#	ARTICLE	IF	CITATIONS
1	Tackling the COVID-19 pandemic: Initial responses in 2020 in selected social health insurance countries in Europe. <i>Health Policy</i> , 2022, 126, 476-484.	3.0	22
2	Migrant GPs and patients: a cross-sectional study of practice characteristics, patient experiences and migration concordance. <i>Scandinavian Journal of Primary Health Care</i> , 2022, 40, 181-189.	1.5	2
3	The health of detainees and the role of primary care: Position paper of the European Forum for Primary Care. <i>Primary Health Care Research and Development</i> , 2022, 23, e29.	1.2	2
4	Task shifting from general practitioners to practice assistants and nurses in primary care: a cross-sectional survey in 34 countries – RETRACTED. <i>Primary Health Care Research and Development</i> , 2022, 23, e30.	1.2	0
5	Physical accessibility of primary care facilities for people with disabilities: a cross-sectional survey in 31 countries. <i>BMC Health Services Research</i> , 2021, 21, 107.	2.2	10
6	Job satisfaction of general practitioners: a cross-sectional survey in 34 countries. <i>Human Resources for Health</i> , 2021, 19, 57.	3.1	14
7	Comparison between primary care service delivery in Malaysia and other participating countries of the QUALICOPC project: a cross-sectional study. <i>BMJ Open</i> , 2021, 11, e047126.	1.9	6
8	Mental and physical health problems before and after detention: A matched cohort study. <i>Lancet Regional Health - Europe</i> , The, 2021, 8, 100154.	5.6	10
9	Task shifting from general practitioners to practice assistants and nurses in primary care: a cross-sectional survey in 34 countries. <i>Primary Health Care Research and Development</i> , 2021, 22, e66.	1.2	6
10	Is suicide mortality associated with neighbourhood social fragmentation and deprivation? A Dutch register-based case-control study using individualised neighbourhoods. <i>Journal of Epidemiology and Community Health</i> , 2020, 74, 197-202.	3.7	25
11	The primary care workforce in Europe: a cross-sectional international comparison of rural and urban areas and changes between 1993 and 2011. <i>European Journal of Public Health</i> , 2020, 30, iv12-iv17.	0.3	11
12	The association between the workload of general practitioners and patient experiences with care: results of a cross-sectional study in 33 countries. <i>Human Resources for Health</i> , 2020, 18, 76.	3.1	17
13	Communication between general practitioners and medical specialists in the referral process: a cross-sectional survey in 34 countries. <i>BMC Family Practice</i> , 2020, 21, 54.	2.9	22
14	Patient enablement after a consultation with a general practitioner – Explaining variation between countries, practices and patients. <i>Health Expectations</i> , 2020, 23, 1129-1143.	2.6	7
15	Multilevel Modelling for Public Health and Health Services Research. , 2020, , .		56
16	What Is Multilevel Modelling?. , 2020, , 29-48.		5
17	Ecometrics: Using MLA to Construct Contextual Variables from Individual Data. , 2020, , 123-138.		3
18	Health in Context. , 2020, , 13-27.		2

#	ARTICLE	IF	CITATIONS
19	Graphs and Equations. , 2020, , 71-88.		0
20	Reading and Writing. , 2020, , 151-169.		0
21	Multilevel Data Structures. , 2020, , 49-68.		2
22	Context, Composition and How Their Influences Vary. , 2020, , 107-122.		3
23	The relationship of personal budgets with independence, participation and quality of life; a secondary analysis of survey data using propensity score matching. <i>Journal of Patient-Reported Outcomes</i> , 2020, 4, 90.	1.9	1
24	Are peopleâ€™s health care needs better met when primary care is strong? A synthesis of the results of the QUALICOPC study in 34 countries. <i>Primary Health Care Research and Development</i> , 2019, 20, e104.	1.2	25
25	Suicide mortality and natural environments â€™ Authors' reply. <i>Lancet Planetary Health</i> , The, 2019, 3, e16.	11.4	0
26	Development and validation of measurement tools for user experience evaluation surveys in the public primary healthcare facilities in Greece: a mixed methods study. <i>BMC Family Practice</i> , 2019, 20, 49.	2.9	8
27	Patientsâ€™ perception of communication at the interface between primary and secondary care: a cross-sectional survey in 34 countries. <i>BMC Health Services Research</i> , 2019, 19, 1018.	2.2	8
28	Citizensâ€™ initiatives for care and welfare in the Netherlands: an ecological analysis. <i>BMC Public Health</i> , 2019, 19, 1334.	2.9	2
29	Community participation in primary care: willingness to participate, a web survey in the Netherlands. <i>Primary Health Care Research and Development</i> , 2019, 20, e13.	1.2	4
