippocampus</i> , 2016, 26, 693-699.	1.9	21
10	On Known Unknowns: Fluency and the Neural Mechanisms of Illusory Truth. <i>Journal of Cognitive Neuroscience</i> , 2016, 28, 739-746.	2.3	56
11	Age-related differences in medial temporal lobe involvement during conceptual fluency. <i>Brain Research</i> , 2015, 1612, 48-58.	2.2	23
12	Activity reductions in perirhinal cortex predict conceptual priming and familiarity-based recognition. <i>Neuropsychologia</i> , 2014, 52, 19-26.	1.6	57
13	Hippocampal and parahippocampal cortex volume predicts recollection in schizophrenia. <i>Schizophrenia Research</i> , 2014, 157, 319-320.	2.0	0
14	Dissociable neural correlates of item and context retrieval in the medial temporal lobes. <i>Behavioural Brain Research</i> , 2013, 254, 102-107.	2.2	22
15	Examining the causes of memory strength variability: Recollection, attention failure, or encoding variability?. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2013, 39, 1726-1741.	0.9	19
16	Familiarity and conceptual implicit memory: Individual differences and neural correlates. <i>Cognitive Neuroscience</i> , 2012, 3, 213-214.	1.4	19
17	Familiarity is related to conceptual implicit memory: An examination of individual differences. <i>Psychonomic Bulletin and Review</i> , 2012, 19, 1154-1164.	2.8	51
18	Dissociable networks involved in spatial and temporal order source retrieval. <i>NeuroImage</i> , 2011, 56, 1803-1813.	4.2	125

#	ARTICLE	IF	CITATIONS
19	Effects of aging and prospective memory on recognition of item and associative information.. Psychology and Aging, 2010, 25, 486-491.	1.6	16
20	The Medial Temporal Lobe Supports Conceptual Implicit Memory. Neuron, 2010, 68, 835-842.	8.1	104
21	Recollection and familiarity: Examining controversial assumptions and new directions. Hippocampus, 2010, 20, 1178-1194.	1.9	406
