#	ARTICLE	IF	CITATIONS
1	Exosomes derived from human umbilical cord blood mesenchymal stem cells stimulate regenerative wound healing via transforming growth factor- β 2 receptor inhibition. <i>Stem Cell Research and Therapy</i> , 2021, 12, 434.	5.5	80
2	Epidermal stem cell-derived exosomes promote skin regeneration by downregulating transforming growth factor- β 1 in wound healing. <i>Stem Cell Research and Therapy</i> , 2020, 11, 452.	5.5	59
3	Anthocyanins from Black Chokeberry (<i>Aroniamelanocarpa</i> Elliot) Delayed Aging-Related Degenerative Changes of Brain. <i>Journal of Agricultural and Food Chemistry</i> , 2017, 65, 5973-5984.	5.2	58
4	Antler stem cell-conditioned medium stimulates regenerative wound healing in rats. <i>Stem Cell Research and Therapy</i> , 2019, 10, 326.	5.5	31
5	Human Amniotic Fluid Stem Cell-Derived Exosomes as a Novel Cell-Free Therapy for Cutaneous Regeneration. <i>Frontiers in Cell and Developmental Biology</i> , 2021, 9, 685873.	3.7	30
6	Anthocyanins Delay Ageing-Related Degenerative Changes in the Liver. <i>Plant Foods for Human Nutrition</i> , 2017, 72, 425-431.	3.2	18
7	Transplanted Antler Stem Cells Stimulated Regenerative Healing of Radiation-induced Cutaneous Wounds in Rats. <i>Cell Transplantation</i> , 2020, 29, 096368972095154.	2.5	16
8	Active Components from Sea Buckthorn (<i>Hippophae rhamnoides</i> L.) Regulate Hepatic Stellate Cell Activation and Liver Fibrogenesis. <i>Journal of Agricultural and Food Chemistry</i> , 2018, 66, 12257-12264.	5.2	15
9	Extracellular vesicles derived from umbilical cord mesenchymal stromal cells alleviate pulmonary fibrosis by means of transforming growth factor- β 2 signaling inhibition. <i>Stem Cell Research and Therapy</i> , 2021, 12, 230.	5.5	15
10	Antler stem cells as a novel stem cell source for reducing liver fibrosis. <i>Cell and Tissue Research</i> , 2020, 379, 195-206.	2.9	14
11	Anthocyanin Improving Metabolic Disorders in Obese Mice from <i>Aornia melanocarpa</i> . <i>Indian Journal of Pharmaceutical Education and Research</i> , 2016, 50, 368-375.	0.6	6
12	Lingonberry Anthocyanins Inhibit Hepatic Stellate Cell Activation and Liver Fibrosis via TGF β 2/Smad/ERK Signaling Pathway. <i>Journal of Agricultural and Food Chemistry</i> , 2021, 69, 13546-13556.	5.2	6
13	Velvet Antler Peptides Reduce Scarring via Inhibiting the TGF- β 2 Signaling Pathway During Wound Healing. <i>Frontiers in Medicine</i> , 2021, 8, 799789.	2.6	6
14	Improvement in aureofuscin production by streptomyces aureofuscus with the addition of acetate and propionate sodium. <i>Bioscience Journal</i> , 2016, 32, 478-485.	0.4	1
15	Tracing the geographic origin of velvet antlers in China via stable isotope analyses. <i>RSC Advances</i> , 2022, 12, 17527-17535.	3.6	0
