

Ajay Pradhan

List of Publications by Citations

Source: <https://exaly.com/author-pdf/8285012/ajay-pradhan-publications-by-citations.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

34
papers

#	Paper	IF	Citations
34	Sex differences in severity and mortality from COVID-19: are males more vulnerable?. <i>Biology of Sex Differences</i> , 2020 , 11, 53	9.3	109
33	Di(2-ethylhexyl) phthalate and diethyl phthalate disrupt lipid metabolism, reduce fecundity and shortens lifespan of <i>Caenorhabditis elegans</i> . <i>Chemosphere</i> , 2018 , 190, 375-382	8.4	50
32	Activation of NF- κ B protein prevents the transition from juvenile ovary to testis and promotes ovarian development in zebrafish. <i>Journal of Biological Chemistry</i> , 2012 , 287, 37926-38	5.4	46
31	The brominated flame retardant TBECHE activates the zebrafish (<i>Danio rerio</i>) androgen receptor, alters gene transcription and causes developmental disturbances. <i>Aquatic Toxicology</i> , 2013 , 142-143, 63-72	5.1	44
30	Juvenile ovary to testis transition in zebrafish involves inhibition of p75. <i>Biology of Reproduction</i> , 2014 , 91, 33	3.9	34
29	Zebrafish sexual behavior: role of sex steroid hormones and prostaglandins. <i>Behavioral and Brain Functions</i> , 2015 , 11, 23	4.1	32
28	1,2-Dibromo-4-(1,2 dibromoethyl) cyclohexane (TBECHE)-mediated steroid hormone receptor activation and gene regulation in chicken LMH cells. <i>Environmental Toxicology and Chemistry</i> , 2014 , 33, 891-9	3.8	29
27	Effect of phthalates on development, reproduction, fat metabolism and lifespan in <i>Daphnia magna</i> . <i>Science of the Total Environment</i> , 2019 , 654, 969-977	10.2	29
26	Identification of a group of brominated flame retardants as novel androgen receptor antagonists and potential neuronal and endocrine disrupters. <i>Environment International</i> , 2015 , 74, 60-70	12.9	27
25	Comparative transcriptional analysis of methylparaben and propylparaben in zebrafish. <i>Science of the Total Environment</i> , 2019 , 671, 129-139	10.2	23
24	Inhibition of retinoic acid synthesis disrupts spermatogenesis and fecundity in zebrafish. <i>General and Comparative Endocrinology</i> , 2015 , 217-218, 81-91	3	20
23	Emerging Roles for Maf1 beyond the Regulation of RNA Polymerase III Activity. <i>Journal of Molecular Biology</i> , 2015 , 427, 2577-85	6.5	18
22	The C-Box Region of MAF1 Regulates Transcriptional Activity and Protein Stability. <i>Journal of Molecular Biology</i> , 2017 , 429, 192-207	6.5	17
21	Perfluorinated alkyl substances impede growth, reproduction, lipid metabolism and lifespan in <i>Daphnia magna</i> . <i>Science of the Total Environment</i> , 2020 , 737, 139682	10.2	16
20	Comparative Analysis of Stress Induced Gene Expression in <i>Caenorhabditis elegans</i> following Exposure to Environmental and Lab Reconstituted Complex Metal Mixture. <i>PLoS ONE</i> , 2015 , 10, e0132897	3.7	15
19	Heat Shock Factor 5 Is Essential for Spermatogenesis in Zebrafish. <i>Cell Reports</i> , 2018 , 25, 3252-3261.e4	10.6	13
18	Androgen receptor modulation following combination exposure to brominated flame-retardants. <i>Scientific Reports</i> , 2018 , 8, 4843	4.9	11

17	TBECH, 1,2-dibromo-4-(1,2 dibromoethyl) cyclohexane, alters androgen receptor regulation in response to mutations associated with prostate cancer. <i>Toxicology and Applied Pharmacology</i> , 2016 , 307, 91-101	4.6	11
16	Thyroid hormone: sex-dependent role in nervous system regulation and disease. <i>Biology of Sex Differences</i> , 2021 , 12, 25	9.3	10
15	Zebrafish cyp17a1 knockout reveals that androgen-mediated signaling is important for male brain sex differentiation. <i>General and Comparative Endocrinology</i> , 2020 , 295, 113490	3	9
14	The brominated flame retardants TBP-AE and TBP-DBPE antagonize the chicken androgen receptor and act as potential endocrine disrupters in chicken LMH cells. <i>Toxicology in Vitro</i> , 2015 , 29, 1993-2000	3.6	9
13	Contribution of pharmaceuticals, fecal bacteria and endotoxin to the inflammatory responses to inland waters. <i>Science of the Total Environment</i> , 2014 , 488-489, 228-35	10.2	8
12	The food preservative ethoxyquin impairs zebrafish development, behavior and alters gene expression profile. <i>Food and Chemical Toxicology</i> , 2020 , 135, 110926	4.7	8
11	In silico and biological analysis of anti-androgen activity of the brominated flame retardants ATE, BATE and DPTE in zebrafish. <i>Chemico-Biological Interactions</i> , 2015 , 233, 35-45	5	7
10	Transcriptional responses of zebrafish to complex metal mixtures in laboratory studies overestimates the responses observed with environmental water. <i>Science of the Total Environment</i> , 2017 , 584-585, 1138-1146	10.2	6
9	Nonsteroidal anti-inflammatory drugs (NSAIDs) cause male-biased sex differentiation in zebrafish. <i>Aquatic Toxicology</i> , 2020 , 223, 105476	5.1	6
8	Germ cell depletion in zebrafish leads to incomplete masculinization of the brain. <i>General and Comparative Endocrinology</i> , 2018 , 265, 15-21	3	6
7	Regulation of zebrafish gonadal sex differentiation. <i>AIMS Molecular Science</i> , 2016 , 3, 567-584	0.9	6
6	Di(isononyl) cyclohexane-1,2-dicarboxylate (DINCH) alters transcriptional profiles, lipid metabolism and behavior in zebrafish larvae. <i>Heliyon</i> , 2021 , 7, e07951	3.6	4
5	Heat shock factor 5 is conserved in vertebrates and essential for spermatogenesis in zebrafish		2
4	In silico and in vitro assessment of androgen receptor antagonists. <i>Computational Biology and Chemistry</i> , 2021 , 92, 107490	3.6	2
3	Plasticizers: negative impacts on the thyroid hormone system.. <i>Environmental Science and Pollution Research</i> , 2022 , 1	5.1	0
2	The brominated flame retardants TBECH and DPTE alter prostate growth, histology and gene expression patterns in the mouse. <i>Reproductive Toxicology</i> , 2021 , 102, 43-55	3.4	
1	Transcriptomic analysis of nonylphenol effect on. <i>PeerJ</i> , 2021 , 9, e10794	3.1
