IENNIEED S POLLOCK

#	Article	IF	CITATIONS
1	Endothelin. Pharmacological Reviews, 2016, 68, 357-418.	16.0	574
2	Expression of Multiple Isoforms of Nitric Oxide Synthase in Normal and Atherosclerotic Vessels. Arteriosclerosis, Thrombosis, and Vascular Biology, 1997, 17, 2479-2488.	2.4	426
3	Endothelin A Receptor Blockade Reduces Diabetic Renal Injury via an Anti-Inflammatory Mechanism. Journal of the American Society of Nephrology: JASN, 2007, 18, 143-154.	6.1	177
4	Adverse Childhood Experiences and Blood Pressure Trajectories From Childhood to Young Adulthood. Circulation, 2015, 131, 1674-1681.	1.6	169
5	Evidence for endothelin involvement in the response to high salt. American Journal of Physiology - Renal Physiology, 2001, 281, F144-F150.	2.7	153
6	Expression of Nitric Oxide Synthase Isoforms in Bone and Bone Cell Cultures. Journal of Bone and Mineral Research, 1997, 12, 1108-1115.	2.8	148
7	Identification of the NO Synthase isoforms Expressed in Human Neutrophil Granulocytes, Megakaryocytes and Platelets. Thrombosis and Haemostasis, 1997, 77, 163-167.	3.4	139
8	Nitric Oxide Synthesis and Oxidative Stress in the Renal Cortex of Rats with Diabetes Mellitus. Journal of the American Society of Nephrology: JASN, 2001, 12, 1630-1639.	6.1	133
9	High expression of endothelial nitric oxide synthase in plexiform lesions of pulmonary hypertension. , 1998, 185, 313-318.		123
10	TNF-α inhibition reduces renal injury in DOCA-salt hypertensive rats. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2008, 294, R76-R83.	1.8	121
11	Endothelin-1 Increases Glomerular Permeability and Inflammation Independent of Blood Pressure in the Rat. Hypertension, 2010, 56, 942-949.	2.7	112
12	Shear stress-mediated NO production in inner medullary collecting duct cells. American Journal of Physiology - Renal Physiology, 2000, 279, F270-F274.	2.7	107
13	Renal endothelin in chronic angiotensin II hypertension. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2002, 283, R243-R248.	1.8	103
14	Racial Differences in Endothelin-1 at Rest and in Response to Acute Stress in Adolescent Males. Hypertension, 2000, 35, 722-725.	2.7	84
15	Adverse Childhood Experiences Are Associated With Detrimental Hemodynamics and Elevated Circulating Endothelin-1 in Adolescents and Young Adults. Hypertension, 2014, 64, 201-207.	2.7	81
16	Collecting Duct-Derived Endothelin Regulates Arterial Pressure and Na Excretion via Nitric Oxide. Hypertension, 2008, 51, 1605-1610.	2.7	79
17	Renal Collecting Duct NOS1 Maintains Fluid–Electrolyte Homeostasis and Blood Pressure. Hypertension, 2013, 62, 91-98.	2.7	75
18	Hypertensive Response to Acute Stress Is Attenuated in Interleukin-6 Knockout Mice. Hypertension, 2004, 44, 259-263.	2.7	73

#	Article	IF	CITATIONS
19	Early Life Stress Sensitizes Rats to Angiotensin II–Induced Hypertension and Vascular Inflammation in Adult Life. Hypertension, 2010, 55, 494-499.	2.7	70
20	Gender Differences in ET and NOS Systems in ETBReceptor–Deficient Rats. Hypertension, 2003, 41, 657-662.	2.7	67
21	Macula Densa Nitric Oxide Synthase 1β Protects against Salt-Sensitive Hypertension. Journal of the American Society of Nephrology: JASN, 2016, 27, 2346-2356.	6.1	55
22	Early Life Stress Enhances Angiotensin II–Mediated Vasoconstriction by Reduced Endothelial Nitric Oxide Buffering Capacity. Hypertension, 2011, 58, 619-626.	2.7	47
23	Long-Term Endothelin-A Receptor Antagonism Provides Robust Renal Protection in Humanized Sickle Cell Disease Mice. Journal of the American Society of Nephrology: JASN, 2017, 28, 2443-2458.	6.1	47
