

Julie Boberg

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8260769/julie-boberg-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

70
papers

3,209
citations

#	Paper	IF	Citations
70	Classical toxicity endpoints in female rats are insensitive to the human endocrine disruptors diethylstilbestrol and ketoconazole. <i>Reproductive Toxicology</i> , 2021 , 101, 9-17	3.4	4
69	Chemical Mixture Calculator - A novel tool for mixture risk assessment. <i>Food and Chemical Toxicology</i> , 2021 , 152, 112167	4.7	5
68	Perinatal exposure to known endocrine disrupters alters ovarian development and systemic steroid hormone profile in rats. <i>Toxicology</i> , 2021 , 458, 152821	4.4	4
67	Human-relevant concentrations of the antifungal drug clotrimazole disrupt maternal and fetal steroid hormone profiles in rats. <i>Toxicology and Applied Pharmacology</i> , 2021 , 422, 115554	4.6	2
66	Transcriptome analysis of fetal rat testis following intrauterine exposure to the azole fungicides triticonazole and flusilazole reveals subtle changes despite adverse endocrine effects. <i>Chemosphere</i> , 2021 , 264, 128468	8.4	7
65	A putative adverse outcome pathway network for disrupted female pubertal onset to improve testing and regulation of endocrine disrupting chemicals. <i>Neuroendocrinology</i> , 2021 ,	5.6	2
64	Safeguarding Female Reproductive Health against Endocrine Disrupting Chemicals-The FREIA Project. <i>International Journal of Molecular Sciences</i> , 2020 , 21,	6.3	8
63	Grouping of endocrine disrupting chemicals for mixture risk assessment - Evidence from a rat study. <i>Environment International</i> , 2020 , 142, 105870	12.9	9
62	Developmental biology meets toxicology: contributing reproductive mechanisms to build adverse outcome pathways. <i>Molecular Human Reproduction</i> , 2020 , 26, 111-116	4.4	6
61	Dietary exposure to selected chemical contaminants in fish for the Danish population. <i>Food Additives and Contaminants - Part A Chemistry, Analysis, Control, Exposure and Risk Assessment</i> , 2020 , 37, 1027-1039	3.2	6
60	Calretinin is a novel candidate marker for adverse ovarian effects of early life exposure to mixtures of endocrine disruptors in the rat. <i>Archives of Toxicology</i> , 2020 , 94, 1241-1250	5.8	2
59	Intrauterine exposure to diethylhexyl phthalate disrupts gap junctions in the fetal rat testis. <i>Current Research in Toxicology</i> , 2020 , 1, 5-11	2.7	7
58	Putative adverse outcome pathways for female reproductive disorders to improve testing and regulation of chemicals. <i>Archives of Toxicology</i> , 2020 , 94, 3359-3379	5.8	15
57	Quantitative to Extrapolation (QIVIVE) for Predicting Reduced Anogenital Distance Produced by Anti-Androgenic Pesticides in a Rodent Model for Male Reproductive Disorders. <i>Environmental Health Perspectives</i> , 2020 , 128, 117005	8.4	7
56	Using assessment criteria for pesticides to evaluate the endocrine disrupting potential of non-pesticide chemicals: Case butylparaben. <i>Environment International</i> , 2020 , 144, 105996	12.9	5
55	The impact of dietary habits on contaminant exposures. <i>Food and Chemical Toxicology</i> , 2020 , 135, 110885	4.7	5
54	In vitro and in vivo endocrine disrupting effects of the azole fungicides triticonazole and flusilazole. <i>Environmental Pollution</i> , 2019 , 255, 113309	9.3	21

