

Alexander Viktorin

List of Publications by Citations

Source: <https://exaly.com/author-pdf/8206034/alexander-viktorin-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
45	Genome-wide association analyses identify 44 risk variants and refine the genetic architecture of major depression. <i>Nature Genetics</i> , 2018 , 50, 668-681	36.3	1301
44	A mega-analysis of genome-wide association studies for major depressive disorder. <i>Molecular Psychiatry</i> , 2013 , 18, 497-511	15.1	853
43	Analysis of shared heritability in common disorders of the brain. <i>Science</i> , 2018 , 360,	33.3	666
42	Geographic differences in genetic susceptibility to IgA nephropathy: GWAS replication study and geospatial risk analysis. <i>PLoS Genetics</i> , 2012 , 8, e1002765	6	231
41	Meta-analysis of Genome-wide Association Studies for Neuroticism, and the Polygenic Association With Major Depressive Disorder. <i>JAMA Psychiatry</i> , 2015 , 72, 642-50	14.5	222
40	The Swedish Twin Registry: establishment of a biobank and other recent developments. <i>Twin Research and Human Genetics</i> , 2013 , 16, 317-29	2.2	213
39	Genome-wide association meta-analysis of human longevity identifies a novel locus conferring survival beyond 90 years of age. <i>Human Molecular Genetics</i> , 2014 , 23, 4420-32	5.6	188
38	Clinical phenotypes of perinatal depression and time of symptom onset: analysis of data from an international consortium. <i>Lancet Psychiatry</i> , 2017 , 4, 477-485	23.3	137
37	The risk of switch to mania in patients with bipolar disorder during treatment with an antidepressant alone and in combination with a mood stabilizer. <i>American Journal of Psychiatry</i> , 2014 , 171, 1067-73	11.9	136
36	Genome-wide Association for Major Depression Through Age at Onset Stratification: Major Depressive Disorder Working Group of the Psychiatric Genomics Consortium. <i>Biological Psychiatry</i> , 2017 , 81, 325-335	7.9	129
35	Meta-analysis of Genome-Wide Association Studies for Extraversion: Findings from the Genetics of Personality Consortium. <i>Behavior Genetics</i> , 2016 , 46, 170-82	3.2	122
34	Minimal phenotyping yields genome-wide association signals of low specificity for major depression. <i>Nature Genetics</i> , 2020 , 52, 437-447	36.3	80
33	Harmonization of Neuroticism and Extraversion phenotypes across inventories and cohorts in the Genetics of Personality Consortium: an application of Item Response Theory. <i>Behavior Genetics</i> , 2014 , 44, 295-313	3.2	80
32	Genetic Differences in the Immediate Transcriptome Response to Stress Predict Risk-Related Brain Function and Psychiatric Disorders. <i>Neuron</i> , 2015 , 86, 1189-202	13.9	79
31	Association of Maternal Use of Folic Acid and Multivitamin Supplements in the Periods Before and During Pregnancy With the Risk of Autism Spectrum Disorder in Offspring. <i>JAMA Psychiatry</i> , 2018 , 75, 176-184	14.5	71
30	Heritability of Perinatal Depression and Genetic Overlap With Nonperinatal Depression. <i>American Journal of Psychiatry</i> , 2016 , 173, 158-65	11.9	62
29	Maternal and infant outcomes associated with lithium use in pregnancy: an international collaborative meta-analysis of six cohort studies. <i>Lancet Psychiatry</i> , 2018 , 5, 644-652	23.3	50

