#	Article	IF	CITATIONS
1	Outcomes of an Early Feeding Practices Intervention to Prevent Childhood Obesity. Pediatrics, 2013, 132, e109-e118.	1.0	136
2	An Early Feeding Practices Intervention for Obesity Prevention. Pediatrics, 2015, 136, e40-e49.	1.0	120
3	Toddlers' food preferences. The impact of novel food exposure, maternal preferences and food neophobia. Appetite, 2012, 59, 818-825.	1.8	112
4	The feeding practices and structure questionnaire: construction and initial validation in a sample of Australian first-time mothers and their 2-year olds. International Journal of Behavioral Nutrition and Physical Activity, 2014, 11, 72.	2.0	92
5	Child eating behavior outcomes of an early feeding intervention to reduce risk indicators for child obesity: The NOURISH RCT. Obesity, 2014, 22, E104-11.	1.5	87
6	Mealtime Structure and Responsive Feeding Practices Are Associated With Less Food Fussiness and More Food Enjoyment in Children. Journal of Nutrition Education and Behavior, 2017, 49, 11-18.e1.	0.3	83
7	Maternal report of young children's eating styles. Validation of the Children's Eating Behaviour Questionnaire in three ethnically diverse Australian samples. Appetite, 2013, 64, 48-55.	1.8	81
8	Food neophobia and its association with diet quality and weight in children aged 24Âmonths: a cross sectional study. International Journal of Behavioral Nutrition and Physical Activity, 2015, 12, 13.	2.0	75
9	The Relationship between Number of Fruits, Vegetables, and Noncore Foods Tried at Age 14 Months and Food Preferences, Dietary Intake Patterns, Fussy Eating Behavior, and Weight Status at Age 3.7 Years. Journal of the Academy of Nutrition and Dietetics, 2016, 116, 630-637.	0.4	65
10	Associations between infant temperament and early feeding practices. A cross-sectional study of Australian mother-infant dyads from the NOURISH randomised controlled trial. Appetite, 2013, 60, 239-245.	1.8	64
11	The relationship between appetite and food preferences in British and Australian children. International Journal of Behavioral Nutrition and Physical Activity, 2015, 12, 116.	2.0	62
12	Contemporary Research on Parenting: Conceptual, Methodological, and Translational Issues. Childhood Obesity, 2013, 9, S-87-S-94.	0.8	56
13	Child dietary and eating behavior outcomes up to 3.5 years after an early feeding intervention: The NOURISH RCT. Obesity, 2016, 24, 1537-1545.	1.5	56
14	Satiety responsiveness in toddlerhood predicts energy intake and weight status at four years of age. Appetite, 2014, 74, 79-85.	1.8	55
15	The Feeding Practices and Structure Questionnaire (FPSQ-28): A parsimonious version validated for longitudinal use from 2 to 5 years. Appetite, 2016, 100, 172-180.	1.8	53
16	Maternal feeding practices and fussy eating in toddlerhood: a discordant twin analysis. International Journal of Behavioral Nutrition and Physical Activity, 2016, 13, 81.	2.0	53
17	Appetitive traits associated with higher and lower body mass index: evaluating the validity of the adult eating behaviour questionnaire in an Australian sample. International Journal of Behavioral Nutrition and Physical Activity, 2017, 14, 130.	2.0	50
18	The timing of solid introduction in an â€~obesogenic' environment: a narrative review of the evidence and methodological issues. Australian and New Zealand Journal of Public Health, 2015, 39, 366-373.	0.8	48

#	Article	IF	CITATIONS
19	Recruiting and engaging new mothers in nutrition research studies: lessons from the Australian NOURISH randomised controlled trial. International Journal of Behavioral Nutrition and Physical Activity, 2012, 9, 129.	2.0	46
20	The relationship between controlling feeding practices and boys' and girls' eating in the absence of hunger. Eating Behaviors, 2014, 15, 519-522.	1.1	42
21	Dads at the dinner table. A cross-sectional study of Australian fathers' child feeding perceptions and practices. Appetite, 2014, 73, 40-44.	1.8	41
22	Slithering snakes, angry men and out-group members: What and whom are we evolved to fear?. Cognition and Emotion, 2013, 27, 1168-1180.	1.2	39
23	The influence of maternal infant feeding practices and beliefs on the expression of food neophobia in toddlers. Appetite, 2014, 82, 36-42.	1.8	36
24	Confirmatory factor analysis of the Baby Eating Behaviour Questionnaire and associations with infant weight, gender and feeding mode in an Australian sample. Appetite, 2014, 82, 43-49.	1.8	36
25	On the resistance to extinction of fear conditioned to angry faces. Psychophysiology, 2012, 49, 375-380.	1.2	34
26	Verbal instruction abolishes fear conditioned to racial out-group faces. Journal of Experimental Social Psychology, 2009, 45, 1303-1307.	1.3	33
27	The effect of poser race on the happy categorization advantage depends on stimulus type, set size, and presentation duration Emotion, 2012, 12, 1303-1314.	1.5	32
28	Feeding beliefs and practices of Chinese immigrant mothers. Validation of a modified version of the Child Feeding Questionnaire. Appetite, 2014, 80, 55-60.	1.8	30
29	Association between Australian-Indian mothers' controlling feeding practices and children's appetite traits. Appetite, 2015, 84, 188-195.	1.8	27
30	Poor dietary patterns at 1–5†years of age are related to food neophobia and breastfeeding duration but not age of introduction to solids in a relatively advantaged sample. Eating Behaviors, 2018, 31, 28-34.	1.1	26
31	A Cross Sectional Comparison of Predisposing, Reinforcing and Enabling Factors for Lifestyle Health Behaviours and Weight Gain in Healthy and Overweight Pregnant Women. Maternal and Child Health Journal, 2017, 21, 626-635.	0.7	25
32	No evidence for subliminal affective priming with emotional facial expression primes. Motivation and Emotion, 2011, 35, 33-43.	0.8	23
33	The role of anxiety and perspective-taking strategy on affective empathic responses. Behaviour Research and Therapy, 2011, 49, 852-857.	1.6	21
34	An exploratory study of associations between <scp>A</scp> ustralianâ€ <scp>I</scp> ndian mothers' use of controlling feeding practices, concerns and perceptions of children's weight and children's picky eating. Nutrition and Dietetics, 2014, 71, 28-34.	0.9	21
35	A prospective study of breastfeeding intentions of healthy weight and overweight women as predictors of breastfeeding outcomes. Midwifery, 2017, 53, 20-27.	1.0	21
36	Does emotion modulate the blink reflex in human conditioning? Startle potentiation during pleasant and unpleasant cues in the picture?picture paradigm. Psychophysiology, 2007, 44, 737-748.	1.2	20

