citing authors

#	ARTICLE	IF	CITATIONS
1	Anti-Planktonic and Anti-Biofilm Properties of Pentacyclic Triterpenesâ€™ Asiatic Acid and Ursolic Acid as Promising Antibacterial Future Pharmaceuticals. <i>Biomolecules</i> , 2022, 12, 98.	4.0	28
2	Benefits of Usage of Immobilized Silver Nanoparticles as <i>Pseudomonas aeruginosa</i> Antibiofilm Factors. <i>International Journal of Molecular Sciences</i> , 2022, 23, 284.	4.1	6
3	Is it Worth Combining <i>Solidago virgaurea</i> Extract and Antibiotics against Uropathogenic <i>Escherichia coli</i> rods? An In Vitro Model Study. <i>Pharmaceutics</i> , 2021, 13, 573.	4.5	4
4	Phytochemical Profile and Antioxidant Activities of <i>Coleus amboinicus</i> Lour. Cultivated in Indonesia and Poland. <i>Molecules</i> , 2021, 26, 2915.	3.8	14
5	Antiviral Potential of Plants against Noroviruses. <i>Molecules</i> , 2021, 26, 4669.	3.8	9
6	Natural Products and Their Potential Anti-HAV Activity. <i>Pathogens</i> , 2021, 10, 1095.	2.8	2
7	Are Uropathogenic Bacteria Living in Multispecies Biofilm Susceptible to Active Plant Ingredientâ€™ Asiatic Acid?. <i>Biomolecules</i> , 2021, 11, 1754.	4.0	7
8	The Enhancement of the Photodynamic Therapy and Ciprofloxacin Activity against Uropathogenic <i>Escherichia coli</i> Strains by <i>Polypodium vulgare</i> Rhizome Aqueous Extract. <i>Pathogens</i> , 2021, 10, 1544.	2.8	4
9	Microbiological, antioxidant and lipoxygenase-1 inhibitory activities of fruit extracts of chosen Rosaceae family species. <i>Advances in Clinical and Experimental Medicine</i> , 2020, 29, 215-224.	1.4	8
10	Differing antibacterial and antibiofilm properties of <i>Polypodium vulgare</i> L. Rhizome aqueous extract and one of its purified active ingredientsâ€™ osladin. <i>Journal of Herbal Medicine</i> , 2019, 17-18, 100261.	2.0	8
11	Photodynamic enhancement of the activity of antibiotics used in urinary tract infections. <i>Lasers in Medical Science</i> , 2019, 34, 1547-1553.	2.1	20
12	Anti-enterococcal activities of pentacyclic triterpenes. <i>Advances in Clinical and Experimental Medicine</i> , 2017, 26, 483-490.	1.4	13
13	Study of the impact of cranberry extract on the virulence factors and biofilm formation by <i>Enterococcus faecalis</i> strains isolated from urinary tract infections. <i>International Journal of Food Sciences and Nutrition</i> , 2016, 67, 1005-1016.	2.8	22
14	Biological Activity of the Methanol and Water Extracts of the Fruits of Anthocyanin-Rich Plants Grown in South-West Poland. <i>Natural Product Communications</i> , 2015, 10, 1934578X1501000.	0.5	5
15	Pentacyclic triterpenes combined with ciprofloxacin help to eradicate the biofilm formed in vitro by <i>Escherichia coli</i> . <i>Indian Journal of Medical Research</i> , 2015, 141, 343.	1.0	21
16	Effect of asiatic and ursolic acids on growth and virulence factors of uropathogenic <i>Escherichia coli</i> strains. <i>Turkish Journal of Biology</i> , 2013, 37, 556-564.	0.8	8
17	Effect of sub-minimum inhibitory concentrations of ciprofloxacin, amikacin and colistin on biofilm formation and virulence factors of <i>Escherichia coli</i> planktonic and biofilm forms isolated from human urine. <i>Brazilian Journal of Microbiology</i> , 2013, 44, 259-265.	2.0	28
18	Medicinal plants extracts affect virulence factors expression and biofilm formation by the uropathogenic <i>Escherichia coli</i> . <i>Urological Research</i> , 2012, 40, 683-697.	1.5	91

#	ARTICLE	IF	CITATIONS
19	Study on the influence of cranberry extract Åuravit SÂ-OÂ-SÂ® on the properties of uropathogenic Escherichia coli strains, their ability to form biofilm and its antioxidant properties. <i>Phytomedicine</i> , 2012, 19, 506-514.	5.3	21
20	Composition of the outer membrane proteins of Escherichia coli strains in relation to serum susceptibility after exposure to subinhibitory concentrations of amikacin and ciprofloxacin. <i>International Journal of Antimicrobial Agents</i> , 2009, 33, 579-582.	2.5	10
21	Effects of subinhibitory concentrations of amikacin and ciprofloxacin on the hydrophobicity and adherence to epithelial cells of uropathogenic Escherichia coli strains. <i>International Journal of Antimicrobial Agents</i> , 2007, 29, 700-704.	2.5	41