24	Plasma Endothelin-1 Release During Acute Stress: Role of Ethnicity and Sex. Psychosomatic Medicine, 2002, 64, 707-713.	2.0	43
25	Novel Nitric Oxide Synthase–Dependent Mechanism of Vasorelaxation in Small Arteries From Hypertensive Rats. Hypertension, 2007, 49, 893-901.	2.7	42
26	NOS1-dependent negative feedback regulation of the epithelial sodium channel in the collecting duct. American Journal of Physiology - Renal Physiology, 2015, 308, F244-F251.	2.7	38
27	Early life stress sensitizes the renal and systemic sympathetic system in rats. American Journal of Physiology - Renal Physiology, 2013, 305, F390-F395.	2.7	36
28	Endothelin and NOS1/nitric oxide signaling and regulation of sodium homeostasis. Current Opinion in Nephrology and Hypertension, 2008, 17, 70-75.	2.0	33
29	Early life stress downregulates endothelin receptor expression and enhances acute stress-mediated blood pressure responses in adult rats. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2010, 299, R185-R191.	1.8	33
30	Early life stress induces renal dysfunction in adult male rats but not female rats. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2013, 304, R121-R129.	1.8	32
31	Loss of circadian gene <i>Bmal1</i> in the collecting duct lowers blood pressure in male, but not female, mice. American Journal of Physiology - Renal Physiology, 2020, 318, F710-F719.	2.7	32
32	High dietary sodium causes dyssynchrony of the renal molecular clock in rats. American Journal of Physiology - Renal Physiology, 2018, 314, F89-F98.	2.7	30
33	Evidence for Gâ€Protein–Coupled Estrogen Receptor as a Pronatriuretic Factor. Journal of the American Heart Association, 2020, 9, e015110.	3.7	30
34	Endothelin Activation of Reactive Oxygen Species Mediates Stress-Induced Pressor Response in Dahl Salt-Sensitive Prehypertensive Rats. Hypertension, 2010, 56, 282-289.	2.7	29
35	Protein Kinase C-Dependent NAD(P)H Oxidase Activation Induced by Type 1 Diabetes in Renal Medullary Thick Ascending Limb. Hypertension, 2010, 55, 468-473.	2.7	29
36	Childhood adversity and mechanistic links to hypertension risk in adulthood. British Journal of Pharmacology, 2019, 176, 1932-1950.	5.4	29

#	Article	IF	CITATIONS
37	Unique endothelin receptor binding in kidneys of ET _B receptor deficient rats. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2003, 284, R674-R681.	1.8	27
38	Histone deacetylase 1 reduces NO production in endothelial cells via lysine deacetylation of NO synthase 3. American Journal of Physiology - Heart and Circulatory Physiology, 2014, 307, H803-H809.	3.2	27
39	Reactive species balance via GTP cyclohydrolase I regulates glioblastoma growth and tumor initiating cell maintenance. Neuro-Oncology, 2018, 20, 1055-1067.	1.2	27
40	Sphingosine-1-Phosphate Evokes Unique Segment-Specific Vasoconstriction of the Renal Microvasculature. Journal of the American Society of Nephrology: JASN, 2014, 25, 1774-1785.	6.1	26
41	Early life stress in male mice induces superoxide production and endothelial dysfunction in adulthood. American Journal of Physiology - Heart and Circulatory Physiology, 2016, 310, H1267-H1274.	3.2	26
42	Urinary excretion of vasoactive factors are correlated to sodium excretion. American Journal of Hypertension, 2001, 14, 1003-1006.	2.0	25
43	Loss of renal medullary endothelin B receptor function during salt deprivation is regulated by angiotensin II. American Journal of Physiology - Renal Physiology, 2012, 303, F659-F666.	2.7	25
44	Dynamin activates NO production in rat renal inner medullary collecting ducts via protein-protein interaction with NOS1. American Journal of Physiology - Renal Physiology, 2011, 301, F118-F124.	2.7	23
