| #  | Article  | IF   | CITATIONS |
|----|--|------|-----------|
| 1  | Location of high affinity Ca2 +-binding sites within the predicted transmembrahe domain of the sarco-plasmic reticulum Ca2+-ATPase. Nature, 1989, 339, 476-478.  | 27.8 | 605       |
| 2  | Membrane Topology of a Cysteine-less Mutant of Human P-glycoprotein. Journal of Biological<br>Chemistry, 1995, 270, 843-848.   | 3.4  | 234       |
| 3  | Correction of Defective Protein Kinesis of Human P-glycoprotein Mutants by Substrates and<br>Modulators. Journal of Biological Chemistry, 1997, 272, 709-712.  | 3.4  | 213       |
| 4  | Recent Progress in Understanding the Mechanism of P-Glycoprotein-mediated Drug Efflux. Journal of<br>Membrane Biology, 2005, 206, 173-185.   | 2.1  | 185       |
| 5  | Location of the Rhodamine-binding Site in the Human Multidrug Resistance P-glycoprotein. Journal of<br>Biological Chemistry, 2002, 277, 44332-44338.   | 3.4  | 183       |
| 6  | Defining the Drug-binding Site in the Human Multidrug Resistance P-glycoprotein Using a<br>Methanethiosulfonate Analog of Verapamil, MTS-verapamil. Journal of Biological Chemistry, 2001, 276,<br>14972-14979.  | 3.4  | 170       |
| 7  | Determining the Dimensions of the Drug-binding Domain of Human P-glycoprotein Using Thiol<br>Cross-linking Compounds as Molecular Rulers. Journal of Biological Chemistry, 2001, 276, 36877-36880.   | 3.4  | 160       |
| 8  | Rapid Purification of Human P-glycoprotein Mutants Expressed Transiently in HEK 293 Cells by<br>Nickel-Chelate Chromatography and Characterization of their Drug-stimulated ATPase Activities.<br>Journal of Biological Chemistry, 1995, 270, 21449-21452. | 3.4  | 158       |
| 9  | Simultaneous Binding of Two Different Drugs in the Binding Pocket of the Human Multidrug<br>Resistance P-glycoprotein. Journal of Biological Chemistry, 2003, 278, 39706-39710.  | 3.4  | 157       |
| 10 | Substrate-induced Conformational Changes in the Transmembrane Segments of Human P-glycoprotein.<br>Journal of Biological Chemistry, 2003, 278, 13603-13606.  | 3.4  | 154       |
| 11 | Covalent Modification of Human P-glycoprotein Mutants Containing a Single Cysteine in Either<br>Nucleotide-binding Fold Abolishes Drug-stimulated ATPase Activity. Journal of Biological Chemistry,<br>1995, 270, 22957-22961.                             | 3.4  | 140       |
| 12 | The "LSGGQ―Motif in Each Nucleotide-binding Domain of Human P-glycoprotein Is Adjacent to the<br>Opposing Walker A Sequence. Journal of Biological Chemistry, 2002, 277, 41303-41306.  | 3.4  | 131       |
| 13 | Identification of Residues in the Drug-binding Site of Human P-glycoprotein Using a Thiol-reactive Substrate. Journal of Biological Chemistry, 1997, 272, 31945-31948.   | 3.4  | 129       |
| 14 | Mutations to Amino Acids Located in Predicted Transmembrane Segment 6 (TM6) Modulate the Activity and Substrate Specificity of Human P-glycoprotein. Biochemistry, 1994, 33, 14049-14057.  | 2.5  | 126       |
| 15 | Identification of Residues within the Drug-binding Domain of the Human Multidrug Resistance<br>P-glycoprotein by Cysteine-scanning Mutagenesis and Reaction with Dibromobimane. Journal of<br>Biological Chemistry, 2000, 275, 39272-39278.                | 3.4  | 121       |
| 16 | Correctors Promote Maturation of Cystic Fibrosis Transmembrane Conductance Regulator<br>(CFTR)-processing Mutants by Binding to the Protein. Journal of Biological Chemistry, 2007, 282,<br>33247-33251.   | 3.4  | 121       |
| 17 | The Transmembrane Domains of the Human Multidrug Resistance P-glycoprotein Are Sufficient to<br>Mediate Drug Binding and Trafficking to the Cell Surface. Journal of Biological Chemistry, 1999, 274,<br>24759-24765.                                      | 3.4  | 119       |
