citing authors

#	ARTICLE	IF	CITATIONS
1	Aerobic exercise and inspiratory muscle training increase functional capacity in patients with univentricular physiology after Fontan operation: A randomized controlled trial. <i>International Journal of Cardiology</i> , 2021, 330, 50-58.	1.7	16
2	Functional lymphatic reserve capacity is depressed in patients with a Fontan circulation. <i>Physiological Reports</i> , 2021, 9, e14862.	1.7	9
3	Risk factors for death or mechanical ventilation time after bidirectional cavopulmonary anastomosis in a developing country. <i>Cardiology in the Young</i> , 2021, , 1-5.	0.8	0
4	Prognostic value of the preoperative neutrophil-lymphocyte ratio in patients undergoing the bidirectional Glenn procedure. <i>Journal of Cardiac Surgery</i> , 2020, 35, 328-334.	0.7	21
5	Improving preoperative risk-of-death prediction in surgery congenital heart defects using artificial intelligence model: A pilot study. <i>PLoS ONE</i> , 2020, 15, e0238199.	2.5	24
6	Single Ventricle Palliation in a Developing Sub-Saharan African Country: What Should be Improved?. <i>World Journal for Pediatric &amp; Congenital Heart Surgery</i> , 2019, 10, 164-170.	0.8	7
7	Effect Of Supervised Physical Training In Patients With Univentricular Physiology After Fontan Operation. <i>Medicine and Science in Sports and Exercise</i> , 2019, 51, 69-69.	0.4	0
8	Early and Long-Term Outcomes of Surgical Treatment of Ebstein's Anomaly. <i>Brazilian Journal of Cardiovascular Surgery</i> , 2019, 34, 511-516.	0.6	7
9	PD34 São Paulo Congenital Heart Corrections: Three-Years' Assist Registry. <i>International Journal of Technology Assessment in Health Care</i> , 2018, 34, 141-142.	0.5	0
10	Blunted peripheral blood supply and underdeveloped skeletal muscle in Fontan patients: The impact on functional capacity. <i>International Journal of Cardiology</i> , 2018, 271, 54-59.	1.7	19
11	Outcomes of the Conversion of the Fontan-Kreutzer Operation to a Total Cavopulmonary Connection for the Failing Univentricular Circulation. <i>Arquivos Brasileiros De Cardiologia</i> , 2018, 112, 130-135.	0.8	0
12	Rational Use of Mechanical Circulatory Support as a Bridge to Pediatric and Congenital Heart Transplantation. <i>Brazilian Journal of Cardiovascular Surgery</i> , 2018, 33, 242-249.	0.6	3
13	Impaired Pulmonary Function is an Additional Potential Mechanism for the Reduction of Functional Capacity in Clinically Stable Fontan Patients. <i>Pediatric Cardiology</i> , 2017, 38, 981-990.	1.3	29
14	Lessons Learned From a Critical Analysis of the Fontan Operation Over Three Decades in a Single Institution. <i>World Journal for Pediatric &amp; Congenital Heart Surgery</i> , 2017, 8, 376-384.	0.8	8
15	Collaborative Quality Improvement in the Congenital Heart Defects: Development of the ASSIST Consortium and a Preliminary Surgical Outcomes Report. <i>Brazilian Journal of Cardiovascular Surgery</i> , 2017, 32, 260-269.	0.6	7
16	The Fontan Operation is Not the End of the Road. <i>Arquivos Brasileiros De Cardiologia</i> , 2016, 106, 162-5.	0.8	7
17	Pediatric and Congenital Heart Transplant: Twenty-year Experience in a Tertiary Brazilian Hospital. <i>Brazilian Journal of Cardiovascular Surgery</i> , 2014, 29, 322-9.	0.6	6
18	Horizontal right Axillary minithoracotomy: Aesthetic and effective option for ventricular and atrial septal defect repair in infants and toddlers.. <i>Brazilian Journal of Cardiovascular Surgery</i> , 2014, 29, 123-30.	0.6	4

#	ARTICLE	IF	CITATIONS
19	Risk factors for prolonged hospital stay after isolated coronary artery bypass grafting. Brazilian Journal of Cardiovascular Surgery, 2013, 28, 353-363.	0.6	15
20	Relação do teste de caminhada pós-operatório e função pulmonar com o tempo de internação da cirurgia cardíaca. Brazilian Journal of Cardiovascular Surgery, 2009, 24, 478-484.	0.6	20
