#	ARTICLE	IF	CITATIONS
1	Factors Associated with Outpatient Therapy Utilization in Extremely Preterm Infants. American Journal of Perinatology, 2024, 41, 458-469.	1.4	2
2	CpG methylation patterns in placenta and neonatal blood are differentially associated with neonatal inflammation. Pediatric Research, 2023, 93, 1072-1084.	2.3	3
3	Differential placental CpG methylation is associated with chronic lung disease of prematurity. Pediatric Research, 2022, 91, 1428-1435.	2.3	3
4	Placental genomics mediates genetic associations with complex health traits and disease. Nature Communications, 2022, 13, 706.	12.8	20
5	Associations between maternal pre-pregnancy body mass index and neonatal neurobehavior in infants born before 30 weeks gestation. Journal of Perinatology, 2022, , .	2.0	1
6	Analysis of Early-Life Growth and Age at Pubertal Onset in US Children. JAMA Network Open, 2022, 5, e2146873.	5.9	13
7	Authors' reply re: Prenatal tobacco smoke exposure and neurological impairment at 10Âyears of age among children born extremely preterm. BJOG: an International Journal of Obstetrics and Gynaecology, 2022, , .	2.3	0
8	Extreme prematurity: Risk and resiliency. Current Problems in Pediatric and Adolescent Health Care, 2022, 52, 101132.	1.7	15
9	Maternal tobacco smoking and offspring autism spectrum disorder or traits in <scp>ECHO</scp> cohorts. Autism Research, 2022, 15, 551-569.	3.8	10
10	Association of Abnormal Findings on Neonatal Cranial Ultrasound With Neurobehavior at Neonatal Intensive Care Unit Discharge in Infants Born Before 30 Weeksâ€™ Gestation. JAMA Network Open, 2022, 5, e226561.	5.9	7
11	Psychiatric Outcomes, Functioning, and Participation in Extremely Low Gestational Age Newborns at Age 15 Years. Journal of the American Academy of Child and Adolescent Psychiatry, 2022, 61, 892-904.e2.	0.5	7
12	Maternal social risk, gestational age at delivery, and cognitive outcomes among adolescents born extremely preterm. Paediatric and Perinatal Epidemiology, 2022, 36, 654-664.	1.7	4
13	CUE: CpG impUtation ensemble for DNA methylation levels across the human methylation450 (HM450) and EPIC (HM850) BeadChip platforms. Epigenetics, 2021, 16, 851-861.	2.7	1
14	Epigenome-wide analysis identifies genes and pathways linked to acoustic cry variation in preterm infants. Pediatric Research, 2021, 89, 1848-1854.	2.3	4
15	Familiesâ€™ perspectives on monitoring infantsâ€™ health and development after discharge from NICUs. Pediatric Research, 2021, 89, 722-724.	2.3	2
16	Placental programming, perinatal inflammation, and neurodevelopment impairment among those born extremely preterm. Pediatric Research, 2021, 89, 326-335.	2.3	25
17	Blood myo-inositol concentrations in preterm and term infants. Journal of Perinatology, 2021, 41, 247-254.	2.0	5
18	Anxiety and Depression Correlates at Age 10 in Children Born Extremely Preterm. Journal of Pediatric Psychology, 2021, 46, 422-432.	2.1	5

#	ARTICLE	IF	CITATIONS
19	Magnetic Resonance Biomarkers in Very Preterm Infants: Relationships to Perinatal Factors. Journal of Pediatrics, 2021, 233, 9-11.	1.8	0
20	Prenatal exposure to toxic and essential metal/metalloid mixtures is associated with placental genomic signatures. ISEE Conference Abstracts, 2021, 2021, .	0.0	0
21	Prenatal Exposure to Toxic Metal Mixtures and Risk of Bacterial Sepsis in Extremely Low Gestational Age Newborns. ISEE Conference Abstracts, 2021, 2021, .	0.0	0
22	Development of the genomic inflammatory index (GII) to assess key maternal antecedents associated with placental inflammation. Placenta, 2021, 111, 82-90.	1.5	1
23	Adherence to Car Seat Tolerance Screening Differs by Indication and Patient Characteristics. Maternal and Child Health Journal, 2021, 25, 1707-1716.	1.5	2