| 18 | Nucleotide sequence andin vitroexpression of rubella virus 24S subgenomic messenger RNA encoding the structural proteins E1, E2, and C. Nucleic Acids Research, 1987, 15, 3041-3056.   | 14.5 | 115       |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | P-glycoprotein. Journal of Biological Chemistry, 1995, 270, 21839-21844.  | 3.4 | 114       |
| 20 | Nucleotide sequence of the <i>pntA</i> and <i>pntB</i> genes encoding the pyridine nucleotide transhydrogenase of <i>Escherichia coli</i> . FEBS Journal, 1986, 158, 647-653.   | 0.2 | 109       |
| 21 | Disease-associated Mutations in the Fourth Cytoplasmic Loop of Cystic Fibrosis Transmembrane<br>Conductance Regulator Compromise Biosynthetic Processing and Chloride Channel Activity. Journal<br>of Biological Chemistry, 1996, 271, 15139-15145. | 3.4 | 105       |
| 22 | Identification of Residues in the Drug-binding Domain of Human P-glycoprotein. Journal of Biological<br>Chemistry, 1999, 274, 35388-35392.  | 3.4 | 103       |
| 23 | Predicting P-Glycoprotein-Mediated Drug Transport Based On Support Vector Machine and Three-Dimensional Crystal Structure of P-glycoprotein. PLoS ONE, 2011, 6, e25815.   | 2.5 | 103       |
| 24 | Drug Binding in Human P-glycoprotein Causes Conformational Changes in Both Nucleotide-binding<br>Domains. Journal of Biological Chemistry, 2003, 278, 1575-1578.  | 3.4 | 101       |
| 25 | Corrector VX-809 stabilizes the first transmembrane domain of CFTR. Biochemical Pharmacology, 2013, 86, 612-619.  | 4.4 | 99        |
| 26 | Cytoplasmic Loop Three of Cystic Fibrosis Transmembrane Conductance Regulator Contributes to<br>Regulation of Chloride Channel Activity. Journal of Biological Chemistry, 1996, 271, 27493-27499.   | 3.4 | 93        |
| 27 | Transmembrane segment 7 of human P-glycoprotein forms part of the drug-binding pocket.<br>Biochemical Journal, 2006, 399, 351-359.  | 3.7 | 93        |
| 28 | Chemical and pharmacological chaperones as new therapeutic agents. Expert Reviews in Molecular<br>Medicine, 2007, 9, 1-18.  | 3.9 | 92        |
| 29 | Drug-stimulated ATPase Activity of Human P-glycoprotein Requires Movement between Transmembrane<br>Segments 6 and 12. Journal of Biological Chemistry, 1997, 272, 20986-20989.  | 3.4 | 91        |
| 30 | Specific Rescue of Cystic Fibrosis Transmembrane Conductance Regulator Processing Mutants Using Pharmacological Chaperones. Molecular Pharmacology, 2006, 70, 297-302.  | 2.3 | 89        |
| 31 | Superfolding of the Partially Unfolded Core-glycosylated Intermediate of Human P-glycoprotein into the Mature Enzyme Is Promoted by Substrate-induced Transmembrane Domain Interactions. Journal of Biological Chemistry, 1998, 273, 14671-14674.   | 3.4 | 87        |
| 32 | The human multidrug resistance Pâ€glycoprotein is inactive when its maturation is inhibited: potential for a role in cancer chemotherapy. FASEB Journal, 1999, 13, 1724-1732.   | 0.5 | 84        |
| 33 | The Packing of the Transmembrane Segments of Human Multidrug Resistance P-glycoprotein Is<br>Revealed by Disulfide Cross-linking Analysis. Journal of Biological Chemistry, 2000, 275, 5253-5256.   | 3.4 | 84        |
| 34 | The ΔF508 Mutation Disrupts Packing of the Transmembrane Segments of the Cystic Fibrosis<br>Transmembrane Conductance Regulator. Journal of Biological Chemistry, 2004, 279, 39620-39627.   | 3.4 | 81        |
| 35 | Transmembrane segment 1 of human P-glycoprotein contributes to the drug-binding pocket.<br>Biochemical Journal, 2006, 396, 537-545.   | 3.7 | 78        |
