citing authors

#	ARTICLE	IF	CITATIONS
1	A national Danish proof of concept on feasibility and safety of home -based intensive chemotherapy in patients with acute myeloid leukemia. <i>Leukemia Research</i> , 2022, 112, 106756.	0.4	3
2	Dropout during a 12-week transitional exercise-based cardiac rehabilitation programme: a mixed-methods prospective cohort study. <i>European Journal of Cardiovascular Nursing</i> , 2022, 21, 578-586.	0.4	9
3	An observational study on body mass index during rehabilitation and follow-up in people with spinal cord injury in Denmark. <i>Spinal Cord</i> , 2022, 60, 157-162.	0.9	2
4	Can supervised group-based multimodal exercise improve health-related quality of life in women with ovarian cancer undergoing chemotherapy?. <i>European Journal of Cancer Care</i> , 2022, 31, .	0.7	3
5	Parents to chronically ill adolescents have ambivalent views on confidential youth consultations – a mixed methods study. <i>International Journal of Adolescent Medicine and Health</i> , 2021, 33, .	0.6	6
6	The test-retest reliability of individualized VO <sub>2</sub> peak test modalities in people with spinal cord injury undergoing rehabilitation. <i>Spinal Cord</i> , 2021, 59, 82-91.	0.9	2
7	Exploring the contextual transition from spinal cord injury rehabilitation to the home environment: a qualitative study. <i>Spinal Cord</i> , 2021, 59, 336-346.	0.9	13
8	Reduced Need for Urinary Bladder Catheterization in the Postanesthesia Care Unit After Implementation of an Evidence-based Protocol: A Prospective Cohort Comparison Study. <i>European Urology Open Science</i> , 2021, 26, 27-34.	0.2	4
9	The missing link-participants’ perspectives on transfer from psychosocial interventional contexts to everyday community life: a qualitative synthesis of interventional studies. <i>BMC Psychology</i> , 2021, 9, 62.	0.9	2
10	Longitudinal symptom burden in adult patients with acute leukaemia participating in the PACEAL randomised controlled exercise trial – an explorative analysis. <i>European Journal of Cancer Care</i> , 2021, 30, e13462.	0.7	4
11	Meaningful Activities and Recovery (MA&R): the effect of a novel rehabilitation intervention among persons with psychiatric disabilities on activity engagement – study protocol for a randomized controlled trial. <i>Trials</i> , 2020, 21, 789.	0.7	13
12	Physical deterioration and adaptive recovery in physically inactive breast cancer patients during adjuvant chemotherapy: a randomised controlled trial. <i>Scientific Reports</i> , 2020, 10, 9710.	1.6	30
13	Lifestyle counselling as secondary prevention in patients with minor stroke and transient ischemic attack: study protocol for a randomized controlled pilot study. <i>Pilot and Feasibility Studies</i> , 2020, 6, 40.	0.5	4
14	Effect and efficacy of lifestyle interventions as secondary prevention. <i>Acta Neurologica Scandinavica</i> , 2020, 142, 299-313.	1.0	8
15	Heavy-load resistance exercise during chemotherapy in physically inactive breast cancer survivors at risk for lymphedema: a randomized trial. <i>Acta Oncologica</i> , 2019, 58, 1667-1675.	0.8	17
16	Fast-track pneumonia pathway focusing on early progressive mobilisation: a clinical feasibility study. <i>ERJ Open Research</i> , 2019, 5, 00012-2019.	1.1	4
17	Health promotion and cardiovascular risk reduction in people with spinal cord injury: physical activity, healthy diet and maintenance after discharge – protocol for a prospective national cohort study and a preintervention- postintervention study. <i>BMJ Open</i> , 2019, 9, e030310.	0.8	8
18	Systematic patient involvement for homebased outpatient administration of complex chemotherapy in acute leukemia and lymphoma. <i>British Journal of Haematology</i> , 2018, 181, 637-641.	1.2	12

