#	ARTICLE	IF	CITATIONS
1	Sleep Spindle Activity is Associated with the Integration of New Memories and Existing Knowledge. <i>Journal of Neuroscience</i> , 2010, 30, 14356-14360.	3.6	422
2	The Role of Sleep Spindles and Slow-Wave Activity in Integrating New Information in Semantic Memory. <i>Journal of Neuroscience</i> , 2013, 33, 15376-15381.	3.6	150
3	Novel word integration in the mental lexicon: Evidence from unmasked and masked semantic priming. <i>Quarterly Journal of Experimental Psychology</i> , 2013, 66, 1001-1025.	1.1	82
4	Short Article: Newly Learned Spoken Words Show Long-Term Lexical Competition Effects. <i>Quarterly Journal of Experimental Psychology</i> , 2008, 61, 361-371.	1.1	68
5	The role of memory consolidation in generalisation of new linguistic information. <i>Cognition</i> , 2012, 125, 107-112.	2.2	46
6	From specific examples to general knowledge in language learning. <i>Cognitive Psychology</i> , 2015, 79, 1-39.	2.2	45
7	Frequency effects in spoken and visual word recognition: Evidence from dual-task methodologies.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2006, 32, 104-119.	0.9	43
8	Targeted memory reactivation of newly learned words during sleep triggers REM-mediated integration of new memories and existing knowledge. <i>Neurobiology of Learning and Memory</i> , 2017, 137, 77-82.	1.9	41
9	Age of acquisition modulates the amplitude of the P300 component in spoken word recognition. <i>Neuroscience Letters</i> , 2005, 379, 17-22.	2.1	22
10	The nature of phoneme representation in spoken word recognition.. <i>Journal of Experimental Psychology: General</i> , 2008, 137, 282-302.	2.1	22
11	The impact of music on learning and consolidation of novel words. <i>Memory</i> , 2017, 25, 107-121.	1.7	22
12	Sleep deprivation and memory: Meta-analytic reviews of studies on sleep deprivation before and after learning.. <i>Psychological Bulletin</i> , 2021, 147, 1215-1240.	6.1	18
13	Spoken word processing creates a lexical bottleneck. <i>Language and Cognitive Processes</i> , 2012, 27, 572-593.	2.2	15
14	Higher sleep spindle activity is associated with fewer false memories in adolescent girls. <i>Neurobiology of Learning and Memory</i> , 2019, 157, 96-105.	1.9	11
15	Generalisation in language learning can withstand total sleep deprivation. <i>Neurobiology of Learning and Memory</i> , 2020, 173, 107274.	1.9	4
16	Reinstatement of odour context cues veridical memories but not false memories. <i>Memory</i> , 2019, 27, 575-579.	1.7	2
17	Lexical Consolidation. , 2015, , 920-925.		0
