#	ARTICLE	IF	CITATIONS
1	Esperanza de vida en torno a la joroba de mortalidad masculina en M�xico, con suavizamiento controlado por segmentos. Estudios Demograficos Y Urbanos, 2022, 37, 307-346.	0.1	0
2	Optimal Reconciliation of Seasonally Adjusted Disaggregates Taking Into Account the Difference Between Direct and Indirect Adjustment of the Aggregate. Journal of Official Statistics, 2021, 37, 31-51.	0.4	1
3	A generalized measure of dispersion. Statistics and Probability Letters, 2020, 164, 108806.	0.7	0
4	On measuring economic growth from outer space: a single country approach. Empirical Economics, 2019, 57, 971-990.	3.0	6
5	Effect of autocorrelation when estimating the trend of a time series via penalized least squares with controlled smoothness. Statistical Methods and Applications, 2018, 27, 109-130.	1.2	1
6	Retropolating some relevant series of Mexico's System of National Accounts at constant prices: The case of Mexico City's GDP. Statistica Neerlandica, 2018, 72, 495-519.	1.6	4
7	Trend smoothness achieved by penalized least squares with the smoothing parameter chosen by optimality criteria. Communications in Statistics Part B: Simulation and Computation, 2017, 46, 1492-1507.	1.2	3
8	Trend estimation of multivariate time series with controlled smoothness. Communications in Statistics - Theory and Methods, 2017, 46, 6704-6726.	1.0	2
9	Penalized least squares smoothing of two-dimensional mortality tables with imposed smoothness. Journal of Applied Statistics, 2017, 44, 1662-1679.	1.3	1
10	A Statistical Approach to Provide Individualized Privacy for Surveys. PLoS ONE, 2016, 11, e0147314.	2.5	17
11	Smoothing a Time Series by Segments of the Data Range. Communications in Statistics - Theory and Methods, 2015, 44, 4568-4585.	1.0	5
12	A new methodology for building local climate change scenarios: A case study of monthly temperature projections for Mexico City. Atmosfera, 2014, 27, 429-449.	0.8	1
13	Building Scenarios of Multiple Time Series that Take into Account the Effects of an Expected Intervention. Journal of Forecasting, 2014, 33, 32-46.	2.8	2
14	A cautionary note on automated statistical downscaling methods for climate change. Climatic Change, 2013, 120, 263-276.	3.6	16
15	Rapid Estimates of Mexico's Quarterly GDP. Journal of Official Statistics, 2013, 29, 397-423.	0.4	4
16	Graduaci3n no-param�trica con suavidad y estructura impuestas por el analista: aplicaciones demogr�ficas para M�xico / Nonparametric Graduation with Smoothness and Structure Imposed by the Analyst: Demographic Applications for Mexico. Estudios Demograficos Y Urbanos, 2013, 28, 429.	0.1	2
17	Temporal disaggregation and restricted forecasting of multiple population time series. Journal of Applied Statistics, 2011, 38, 799-815.	1.3	3
18	Trend estimation of financial time series. Applied Stochastic Models in Business and Industry, 2010, 26, 205-223.	1.5	3

#	ARTICLE	IF	CITATIONS
19	Surveys with negative questions for sensitive items. <i>Statistics and Probability Letters</i> , 2009, 79, 2456-2461.	0.7	50
20	Estimating Trends with Percentage of Smoothness Chosen by the User. <i>International Statistical Review</i> , 2008, 76, 187-202.	1.9	14
21	Time series smoothing by penalized least squares. <i>Statistics and Probability Letters</i> , 2007, 77, 1225-1234.	0.7	14
22	Restricted forecasting with VAR models: An analysis of a test for joint compatibility between restrictions and forecasts. <i>International Journal of Forecasting</i> , 2006, 22, 751-770.	6.5	4
23	Restricted estimation of an adjusted time series: application to Mexico's industrial production index. <i>Journal of Applied Statistics</i> , 2005, 32, 157-177.	1.3	0
24	Combining multiple time series predictors: a useful inferential procedure. <i>Journal of Statistical Planning and Inference</i> , 2003, 116, 249-276.	0.6	11
25	Data graduation based on statistical time series methods. <i>Statistics and Probability Letters</i> , 2001, 52, 169-175.	0.7	5
26	Linear combination of restrictions and forecasts in time series analysis. <i>Journal of Forecasting</i> , 2000, 19, 103-122.	2.8	18
27	Selecting a linearizing power transformation for time series. <i>Journal of Applied Statistics</i> , 2000, 27, 185-195.	1.3	2
28	Temporal and contemporaneous disaggregation of multiple economic time series. <i>Test</i> , 1999, 8, 459-489.	1.1	10
29	Measuring intervention Effects on Multiple Time Series Subjected to Linear Restrictions: A Banking Example. <i>Journal of Business and Economic Statistics</i> , 1998, 16, 489-497.	2.9	0
30	Measuring Intervention Effects on Multiple Time Series Subjected to Linear Restrictions: A Banking Example. <i>Journal of Business and Economic Statistics</i> , 1998, 16, 489.	2.9	0
31	Forecasting electricity consumption with extra-model information provided by consumers. <i>Journal of Applied Statistics</i> , 1998, 25, 283-299.	1.3	5
32	Forecasting a Cumulative Variable Using Its Partially Accumulated Data. <i>Management Science</i> , 1997, 43, 879-889.	4.1	15
33	Holstein white coat color and performance: phenotypic, genetic and environmental correlations. <i>Genetics and Molecular Biology</i> , 1996, 19, 587-591.	1.0	5
34	Kalman filter for singular and conditional state-space models when the system state and the observational error are correlated. <i>Statistics and Probability Letters</i> , 1995, 22, 303-310.	0.7	8
35	Restricted forecasts using exponential smoothing techniques. <i>International Journal of Forecasting</i> , 1994, 10, 515-527.	6.5	12
36	Time series analysis supported by power transformations. <i>Journal of Forecasting</i> , 1993, 12, 37-48.	2.8	105

#	ARTICLE	IF	CITATIONS
37	Combining historical and preliminary information to obtain timely time series data. International Journal of Forecasting, 1993, 9, 477-485.	6.5	7
38	ARIMA forecasts with restrictions derived from a structural change. International Journal of Forecasting, 1991, 7, 339-347.	6.5	10
39	Temporal Disaggregation of Time Series: An ARIMA-Based Approach. International Statistical Review, 1990, 58, 29.	1.9	31
40	Optimal conditional ARIMA forecasts. Journal of Forecasting, 1989, 8, 215-229.	2.8	24
41	Transforming grouped bivariate data to near normality. Statistics and Probability Letters, 1988, 6, 213-224.	0.7	3
42	A note on the estimation of Atkinson's index of inequality. Economics Letters, 1987, 25, 379-384.	1.9	5
43	Transformation of grouped data to near normality. Insurance: Mathematics and Economics, 1984, 3, 257-262.	1.2	4
44	Use of the Box-Cox transformation with binary response models. Biometrika, 1982, 69, 309-314.	2.4	164
45	The finite sample performance of two methods for choosing a power transformation when seasonally adjusting a time series with X-13ARIMA-SEATS. Communications in Statistics - Theory and Methods, 0, , 1-15.	1.0	0
