#	ARTICLE	IF	CITATIONS
1	Fish Prisons and Bluehouses: Perceived Risks and Benefits of Land-based Aquaculture in Four US Communities. <i>Environmental Communication</i> , 2023, 17, 930-946.	1.2	4
2	Information effects on lay tradeoffs between national regulatory costs and benefits. <i>Risk Analysis</i> , 2022, 42, 2620-2638.	1.5	3
3	Affect toward the policy option versus the hazard differentially mediates cultural effects on Americans' Zika risk perceptions and policy support: Comparing the Solution Aversion-based model and the Affect Heuristic-Cultural Cognition Theory model. <i>Human and Ecological Risk Assessment (HERA)</i> , 2022, 28, 281-315.	1.7	4
4	A Longitudinal Analysis of Americans' Media Sources, Risk Perceptions, and Judged Need for Action during the Zika Outbreak. <i>Health Communication</i> , 2021, 36, 1571-1580.	1.8	14
5	Perceived characteristics of hazard-managing organizations for institutional stereotypes and their effects on trust. <i>Journal of Risk Research</i> , 2021, 24, 148-166.	1.4	0
6	Cultural Theory's Contributions to Risk Analysis: A Thematic Review with Directions and Resources for Further Research. <i>Risk Analysis</i> , 2021, 41, 429-455.	1.5	53
7	Temporal shifts in Americans' risk perceptions of the Zika outbreak. <i>Human and Ecological Risk Assessment (HERA)</i> , 2021, 27, 1242-1257.	1.7	11
8	Lay beliefs about scientists' relations with their employers. <i>Public Understanding of Science</i> , 2021, 30, 103-114.	1.6	1
9	Americans' early behavioral responses to COVID-19. <i>Human and Ecological Risk Assessment (HERA)</i> , 2021, 27, 1733-1746.	1.7	8
10	Evaluating the Effects of News-following, Volume and Content of News Coverage on Americans' Risk Perceptions during the 2014-2016 Ebola Outbreak. <i>Journal of Health Communication</i> , 2021, 26, 328-338.	1.2	1
11	Americans' views of scientists' motivations for scientific work. <i>Public Understanding of Science</i> , 2020, 29, 2-20.	1.6	12
12	Comparing cultural theory and cultural cognition theory survey measures to each other and as explanations for judged risk. <i>Journal of Risk Research</i> , 2020, 23, 1278-1300.	1.4	14
13	Probing the role of institutional stereotypes in Americans' evaluations of hazard-managing institutions. <i>Journal of Risk Research</i> , 2020, 23, 313-329.	1.4	5
14	Cultural theory and cultural cognition theory survey measures: confirmatory factoring and predictive validity of factor scores for judged risk. <i>Journal of Risk Research</i> , 2020, 23, 1467-1490.	1.4	20
15	Construct Validity of Cultural Theory Survey Measures. <i>Social Science Quarterly</i> , 2020, 101, 2332-2383.	0.9	17
16	Hazard avoidance, symbolic and practical: the case of Americans' reported responses to Ebola. <i>Journal of Risk Research</i> , 2019, 22, 346-363.	1.4	13
17	Americans' Views of Voluntary Protective Actions Against Zika Infection: Conceptual and Measurement Issues. <i>Risk Analysis</i> , 2019, 39, 2694-2717.	1.5	14
18	The Value-Added by Cultural Theories of Political Values: Comparing Ideology, Partisanship, and Two Cultural Value Explanations. <i>SSRN Electronic Journal</i> , 2019, , .	0.4	5

#	ARTICLE	IF	CITATIONS
19	Comparing Cultural Theory and Cultural Cognition Theory Survey Measures to Each Other and as Explanations for Judged Risk. SSRN Electronic Journal, 2019, , .	0.4	2
20	Experiments in Lay Cues to the Relative Validity of Positions Taken by Disputing Groups of Scientists. Risk Analysis, 2019, 39, 1657-1674.	1.5	3
21	Why do scientists disagree? Explaining and improving measures of the perceived causes of scientific disputes. PLoS ONE, 2019, 14, e0211269.	1.1	24
22	A longitudinal study of concern and judged risk: the case of Ebola in the United States, 2014â€“2015. Journal of Risk Research, 2019, 22, 1280-1293.	1.4	17
23	â€œCounting votesâ€ in public responses to scientific disputes. Public Understanding of Science, 2018, 27, 594-610.	1.6	10
24	Lay Americansâ€™ views of why scientists disagree with each other. Public Understanding of Science, 2018, 27, 824-835.	1.6	14
25	Effects of Acknowledging Uncertainty about Earthquake Risk Estimates on San Francisco Bay Area Residentsâ€™ Beliefs, Attitudes, and Intentions. Risk Analysis, 2018, 38, 666-679.	1.5	13
