## Luana Meller Manosso

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/8132362/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Environmental Enrichment Rescues Oxidative Stress and Behavioral Impairments Induced by Maternal Care Deprivation: Sex- and Developmental-Dependent Differences. Molecular Neurobiology, 2023, 60, 6757-6773.	1.9	6
2	Vitamin E for the management of major depressive disorder: possible role of the anti-inflammatory and antioxidant systems. Nutritional Neuroscience, 2022, 25, 1310-1324.	1.5	31
3	Environmental enrichment improves lifelong persistent behavioral and epigenetic changes induced by early-life stress. Journal of Psychiatric Research, 2021, 138, 107-116.	1.5	19
4	Sex-related patterns of the gut-microbiota-brain axis in the neuropsychiatric conditions. Brain Research Bulletin, 2021, 171, 196-208.	1.4	15
5	Microbiota-Gut-Brain Communication in the SARS-CoV-2 Infection. Cells, 2021, 10, 1993.	1.8	17
6	Antidepressant effects of creatine on amyloid β1–40-treated mice: The role of GSK-3β/Nrf2 pathway. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2018, 86, 270-278.	2.5	15
7	Evidence for the involvement of heme oxygenase-1 in the antidepressant-like effect of zinc. Pharmacological Reports, 2017, 69, 497-503.	1.5	13
8	Involvement of glutamatergic neurotransmission in the antidepressant-like effect of zinc in the chronic unpredictable stress model of depression. Journal of Neural Transmission, 2016, 123, 339-352.	1.4	13
9	Antidepressant-like effect of zinc is dependent on signaling pathways implicated in BDNF modulation. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2015, 59, 59-67.	2.5	36
10	Agmatine enhances antidepressant potency of MK-801 and conventional antidepressants in mice. Pharmacology Biochemistry and Behavior, 2015, 130, 9-14.	1.3	35
11	Depressive-like behavior induced by tumor necrosis factor-α is abolished by agmatine administration. Behavioural Brain Research, 2014, 261, 336-344.	1.2	57
12	Serotonergic and noradrenergic systems are implicated in the antidepressant-like effect of ursolic acid in mice. Pharmacology Biochemistry and Behavior, 2014, 124, 108-116.	1.3	43
13	Antidepressant-like effect of α-tocopherol in a mouse model of depressive-like behavior induced by TNF-α. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2013, 46, 48-57.	2.5	53
14	Nutritional strategies for dealing with depression. Food and Function, 2013, 4, 1776.	2.1	29
