#	ARTICLE	IF	CITATIONS
1	The Placenta's Role in Sexually Dimorphic Fetal Growth Strategies. <i>Reproductive Sciences</i> , 2022, 29, 1895-1907.	1.1	8
2	Are there sex differences in fetal growth strategies and in the long-term effects of pregnancy complications on cognitive functioning?. <i>Journal of Developmental Origins of Health and Disease</i> , 2022, 13, 766-778.	0.7	7
3	Sex-dependent effects of prenatal food and protein restriction on offspring physiology in rats and mice: systematic review and meta-analyses. <i>Biology of Sex Differences</i> , 2021, 12, 21.	1.8	11
4	Recombinant IGF-1 Induces Sex-Specific Changes in Bone Composition and Remodeling in Adult Mice with Pappa2 Deficiency. <i>International Journal of Molecular Sciences</i> , 2021, 22, 4048.	1.8	8
5	Recovery of the maternal skeleton after lactation is impaired by advanced maternal age but not by reduced IGF availability in the mouse. <i>PLoS ONE</i> , 2021, 16, e0256906.	1.1	1
6	Obesogenic diet exposure alters uterine natural killer cell biology and impairs vasculature remodeling in mice. <i>Biology of Reproduction</i> , 2020, 102, 63-75.	1.2	11
7	Maternal Obesity Does Not Exacerbate the Effects of LPS Injection on Pregnancy Outcomes in Mice. <i>Biology</i> , 2020, 9, 293.	1.3	0
8	Pregnancy complications recur independently of maternal vascular malperfusion lesions. <i>PLoS ONE</i> , 2020, 15, e0228664.	1.1	10
9	Pregnancy complications recur independently of maternal vascular malperfusion lesions. , 2020, 15, e0228664.		0
10	Pregnancy complications recur independently of maternal vascular malperfusion lesions. , 2020, 15, e0228664.		0
11	Pregnancy complications recur independently of maternal vascular malperfusion lesions. , 2020, 15, e0228664.		0
12	Pregnancy complications recur independently of maternal vascular malperfusion lesions. , 2020, 15, e0228664.		0
13	Pregnancy complications recur independently of maternal vascular malperfusion lesions. , 2020, 15, e0228664.		0
14	Pregnancy complications recur independently of maternal vascular malperfusion lesions. , 2020, 15, e0228664.		0
15	Placental villous hypermaturation is associated with improved neonatal outcomes. <i>Placenta</i> , 2019, 76, 1-5.	0.7	19
16	Effects of high-fat diets on fetal growth in rodents: a systematic review. <i>Reproductive Biology and Endocrinology</i> , 2019, 17, 39.	1.4	28
17	Pappa2 deletion has sex- and age-specific effects on bone in mice. <i>Growth Hormone and IGF Research</i> , 2019, 44, 6-10.	0.5	18
18	The problem with using the birthweight:placental weight ratio as a measure of placental efficiency. <i>Placenta</i> , 2018, 68, 52-58.	0.7	25

#	ARTICLE	IF	CITATIONS
19	PAPP-A2 deficiency does not exacerbate the phenotype of a mouse model of intrauterine growth restriction. <i>Reproductive Biology and Endocrinology</i> , 2018, 16, 58.	1.4	4
20	Associations between imprinted gene expression in the placenta, human fetal growth and preeclampsia. <i>Biology Letters</i> , 2017, 13, 20170643.	1.0	21
21	An evaluation of Interprofessional group antenatal care: a prospective comparative study. <i>BMC Pregnancy and Childbirth</i> , 2017, 17, 297.	0.9	8
22	A maternal high-fat, high-sucrose diet has sex-specific effects on fetal glucocorticoids with little consequence for offspring metabolism and voluntary locomotor activity in mice. <i>PLoS ONE</i> , 2017, 12, e0174030.	1.1	21
23	Experimental reduction of haematocrit affects reproductive performance in European starlings. <i>Functional Ecology</i> , 2016, 30, 398-409.	1.7	18