53	Chemical risk assessment based on in vitro and human biomonitoring data: A case study on thyroid toxicants. <i>Current Opinion in Toxicology</i> , 2019 , 15, 8-17	4.4	1
52	A pragmatic approach for human risk assessment of chemical mixtures. <i>Current Opinion in Toxicology</i> , 2019 , 15, 1-7	4.4	15
51	Perfluorohexane Sulfonate (PFHxS) and a Mixture of Endocrine Disrupters Reduce Thyroxine Levels and Cause Antiandrogenic Effects in Rats. <i>Toxicological Sciences</i> , 2018 , 163, 579-591	4.4	34
50	Plastics 2018 , 619-623		1
49	Low-dose exposure to Bisphenol A during development has limited effects on male reproduction in midpubertal and aging Fischer 344 rats. <i>Reproductive Toxicology</i> , 2018 , 81, 196-206	3.4	8
48	EDC IMPACT: Reduced sperm counts in rats exposed to human relevant mixtures of endocrine disrupters. <i>Endocrine Connections</i> , 2018 , 7, 139-148	3.5	21
47	Exposure to a glyphosate-based herbicide formulation, but not glyphosate alone, has only minor effects on adult rat testis. <i>Reproductive Toxicology</i> , 2018 , 82, 25-31	3.4	18
46	DNA damage in mouse organs and in human sperm cells by bisphenol A. <i>Toxicological and Environmental Chemistry</i> , 2018 , 100, 465-478	1.4	1
45	Environmental influences on ovarian dysgenesis - developmental windows sensitive to chemical exposures. <i>Nature Reviews Endocrinology</i> , 2017 , 13, 400-414	15.2	62
44	Combined exposure to low doses of pesticides causes decreased birth weights in rats. <i>Reproductive Toxicology</i> , 2017 , 72, 97-105	3.4	24
43	Rebuttal to letter by Morfeld et al., "Boberg et al. (2011) - Corrigendum (2016): Further significant modifications needed". <i>Reproductive Toxicology</i> , 2017 , 71, 162-163	3.4	1
42	Perfluorononanoic acid in combination with 14 chemicals exerts low-dose mixture effects in rats. <i>Archives of Toxicology</i> , 2016 , 90, 661-75	5.8	13
41	Low-dose effects of bisphenol A on mammary gland development in rats. <i>Andrology</i> , 2016 , 4, 673-83	4.2	65
40	Perinatal exposure to mixtures of endocrine disrupting chemicals reduces female rat follicle reserves and accelerates reproductive aging. <i>Reproductive Toxicology</i> , 2016 , 61, 186-94	3.4	50
39	Multiple Endocrine Disrupting Effects in Rats Perinatally Exposed to Butylparaben. <i>Toxicological Sciences</i> , 2016 , 152, 244-56	4.4	51
38	Low-dose developmental exposure to bisphenol A alters the femoral bone geometry in wistar rats. <i>Chemosphere</i> , 2016 , 164, 339-346	8.4	22
37	Low-dose effect of developmental bisphenol A exposure on sperm count and behaviour in rats. <i>Andrology</i> , 2016 , 4, 594-607	4.2	66
36	Perinatal exposure to mixtures of anti-androgenic chemicals causes proliferative lesions in rat prostate. <i>Prostate</i> , 2015 , 75, 126-40	4.2	11

35	Mixtures of environmentally relevant endocrine disrupting chemicals affect mammary gland development in female and male rats. <i>Reproductive Toxicology</i> , 2015 , 54, 47-57	3.4	23
34	Differential gene expression patterns in developing sexually dimorphic rat brain regions exposed to antiandrogenic, estrogenic, or complex endocrine disruptor mixtures: glutamatergic synapses as target. <i>Endocrinology</i> , 2015 , 156, 1477-93	4.8	24
33	Late-life effects on rat reproductive system after developmental exposure to mixtures of endocrine disrupters. <i>Reproduction</i> , 2014 , 147, 465-76	3.8	45
32	In vivo Comet assay--statistical analysis and power calculations of mice testicular cells. <i>Mutation Research - Genetic Toxicology and Environmental Mutagenesis</i> , 2014 , 774, 29-40	3	5
31	Low-dose effects of bisphenol A on early sexual development in male and female rats. <i>Reproduction</i> , 2014 , 147, 477-87	3.8	76
30	Mixtures of endocrine-disrupting contaminants induce adverse developmental effects in preweaning rats. <i>Reproduction</i> , 2014 , 147, 489-501	3.8	45
29	Effects of perinatal ethinyl estradiol exposure in male and female Wistar rats. <i>Reproductive Toxicology</i> , 2013 , 42, 180-91	3.4	24
28	Triclosan exposure reduces thyroxine levels in pregnant and lactating rat dams and in directly exposed offspring. <i>Food and Chemical Toxicology</i> , 2013 , 59, 534-40	4.7	63
27	In vitro-in vivo correlations for endocrine activity of a mixture of currently used pesticides. <i>Toxicology and Applied Pharmacology</i> , 2013 , 272, 757-66	4.6	36
26	Endocrine disrupting effects in rats perinatally exposed to a dietary relevant mixture of phytoestrogens. <i>Reproductive Toxicology</i> , 2013 , 40, 41-51	3.4	21
25	Probabilistic assessment of the cumulative dietary exposure of the population of Denmark to endocrine disrupting pesticides. <i>Food and Chemical Toxicology</i> , 2013 , 55, 113-20	4.7	21
24	Dietary relevant mixtures of phytoestrogens inhibit adipocyte differentiation in vitro. <i>Food and Chemical Toxicology</i> , 2013 , 55, 265-71	4.7	14
23	The effect of perinatal exposure to ethinyl oestradiol or a mixture of endocrine disrupting pesticides on kisspeptin neurons in the rat hypothalamus. <i>NeuroToxicology</i> , 2013 , 37, 154-62	4.4	13
22	Levels of pesticides and their metabolites in Wistar rat amniotic fluids and maternal urine upon gestational exposure. <i>International Journal of Environmental Research and Public Health</i> , 2013 , 10, 2271-81	4.6	15
21	Mixtures of endocrine disrupting contaminants modelled on human high end exposures: an exploratory study in rats. <i>Journal of Developmental and Physical Disabilities</i> , 2012 , 35, 303-16		77
20	Perinatal ethinyl oestradiol alters mammary gland development in male and female Wistar rats. <i>Journal of Developmental and Physical Disabilities</i> , 2012 , 35, 385-96		22
19	Adverse effects on sexual development in rat offspring after low dose exposure to a mixture of endocrine disrupting pesticides. <i>Reproductive Toxicology</i> , 2012 , 34, 261-74	3.4	72
18	Persistent developmental toxicity in rat offspring after low dose exposure to a mixture of endocrine disrupting pesticides. <i>Reproductive Toxicology</i> , 2012 , 34, 237-50	3.4	66