24	A Consideration of Racism in Pediatric Epidemiologic Studies. Journal of Pediatrics, 2021, 239, 225-227.	1.8	7
25	Heart rate characteristics monitoring and reduction in mortality or neurodevelopmental impairment in extremely low birthweight infants with sepsis. Early Human Development, 2021, 159, 105419.	1.8	7
26	Pre-pregnancy BMI-associated miRNA and mRNA expression signatures in the placenta highlight a sexually-dimorphic response to maternal underweight status. Scientific Reports, 2021, 11, 15743.	3.3	9
27	NEOage clocks - epigenetic clocks to estimate post-menstrual and postnatal age in preterm infants. Aging, 2021, 13, 23527-23544.	3.1	7
28	Neurocognitive and social-communicative function of children born very preterm at 10 years of age: Associations with microorganisms recovered from the placenta parenchyma. Journal of Perinatology, 2020, 40, 306-315.	2.0	9
29	Psychosocial and medical adversity associated with neonatal neurobehavior in infants born before 30 weeks gestation. Pediatric Research, 2020, 87, 721-729.	2.3	24
30	Novel diffuse white matter abnormality biomarker at term-equivalent age enhances prediction of long-term motor development in very preterm children. Scientific Reports, 2020, 10, 15920.	3.3	12
31	Genetic and epigenetic factors and early life inflammation as predictors of neurodevelopmental outcomes. Seminars in Fetal and Neonatal Medicine, 2020, 25, 101115.	2.3	26
32	A role for microRNAs in the epigenetic control of sexually dimorphic gene expression in the human placenta. Epigenomics, 2020, 12, 1543-1558.	2.1	18
33	Evidence for the placenta-brain axis: multi-omic kernel aggregation predicts intellectual and social impairment in children born extremely preterm. Molecular Autism, 2020, 11, 97.	4.9	26
34	Albuminuria, Hypertension, and Reduced Kidney Volumes in Adolescents Born Extremely Premature. Frontiers in Pediatrics, 2020, 8, 230.	1.9	20
35	Mortality and Neurodevelopmental Outcomes in the Heart Rate Characteristics Monitoring Randomized Controlled Trial. Journal of Pediatrics, 2020, 219, 48-53.	1.8	18
36	Treatment for hypotension in the first 24 postnatal hours and the risk of hearing loss among extremely low birth weight infants. Journal of Perinatology, 2020, 40, 774-780.	2.0	2

#	ARTICLE	IF	CITATIONS
37	Early growth outcomes in very low birth weight infants with bronchopulmonary dysplasia or fetal growth restriction. <i>Pediatric Research</i> , 2020, 88, 601-604.	2.3	1
38	Association of circulating uric acid and angiotensin-(1â€“7) in relation to higher blood pressure in adolescents and the influence of preterm birth. <i>Journal of Human Hypertension</i> , 2020, 34, 818-825.	2.2	11
39	Sociodemographic and medical influences on neurobehavioral patterns in preterm infants: A multi-center study. <i>Early Human Development</i> , 2020, 142, 104954.	1.8	22
40	Renal function and blood pressure are altered in adolescents born preterm. <i>Pediatric Nephrology</i> , 2019, 34, 137-144.	1.7	49
41	Placental CpG Methylation of Inflammation, Angiogenic, and Neurotrophic Genes and Retinopathy of Prematurity. , 2019, 60, 2888.		20
42	Antenatal Steroid Exposure, Aerobic Fitness, and Physical Activity in Adolescents Born Preterm with Very Low Birth Weight. <i>Journal of Pediatrics</i> , 2019, 215, 98-106.e2.	1.8	7
43	Acetaminophen use during pregnancy and DNA methylation in the placenta of the extremely low gestational age newborn (ELGAN) cohort. <i>Environmental Epigenetics</i> , 2019, 5, dvz010.	1.8	34
44	Socioeconomic status and early blood concentrations of inflammation-related and neurotrophic proteins among extremely preterm newborns. <i>PLoS ONE</i> , 2019, 14, e0214154.	2.5	11