28	Applying polygenic risk scores to postpartum depression. <i>Archives of Womens Mental Health</i> , 2014 , 17, 519-28	5	49
27	Does Childhood Trauma Moderate Polygenic Risk for Depression? A Meta-analysis of 5765 Subjects From the Psychiatric Genomics Consortium. <i>Biological Psychiatry</i> , 2018 , 84, 138-147	7.9	48
26	Genome-wide gene-environment analyses of major depressive disorder and reported lifetime traumatic experiences in UK Biobank. <i>Molecular Psychiatry</i> , 2020 , 25, 1430-1446	15.1	47
25	The Risk of Treatment-Emergent Mania With Methylphenidate in Bipolar Disorder. <i>American Journal of Psychiatry</i> , 2017 , 174, 341-348	11.9	44
24	Dominant Genetic Variation and Missing Heritability for Human Complex Traits: Insights from Twin versus Genome-wide Common SNP Models. <i>American Journal of Human Genetics</i> , 2015 , 97, 708-14	11	35
23	Autism risk following antidepressant medication during pregnancy. <i>Psychological Medicine</i> , 2017 , 47, 2787-2796	6.9	34
22	Comparison of heritability of Cystatin C- and creatinine-based estimates of kidney function and their relation to heritability of cardiovascular disease. <i>Journal of the American Heart Association</i> , 2015 , 4, e001467	6	33
21	Hair Cortisol in Twins: Heritability and Genetic Overlap with Psychological Variables and Stress-System Genes. <i>Scientific Reports</i> , 2017 , 7, 15351	4.9	33
20	Depression, anxiety, and antidepressant treatment in women: association with in vitro fertilization outcome. <i>Fertility and Sterility</i> , 2016 , 105, 1594-1602.e3	4.8	32
19	Longitudinal depression or anxiety in mothers and offspring asthma: a Swedish population-based study. <i>International Journal of Epidemiology</i> , 2018 , 47, 166-174	7.8	29
18	Selective serotonin re-uptake inhibitor use during pregnancy: association with offspring birth size and gestational age. <i>International Journal of Epidemiology</i> , 2016 , 45, 170-7	7.8	25
17	Association of Antidepressant Medication Use During Pregnancy With Intellectual Disability in Offspring. <i>JAMA Psychiatry</i> , 2017 , 74, 1031-1038	14.5	25
16	Maternal suicide - Register based study of all suicides occurring after delivery in Sweden 1974-2009. <i>PLoS ONE</i> , 2018 , 13, e0190133	3.7	22
15	Genome-wide association analyses identify 44 risk variants and refine the genetic architecture of major depressive disorder		21
14	Methylphenidate and the risk of psychosis in adolescents and young adults: a population-based cohort study. <i>Lancet Psychiatry</i> , 2019 , 6, 651-658	23.3	18
13	Association of Autism Spectrum Disorder With Prenatal Exposure to Medication Affecting Neurotransmitter Systems. <i>JAMA Psychiatry</i> , 2018 , 75, 1217-1224	14.5	18
12	Association of polygenic score for major depression with response to lithium in patients with bipolar disorder. <i>Molecular Psychiatry</i> , 2021 , 26, 2457-2470	15.1	17
11	Minimal phenotyping yields GWAS hits of reduced specificity for major depression		12

10	Association of Whole-Genome and NETRIN1 Signaling Pathway-Derived Polygenic Risk Scores for Major Depressive Disorder and White Matter Microstructure in the UK Biobank. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2019 , 4, 91-100	3.4	12
9	Sex-Dependent Shared and Nonshared Genetic Architecture Across Mood and Psychotic Disorders. <i>Biological Psychiatry</i> , 2022 , 91, 102-117	7.9	11
8	IgA measurements in over 12 000 Swedish twins reveal sex differential heritability and regulatory locus near CD30L. <i>Human Molecular Genetics</i> , 2014 , 23, 4177-84	5.6	9
7	Paternal use of antidepressants and offspring outcomes in Sweden: nationwide prospective cohort study. <i>BMJ, The</i> , 2018 , 361, k2233	5.9	7
6	The Genetic Architecture of Depression in Individuals of East Asian Ancestry: A Genome-Wide Association Study. <i>JAMA Psychiatry</i> , 2021 , 78, 1258-1269	14.5	7
5	Associations of Prescribed ADHD Medication in Pregnancy with Pregnancy-Related and Offspring Outcomes: A Systematic Review. <i>CNS Drugs</i> , 2020 , 34, 731-747	6.7	5
4	Clinical indications of premenstrual disorders and subsequent risk of injury: a population-based cohort study in Sweden. <i>BMC Medicine</i> , 2021 , 19, 119	11.4	4
3	Prediction of treatment dosage and duration from free-text prescriptions: an application to ADHD medications in the Swedish prescribed drug register. <i>Evidence-Based Mental Health</i> , 2021 , 24, 146-152	11.1	2
2	Calling for More Research of Medication Effects in Bipolar Disorder: Response to Ketter and DellaOsso. <i>American Journal of Psychiatry</i> , 2017 , 174, 804-805	11.9	
1	Response to Ostacher et al. <i>American Journal of Psychiatry</i> , 2015 , 172, 586-7	11.9