| 36 | Identification of Residues in the Drug Translocation Pathway of the Human Multidrug Resistance<br>P-glycoprotein by Arginine Mutagenesis. Journal of Biological Chemistry, 2009, 284, 24074-24087.  | 3.4 | 78        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 37 | Vanadate trapping of nucleotide at the ATP-binding sites of human multidrug resistance<br>P-glycoprotein exposes different residues to the drug-binding site. Proceedings of the National<br>Academy of Sciences of the United States of America, 2002, 99, 3511-3516.      | 7.1 | 77        |
| 38 | Mutational analysis of ABC proteins. Archives of Biochemistry and Biophysics, 2008, 476, 51-64.   | 3.0 | 77        |
| 39 | Determining the structure and mechanism of the human multidrug resistance P-glycoprotein using cysteine-scanning mutagenesis and thiol-modification techniques. Biochimica Et Biophysica Acta - Biomembranes, 1999, 1461, 315-325.  | 2.6 | 74        |
| 40 | Rescue of ΔF508 and Other Misprocessed CFTR Mutants by a Novel Quinazoline Compound. Molecular<br>Pharmaceutics, 2005, 2, 407-413.  | 4.6 | 74        |
| 41 | Inhibition of Oxidative Cross-linking between Engineered Cysteine Residues at Positions 332 in<br>Predicted Transmembrane Segments (TM) 6 and 975 in Predicted TM12 of Human P-glycoprotein by Drug<br>Substrates. Journal of Biological Chemistry, 1996, 271, 27482-27487. | 3.4 | 73        |
| 42 | Disease-Associated Mutations in Cytoplasmic Loops 1 and 2 of Cystic Fibrosis Transmembrane<br>Conductance Regulator Impede Processing or Opening of the Channelâ€. Biochemistry, 1997, 36,<br>11966-11974.  | 2.5 | 73        |
| 43 | Methanethiosulfonate Derivatives of Rhodamine and Verapamil Activate Human P-glycoprotein at<br>Different Sites. Journal of Biological Chemistry, 2003, 278, 50136-50141.   | 3.4 | 72        |
| 44 | Do drug substrates enter the common drug-binding pocket of P-glycoprotein through "gates�.<br>Biochemical and Biophysical Research Communications, 2005, 329, 419-422.  | 2.1 | 72        |
| 45 | Modulating the Folding of P-Glycoprotein and Cystic Fibrosis Transmembrane Conductance Regulator<br>Truncation Mutants with Pharmacological Chaperones. Molecular Pharmacology, 2007, 71, 751-758.  | 2.3 | 68        |
| 46 | Processing Mutations Disrupt Interactions between the Nucleotide Binding and Transmembrane<br>Domains of P-glycoprotein and the Cystic Fibrosis Transmembrane Conductance Regulator (CFTR).<br>Journal of Biological Chemistry, 2008, 283, 28190-28197.                     | 3.4 | 68        |
| 47 | Molecular dissection of the human multidrug resistance P-glycoprotein. Biochemistry and Cell<br>Biology, 1999, 77, 11-23.   | 2.0 | 67        |
| 48 | Disulfiram Metabolites Permanently Inactivate the Human Multidrug Resistance P-Glycoproteinâ€.<br>Molecular Pharmaceutics, 2004, 1, 426-433.  | 4.6 | 67        |
| 49 | Disulfide Cross-linking Analysis Shows That Transmembrane Segments 5 and 8 of Human<br>P-glycoprotein Are Close Together on the Cytoplasmic Side of the Membrane. Journal of Biological<br>Chemistry, 2004, 279, 7692-7697.   | 3.4 | 64        |
| 50 | Cross-linking of Human Multidrug Resistance P-glycoprotein by the Substrate,<br>Tris-(2-maleimidoethyl)amine, Is Altered by ATP Hydrolysis. Journal of Biological Chemistry, 2001, 276,<br>31800-31805.   | 3.4 | 62        |
| 51 | Rhodamine Inhibitors of P-Glycoprotein: An Amide/Thioamide "Switch―for ATPase Activity. Journal of<br>Medicinal Chemistry, 2009, 52, 3328-3341.   | 6.4 | 58        |
| 52 | Quality Control by Proteases in the Endoplasmic Reticulum. Journal of Biological Chemistry, 1998, 273, 32373-32376.   | 3.4 | 57        |
| 53 | The V510D Suppressor Mutation Stabilizes ΔF508-CFTR at the Cell Surface. Biochemistry, 2010, 49, 6352-6357.   | 2.5 | 57        |