#	Article	IF	CITATIONS
37	Affect, attention, or anticipatory arousal? Human blink startle modulation in forward and backward affective conditioning. International Journal of Psychophysiology, 2008, 69, 9-17.	0.5	20
38	Extending the validity of the Feeding Practices and Structure Questionnaire. International Journal of Behavioral Nutrition and Physical Activity, 2015, 12, 90.	2.0	20
39	Measurement invariance of the Feeding Practices and Structure Questionnaire-28 among a community of socioeconomically disadvantaged mothers and fathers. Appetite, 2018, 120, 115-122.	1.8	20
40	The effects of verbal instruction on affective and expectancy learning. Behaviour Research and Therapy, 2010, 48, 203-209.	1.6	18
41	Association between maternal depressive symptoms in the early postâ€natal period and responsiveness in feeding at child age 2 years. Maternal and Child Nutrition, 2015, 11, 926-935.	1.4	18
42	Prospective Relationships between Health Cognitions and Excess Gestational Weight GainÂin a Cohort of Healthy and Overweight PregnantÂWomen. Journal of the Academy of Nutrition and Dietetics, 2017, 117, 1198-1209.	0.4	18
43	Attitudes of Australian psychologists towards the delivery of therapy via video conferencing technology. Australian Psychologist, 2020, 55, 606-617.	0.9	18
44	The relationship between maternal feeding beliefs and practices and perceptions of infant eating behaviours at 4 months. Appetite, 2016, 105, 1-7.	1.8	17
45	Emotional expressions preferentially elicit implicit evaluations of faces also varying in race or age Emotion, 2014, 14, 865-877.	1.5	15
46	Relationships between maternal overweight prior to pregnancy, feeding mode and infant feeding beliefs and practices. Journal of Paediatrics and Child Health, 2015, 51, 913-919.	0.4	14
47	Obesogenic eating behaviors mediate the relationships between psychological problems and BMI in children. Obesity, 2017, 25, 928-934.	1.5	14
48	Non-responsive feeding practices mediate the relationship between maternal and child obesogenic eating behaviours. Appetite, 2020, 151, 104648.	1.8	13
49	Breastfeeding Duration and Authoritative Feeding Practices in First-Time Mothers. Journal of Human Lactation, 2016, 32, 498-506.	0.8	11
50	Are two threats worse than one? The effects of face race and emotional expression on fear conditioning. Psychophysiology, 2014, 51, 152-158.	1.2	9
51	Is higher formula intake and limited dietary diversity in Australian children at 14 months of age associated with dietary quality at 24 months?. Appetite, 2018, 120, 240-245.	1.8	8
52	The effect of emotional and attentional load on attentional startle modulation. International Journal of Psychophysiology, 2009, 74, 266-273.	0.5	7
53	Electro-cortical implicit race bias does not vary with participants' race or sex. Social Cognitive and Affective Neuroscience, 2011, 6, 591-601.	1.5	7
54	Associations between appetitive traits, dietary patterns and weight status of children attending the School Kids Intervention Program. Nutrition and Health, 2020, 26, 103-113.	0.6	7

#	Article	IF	CITATIONS
55	Comparing barriers to breastfeeding success in the first month for non-overweight and overweight women. BMC Pregnancy and Childbirth, 2018, 18, 461.	0.9	5
56	Examining child intake frequency, mothers' own liking and child early exposure as potential predictors of child liking for restricted foods and drinks at 5 years old. Public Health Nutrition, 2020, 23, 2355-2364.	1.1	4
57	Childâ€feeding practices of <scp>I</scp> ndian and <scp>A</scp> ustralianâ€ <scp>I</scp> ndian mothers. Nutrition and Dietetics, 2014, 71, 276-283.	0.9	2
58	The relationship between self-reported animal fear and ERP modulation: Evidence for enhanced processing and fear of harmless invertebrates in snake- and spider-fearful individuals. Motivation and Emotion, 2011, 35, 474-483.	0.8	1
59	Validity of Maternal-Reported Weight and Height of 2–5 Year Old Children. Indian Journal of Pediatrics, 2018, 85, 567-568.	0.3	1
60	Qualitative Exploration of Dimensions of Restrictive Feeding With Australian Mothers of 6-Year-Olds. Journal of Nutrition Education and Behavior, 2021, 53, 858-869.	0.3	1