45	Early Postnatal IGF-1 and IGFBP-1 Blood Levels in Extremely Preterm Infants: Relationships with Indicators of Placental Insufficiency and with Systemic Inflammation. <i>American Journal of Perinatology</i> , 2019, 36, 1442-1452.	1.4	16
46	Associations between placental CpG methylation of metastable epialleles and childhood body mass index across ages one, two and ten in the Extremely Low Gestational Age Newborns (ELGAN) cohort. <i>Epigenetics</i> , 2019, 14, 1102-1111.	2.7	22
47	Association of Circulating Proinflammatory and Anti-inflammatory Protein Biomarkers in Extremely Preterm Born Children with Subsequent Brain Magnetic Resonance Imaging Volumes and Cognitive Function at Age 10 Years. <i>Journal of Pediatrics</i> , 2019, 210, 81-90.e3.	1.8	17
48	Epigenome-wide DNA methylation in placentas from preterm infants: association with maternal socioeconomic status. <i>Epigenetics</i> , 2019, 14, 751-765.	2.7	50
49	Epigenome-wide Analysis Identifies Genes and Pathways Linked to Neurobehavioral Variation in Preterm Infants. <i>Scientific Reports</i> , 2019, 9, 6322.	3.3	43
50	Microorganisms in the Placenta: Links to Early-Life Inflammation and Neurodevelopment in Children. <i>Clinical Microbiology Reviews</i> , 2019, 32, .	13.6	24
51	Executive Dysfunction Early Postnatal Biomarkers among Children Born Extremely Preterm. <i>Journal of NeuroImmune Pharmacology</i> , 2019, 14, 188-199.	4.1	16
52	Obesity is Associated with Higher Blood Pressure and Higher Levels of Angiotensin II but Lower Angiotensin-(1-7) in Adolescents Born Preterm. <i>Journal of Pediatrics</i> , 2019, 205, 55-60.e1.	1.8	34
53	Hand Preference and Cognitive, Motor, and Behavioral Functioning in 10-Year-Old Extremely Preterm Children. <i>Journal of Pediatrics</i> , 2018, 195, 279-282.e3.	1.8	5
54	Antenatal and neonatal antecedents of learning limitations in 10-year old children born extremely preterm. <i>Early Human Development</i> , 2018, 118, 8-14.	1.8	3

#	ARTICLE	IF	CITATIONS
55	Elevations of inflammatory proteins in neonatal blood are associated with obesity and overweight among 2-year-old children born extremely premature. <i>Pediatric Research</i> , 2018, 83, 1110-1119.	2.3	12
56	Antenatal and Neonatal Antecedents of Executive Dysfunctions in Extremely Preterm Children. <i>Journal of Child Neurology</i> , 2018, 33, 198-208.	1.4	5
57	Are Extremely Low Gestational Age Newborns Born to Obese Women at Increased Risk of Cerebral Palsy at 2 Years?. <i>Journal of Child Neurology</i> , 2018, 33, 216-224.	1.4	10
58	Antecedents of Screening Positive for Attention Deficit Hyperactivity Disorder in Ten-Year-Old Children Born Extremely Preterm. <i>Pediatric Neurology</i> , 2018, 81, 25-30.	2.1	25
59	Socioemotional dysfunctions at age 10 years in extremely preterm newborns with late-onset bacteremia. <i>Early Human Development</i> , 2018, 121, 1-7.	1.8	2
60	Neonatal Intensive Care Unit Length of Stay Reduction by Heart Rate Characteristics Monitoring. <i>Journal of Pediatrics</i> , 2018, 198, 162-167.	1.8	23
61	Neonatal systemic inflammation and the risk of low scores on measures of reading and mathematics achievement at age 10 years among children born extremely preterm. <i>International Journal of Developmental Neuroscience</i> , 2018, 66, 45-53.	1.6	13
62	Antecedents of Obesity Among Children Born Extremely Preterm. <i>Pediatrics</i> , 2018, 142, .	2.1	23
63	The risk of neurodevelopmental disorders at age 10 years associated with blood concentrations of interleukins 4 and 10 during the first postnatal month of children born extremely preterm. <i>Cytokine</i> , 2018, 110, 181-188.	3.2	25
64	Neurocognitive and Health Correlates of Overweight and Obesity among Ten-Year-Old Children Born Extremely Preterm. <i>Journal of Pediatrics</i> , 2018, 200, 84-90.e4.	1.8	9
