## Julia Wendt

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/8282070/publications.pdf Version: 2024-02-01

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | <scp>ENIGMAâ€anxiety</scp> working group: Rationale for and organization<br>of <scp>largeâ€scale</scp> neuroimaging studies of anxiety disorders. Human Brain Mapping, 2022, 43,<br>83-112.                    | 1.9 | 31        |
| 2  | Memory advantage for untrustworthy faces: Replication across lab- and web-based studies. PLoS ONE, 2022, 17, e0264034.   | 1.1 | 4         |
| 3  | New insights on the correspondence between subjective affective experience and physiological responses from representational similarity analysis. Psychophysiology, 2022, 59, e14088.                          | 1.2 | 5         |
| 4  | An examination of Intolerance of Uncertainty and contingency instruction on multiple indices during threat acquisition and extinction training. International Journal of Psychophysiology, 2022, 177, 171-178. | 0.5 | 1         |
| 5  | Cortical thickness and restingâ€state cardiac function across the lifespan: A crossâ€sectional pooled<br>megaâ€analysis. Psychophysiology, 2021, 58, e13688.   | 1.2 | 33        |
| 6  | Attentive immobility in the face of inevitable distal threat—Startle potentiation and fear bradycardia as an index of emotion and attention. Psychophysiology, 2021, 58, e13812.                               | 1.2 | 11        |
| 7  | Establishment of Emotional Memories Is Mediated by Vagal Nerve Activation: Evidence from Noninvasive taVNS. Journal of Neuroscience, 2021, 41, 7636-7648.  | 1.7 | 14        |
| 8  | The Role of Interoceptive Sensibility and Emotional Conceptualization for the Experience of Emotions.<br>Frontiers in Psychology, 2021, 12, 712418.  | 1.1 | 16        |
| 9  | Item and source memory for emotional associates is mediated by different retrieval processes.<br>Neuropsychologia, 2020, 145, 106606.  | 0.7 | 21        |
| 10 | The Neurofunctional Basis of Affective Startle Modulation in Humans: Evidence From Combined Facial<br>Electromyography and Functional Magnetic Resonance Imaging. Biological Psychiatry, 2020, 87,<br>548-558. | 0.7 | 46        |
| 11 | Effects of verbal instructions and physical threat removal prior to extinction training on the return of conditioned fear. Scientific Reports, 2020, 10, 1202.   | 1.6 | 4         |
| 12 | Promoting long-term inhibition of human fear responses by non-invasive transcutaneous vagus nerve stimulation during extinction training. Scientific Reports, 2020, 10, 1529.                                  | 1.6 | 26        |
| 13 | Enhanced spontaneous retrieval of cues from emotional events: An ERP study. Biological Psychology, 2019, 148, 107742.  | 1.1 | 4         |
| 14 | Vagally mediated heart rate variability and safety learning: Effects of instructions and number of extinction trials. Psychophysiology, 2019, 56, e13404.  | 1.2 | 10        |
| 15 | COMTVal158Met Genotype Affects Complex Emotion Recognition in Healthy Men and Women. Frontiers in Neuroscience, 2019, 12, 1007.  | 1.4 | 8         |
| 16 | Behavioral and neural evidence of enhanced long-term memory for untrustworthy faces. Scientific<br>Reports, 2019, 9, 19217.  | 1.6 | 5         |
| 17 | Heartfelt memories: Cardiac vagal tone correlates with increased memory for untrustworthy faces<br>Emotion, 2019, 19, 178-182.   | 1.5 | 12        |
| 18 | Navigating the garden of forking paths for data exclusions in fear conditioning research. ELife, 2019,<br>8  | 2.8 | 92        |