| 54 | Additive effect of multiple pharmacological chaperones on maturation of CFTR processing mutants.<br>Biochemical Journal, 2007, 406, 257-263.  | 3.7 | 55        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 55 | Human P-glycoprotein is active when the two halves are clamped together in the closed conformation. Biochemical and Biophysical Research Communications, 2010, 395, 436-440.  | 2.1 | 54        |
| 56 | The ATPase Activity of the P-glycoprotein Drug Pump Is Highly Activated When the N-terminal and<br>Central Regions of the Nucleotide-binding Domains Are Linked Closely Together. Journal of Biological<br>Chemistry, 2012, 287, 26806-26816. | 3.4 | 54        |
| 57 | Drug-stimulated ATPase Activity of Human P-glycoprotein Is Blocked by Disulfide Cross-linking<br>between the Nucleotide-binding Sites. Journal of Biological Chemistry, 2000, 275, 19435-19438.   | 3.4 | 53        |
| 58 | Val133 and Cys137 in Transmembrane Segment 2 Are Close to Arg935 and Gly939 in Transmembrane<br>Segment 11 of Human P-glycoprotein. Journal of Biological Chemistry, 2004, 279, 18232-18238.  | 3.4 | 53        |
| 59 | Thapsigargin or curcumin does not promote maturation of processing mutants of the ABC transporters, CFTR, and P-glycoprotein. Biochemical and Biophysical Research Communications, 2004, 325, 580-585.  | 2.1 | 52        |
| 60 | The Minimum Functional Unit of Human P-glycoprotein Appears to be a Monomer. Journal of<br>Biological Chemistry, 1996, 271, 27488-27492.  | 3.4 | 51        |
| 61 | Rescue of Folding Defects in ABC Transporters Using Pharmacological Chaperones. Journal of<br>Bioenergetics and Biomembranes, 2005, 37, 501-507.  | 2.3 | 51        |
| 62 | Correctors promote folding of the CFTR in the endoplasmic reticulum. Biochemical Journal, 2008, 413, 29-36.   | 3.7 | 51        |
| 63 | The Drug-Binding Pocket of the Human Multidrug Resistance P-Glycoprotein Is Accessible to the Aqueous Medium. Biochemistry, 2004, 43, 12081-12089.  | 2.5 | 50        |
| 64 | Corrector VX-809 promotes interactions between cytoplasmic loop one and the first nucleotide-binding domain of CFTR. Biochemical Pharmacology, 2017, 136, 24-31.  | 4.4 | 49        |
| 65 | Permanent Activation of the Human P-glycoprotein by Covalent Modification of a Residue in the Drug-binding Site. Journal of Biological Chemistry, 2003, 278, 20449-20452.   | 3.4 | 48        |
| 66 | The chemical chaperone CFcor-325 repairs folding defects in the transmembrane domains of CFTR-processing mutants. Biochemical Journal, 2006, 395, 537-542.  | 3.7 | 45        |
| 67 | Tariquidar inhibits P-glycoprotein drug efflux but activates ATPase activity by blocking transition to an open conformation. Biochemical Pharmacology, 2014, 92, 558-566.   | 4.4 | 44        |
| 68 | Cystic fibrosis: channel, catalytic, and folding properties of the CFTR protein. Journal of Bioenergetics and Biomembranes, 1997, 29, 429-442.  | 2.3 | 43        |
| 69 | ATP Hydrolysis Promotes Interactions between the Extracellular Ends of Transmembrane Segments 1 and 11 of Human Multidrug Resistance P-Glycoprotein. Biochemistry, 2005, 44, 10250-10258.   | 2.5 | 43        |
| 70 | Expression of rubella virus cDNA coding for the structural proteins. Gene, 1988, 65, 23-30.   | 2.2 | 41        |
| 71 | Suppressor Mutations in the Transmembrane Segments of P-glycoprotein Promote Maturation of<br>Processing Mutants and Disrupt a Subset of Drug-binding Sites. Journal of Biological Chemistry, 2007,<br>282, 32043-32052.                      | 3.4 | 40        |
| 72 | Human P-glycoprotein Contains a Greasy Ball-and-Socket Joint at the Second Transmission Interface.<br>Journal of Biological Chemistry, 2013, 288, 20326-20333.  | 3.4 | 40        |

