#	ARTICLE	IF	CITATIONS
1	Abnormal whole-body energy metabolism in iron-deficient humans despite preserved skeletal muscle oxidative phosphorylation. <i>Scientific Reports</i> , 2022, 12, 998.	1.6	6
2	Differential responses to breath-holding, voluntary deep breathing and hypercapnia in left and right dorsal anterior cingulate. <i>Experimental Physiology</i> , 2021, 106, 726-735.	0.9	4
3	Sir George Johnson FRCP (1818-1896), high blood pressure and the continuing altercation about its origins. <i>Experimental Physiology</i> , 2021, 106, 1886-1896.	0.9	0
4	Iron bioavailability and cardiopulmonary function during ascent to very high altitude. <i>European Respiratory Journal</i> , 2020, 56, 1902285.	3.1	10
5	Intravenous iron delivers a sustained (8-week) lowering of pulmonary artery pressure during exercise in healthy older humans. <i>Physiological Reports</i> , 2019, 7, e14164.	0.7	11
6	Effects of modest iron loading on iron indices in healthy individuals. <i>Journal of Applied Physiology</i> , 2018, 125, 1710-1719.	1.2	2
7	Cardiopulmonary phenotype associated with human PHD2 mutation. <i>Physiological Reports</i> , 2017, 5, e13224.	0.7	10
8	Changes in pulmonary vascular responsiveness to hypoxia. <i>Experimental Physiology</i> , 2017, 102, 1561-1561.	0.9	1
9	Human hypoxic pulmonary vasoconstriction is unaltered by 8h of preceding isocapnic hyperoxia. <i>Physiological Reports</i> , 2017, 5, e13396.	0.7	6
10	Clinical iron deficiency disturbs normal human responses to hypoxia. <i>Journal of Clinical Investigation</i> , 2016, 126, 2139-2150.	3.9	82
11	How Do Antihypertensive Drugs Work? Insights from Studies of the Renal Regulation of Arterial Blood Pressure. <i>Frontiers in Physiology</i> , 2016, 7, 320.	1.3	21
12	Determinants of ventilation and pulmonary artery pressure during early acclimatization to hypoxia in humans. <i>Journal of Physiology</i> , 2016, 594, 1197-1213.	1.3	19
13	Age, sex and arterial pressure: the kidney is essential. <i>Experimental Physiology</i> , 2016, 101, 448-448.	0.9	0
14	Suppression of plasma hepcidin by venesection during steady-state hypoxia. <i>Blood</i> , 2016, 127, 1206-1207.	0.6	15
15	Elevation of iron storage in humans attenuates the pulmonary vascular response to hypoxia. <i>Journal of Applied Physiology</i> , 2016, 121, 537-544.	1.2	23
16	Exaggerated pulmonary vascular response to acute hypoxia in older men. <i>Experimental Physiology</i> , 2015, 100, 1187-1198.	0.9	17
17	A cross-sectional study of the prevalence and associations of iron deficiency in a cohort of patients with chronic obstructive pulmonary disease. <i>BMJ Open</i> , 2015, 5, e007911.	0.8	48
18	Output, pressure and shunt: misrepresentation of pulmonary haemodynamics. <i>Journal of Physiology</i> , 2015, 593, 481-481.	1.3	1

#	ARTICLE	IF	CITATIONS
19	Contrasting effects of ascorbate and iron on the pulmonary vascular response to hypoxia in humans. <i>Physiological Reports</i> , 2014, 2, e12220.	0.7	20
20	Dexamethasone mimics aspects of physiological acclimatization to 8 hours of hypoxia but suppresses plasma erythropoietin. <i>Journal of Applied Physiology</i> , 2013, 114, 948-956.	1.2	18
21	Unsupported assumption in model of salt-sensitive hypertension. <i>Journal of Physiology</i> , 2013, 591, 2963-2963.	1.3	2
22	Commercial Air Travel and In-Flight Pulmonary Hypertension. <i>Aviation, Space, and Environmental Medicine</i> , 2013, 84, 65-67.	0.6	14
23	Variations in Alveolar Partial Pressure for Carbon Dioxide and Oxygen Have Additive Not Synergistic Acute Effects on Human Pulmonary Vasoconstriction. <i>PLoS ONE</i> , 2013, 8, e67886.	1.1	18