45	Endothelinâ€1 as a master regulator of wholeâ€body Na ⁺ homeostasis. FASEB Journal, 2015, 29, 4937-4944.	0.5	23
46	HDAC1: an environmental sensor regulating endothelial function. Cardiovascular Research, 2022, 118, 1885-1903.	3.8	21
47	PKC-dependent superoxide production by the renal medullary thick ascending limb from diabetic rats. American Journal of Physiology - Renal Physiology, 2009, 297, F1220-F1228.	2.7	20
48	Nitric oxide and the A and B of endothelin of sodium homeostasis. Current Opinion in Nephrology and Hypertension, 2013, 22, 26-31.	2.0	20
49	Mycophenolate mofetil prevents high-fat diet-induced hypertension and renal glomerular injury in Dahl SS rats. Physiological Reports, 2013, 1, e00137.	1.7	20
50	Collecting Duct Nitric Oxide Synthase 1ß Activation Maintains Sodium Homeostasis During High Sodium Intake Through Suppression of Aldosterone and Renal Angiotensin II Pathways. Journal of the American Heart Association, 2017, 6, .	3.7	20
51	Diurnal Control of Blood Pressure Is Uncoupled From Sodium Excretion. Hypertension, 2020, 75, 1624-1634.	2.7	20
52	Time-restricted feeding rescues high-fat-diet-induced hippocampal impairment. IScience, 2021, 24, 102532.	4.1	20
53	Endogenous endothelin attenuates the pressor response to acute environmental stress via the ETAreceptor. American Journal of Physiology - Heart and Circulatory Physiology, 2005, 288, H1829-H1835.	3.2	19
54	In vivo evidence for endothelin-1-mediated attenuation of α1-adrenergic stimulation. American Journal of Physiology - Heart and Circulatory Physiology, 2006, 290, H1251-H1258.	3.2	19

#	Article	IF	CITATIONS
55	Acute Pressor Response to Psychosocial Stress Is Dependent on Endotheliumâ€Derived Endothelinâ€1. Journal of the American Heart Association, 2018, 7, .	3.7	19
56	ETA Activation Mediates Angiotensin II-Induced Infiltration of Renal Cortical T Cells. Journal of the American Society of Nephrology: JASN, 2011, 22, 2187-2192.	6.1	18
57	High salt induces autocrine actions of ET-1 on inner medullary collecting duct NO production via upregulated ET _B receptor expression. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2016, 311, R263-R271.	1.8	17
58	Endothelin receptor-specific control of endoplasmic reticulum stress and apoptosis in the kidney. Scientific Reports, 2017, 7, 43152.	3.3	17
59	Early life stress in mice alters gut microbiota independent of maternal microbiota inheritance. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2021, 320, R663-R674.	1.8	17
60	Early life stress induces immune priming in kidneys of adult male rats. American Journal of Physiology - Renal Physiology, 2018, 314, F343-F355.	2.7	16
61	Acclimation to a Highâ€Salt Diet Is Sex Dependent. Journal of the American Heart Association, 2022, 11, e020450.	3.7	16
62	Extracellular signal-regulated kinases1/2 signaling pathways are not involved in endothelin regulation of mouse inner medullary collecting duct nitric oxide production. Life Sciences, 2012, 91, 578-582.	4.3	15
63	Dahl SS rats demonstrate enhanced aortic perivascular adipose tissue-mediated buffering of vasoconstriction through activation of NOS in the endothelium. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2016, 310, R286-R296.	1.8	14
64	Fluid-electrolyte homeostasis requires histone deacetylase function. JCI Insight, 2020, 5, .	5.0	14
65	High salt diet increases the pressor response to stress in female, but not male ETB -receptor-deficient rats. Physiological Reports, 2015, 3, e12326.	1.7	13
