#	Article	IF	CITATIONS
1	Genetic determinants of fetal opiate exposure and risk of neonatal abstinence syndrome: Knowledge deficits and prospects for future research. Clinical Pharmacology and Therapeutics, 2015, 98, 309-320.	2.3	23
2	Pharmacology of Common Analgesic and Sedative Drugs Used in the Neonatal Intensive Care Unit. Clinics in Perinatology, 2019, 46, 673-692.	0.8	21
3	Ursodeoxycholic acid versus phenobarbital for cholestasis in the Neonatal Intensive Care Unit. BMC Pediatrics, 2018, 18, 197.	0.7	18
4	Neurodevelopmental outcomes in preterm infants with retinopathy of prematurity. Survey of Ophthalmology, 2021, 66, 877-891.	1.7	18
5	The development of a high-performance liquid chromatography–tandem mass spectrometric method for simultaneous quantification of morphine, morphine-3-β-glucuronide, morphine-6-β-glucuronide, hydromorphone, and normorphine in serum. Clinical Biochemistry, 2015, 48, 1283-1290.	0.8	16
6	Increasing Resident Racial and Ethnic Diversity through Targeted Recruitment Efforts. Journal of Pediatrics, 2020, 216, 4-6.	0.9	15
7	Pharmacometabolomics of Respiratory Phenotypic Response to Dexamethasone in Preterm Infants at Risk for Bronchopulmonary Dysplasia. Clinical and Translational Science, 2019, 12, 591-599.	1.5	13
8	Genetic variation in CRHR1 is associated with short-term respiratory response to corticosteroids in preterm infants at risk for bronchopulmonary dysplasia. Pediatric Research, 2019, 85, 625-633.	1.1	13
9	Pharmacoepidemiology of opiate use in the neonatal ICU: Increasing cumulative doses and iatrogenic opiate withdrawal. Journal of Opioid Management, 2015, 11, 305-312.	0.2	13
10	Ventilatory Strategies in Infants with Established Severe Bronchopulmonary Dysplasia: A Multicenter Point Prevalence Study. Journal of Pediatrics, 2022, 242, 248-252.e1.	0.9	10
11	Challenges and opportunities for improving access to approved neonatal drugs and devices. Journal of Perinatology, 2022, 42, 825-828.	0.9	8
12	Intensive and prolonged urine collection in preterm infants reveals three distinct indomethacin metabolic patterns: potential implications for drug dosing. Pediatric Research, 2018, 84, 325-327.	1.1	6
13	Pharmacogenomics and implementation of precision therapeutics in the neonatal ICU: a new frontier?. Pharmacogenomics, 2018, 19, 1231-1233.	0.6	5
14	Inter-rater reliability of the neonatal adverse event severity scale using real-world Neonatal clinical trial data. Journal of Perinatology, 2021, 41, 2813-2819.	0.9	4
15	Improving Recognition and Reporting of Adverse Drug Reactions in the NICU: A Quality Improvement Project. Pediatric Quality & Safety, 2019, 4, e203.	0.4	3
16	Pharmacometabolomics Profiling of Preterm Infants Validates Patterns of Metabolism Associated With Response to Dexamethasone Treatment for Bronchopulmonary Dysplasia. Frontiers in Pediatrics, 0, 10, .	0.9	3
17	Precision therapeutics in the NICU: why are we missing the mark?. Journal of Perinatology, 2018, 38, 444-446.	0.9	2
18	Corticosteroid response predicts bronchopulmonary dysplasia status at 36 weeks in preterm infants treated with dexamethasone: A pilot study. Pediatric Pulmonology, 2022, 57, 1760-1769.	1.0	2

## TAMORAH LEWIS

#	Article	IF	CITATIONS
19	Adequate Pain Management and Sedation in the Neonate: a Fine Balance. Current Treatment Options in Pediatrics, 2018, 4, 108-118.	0.2	1
20	Grappling With Racial Health Inequity in Pediatric Cardiology. Circulation: Cardiovascular Quality and Outcomes, 2021, 14, e008099.	0.9	1
21	ECI biocommentary. Pediatric Research, 2019, 85, 586-586.	1.1	O
22	Comparative Transcriptional Analysis of Patient Responders Versus Non-Responders to Glucocorticoid Treatment for Bronchopulmonary Dysplasia. Journal of the Endocrine Society, 2021, 5, A80-A80.	0.1	0
23	Health Equity Column: Framing the Importance of Health Equity and Antiracism in the NICU. Neonatology Today, 2021, , 43-47.	0.0	0
