citing authors

#	ARTICLE	IF	CITATIONS
1	Impermeability Research of Autoclaved Propylene Oxide Sludge Shell-aggregate Concrete. Journal Wuhan University of Technology, Materials Science Edition, 2022, 37, 241-247.	1.0	1
2	Preparation of porous silica from natural chlorite via selective acid leaching and its application in methylene blue adsorption. Journal of Central South University, 2022, 29, 1173-1184.	3.0	6
3	SYNTHESIS AND CHARACTERIZATION OF ORDERED MESOPOROUS MCM-41 FROM NATURAL CHLORITE AND ITS APPLICATION IN METHYLENE BLUE ADSORPTION. Clays and Clay Minerals, 2021, 69, 217-231.	1.3	0
4	Investigation of the mechanism of slow hydration in low w/c ratio RPC matrix under long-term autoclaved curing. Construction and Building Materials, 2020, 237, 117660.	7.2	8
5	Preparation of porous silica powder via selective acid leaching of calcined tobermorite. Powder Technology, 2020, 375, 420-432.	4.2	12
6	Evaluation of glass-fiber grafted by epoxide-terminated hyperbranched polymer on the effect of mechanical characterization of epoxy composites. Science and Engineering of Composite Materials, 2018, 25, 417-424.	1.4	5
7	Synergetic reinforcements of epoxy composites with glass fibers and hyperbranched polymers. Polymer Composites, 2018, 39, 2871-2879.	4.6	5
8	Synthesis of core-shell particles based on hyperbranched polyester and zirconium slag nanoparticles and its influence on the impact resistance of epoxy resin thermosets. Polymer Composites, 2017, 38, 441-451.	4.6	11
9	Synthesis and characterization of hyperbranched polymer with epoxide-terminated group and application as modifier for epoxy/polyamide system. Polymer Science - Series B, 2017, 59, 328-336.	0.8	6
10	Improved mechanical properties of epoxy-based composites with hyperbranched polymer grafting glass-fiber. Polymers for Advanced Technologies, 2016, 27, 898-904.	3.2	18
11	Ca <sup>2+</sup> and OH <sup>-</sup> release of ceramsites containing anorthite and gehlenite prepared from waste lime mud. Journal of Environmental Sciences, 2016, 47, 91-99.	6.1	19
12	Investigations on mechanical characteristics of glass fiber reinforced epoxy composite modified with amino-terminated hyperbranched polymer. Fibers and Polymers, 2016, 17, 282-288.	2.1	10
13	The effect of amino-terminated hyperbranched polymers on the impact resistance of epoxy resins. Colloid and Polymer Science, 2016, 294, 607-615.	2.1	22
14	Synergic improvement of DGEBA/CSP/HBP composite on mechanical behavior. Polymer Science - Series A, 2016, 58, 785-792.	1.0	2
15	The effect of core-shell particles on the mechanical performance of epoxy resins modified with hyperbranched polymers. Journal of Materials Research, 2016, 31, 1393-1402.	2.6	10
16	Enhancing the mechanical properties of epoxy resin by addition of an amino-terminated hyperbranched polymer grown on glass fiber. Journal of Materials Science, 2016, 51, 1829-1837.	3.7	16
17	Mechanical characterization of epoxy composites with glass fibers grafted by hyperbranched polymer with amino terminal groups. Polymer Bulletin, 2016, 73, 2947-2960.	3.3	3
18	Dewatering of waste lime mud and after calcining its applications in the autoclaved products. Journal of Cleaner Production, 2016, 113, 355-364.	9.3	14

#	ARTICLE	IF	CITATIONS
19	Recycling of lime mud and fly ash for fabrication of anorthite ceramic at low sintering temperature. <i>Ceramics International</i> , 2015, 41, 5648-5655.	4.8	66
20	Synthesis and characterization of amino-terminated hyperbranched polymer and its effect on impact resistance of epoxy resin thermosets. <i>Colloid and Polymer Science</i> , 2015, 293, 2681-2688.	2.1	20
21	Preparation and characterization of ceramsite from lime mud and coal fly ash. <i>Construction and Building Materials</i> , 2015, 95, 10-17.	7.2	78
22	Recycling of low-silicon iron tailings in the production of lightweight aggregates. <i>Ceramics International</i> , 2015, 41, 1213-1221.	4.8	46
23	Characteristics of the fired bricks with low-silicon iron tailings. <i>Construction and Building Materials</i> , 2014, 70, 36-42.	7.2	99
24	High-temperature phase transition and the activity of tobermorite. <i>Journal Wuhan University of Technology, Materials Science Edition</i> , 2014, 29, 298-301.	1.0	18
25	Preparation of TiO <sub>2</sub> /Al-MCM-41 mesoporous materials from coal-series kaolin and photodegradation of methyl orange. <i>Materials Science-Poland</i> , 2013, 31, 372-377.	1.0	4
26	Fe-MCM-41 from Coal-Series Kaolin as Catalysts for the Selective Catalytic Reduction of NO with Ammonia. <i>Journal of Materials Engineering and Performance</i> , 2013, 22, 3762-3768.	2.5	2
27	Tribological behavior of MC Nylon6 composites filled with glass fiber and fly ash. <i>Journal Wuhan University of Technology, Materials Science Edition</i> , 2012, 27, 290-295.	1.0	14
28	Porous manganese oxide generated from lithiation/delithiation with improved electrochemical oxidation for supercapacitors. <i>Journal of Materials Chemistry</i> , 2011, 21, 15521.	6.7	45
29	Hydrothermal synthesis of xonotlite-type calcium silicate insulation material using industrial zirconium waste residue. <i>Journal Wuhan University of Technology, Materials Science Edition</i> , 2011, 26, 519-522.	1.0	2
30	Mechanical properties of autoclaved shell-aggregate. <i>Journal Wuhan University of Technology, Materials Science Edition</i> , 2011, 26, 723-729.	1.0	0
31	Structure and magnetic properties of melt-spun (Nd <sub>0.625</sub> Ni <sub>0.375</sub> ) <sub>85</sub> Al <sub>15</sub> ribbons. <i>Journal of Applied Physics</i> , 2006, 99, 08B524.	2.5	3