66	Collecting duct-specific knockout of nitric oxide synthase 3 impairs water excretion in a sex-dependent manner. American Journal of Physiology - Renal Physiology, 2016, 311, F1074-F1083.	2.7	13
67	Renal denervation attenuates hypertension but not salt sensitivity in ET _B receptor-deficient rats. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2017, 313, R425-R437.	1.8	13
68	Tauroursodeoxycholic acid (TUDCA) abolishes chronic high saltâ€induced renal injury and inflammation. Acta Physiologica, 2019, 226, e13227.	3.8	13
69	Distinct regulation of inner medullary collecting duct nitric oxide production from mice and rats. Clinical and Experimental Pharmacology and Physiology, 2013, 40, 233-239.	1.9	12
70	Water and electrolyte homeostasis brings balance to physiology. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2014, 307, R481-R483.	1.8	11
71	Angiotensin II is required to induce exaggerated salt sensitivity in Dahl rats exposed to maternal separation. Physiological Reports, 2015, 3, e12408.	1.7	11
72	Maternal separation enhances anticontractile perivascular adipose tissue function in male rats on a high-fat diet. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2018, 315, R1085-R1095.	1.8	11

#	Article	IF	CITATIONS
73	Acute Tetrahydrobiopterin Improves Endothelial Function in Patients WithÂCOPD. Chest, 2018, 154, 597-606.	0.8	11
74	Ethnic Differences in Nighttime Melatonin and Nighttime Blood Pressure: A Study in European Americans and African Americans. American Journal of Hypertension, 2019, 32, 968-974.	2.0	11
75	Activation of G protein-coupled estrogen receptor 1 ameliorates proximal tubular injury and proteinuria in Dahl salt-sensitive female rats. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2021, 320, R297-R306.	1.8	11
76	Differential regulation of nitric oxide synthase function in aorta and tail artery from 5/6 nephrectomized rats. Physiological Reports, 2013, 1, e00145.	1.7	10
77	Endothelium-derived ET-1 and the development of renal injury. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2015, 309, R1071-R1073.	1.8	10
78	Free radical scavenging decreases endothelinâ€1 excretion and glomerular albumin permeability during type 1 diabetes. Physiological Reports, 2016, 4, e13055.	1.7	10
79	Introduction to the American Heart Association's Hypertension Strategically Focused Research Network. Hypertension, 2016, 67, 674-680.	2.7	10
80	Sirt1 during childhood is associated with microvascular function later in life. American Journal of Physiology - Heart and Circulatory Physiology, 2020, 318, H1371-H1378.	3.2	10
81	Combined Endothelin A Blockade and Chlorthalidone Treatment in a Rat Model of Metabolic Syndrome. Journal of Pharmacology and Experimental Therapeutics, 2014, 351, 467-473.	2.5	9
82	Combined hydroxyurea and ET _A receptor blockade reduces renal injury in the humanized sickle cell mouse. Acta Physiologica, 2019, 225, e13178.	3.8	9
83	Hydroxyurea improves nitric oxide bioavailability in humanized sickle cell mice. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2021, 320, R630-R640.	1.8	9
84	Dynamin-2 is a novel NOS1β interacting protein and negative regulator in the collecting duct. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2016, 310, R570-R577.	1.8	8
85	Influence of the selective COX-2 inhibitor celecoxib on sex differences in blood pressure and albuminuria in spontaneously hypertensive rats. Prostaglandins and Other Lipid Mediators, 2018, 135, 16-20.	1.9	8
86	Relation of urinary endothelin-1 to stress-induced pressure natriuresis in healthy adolescents. Journal of the American Society of Hypertension, 2018, 12, 34-41.	2.3	8