26	Residential Location and Psychological Distance in Americansâ€™ Risk Views and Behavioral Intentions Regarding Zika Virus. Risk Analysis, 2018, 38, 2561-2579.	1.5	28
27	Public perceptions of expert disagreement: Bias and incompetence or a complex and random world?. Public Understanding of Science, 2017, 26, 325-338.	1.6	34
28	Explaining Americansâ€™ responses to dread epidemics: an illustration with Ebola in late 2014. Journal of Risk Research, 2017, 20, 1338-1357.	1.4	24
29	Examining associations between citizens' beliefs and attitudes about uncertainty and their earthquake risk judgments, preparedness intentions, and mitigation policy support in Japan and the United States. International Journal of Disaster Risk Reduction, 2017, 22, 37-45.	1.8	18
30	Public Perceptions of Regulatory Costs, Their Uncertainty and Interindividual Distribution. Risk Analysis, 2016, 36, 1148-1170.	1.5	7
31	Modeling Retrospective Attribution of Responsibility to Hazardâ€™Managing Institutions: An Example Involving a Food Contamination Incident. Risk Analysis, 2015, 35, 423-433.	1.5	4
32	Fearing or fearsome Ebola communication? Keeping the public in the dark about possible post-21-day symptoms and infectiousness could backfire. Health, Risk and Society, 2015, 17, 458-471.	0.9	15
33	Bases of Support Differ for Deer Reduction Versus Behavior Change Options to Manage Deer Impacts. Human Dimensions of Wildlife, 2014, 19, 33-46.	1.0	10
34	Public Response to Official Information on Cancer and Cancer Clusters. Human and Ecological Risk Assessment (HERA), 2014, 20, 839-871.	1.7	1
35	Research Article: Communication Challenges for Complex Policy Issues: An Illustration with Multimedia Radon Mitigation. Environmental Practice, 2014, 16, 113-126.	0.3	3
36	Q method can identify diverse perspectives on â€“helpfulâ€ information on cancer clusters and inform risk communication generally. Journal of Risk Research, 2014, 17, 1125-1145.	1.4	2

#	ARTICLE	IF	CITATIONS
37	How perceived gains and losses from nature trails affect trail management preferences. <i>Journal of Environmental Psychology</i> , 2014, 40, 430-439.	2.3	1
38	Beliefs about Ecological Impacts Predict Deer Acceptance Capacity and Hunting Support. <i>Society and Natural Resources</i> , 2014, 27, 915-930.	0.9	10
39	Views on Black Bear Management in New Jersey. <i>Human Dimensions of Wildlife</i> , 2013, 18, 249-262.	1.0	7
40	Experience with Urban Air Pollution in Paterson, New Jersey and Implications for Air Pollution Communication. <i>Risk Analysis</i> , 2012, 32, 39-53.	1.5	57
41	Climate Change Communication: A Provocative Inquiry into Motives, Meanings, and Means. <i>Risk Analysis</i> , 2012, 32, 973-991.	1.5	33
42	Acculturation, Ethnicity, and Air Pollution Perceptions. <i>Risk Analysis</i> , 2011, 31, 984-999.	1.5	13
43	The Importance of Multiple Performance Criteria for Understanding Trust in Risk Managers. <i>Risk Analysis</i> , 2010, 30, 1099-1115.	1.5	16
44	The Intuitive Detection Theorist (IDT) Model of Trust in Hazard Managers. <i>Risk Analysis</i> , 2010, 30, 1196-1209.	1.5	27
45	Trust and Terrorism: Citizen Responses to Anti-Terrorism Performance History. <i>Risk Analysis</i> , 2010, 30, 1328-1340.	1.5	2
46	Public Views on Drinking Water Standards as Risk Indicators. <i>Risk Analysis</i> , 2008, 28, 1515-1530.	1.5	24
47	Local Officials' and Citizens' Views on Freshwater Wetlands. <i>Society and Natural Resources</i> , 2008, 21, 387-403.	0.9	17
48	Information is not enough. , 2007, , 223-234.		22
49	From the Inside Out: Environmental Agency Views about Communications with the Public. <i>Risk Analysis</i> , 2006, 26, 1395-1407.	1.5	18
50	Public understanding of environmental impacts of electricity deregulation. <i>Energy Policy</i> , 2006, 34, 1332-1343.	4.2	13
51	Evaluating Public Responses to Environmental Trend Indicators. <i>Science Communication</i> , 2006, 28, 64-92.	1.8	14
52	Testing and Expanding a Model of Cognitive Processing of Risk Information. <i>Risk Analysis</i> , 2005, 25, 631-650.	1.5	96
53	Communicating about environmental indicators. <i>Journal of Risk Research</i> , 2005, 8, 63-75.	1.4	26
