|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Comparison of the open tension-free mesh-plug, transabdominal preperitoneal (TAPP), and totally extraperitoneal (TEP) laparoscopic techniques for primary unilateral inguinal hernia repair: a prospective randomized controlled trial. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2011, 25, 234-239. | 2.4 | 103       |
| 2 | Comparison of Laparoscopic Cholecystectomy for Acute Cholecystitis within and Beyond 72 h of Symptom Onset During Emergency Admissions. <i>World Journal of Surgery</i> , 2012, 36, 2654-2658.                                                                                                                             | 1.6 | 52        |
| 3 | Micronutrient Deficiencies After Laparoscopic Gastric Bypass: Recommendations. <i>Obesity Surgery</i> , 2008, 18, 1062-1066.                                                                                                                                                                                               | 2.1 | 40        |
| 4 | Comparison of emergent versus elective laparoscopic common bile duct exploration for patients with or without nonsevere acute cholangitis complicated with common bile duct stones. <i>Journal of Surgical Research</i> , 2014, 187, 72-76.                                                                                | 1.6 | 12        |
| 5 | Gastric bypass procedure for type 2 diabetes patients with BMI <28 kg/m <sup>2</sup> . <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2017, 31, 1172-1179.                                                                                                                                                | 2.4 | 8         |
| 6 | Effects of pneumoperitoneum of laparoscopic cholecystectomy on the coagulation system of patients: a prospective observational study. <i>Chinese Medical Journal</i> , 2014, 127, 2599-604.                                                                                                                                | 2.3 | 6         |
| 7 | Laparoscopic Sleeve Gastrectomy Affects Coagulation System of Obese Patients. <i>Obesity Surgery</i> , 2020, 30, 3989-3996.                                                                                                                                                                                                | 2.1 | 5         |
| 8 | Endoscopic Surgery for Omohyoid Muscle Syndrome. <i>Journal of Laparoendoscopic and Advanced Surgical Techniques - Part A</i> , 2015, 25, 672-674.                                                                                                                                                                         | 1.0 | 4         |
| 9 | The procedure of mesh wrapping the gastric pouch in cadaver study. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2007, 21, 2244-2247.                                                                                                                                                                    | 2.4 | 2         |