24	Haematocrit, eggshell colouration and sexual signaling in the European starling (<i>Sturnus vulgaris</i>). <i>BMC Ecology</i> , 2016, 16, 31.	3.0	7
25	ADAM12 and PAPP-A: Candidate regulators of trophoblast invasion and first trimester markers of healthy trophoblasts. <i>Cell Adhesion and Migration</i> , 2016, 10, 147-153.	1.1	20
26	When are sex-specific effects really sex-specific?. <i>Journal of Developmental Origins of Health and Disease</i> , 2015, 6, 438-442.	0.7	14
27	Pappa2 deletion in mice affects male but not female fertility. <i>Reproductive Biology and Endocrinology</i> , 2015, 13, 109.	1.4	6
28	Pappa2 deletion alters IGFs but has little effect on glucose disposal or adiposity. <i>Growth Hormone and IGF Research</i> , 2015, 25, 232-239.	0.5	25
29	PAPP-A2 expression by osteoblasts is required for normal postnatal growth in mice. <i>Growth Hormone and IGF Research</i> , 2015, 25, 274-280.	0.5	19
30	IGFBP-4 and α^5 are expressed in first-trimester villi and differentially regulate the migration of HTR-8/SVneo cells. <i>Reproductive Biology and Endocrinology</i> , 2014, 12, 123.	1.4	21
31	First-Trimester Levels of Pregnancy-Associated Plasma Protein A2 (PAPP-A2) in the Maternal Circulation Are Elevated in Pregnancies That Subsequently Develop Preeclampsia. <i>Reproductive Sciences</i> , 2014, 21, 754-760.	1.1	26
32	Placental invasion, preeclampsia risk and adaptive molecular evolution at the origin of the great apes: Evidence from genome-wide analyses. <i>Placenta</i> , 2013, 34, 127-132.	0.7	55
33	Pregnancy Associated Plasma Protein A2 (PAPP-A2) Affects Bone Size and Shape and Contributes to Natural Variation in Postnatal Growth in Mice. <i>PLoS ONE</i> , 2013, 8, e56260.	1.1	38
34	Quantitative Trait Locus (QTL) Mapping Reveals a Role for Unstudied Genes in <i>Aspergillus</i> Virulence. <i>PLoS ONE</i> , 2011, 6, e19325.	1.1	19
35	A major QTL controls susceptibility to spinal curvature in the curveback guppy. <i>BMC Genetics</i> , 2011, 12, 16.	2.7	14
36	Regulation of pregnancy-associated plasma protein A2 (PAPPA2) in a human placental trophoblast cell line (BeWo). <i>Reproductive Biology and Endocrinology</i> , 2011, 9, 48.	1.4	38

#	ARTICLE	IF	CITATIONS
37	Virulence in an insect model differs between mating types in <i>Aspergillus fumigatus</i> . <i>Medical Mycology</i> , 2011, 49, 202-207.	0.3	36
38	Altered placental expression of PAPP2 does not affect birth weight in mice. <i>Reproductive Biology and Endocrinology</i> , 2010, 8, 90.	1.4	12
39	Altered levels of insulin-like growth factor binding protein proteases in preeclampsia and intrauterine growth restriction. <i>Prenatal Diagnosis</i> , 2010, 30, 815-820.	1.1	24
40	Expression of pregnancy-associated plasma protein A2 during pregnancy in human and mouse. <i>Journal of Endocrinology</i> , 2009, 202, 337-345.	1.2	50
41	Mononucleotide repeats represent an important source of polymorphic microsatellite markers in <i>Aspergillus nidulans</i> . <i>Molecular Ecology Resources</i> , 2009, 9, 572-578.	2.2	7
42	Influence of sex steroid hormones on spatial memory in a songbird. <i>Journal of Comparative Physiology A: Neuroethology, Sensory, Neural, and Behavioral Physiology</i> , 2008, 194, 963-969.	0.7	22
43	No evidence for inbreeding avoidance in a great reed warbler population. <i>Behavioral Ecology</i> , 2007, 18, 157-164.	1.0	59
44	Fine mapping dissects pleiotropic growth quantitative trait locus into linked loci. <i>Mammalian Genome</i> , 2007, 18, 240-245.	1.0	19