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 73 | Chalcogenopyrylium Compounds as Modulators of the ATP-Binding Cassette Transporters<br>P-Glycoprotein (P-gp/ <i>ABCB1</i> ) and Multidrug Resistance Protein 1 (MRP1/ <i>ABCC1</i> ). Journal of<br>Medicinal Chemistry, 2012, 55, 4683-4699.  | 6.4 | 39        |
| 74 | Mapping the Binding Site of the Inhibitor Tariquidar That Stabilizes the First Transmembrane Domain of P-glycoprotein. Journal of Biological Chemistry, 2015, 290, 29389-29401.  | 3.4 | 37        |
| 75 | Introduction of the Most Common Cystic Fibrosis Mutation (ΔF508) into Human P-glycoprotein<br>Disrupts Packing of the Transmembrane Segments. Journal of Biological Chemistry, 2002, 277,<br>27585-27588.                                      | 3.4 | 36        |
| 76 | Correctors Enhance Maturation of î"F508 CFTR by Promoting Interactions between the Two Halves of the Molecule. Biochemistry, 2009, 48, 9882-9890.  | 2.5 | 36        |
| 77 | Mutational Analysis of the Predicted First Transmembrane Segment of Each Homologous Half of<br>Human P-glycoprotein Suggests That They Are Symmetrically Arranged in the Membrane. Journal of<br>Biological Chemistry, 1996, 271, 15414-15419. | 3.4 | 33        |
| 78 | The DCCD-binding polypeptide alone is insufficient for proton translocation through F0 in membranes of Escherichia, coli. Biochemical and Biophysical Research Communications, 1981, 103, 52-59.   | 2.1 | 28        |
| 79 | Structural analysis of a new GC-specific insertion element IS186. FEBS Letters, 1985, 192, 47-52.  | 2.8 | 27        |
| 80 | Arginines in the First Transmembrane Segment Promote Maturation of a P-glycoprotein Processing<br>Mutant by Hydrogen Bond Interactions with Tyrosines in Transmembrane Segment 11. Journal of<br>Biological Chemistry, 2008, 283, 24860-24870. | 3.4 | 26        |
| 81 | The DCCD-binding polypeptide is close to the F1 ATPase-binding site on the cytoplasmic surface of the cell membrane of Escherichia coli. Biochemical and Biophysical Research Communications, 1982, 106, 400-406.                              | 2.1 | 25        |
| 82 | Processing Mutations Located throughout the Human Multidrug Resistance P-glycoprotein Disrupt<br>Interactions between the Nucleotide Binding Domains. Journal of Biological Chemistry, 2004, 279,<br>38395-38401.                              | 3.4 | 24        |
| 83 | The Transmission Interfaces Contribute Asymmetrically to the Assembly and Activity of Human<br>P-glycoprotein. Journal of Biological Chemistry, 2015, 290, 16954-16963.  | 3.4 | 24        |
| 84 | Nucleotide Binding, ATP Hydrolysis, and Mutation of the Catalytic Carboxylates of Human<br>P-Glycoprotein Cause Distinct Conformational Changes in the Transmembrane Segments.<br>Biochemistry, 2007, 46, 9328-9336.                           | 2.5 | 23        |
| 85 | A Salt Bridge in Intracellular Loop 2 Is Essential for Folding of Human P-Clycoprotein. Biochemistry, 2013, 52, 3194-3196.   | 2.5 | 23        |
| 86 | The Dileucine Motif at the COOH Terminus of Human Multidrug Resistance P-glycoprotein Is Important for Folding but Not Activity. Journal of Biological Chemistry, 2005, 280, 2522-2528.  | 3.4 | 22        |
| 87 | P-glycoprotein ATPase activity requires lipids to activate a switch at the first transmission interface.<br>Biochemical and Biophysical Research Communications, 2016, 472, 379-383.   | 2.1 | 22        |
| 88 | Expression of a Functionally Active Human Renal Sodium-Calcium Exchanger Lacking a Signal<br>Sequence. Journal of Biological Chemistry, 1995, 270, 19345-19350.  | 3.4 | 21        |
| 89 | Nonylphenol Ethoxylates, but Not Nonylphenol, Are Substrates of the Human Multidrug Resistance<br>P-glycoprotein. Biochemical and Biophysical Research Communications, 1998, 247, 478-480.   | 2.1 | 21        |