17	Differential effects of environmental chemicals and food contaminants on adipogenesis, biomarker release and PPAR α activation. <i>Molecular and Cellular Endocrinology</i> , 2012 , 361, 106-15	4.4	126
16	Identification of Cumulative Assessment Groups of Pesticides. <i>EFSA Supporting Publications</i> , 2012 , 9, 269E	1.1	21
15	Effects of pre- and postnatal exposure to the UV-filter octyl methoxycinnamate (OMC) on the reproductive, auditory and neurological development of rat offspring. <i>Toxicology and Applied Pharmacology</i> , 2011 , 250, 278-90	4.6	84
14	Reproductive and behavioral effects of diisononyl phthalate (DINP) in perinatally exposed rats. <i>Reproductive Toxicology</i> , 2011 , 31, 200-9	3.4	120
13	Rebuttal to letter by Dr. A. Scialli. <i>Reproductive Toxicology</i> , 2011 , 32, 141	3.4	
12	Exposure to the widely used fungicide mancozeb causes thyroid hormone disruption in rat dams but no behavioral effects in the offspring. <i>Toxicological Sciences</i> , 2011 , 120, 439-46	4.4	72
11	Intrauterine exposure to mild analgesics is a risk factor for development of male reproductive disorders in human and rat. <i>Human Reproduction</i> , 2011 , 26, 235-44	5.7	194
10	Combined exposure to endocrine disrupting pesticides impairs parturition, causes pup mortality and affects sexual differentiation in rats. <i>Journal of Developmental and Physical Disabilities</i> , 2010 , 33, 434-42		52
9	Possible endocrine disrupting effects of parabens and their metabolites. <i>Reproductive Toxicology</i> , 2010 , 30, 301-12	3.4	330
8	Low-dose perinatal exposure to di(2-ethylhexyl) phthalate induces anti-androgenic effects in male rats. <i>Reproductive Toxicology</i> , 2010 , 30, 313-21	3.4	115
7	Evaluation of endocrine disrupting effects of nitrate after in utero exposure in rats and of nitrate and nitrite in the H295R and T-screen assay. <i>Toxicological Sciences</i> , 2009 , 108, 437-44	4.4	8
6	Combined exposure to anti-androgens causes markedly increased frequencies of hypospadias in the rat. <i>Journal of Developmental and Physical Disabilities</i> , 2008 , 31, 241-8		121
5	Developmental neurotoxicity of propylthiouracil (PTU) in rats: relationship between transient hypothyroxinemia during development and long-lasting behavioural and functional changes. <i>Toxicology and Applied Pharmacology</i> , 2008 , 232, 1-13	4.6	54
4	Influence of dietary fatty acids on endocannabinoid and N-acylethanolamine levels in rat brain, liver and small intestine. <i>Biochimica Et Biophysica Acta - Molecular and Cell Biology of Lipids</i> , 2008 , 1781, 200-12		251
3	Do parabens have the ability to interfere with steroidogenesis?. <i>Toxicological Sciences</i> , 2008 , 106, 206-13	4.4	103
2	Impact of diisobutyl phthalate and other PPAR agonists on steroidogenesis and plasma insulin and leptin levels in fetal rats. <i>Toxicology</i> , 2008 , 250, 75-81	4.4	133
1	Endocrine-disrupting activities in vivo of the fungicides tebuconazole and epoxiconazole. <i>Toxicological Sciences</i> , 2007 , 100, 464-73	4.4	178