#	ARTICLE	IF	CITATIONS
19	Heavy-Load Lifting. <i>Medicine and Science in Sports and Exercise</i> , 2018, 50, 187-195.	0.2	21
20	Transfusion-associated circulatory overload in adult, medical emergency patients with perspectives on early warning practice: a single-centre, clinical study. <i>Blood Transfusion</i> , 2018, 16, 137-144.	0.3	11
21	Rethinking exercise identity: a qualitative study of physically inactive cancer patientsâ€™ transforming process while undergoing chemotherapy. <i>BMJ Open</i> , 2017, 7, e016689.	0.8	14
22	A randomized cross-over trial to detect differences in arm volume after low- and heavy-load resistance exercise among patients receiving adjuvant chemotherapy for breast cancer at risk for arm lymphedema: study protocol. <i>BMC Cancer</i> , 2016, 16, 517.	1.1	8
23	Early warning and prevention of pneumonia in acute leukemia by patient education, spirometry, and positive expiratory pressure: A randomized controlled trial. <i>American Journal of Hematology</i> , 2016, 91, 271-276.	2.0	13
24	Multimodal intervention integrated into the clinical management of acute leukemia improves physical function and quality of life during consolidation chemotherapy: a randomized trial 'PACE-AL. <i>Haematologica</i> , 2016, 101, e316-e319.	1.7	22
25	The challenge of preserving cardiorespiratory fitness in physically inactive patients with colon or breast cancer during adjuvant chemotherapy: a randomised feasibility study. <i>BMJ Open Sport and Exercise Medicine</i> , 2015, 1, e000021.	1.4	30
26	Patient safety and technology-driven medication â€“ A qualitative study on how graduate nursing students navigate through complex medication administration. <i>Nurse Education in Practice</i> , 2015, 15, 203-211.	1.0	19
27	Patient Activation through Counseling and Exercise â€“ Acute Leukemia (PACE-AL) â€“ a randomized controlled trial. <i>BMC Cancer</i> , 2013, 13, 446.	1.1	20
28	The emerging role of exercise and health counseling in patients with acute leukemia undergoing chemotherapy during outpatient management. <i>Leukemia Research</i> , 2013, 37, 155-161.	0.4	23
29	The effects of a six-week supervised multimodal exercise intervention during chemotherapy on cancer-related fatigue. <i>European Journal of Oncology Nursing</i> , 2013, 17, 331-339.	0.9	77
30	At cancer diagnosis: a â€“window of opportunityâ€™ for behavioural change towards physical activity. A randomised feasibility study in patients with colon and breast cancer. <i>BMJ Open</i> , 2013, 3, e003556.	0.8	24
31	Health related quality of life and impact of infectious comorbidity in outpatient management of patients with acute leukemia. <i>Leukemia and Lymphoma</i> , 2012, 53, 1896-1904.	0.6	13
32	Exercise may reduce depression but not anxiety in self-referred cancer patients undergoing chemotherapy. Post-hoc analysis of data from the â€“Body & Cancerâ€™ trial. <i>Acta Oncologica</i> , 2011, 50, 660-669.	0.8	35
33	Hematologic Patients' Clinical and Psychosocial Experiences With Implanted Long-term Central Venous Catheter. <i>Cancer Nursing</i> , 2010, 33, 426-435.	0.7	29
34	Safe and feasible outpatient treatment following induction and consolidation chemotherapy for patients with acute leukaemia. <i>European Journal of Haematology</i> , 2010, 84, 316-322.	1.1	46
35	Effect of a multimodal high intensity exercise intervention in cancer patients undergoing chemotherapy: randomised controlled trial. <i>BMJ: British Medical Journal</i> , 2009, 339, b3410-b3410.	2.4	378
36	Self-reported physical activity behaviour; exercise motivation and information among Danish adult cancer patients undergoing chemotherapy. <i>European Journal of Oncology Nursing</i> , 2009, 13, 116-121.	0.9	53

#	ARTICLE	IF	CITATIONS
37	The effect of a multidimensional exercise intervention on physical capacity, well-being and quality of life in cancer patients undergoing chemotherapy. <i>Supportive Care in Cancer</i> , 2006, 14, 116-127.	1.0	114
38	The impact of a multidimensional exercise program on self-reported anxiety and depression in cancer patients undergoing chemotherapy: A phase II study. <i>Palliative and Supportive Care</i> , 2005, 3, 197-208.	0.6	39
39	Feasibility, physical capacity, and health benefits of a multidimensional exercise program for cancer patients undergoing chemotherapy. <i>Supportive Care in Cancer</i> , 2003, 11, 707-716.	1.0	106