45	PAPP2, an Enzyme That Cleaves an Insulin-Like Growth-Factor-Binding Protein, Is a Candidate Gene for a Quantitative Trait Locus Affecting Body Size in Mice. <i>Genetics</i> , 2006, 173, 1547-1553.	1.2	47
46	Behavioural Genetics: Finding Genes that Cause Complex Trait Variation. <i>Current Biology</i> , 2005, 15, R19-R21.	1.8	1
47	Regulatory Variation at Glypican-3 Underlies a Major Growth QTL in Mice. <i>PLoS Biology</i> , 2005, 3, e135.	2.6	47
48	What causes the decrease in haematocrit during egg production?. <i>Functional Ecology</i> , 2004, 18, 330-336.	1.7	58
49	Identification and reciprocal introgression of a QTL affecting body mass in mice. <i>Genetics Selection Evolution</i> , 2004, 36, 577-91.	1.2	2
50	Genetic complexity of an obesity QTL (Fob3) revealed by detailed genetic mapping. <i>Mammalian Genome</i> , 2004, 15, 472-481.	1.0	37
51	Fine mapping of a murine growth locus to a 1.4-cM region and resolution of linked QTL. <i>Mammalian Genome</i> , 2004, 15, 482-491.	1.0	28
52	Characterization of a QTL affecting skeletal size in mice. <i>Mammalian Genome</i> , 2003, 14, 175-183.	1.0	22
53	Experimental dissociation of the effects of diet, age and breeding experience on primary reproductive effort in zebra finches <i>Taeniopygia guttata</i> . <i>Journal of Avian Biology</i> , 2003, 34, 379-386.	0.6	16
54	Genetic Architecture: Dissecting the Genetic Basis of Phenotypic Variation. <i>Current Biology</i> , 2002, 12, R415-R416.	1.8	6

#	ARTICLE	IF	CITATIONS
55	Avian egg size: variation within species and inflexibility within individuals. <i>Biological Reviews</i> , 2002, 77, 1-26.	4.7	492
56	Effects of Porcine Follicle-Stimulating Hormone on the Reproductive Performance of Female Zebra Finches (<i>Taeniopygia guttata</i>). <i>General and Comparative Endocrinology</i> , 2002, 125, 121-131.	0.8	6
57	Interindividual variation in yolk mass and the rate of growth of ovarian follicles in the zebra finch (<i>T. z. z.</i>) <i>Journal of Avian Biology</i> , 2001, 32, 255-261.	0.7	26
58	Intraspecific variation in reproductive physiology and egg quality in the European Starling <i>Sturnus vulgaris</i> . <i>Journal of Avian Biology</i> , 2001, 32, 31-37.	0.6	21
59	Seasonal decline in clutch size in European starlings: a novel randomization test to distinguish between the timing and quality hypotheses. <i>Journal of Animal Ecology</i> , 2001, 70, 1080-1087.	1.3	67
60	Follicular Development and Plasma Yolk Precursor Dynamics through the Laying Cycle in the European Starling (<i>Sturnus vulgaris</i>). <i>Physiological and Biochemical Zoology</i> , 2001, 74, 356-365.	0.6	86
61	Trade-offs between egg size and number in waterfowl: an interspecific test of the van Noordwijk and de Jong model. <i>Functional Ecology</i> , 2000, 14, 497-501.	1.7	42
62	Producing extra eggs does not deplete macronutrient reserves in European Starlings <i>Sturnus vulgaris</i> . <i>Journal of Avian Biology</i> , 2000, 31, 312-318.	0.6	14
63	Organ Mass Dynamics in Relation to Yolk Precursor Production and Egg Formation in European Starlings <i>Sturnus vulgaris</i> . <i>Physiological and Biochemical Zoology</i> , 1999, 72, 455-461.	0.6	23
64	Controlling for Body Mass Effects: Is Part-Whole Correlation Important?. <i>Physiological and Biochemical Zoology</i> , 1999, 72, 250-253.	0.6	97
65	Effects of exogenous 17 β -estradiol on the reproductive physiology and reproductive performance of European starlings (<i>Sturnus vulgaris</i>). <i>Journal of Experimental Biology</i> , 1999, 202, 2679-2685.	0.8	33