Julia Wendt

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 19 | Pretreatment Cardiac Vagal Tone Predicts Dropout from and Residual Symptoms after Exposure<br>Therapy in Patients with Panic Disorder and Agoraphobia. Psychotherapy and Psychosomatics, 2018, 87,<br>187-189.                     | 4.0 | 23        |
| 20 | Resting State Vagally-Mediated Heart Rate Variability Is Associated With Neural Activity During Explicit<br>Emotion Regulation. Frontiers in Neuroscience, 2018, 12, 794.  | 1.4 | 40        |
| 21 | Effects of Transcutaneous Vagus Nerve Stimulation (tVNS) on the P300 and Alpha-Amylase Level: A<br>Pilot Study. Frontiers in Human Neuroscience, 2018, 12, 202.  | 1.0 | 89        |
| 22 | Oral Contraceptives Impair Complex Emotion Recognition in Healthy Women. Frontiers in Neuroscience, 2018, 12, 1041.  | 1.4 | 30        |
| 23 | Extinktion: Neurowissenschaftliche Erkenntnisse zur Frage, wie Menschen sich Ä <b>¤</b> dern.<br>Verhaltenstherapie, 2017, 27, 16-26.  | 0.3 | 4         |
| 24 | Don't fear â€~fear conditioning': Methodological considerations for the design and analysis of studies<br>on human fear acquisition, extinction, and return of fear. Neuroscience and Biobehavioral Reviews,<br>2017, 77, 247-285. | 2.9 | 543       |
| 25 | Acquisition and inhibition of conditioned fear is modulated by individual stimulus fear-relevance.<br>Neurobiology of Learning and Memory, 2017, 137, 114-122.   | 1.0 | 3         |
| 26 | Active avoidance and attentive freezing in the face of approaching threat. NeuroImage, 2017, 158, 196-204.   | 2.1 | 81        |
| 27 | Physiological and neural correlates of worry and rumination: Support for the contrast avoidance model of worry. Psychophysiology, 2017, 54, 161-171.   | 1.2 | 27        |
| 28 | When neutral turns significant: brain dynamics of rapidly formed associations between neutral stimuli and emotional contexts. European Journal of Neuroscience, 2016, 44, 2176-2183.   | 1.2 | 26        |
| 29 | Binding neutral information to emotional contexts: Brain dynamics of long-term recognition memory.<br>Cognitive, Affective and Behavioral Neuroscience, 2016, 16, 234-247.   | 1.0 | 55        |
| 30 | Resting heart rate variability is associated with inhibition of conditioned fear. Psychophysiology, 2015, 52, 1161-1166.   | 1.2 | 63        |
| 31 | Discriminant validity of constructs derived from the self-regulative model for evaluation anxiety for predicting clinical manifestations of test anxiety. Behaviour Research and Therapy, 2015, 73, 52-57.                         | 1.6 | 4         |
| 32 | Genetic influences on the acquisition and inhibition of fear. International Journal of<br>Psychophysiology, 2015, 98, 499-505.   | 0.5 | 23        |
| 33 | Fear-potentiated startle processing in humans: Parallel fMRI and orbicularis EMG assessment during cue conditioning and extinction. International Journal of Psychophysiology, 2015, 98, 535-545.                                  | 0.5 | 56        |
| 34 | Discriminating Clinical From Nonclinical Manifestations of Test Anxiety: A Validation Study. Behavior<br>Therapy, 2014, 45, 222-231.   | 1.3 | 29        |
| 35 | Functional imaging in obese children responding to long-term sports therapy. Behavioural Brain<br>Research, 2014, 272, 25-31.  | 1.2 | 3         |
| 36 | Impaired recognition of emotional facial expressions in patients with multiple sclerosis. Multiple<br>Sclerosis and Related Disorders, 2014, 3, 482-488.   | 0.9 | 37        |

Julia Wendt

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 37 | Mechanisms of change: Effects of repetitive exposure to feared stimuli on the brain's fear network.<br>Psychophysiology, 2012, 49, 1319-1329.  | 1.2 | 15        |
| 38 | Brain activation during spatial updating and attentive tracking of moving targets. Brain and Cognition, 2012, 78, 105-113.   | 0.8 | 41        |
| 39 | Brain activation during anticipation of interoceptive threat. NeuroImage, 2012, 61, 857-865.   | 2.1 | 72        |
| 40 | The functional connectivity between amygdala and extrastriate visual cortex activity during<br>emotional picture processing depends on stimulus novelty. Biological Psychology, 2011, 86, 203-209. | 1.1 | 46        |
| 41 | The brain's relevance detection network operates independently of stimulus modality. Behavioural<br>Brain Research, 2010, 210, 16-23.  | 1.2 | 30        |
| 42 | Prefrontal function associated with impaired emotion recognition in patients with multiple sclerosis. Behavioural Brain Research, 2009, 205, 280-285.  | 1.2 | 65        |
| 43 | Brain activation and defensive response mobilization during sustained exposure to phobiaâ€related and other affective pictures in spider phobia. Psychophysiology, 2008, 45, 205-215.              | 1.2 | 107       |