65	Among Children Born Extremely Preterm a Higher Level of Circulating Neurotrophins Is Associated with Lower Risk of Cognitive Impairment at School Age. <i>Journal of Pediatrics</i> , 2018, 201, 40-48.e4.	1.8	13
66	Elevated protein concentrations in newborn blood and the risks of autism spectrum disorder, and of social impairment, at age 10 years among infants born before the 28th week of gestation. <i>Translational Psychiatry</i> , 2018, 8, 115.	4.8	16
67	Placental CpG methylation of infants born extremely preterm predicts cognitive impairment later in life. <i>PLoS ONE</i> , 2018, 13, e0193271.	2.5	26
68	Sexual epigenetic dimorphism in the human placenta: implications for susceptibility during the prenatal period. <i>Epigenomics</i> , 2017, 9, 267-278.	2.1	94
69	Antecedents and early correlates of high and low concentrations of angiogenic proteins in extremely preterm newborns. <i>Clinica Chimica Acta</i> , 2017, 471, 1-5.	1.1	15
70	Antenatal corticosteroids and cardiometabolic outcomes in adolescents born with very low birth weight. <i>Pediatric Research</i> , 2017, 82, 697-703.	2.3	8
71	Neurocognitive Outcomes at 10 Years of Age in Extremely Preterm Newborns with Late-Onset Bacteremia. <i>Journal of Pediatrics</i> , 2017, 187, 43-49.e1.	1.8	51
72	Cumulative Incidence of Seizures and Epilepsy in Ten-Year-Old Children Born Before 28 Weeks' Gestation. <i>Pediatric Neurology</i> , 2017, 73, 13-19.	2.1	26

#	ARTICLE	IF	CITATIONS
73	Both antenatal and postnatal inflammation contribute information about the risk of brain damage in extremely preterm newborns. <i>Pediatric Research</i> , 2017, 82, 691-696.	2.3	54
74	Postnatal systemic inflammation and neuroophthalmologic dysfunctions in extremely low gestational age children. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2017, 106, 454-457.	1.5	2
75	Neurodevelopment at Age 10 Years of Children Born <28 Weeks With Fetal Growth Restriction. <i>Pediatrics</i> , 2017, 140, .	2.1	54
76	Maternal obesity and attention-related symptoms in the preterm offspring. <i>Early Human Development</i> , 2017, 115, 9-15.	1.8	15
77	Social Responsiveness Scale Assessment of the Preterm Behavioral Phenotype in 10-Year-Olds Born Extremely Preterm. <i>Journal of Developmental and Behavioral Pediatrics</i> , 2017, 38, 697-705.	1.1	20
78	Antenatal corticosteroids and the renin-angiotensin-aldosterone system in adolescents born preterm. <i>Pediatric Research</i> , 2017, 81, 88-93.	2.3	30
79	Microorganisms in the human placenta are associated with altered CpG methylation of immune and inflammation-related genes. <i>PLoS ONE</i> , 2017, 12, e0188664.	2.5	19
80	Genomic biomarkers of prenatal intrauterine inflammation in umbilical cord tissue predict later life neurological outcomes. <i>PLoS ONE</i> , 2017, 12, e0176953.	2.5	18
81	Antecedents of inflammation biomarkers in preterm newborns on days 21 and 28. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2016, 105, 274-280.	1.5	14
82	Duration of Systemic Inflammation in the First Postnatal Month Among Infants Born Before the 28th Week of Gestation. <i>Inflammation</i> , 2016, 39, 672-677.	3.8	33
83	Weight Status in the First 2 Years of Life and Neurodevelopmental Impairment in Extremely Low Gestational Age Newborns. <i>Journal of Pediatrics</i> , 2016, 168, 30-35.e2.	1.8	20
84	Systemic inflammation on postnatal days 21 and 28 and indicators of brain dysfunction 2years later among children born before the 28th week of gestation. <i>Early Human Development</i> , 2016, 93, 25-32.	1.8	58
85	Improved Filtering of Pulse Oximeter Monitoring Alarms in the Neonatal ICU: Bedside Significance. <i>Respiratory Care</i> , 2016, 61, 85-89.	1.6	2