| 90 | Corrector-mediated rescue of misprocessed CFTR mutants can be reduced by the P-glycoprotein drug pump. Biochemical Pharmacology, 2012, 83, 345-354.  | 4.4 | 20        |

| #   | Article  | IF  | CITATIONS |
|-----|--|-----|-----------|
| 91  | Detection of antibodies to individual proteins of rubella virus. Journal of Virological Methods, 1986,<br>13, 149-159.   | 2.1 | 19        |
| 92  | Expression and mutation of Ca2+ ATPases of the sarcoplasmic reticulum. Cytoskeleton, 1989, 14, 26-34.  | 4.4 | 19        |
| 93  | Identification of the Distance between the Homologous Halves of P-glycoprotein That Triggers the<br>High/Low ATPase Activity Switch. Journal of Biological Chemistry, 2014, 289, 8484-8492.  | 3.4 | 19        |
| 94  | Interaction of Escherichia coli F1-ATPase with dicyclohexylcarbodiimide-binding polypeptide.<br>Biochimica Et Biophysica Acta - Biomembranes, 1983, 733, 274-282.  | 2.6 | 18        |
| 95  | The Glycosylation and Orientation in the Membrane of the Third Cytoplasmic Loop of Human<br>P-Glycoprotein Is Affected by Mutations and Substrates. Biochemistry, 1999, 38, 5124-5129.   | 2.5 | 18        |
| 96  | Drug Rescue Distinguishes between Different Structural Models of Human P-Glycoprotein.<br>Biochemistry, 2013, 52, 7167-7169.   | 2.5 | 18        |
| 97  | Locking Intracellular Helices 2 and 3 Together Inactivates Human P-glycoprotein. Journal of Biological Chemistry, 2014, 289, 229-236.  | 3.4 | 18        |
| 98  | Insertion of an Arginine Residue into the Transmembrane Segments Corrects Protein Misfolding.<br>Journal of Biological Chemistry, 2006, 281, 29436-29440.  | 3.4 | 17        |
| 99  | Deletion of NH2â^and COOH-terminal sequences destroys function of the Ca2+ATPase of rabbit fast-twitch skeletal muscle sarcoplasmic reticulum. FEBS Letters, 1993, 336, 168-170.   | 2.8 | 16        |
| 100 | [35] Mutational analysis of human P-glycoprotein. Methods in Enzymology, 1998, 292, 480-492.   | 1.0 | 16        |
| 101 | Bithiazole Correctors Rescue CFTR Mutants by Two Different Mechanisms. Biochemistry, 2013, 52, 5161-5163.  | 2.5 | 16        |
| 102 | Attachment of a â€~molecular spring' restores drug-stimulated ATPase activity to P -glycoprotein lacking<br>both Q loop glutamines. Biochemical and Biophysical Research Communications, 2017, 483, 366-370.   | 2.1 | 13        |
| 103 | Benzbromarone Stabilizes ΔF508 CFTR at the Cell Surface. Biochemistry, 2011, 50, 4393-4395.  | 2.5 | 11        |
| 104 | Cysteines Introduced into Extracellular Loops 1 and 4 of Human P-Glycoprotein That Are Close Only in<br>the Open Conformation Spontaneously Form a Disulfide Bond That Inhibits Drug Efflux and ATPase<br>Activity. Journal of Biological Chemistry, 2014, 289, 24749-24758. | 3.4 | 11        |
| 105 | The cystic fibrosis V232D mutation inhibits CFTR maturation by disrupting a hydrophobic pocket rather than formation of aberrant interhelical hydrogen bonds. Biochemical Pharmacology, 2014, 88, 46-57.   | 4.4 | 11        |
| 106 | Using a cysteine-less mutant to provide insight into the structure and mechanism of CFTR. Journal of Physiology, 2006, 572, 312-312.   | 2.9 | 9         |
| 107 | Thiorhodamines containing amide and thioamide functionality as inhibitors of the ATP-binding<br>cassette drug transporter P-glycoprotein (ABCB1). Bioorganic and Medicinal Chemistry, 2012, 20,<br>4290-4302.  | 3.0 | 9         |
| 108 | The W232R Suppressor Mutation Promotes Maturation of a Truncation Mutant Lacking both<br>Nucleotide-Binding Domains and Restores Interdomain Assembly and Activity of P-glycoprotein<br>Processing Mutants. Biochemistry, 2011, 50, 672-685.                                 | 2.5 | 6         |