54	Varying Risk Comparison Elements: Effects on Public Reactions. <i>Risk Analysis</i> , 2004, 24, 103-114.	1.5	29

#	ARTICLE	IF	CITATIONS
55	Arguments for Testing Ethnic Identity and Acculturation as Factors in Risk Judgments. Risk Analysis, 2004, 24, 1279-1287.	1.5	13
56	Accommodating Uncertainty in Comparative Risk. Risk Analysis, 2004, 24, 1323-1335.	1.5	26
57	Risk Comparisons, Conflict, and Risk Acceptability Claims. Risk Analysis, 2004, 24, 131-145.	1.5	22
58	Communicating Air Quality Information: Experimental Evaluation of Alternative Formats. Risk Analysis, 2003, 23, 91-103.	1.5	32
59	Are Some Risk Comparisons More Effective Under Conflict?: A Replication and Extension of Roth et al.. Risk Analysis, 2003, 23, 767-780.	1.5	20
60	Further Notes on Public Response to Uncertainty in Risks and Science. Risk Analysis, 2003, 23, 781-789.	1.5	70
61	Communicating Worst-Case Scenarios: Neighbors' Views of Industrial Accident Management. Risk Analysis, 2003, 23, 829-840.	1.5	8
62	Do Reports on Drinking Water Quality Affect Customers' Concerns? Experiments in Report Content. Risk Analysis, 2003, 23, 985-998.	1.5	47
63	How Reassuring are Risk Comparisons to Pollution Standards and Emission Limits?. Risk Analysis, 2003, 23, 999-1007.	1.5	21
64	Customer Reaction to hypothetical and actual CCRs and related information. Journal - American Water Works Association, 2003, 95, 90-99.	0.2	3
65	Gender and Race in Beliefs about Outdoor Air Pollution. Risk Analysis, 2002, 22, 725-738.	1.5	99
66	Stability and Inoculation of Risk Comparisons' Effects Under Conflict: Replicating and Extending the "Asbestos Jury" Study by Slovic et al .. Risk Analysis, 2002, 22, 777-788.	1.5	11
67	Ethical Issues in Risk Communication: Continuing the Discussion*. Risk Analysis, 1999, 19, 335-348.	1.5	43
68	Ethical issues in risk communication: continuing the discussion. Risk Analysis, 1999, 19, 335-348.	1.5	23
69	Exploring dimensionality in the origins of hazard-related trust. Journal of Risk Research, 1999, 2, 325-354.	1.4	113
70	Lay views on uncertainty in environmental health risk assessment. Journal of Risk Research, 1998, 1, 261-279.	1.4	94
71	Presenting Uncertainty in Health Risk Assessment: Initial Studies of Its Effects on Risk Perception and Trust. Risk Analysis, 1995, 15, 485-494.	1.5	310
72	"Improving" Risk Communication and Risk Management: Legislated Solutions or Legislated Disasters?. Risk Analysis, 1994, 14, 905-906.	1.5	9

#	ARTICLE	IF	CITATIONS
73	"The Mental Model" Meets "The Planning Process": Wrestling with Risk Communication Research and Practice1. Risk Analysis, 1993, 13, 5-8.	1.5	13
74	Coping with Paradoxes of Risk Communication: Observations and Suggestions1. Risk Analysis, 1993, 13, 241-243.	1.5	2
75	Agency Communication, Community Outrage, and Perception of Risk: Three Simulation Experiments. Risk Analysis, 1993, 13, 585-598.	1.5	107
76	Residential exposure to chromium wasteâ€”urine biological monitoring in conjunction with environmental exposure monitoring. Environmental Research, 1992, 58, 147-162.	3.7	29
77	Risk and Culture Research. Journal of Cross-Cultural Psychology, 1991, 22, 141-149.	1.0	29
78	Public concerns and the public role in siting nuclear and chemical waste facilities. Environmental Management, 1987, 11, 571-586.	1.2	22
79	The Environmentalist Movement and Grid/Group Analysis: A Modest Critique. , 1987, , 147-175.		18
80	AAAS Annual Meeting. Professional Geographer, 1984, 36, 488-488.	1.0	0
81	Federal wastewater reuse policy: Institutional and attitudinal obstacles to national progress. Resource Recovery and Conservation, 1980, 5, 179-193.	0.1	0
82	Waste water reuse and water quality planning in new England: Attitudes and adoption. Water Resources Research, 1979, 15, 1329-1334.	1.7	1
83	Cultural Theory and Cultural Cognition Theory Survey Measures: Confirmatory Factoring and Predictive Validity of Factor Scores for Judged Risk. SSRN Electronic Journal, 0, , .	0.4	4
84	American Institutional Stereotypes: A Pilot Investigation of Factor Structure. SSRN Electronic Journal, 0, , .	0.4	3
85	How Alike Are Political Values Measures?: Comparing Measures of Universal Values, Moral Foundations, Cultural Theory, and Cultural Cognition Theory. SSRN Electronic Journal, 0, , .	0.4	3