30	Trust in times of health reform. <i>Health Policy</i> , 2019, 123, 281-287.	3.0	29
31	Neighbourhood social and physical environment and general practitioner assessed morbidity. <i>Health and Place</i> , 2018, 49, 68-84.	3.3	49
32	<sc>GP</sc> Practices as a Oneâ€™Stop Shop: How Do Patients Perceive the Quality of Care? A Crossâ€™Sectional Study in Thirtyâ€™Four Countries. <i>Health Services Research</i> , 2018, 53, 2047-2063.	2.0	27
33	The association between quality system development stage and the implementation of process-level patient safety themes in Dutch hospitals: an observational study. <i>BMC Health Services Research</i> , 2018, 18, 189.	2.2	2
34	Natural environments and suicide mortality in the Netherlands: a cross-sectional, ecological study. <i>Lancet Planetary Health</i> , The, 2018, 2, e134-e139.	11.4	81
35	Managing multimorbidity: Profiles of integrated care approaches targeting people with multiple chronic conditions in Europe. <i>Health Policy</i> , 2018, 122, 44-52.	3.0	82
36	Advice from the health insurer as a channelling strategy: a natural experiment at a Dutch health insurance company. <i>BMC Health Services Research</i> , 2018, 18, 832.	2.2	3

#	ARTICLE	IF	CITATIONS
37	The impact of social capital, land use, air pollution and noise on individual morbidity in Dutch neighbourhoods. <i>Environment International</i> , 2018, 121, 453-460.	10.0	72
38	More green space is related to less antidepressant prescription rates in the Netherlands: A Bayesian geospatial quantile regression approach. <i>Environmental Research</i> , 2018, 166, 290-297.	7.5	76
39	Community orientation of general practitioners in 34 countries. <i>Health Policy</i> , 2018, 122, 1070-1077.	3.0	11
40	A call for action to establish a research agenda for building a future health workforce in Europe. <i>Health Research Policy and Systems</i> , 2018, 16, 52.	2.8	42
41	Primary care workforce development in Europe: An overview of health system responses and stakeholder views. <i>Health Policy</i> , 2018, 122, 1055-1062.	3.0	14
42	Social capital, collective efficacy and the provision of social support services and amenities by municipalities in the Netherlands. <i>Health and Social Care in the Community</i> , 2017, 25, 414-423.	1.6	13
43	Neighbourhood green space, social environment and mental health: an examination in four European cities. <i>International Journal of Public Health</i> , 2017, 62, 657-667.	2.3	58
44	Selective contracting and channelling patients to preferred providers: A scoping review. <i>Health Policy</i> , 2017, 121, 504-514.	3.0	13
45	Increased cost sharing and changes in noncompliance with specialty referrals in The Netherlands. <i>Health Policy</i> , 2017, 121, 180-188.	3.0	10
46	Neighbourly support of people with chronic illness; is it related to neighbourhood social capital?. <i>Social Science and Medicine</i> , 2017, 173, 110-117.	3.8	11
47	Health plan choice in the Netherlands: restrictive health plans preferred by young and healthy individuals. <i>Health Economics, Policy and Law</i> , 2017, 12, 345-362.	1.8	5
48	Does the Health Impact of Exposure to Neighbourhood Green Space Differ between Population Groups? An Explorative Study in Four European Cities. <i>International Journal of Environmental Research and Public Health</i> , 2017, 14, 618.	2.6	45
49	Is there a conflict between general practitioners applying guidelines for antibiotic prescribing and including their patients' preferences?. <i>Patient Preference and Adherence</i> , 2017, Volume 12, 9-19.	1.8	9
50	General Practitioners' Participation in a Large, Multicountry Combined General Practitioner-Patient Survey: Recruitment Procedures and Participation Rate. <i>International Journal of Family Medicine</i> , 2016, 1-9.	1.2	39
51	The interplay between neighbourhood characteristics: The health impact of changes in social cohesion, disorder and unsafety feelings. <i>Health and Place</i> , 2016, 39, 1-8.	3.3	31
52	Associations Between Neighborhood Social Capital, Health Literacy, and Self-Rated Health Among People With Chronic Illness. <i>Journal of Health Communication</i> , 2016, 21, 36-44.	2.4	26
53	Chronic illness self-management: a mechanism behind the relationship between neighbourhood social capital and health?. <i>European Journal of Public Health</i> , 2016, 27, ckw185.	0.3	8
54	Does a strategy to promote shared decision-making reduce medical practice variation in the choice of either single or double embryo transfer after in vitro fertilisation? A secondary analysis of a randomised controlled trial. <i>BMJ Open</i> , 2016, 6, e010894.	1.9	12