87	High salt intake induces collecting duct HDAC1-dependent NO signaling. American Journal of Physiology - Renal Physiology, 2021, 320, F297-F307.	2.7	8
88	Liver circadian clock disruption alters perivascular adipose tissue gene expression and aortic function in mice. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2021, 320, R960-R971.	1.8	8
89	Pentosan polysulfate preserves renal microvascular P2X1 receptor reactivity and autoregulatory behavior in DOCA-salt hypertensive rats. American Journal of Physiology - Renal Physiology, 2016, 310, F456-F465.	2.7	6
90	Angiotensin II and the Natriuretic and Blood Pressure Response to Mental Stress in African Americans. Ethnicity and Disease, 2018, 28, 511-516.	2.3	6

#	Article	IF	CITATIONS
91	A pilot study of the effect of atorvastatin on endothelial function and albuminuria in sickle cell disease. American Journal of Hematology, 2019, 94, E299-E301.	4.1	6
92	The Link Between Childhood Adversity and Cardiovascular Disease Risk: Role of Cerebral and Systemic Vasculature. Function, 2022, 3, .	2.3	6
93	Superoxide Dismutase Activity in Small Mesenteric Arteries Is Downregulated by Angiotensin II but Not by Hypertension. Toxicological Research, 2018, 34, 363-370.	2.1	5
94	SONAR propels endothelin A receptor antagonists to success. Nature Reviews Nephrology, 2019, 15, 461-462.	9.6	4
95	The Augusta Heart Study. Journal of Environment and Health Sciences, 2019, 5, 15-23.	1.0	3
96	High Salt Diet Induces HDAC1â€Dependent Disruption of Nitric Oxide Signaling in the Renal Microvasculature. FASEB Journal, 2019, 33, 866.6.	0.5	2
97	Dahl saltâ€sensitive rats on a highâ€fat diet develop hypertension and enhanced constriction to angiotensin II without changing endothelialâ€dependent vasorelaxation. FASEB Journal, 2010, 24, 1025.9.	0.5	2
98	Early life stress induces dysregulation of the heme pathway in adult mice. Physiological Reports, 2021, 9, e14844.	1.7	1
99	Renal medullary infusion of ET B receptor agonist induces diuresis and natriuresis via nitric oxide synthase (NOS) 1 and protein kinase (PK) G pathways. FASEB Journal, 2007, 21, A495.	0.5	1
100	Abstract P060: High Salt Induces An Endothelial HDAC1-stimulating Circulating Factor Leading To Disrupted Renal Microvascular Nitric Oxide Signaling. Hypertension, 2020, 76, .	2.7	1
101	Role of collecting duct principal cell NOS1β in sodium and potassium homeostasis. Physiological Reports, 2021, 9, e15080.	1.7	1
102	Oxidative stress mediates the pressor response to acute environmental stress in Dahl saltâ€sensitive rats. FASEB Journal, 2006, 20, A357.	0.5	1
103	Sex differences in fractalkine responses in spontaneously hypertensive rats (SHR). FASEB Journal, 2007, 21, A1418.	0.5	1
104	Diabetesâ€induced NOS1 and NOS2 activity blunts oxygen consumption in renal medullary thick ascending limbs. FASEB Journal, 2010, 24, 812.10.	0.5	1
105	Mitochondrial PKC, NAD(P)H oxidase and superoxide anion in the renal medullary thick ascending limb during type 1 diabetes. FASEB Journal, 2011, 25, 664.12.	0.5	1
106	Early life stress induces endothelial dysfunction in a mouse model of maternal separation. FASEB Journal, 2012, 26, 1101.2.	0.5	1
107	Endothelin B (ETB) receptor protects against endoplasmic reticulum (ER) stressâ€induced renal damage. FASEB Journal, 2013, 27, 906.5.	0.5	1
108	Evidence that Vascular Endothelial Derived Endothelinâ€1 Promotes Development of Tunicamycinâ€Induced Endoplasmic Reticulum Stress in Renal Vessels. FASEB Journal, 2015, 29, 811.15.	0.5	1