24	Cardiopulmonary function in two human disorders of the hypoxia-inducible factor (HIF) pathway: von Hippel-Lindau disease and HIF-1 α gain-of-function mutation. <i>FASEB Journal</i> , 2011, 25, 2001-2011.	0.2	86
25	Extent to which pulmonary vascular responses to P _{CO₂} and P _{O₂} play a functional role within the healthy human lung. <i>Journal of Applied Physiology</i> , 2010, 108, 1084-1096.	1.2	29
26	A genetic disease in humans demonstrates the importance of hypoxia-inducible factor in skeletal muscle metabolism. <i>FASEB Journal</i> , 2009, 23, 955-32.	0.2	0
27	The sympathetic chemoreflex response to hypoxia in humans is sensitised by prior exposure to 8 h of isocapnic hypoxia. <i>FASEB Journal</i> , 2009, 23, 1008-14.	0.2	0
28	The increase in pulmonary arterial pressure caused by hypoxia depends on iron status. <i>Journal of Physiology</i> , 2008, 586, 5999-6005.	1.3	139
29	Iron chelation does not potentiate early acclimatisation to sustained hypoxia in humans. <i>FASEB Journal</i> , 2007, 21, A925.	0.2	0
30	Intravenous iron loading inhibits the pulmonary vascular response to hypoxia in humans. <i>FASEB Journal</i> , 2007, 21, A1438.	0.2	0
31	The effect of hydralazine on cardiorespiratory responses to hypoxia may not involve activation of the HIF pathway. <i>FASEB Journal</i> , 2006, 20, LB30.	0.2	0
32	Two temporal components within the human pulmonary vascular response to $\frac{1}{2}$ h of isocapnic hypoxia. <i>Journal of Applied Physiology</i> , 2005, 98, 1125-1139.	1.2	117
33	Separating the direct effect of hypoxia from the indirect effect of changes in cardiac output on the maximum pressure difference across the tricuspid valve in healthy humans. <i>Pflugers Archiv European Journal of Physiology</i> , 2005, 450, 372-380.	1.3	25
34	Human pulmonary vascular response to 4 h of hypercapnia and hypocapnia measured using Doppler echocardiography. <i>Journal of Applied Physiology</i> , 2003, 94, 1543-1551.	1.2	152
35	Desferrioxamine elevates pulmonary vascular resistance in humans: potential for involvement of HIF-1. <i>Journal of Applied Physiology</i> , 2002, 92, 2501-2507.	1.2	64
36	Respiratory control in humans after 8 h of lowered arterial P _{O₂} , hemodilution, or carboxyhemoglobinemia. <i>Journal of Applied Physiology</i> , 2001, 90, 1189-1195.	1.2	18

#	ARTICLE	IF	CITATIONS
37	Effects of 8 h of Isocapnic Hypoxia with and without Muscarinic Blockade on Ventilation and Heart Rate in Humans. <i>Experimental Physiology</i> , 2001, 86, 529-538.	0.9	9
38	Cardiovascular Effects of 8 h of Isocapnic Hypoxia with and without Beta-Blockade in Humans. <i>Experimental Physiology</i> , 2000, 85, 557-565.	0.9	3
39	Effects of desferrioxamine on serum erythropoietin and ventilatory sensitivity to hypoxia in humans. <i>Journal of Applied Physiology</i> , 2000, 89, 680-686.	1.2	63
40	Cardiovascular effects of 8 h of isocapnic hypoxia with and without beta-blockade in humans. <i>Experimental Physiology</i> , 2000, 85, 557-565.	0.9	1
41	Ventilatory effects of 8 h of isocapnic hypoxia with and without β -blockade in humans. <i>Journal of Applied Physiology</i> , 1999, 86, 1897-1904.	1.2	11
42	Effects of dopamine and domperidone on ventilatory sensitivity to hypoxia after 8 h of isocapnic hypoxia. <i>Journal of Applied Physiology</i> , 1999, 86, 222-229.	1.2	91
43	Effects of somatostatin on the control of breathing in humans. <i>Journal of Physiology</i> , 1999, 521, 289-297.	1.3	10
44	Effects of haloperidol on ventilation during isocapnic hypoxia in humans. <i>Journal of Applied Physiology</i> , 1997, 83, 1110-1115.	1.2	18
