LIALE YONG

1     Ferntosecond laser direct working bioinspired superhydropholic/hydrophilic micro-pattern for fog     4.0       2     Emerging Separation Applications of Surface Superwettability. Nanomaterials, 2022, 12, 688.     4.1       3     Filtration and removal of liquid polymers from water (polymer/water superation) by use of the underwater superpolymphobicity. Concept, achievement, and applications. Nano Select, 2021, 2, 688.     4.1       4     Underwater superpolymphobicity: Concept, achievement, and applications. Nano Select, 2021, 2, 1011-1022.     8.7       5     LiquidSchriusd State Steel Staffs Organsed by Alcohol&Edssisted Femtosecond Laser     3.7       6     SuperwettabilityActased separation if poul droplets on a femtosecond laser structured superhydrophobic shape memory polymer by near-infrared light. Science China Chemistry, 2021, 64, 868     8.2       7     Remote, selective, and in situ manipulation of liquid droplets on a femtosecond Laser structured superhydrophobic shape memory polymer by near-infrared light. Science China Chemistry, 2021, 64, 868     8.6       10     Waterigas separation based on the selective bubble-passage effect of underwater superhydrophobic.     5.4       11     SuperwettabilityActionation of head to structure structured superhydrophobic/ty.     5.4       12     Aferntosecond Laser for preparing a nontoxic slippery liquid-infrared light. Science (2020, 8, 5057 515).     5.4       13     Superhydrophobic/ty.ememory surfaces prepared by a femtosecond Laser. Chemical Engineering Journal.     12.7       14     Superhydr	#	Article	IF	CITATIONS
3       Filtration and removal of liquid polymers from water (polymer/water separation) by use of the interface Science, 2021, 552, 1203-1212.       9.4         4       Underwater superpolymphobic hy: Concept, achievement, and applications. Nano Select, 2021, 2, 1033-1212.       9.7         6       LiquidsEnfused Slippery Stainless Steel Surface Prepared by AlcoholisEAssisted Femtosecond Laser       9.7         7       Ableton. Alconnect Moderials Interfaces, 2021, 8, 2001394.       9.7         6       Superwettability3Ebased separation: From oillwater separation to polymer/water separation and a.7       8.7         7       superhydrophobic shape memory polymer by near-infrared light. Science China Chemistry, 2021, 64, 861-872.       8.2         8       Editorial: Bioinspired Articlal Compound Eyes: Characteristic, Fabrication, and Application. Alvanced Materials 5.8       5.8         10       Waterigas separation based on the selective bubble-passage effect of underwater superacephobic and superwettability of NIT alloys. Biomaterials Science, 2021, 13, 10414-10424.       5.6         11       Superhydrophobicity-memory surfaces prepared by a femitosecond laser. Chemical Engineering Journal, 22.7       5.4         12       Afemotese profile and the selective bubble-passage effect of underwater superacephobic and super-activity by a femitosecond laser. Chemical Engineering Journal, 22.7       5.4         13       Frentises ond Laser Microfabrication of Porons Superwetting Materials Science, 2020, 8, 6505-6514.       5.4 </td <td>1</td> <td>Femtosecond laser direct weaving bioinspired superhydrophobic/hydrophilic micro-pattern for fog harvesting. Optics and Laser Technology, 2022, 146, 107593.</td> <td>4.6</td> <td>18</td>	1	Femtosecond laser direct weaving bioinspired superhydrophobic/hydrophilic micro-pattern for fog harvesting.