86	Maternal obesity and development of the preterm newborn at 2Âyears. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2015, 104, 900-903.	1.5	16
87	Elevated Endogenous Erythropoietin Concentrations Are Associated with Increased Risk of Brain Damage in Extremely Preterm Neonates. <i>PLoS ONE</i> , 2015, 10, e0115083.	2.5	29
88	Preterm Birth Is Associated with Higher Uric Acid Levels in Adolescents. <i>Journal of Pediatrics</i> , 2015, 167, 76-80.	1.8	12
89	Patterns of psychological distress in mothers of preterm infants. , 2015, 41, 154-163.		141
90	The Breadth and Type of Systemic Inflammation and the Risk of Adverse Neurological Outcomes in Extremely Low Gestation Newborns. <i>Pediatric Neurology</i> , 2015, 52, 42-48.	2.1	82

#	ARTICLE	IF	CITATIONS
91	Antenatal and Early Postnatal Antecedents of Parent-Reported Attention Problems at 2 Years of Age. <i>Journal of Pediatrics</i> , 2015, 166, 20-25.e1.	1.8	17
92	Are preterm newborns who have relative hyperthyrotropinemia at increased risk of brain damage?. <i>Journal of Pediatric Endocrinology and Metabolism</i> , 2014, 27, 1077-88.	0.9	10
93	Apolipoprotein E genotype and outcome in infants with hypoxic-ischemic encephalopathy. <i>Pediatric Research</i> , 2014, 75, 424-430.	2.3	9
94	Elevated blood levels of inflammation-related proteins are associated with an attention problem at age 24 mo in extremely preterm infants. <i>Pediatric Research</i> , 2014, 75, 781-787.	2.3	105
95	Systemic Inflammation and Cerebral Palsy Risk in Extremely Preterm Infants. <i>Journal of Child Neurology</i> , 2014, 29, 1692-1698.	1.4	75
96	Preschool Motor Skills Following Physical and Occupational Therapy Services Among Non-Disabled Very Low Birth Weight Children. <i>Maternal and Child Health Journal</i> , 2014, 18, 821-828.	1.5	3
97	Maternally administered interventions for preterm infants in the NICU: Effects on maternal psychological distress and mother-infant relationship. , 2014, 37, 695-710.		106
98	Maternal Race, Demography, and Health Care Disparities Impact Risk for Intraventricular Hemorrhage in Preterm Neonates. <i>Journal of Pediatrics</i> , 2014, 164, 1005-1011.e3.	1.8	49
99	Randomized Controlled Trial of Early Enteral Fat Supplement and Fish Oil to Promote Intestinal Adaptation in Premature Infants with an Enterostomy. <i>Journal of Pediatrics</i> , 2014, 165, 274-279.e1.	1.8	15
100	Retinopathy of prematurity and brain damage in the very preterm newborn. <i>Journal of AAPOS</i> , 2014, 18, 241-247.	0.3	33
101	Factors Associated with Collaboration Among Agencies Serving Children with Complex Chronic Conditions. <i>Maternal and Child Health Journal</i> , 2013, 17, 1533-1540.	1.5	4
102	Pharmacokinetics and safety of a single intravenous dose of myo-inositol in preterm infants of 23-29 wk. <i>Pediatric Research</i> , 2013, 74, 721-729.	2.3	21
103	Two-hit model of brain damage in the very preterm newborn: small for gestational age and postnatal systemic inflammation. <i>Pediatric Research</i> , 2013, 73, 362-370.	2.3	99
104	Systemic Inflammation, Intraventricular Hemorrhage, and White Matter Injury. <i>Journal of Child Neurology</i> , 2013, 28, 1637-1645.	1.4	50
105	Septicemia mortality reduction in neonates in a heart rate characteristics monitoring trial. <i>Pediatric Research</i> , 2013, 74, 570-575.	2.3	126
106	Extreme prematurity and attention deficit: epidemiology and prevention. <i>Frontiers in Human Neuroscience</i> , 2013, 7, 578.	2.0	23
107	Intraventricular Hemorrhage and Developmental Outcomes at 24 Months of Age in Extremely Preterm Infants. <i>Journal of Child Neurology</i> , 2012, 27, 22-29.	1.4	97
108	Systemic responses of preterm newborns with presumed or documented bacteraemia. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2012, 101, 355-359.	1.5	43
