#	ARTICLE	IF	CITATIONS
1	Ancient DNA, pig domestication, and the spread of the Neolithic into Europe. Proceedings of the National Academy of Sciences of the United States of America, 2007, 104, 15276-15281.	7.1	414
2	Chemical analyses of organic residues in archaeological pottery from Arbon Bleiche 3, Switzerland – evidence for dairying in the late Neolithic. Journal of Archaeological Science, 2006, 33, 1-13.	2.4	170
3	Ancient pigs reveal a near-complete genomic turnover following their introduction to Europe. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 17231-17238.	7.1	101
4	Beyond affluence: the zooarchaeology of luxury. World Archaeology, 2003, 34, 428-441.	1.1	71
5	The significance of climate fluctuations for lake level changes and shifts in subsistence economy during the late Neolithic (4300–2400 b.c.) in central Europe. Vegetation History and Archaeobotany, 2006, 15, 403-418.	2.1	50
6	Short climatic fluctuations and their impact on human economies and societies: the potential of the Neolithic lake shore settlements in the Alpine foreland. Environmental Archaeology, 2010, 15, 173-182.	1.2	44
7	High-resolution isotopic evidence of specialised cattle herding in the European Neolithic. PLoS ONE, 2017, 12, e0180164.	2.5	43
8	Incorporation of aurochs into a cattle herd in Neolithic Europe: single event or breeding?. Scientific Reports, 2014, 4, 5798.	3.3	40
9	Contextualising the dead – Combining geoarchaeology and osteo-anthropology in a new multi-focus approach in bone histotaphonomy. Journal of Archaeological Science, 2018, 98, 45-58.	2.4	37
10	The economy and environment of the 4th and 3rd millennia BC in the northern Alpine foreland based on studies of animal bones. Environmental Archaeology, 2006, 11, 49-64.	1.2	36
11	What is on the menu in a Celtic town? Iron Age diet reconstructed at Basel-Gasfabrik, Switzerland. Archaeological and Anthropological Sciences, 2017, 9, 1307-1326.	1.8	31
12	Ancient DNA, a Neolithic legging from the Swiss Alps and the early history of goat. Journal of Archaeological Science, 2010, 37, 1247-1251.	2.4	27
13	Landscape opening and herding strategies: Carbon isotope analyses of herbivore bone collagen from the Neolithic and Bronze Age lakeshore site of Zurich-Mozartstrasse, Switzerland. Quaternary International, 2017, 436, 18-28.	1.5	23
14	Near East mtDNA haplotype variants in Roman cattle from Augusta Raurica, Switzerland, and in the Swiss Evolene breed. Animal Genetics, 2006, 37, 373-375.	1.7	22
15	Molecular and isotopic characterization of lipids staining bone and antler tools in the Late Neolithic settlement, Zurich Opera Parking, Switzerland. Organic Geochemistry, 2014, 69, 11-25.	1.8	20
16	Burial condition is the most important factor for mtDNA PCR amplification success in Palaeolithic equid remains from the Alpine foreland. Archaeological and Anthropological Sciences, 2015, 7, 505-515.	1.8	20
17	Miners and mining in the Late Bronze Age: a multidisciplinary study from Austria. Antiquity, 2011, 85, 1259-1278.	1.0	18
18	Inter- and intraspecies variability in stable isotope ratio values of archaeological freshwater fish remains from Switzerland (11th–19th centuries AD). Environmental Archaeology, 2016, 21, 119-132.	1.2	18

#	ARTICLE	IF	CITATIONS
19	Taxonomic and phylogenetic signals in bovini cheek teeth: Towards new biosystematic markers to explore the history of wild and domestic cattle. <i>Journal of Archaeological Science</i> , 2019, 109, 104993.	2.4	14
20	Middens, currents and shorelines: Complex depositional processes of waterlogged prehistoric lakeside settlements based on the example of Zurich-Parkhaus OpÄ©ra (Switzerland). <i>Journal of Archaeological Science</i> , 2018, 97, 26-41.	2.4	12
21	A knot in a network: Residential mobility at the Late Iron Age proto-urban centre of Basel-Gasfabrik (Switzerland) revealed by isotope analyses. <i>Journal of Archaeological Science: Reports</i> , 2018, 17, 735-753.	0.5	9
22	Hunting, Husbandry, and Human-Environment Interactions in the Neolithic Lakeshore Sites of Western Switzerland. <i>European Journal of Archaeology</i> , 2019, 22, 3-21.	0.5	8
23	Carbon and nitrogen isotopic ratios in archaeological and modern Swiss fish as possible markers for diachronic anthropogenic activity in freshwater ecosystems. <i>Journal of Archaeological Science: Reports</i> , 2016, 10, 411-423.	0.5	7
24	Millennia-Long Co-Existence of Two Major European Whitefish (<i>Coregonus</i> spp.) Lineages in Switzerland Inferred from Ancient Mitochondrial DNA. <i>Diversity</i> , 2017, 9, 34.	1.7	6
25	Size diversity in Swiss Bronze Age cattle. <i>International Journal of Osteoarchaeology</i> , 2018, 28, 294-304.	1.2	6
26	Ancient mtDNA diversity reveals specific population development of wild horses in Switzerland after the Last Glacial Maximum. <i>PLoS ONE</i> , 2017, 12, e0177458.	2.5	5
27	Phenotypic diversity in Bronze Age pigs from the Alpine and Central Plateau regions of Switzerland. <i>Journal of Archaeological Science: Reports</i> , 2018, 21, 38-46.	0.5	5
28	MtDNA D-Loop Diversity in Alpine Cattle during the Bronze Age. <i>Diversity</i> , 2021, 13, 449.	1.7	5
29	Mitochondrial d-loop variation, coat colour and sex identification of Late Iron Age horses in Switzerland. <i>Journal of Archaeological Science: Reports</i> , 2016, 6, 386-396.	0.5	2
30	Best practice for osteological sexing in forensics and bioarchaeology: The utility of combining metric and morphological traits from different anatomical regions. <i>International Journal of Osteoarchaeology</i> , 0, , .	1.2	2
31	Small Animals, Big Impact? Early Farmers and Pre- and Post-Harvest Pests from the Middle Neolithic Site of Les Bagnoles in the South-East of France (Lâ€™Isle-sur-la-Sorgue, Vaucluse, France). <i>Journal of Archaeological Science: Reports</i> , 2017, 16, 1-10.	0.5	1
32	The Beginnings of Alpine Transhumance? Isotopic Insights into Neolithic Cattle Herding. <i>Chimia</i> , 2017, 71, 860.	0.6	1
