#	ARTICLE	IF	CITATIONS
1	Qualitative Exploration of Dimensions of Restrictive Feeding With Australian Mothers of 6-Year-Olds. <i>Journal of Nutrition Education and Behavior</i> , 2021, 53, 858-869.	0.3	1
2	Attitudes of Australian psychologists towards the delivery of therapy via video conferencing technology. <i>Australian Psychologist</i> , 2020, 55, 606-617.	0.9	18
3	Examining child intake frequency, mothers' own liking and child early exposure as potential predictors of child liking for restricted foods and drinks at 5 years old. <i>Public Health Nutrition</i> , 2020, 23, 2355-2364.	1.1	4
4	Non-responsive feeding practices mediate the relationship between maternal and child obesogenic eating behaviours. <i>Appetite</i> , 2020, 151, 104648.	1.8	13
5	Associations between appetitive traits, dietary patterns and weight status of children attending the School Kids Intervention Program. <i>Nutrition and Health</i> , 2020, 26, 103-113.	0.6	7
6	Validity of Maternal-Reported Weight and Height of 2-5 Year Old Children. <i>Indian Journal of Pediatrics</i> , 2018, 85, 567-568.	0.3	1
7	Measurement invariance of the Feeding Practices and Structure Questionnaire-28 among a community of socioeconomically disadvantaged mothers and fathers. <i>Appetite</i> , 2018, 120, 115-122.	1.8	20
8	Is higher formula intake and limited dietary diversity in Australian children at 14 months of age associated with dietary quality at 24 months?. <i>Appetite</i> , 2018, 120, 240-245.	1.8	8
9	Comparing barriers to breastfeeding success in the first month for non-overweight and overweight women. <i>BMC Pregnancy and Childbirth</i> , 2018, 18, 461.	0.9	5
10	Poor dietary patterns at 1-5 years of age are related to food neophobia and breastfeeding duration but not age of introduction to solids in a relatively advantaged sample. <i>Eating Behaviors</i> , 2018, 31, 28-34.	1.1	26
11	Prospective Relationships between Health Cognitions and Excess Gestational Weight Gain in a Cohort of Healthy and Overweight Pregnant Women. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2017, 117, 1198-1209.	0.4	18
12	Obesogenic eating behaviors mediate the relationships between psychological problems and BMI in children. <i>Obesity</i> , 2017, 25, 928-934.	1.5	14
13	A prospective study of breastfeeding intentions of healthy weight and overweight women as predictors of breastfeeding outcomes. <i>Midwifery</i> , 2017, 53, 20-27.	1.0	21
14	Mealtime Structure and Responsive Feeding Practices Are Associated With Less Food Fussiness and More Food Enjoyment in Children. <i>Journal of Nutrition Education and Behavior</i> , 2017, 49, 11-18.e1.	0.3	83
15	A Cross Sectional Comparison of Predisposing, Reinforcing and Enabling Factors for Lifestyle Health Behaviours and Weight Gain in Healthy and Overweight Pregnant Women. <i>Maternal and Child Health Journal</i> , 2017, 21, 626-635.	0.7	25
16	Appetitive traits associated with higher and lower body mass index: evaluating the validity of the adult eating behaviour questionnaire in an Australian sample. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 130.	2.0	50
17	Child dietary and eating behavior outcomes up to 3.5 years after an early feeding intervention: The NOURISH RCT. <i>Obesity</i> , 2016, 24, 1537-1545.	1.5	56
18	The relationship between maternal feeding beliefs and practices and perceptions of infant eating behaviours at 4 months. <i>Appetite</i> , 2016, 105, 1-7.	1.8	17

#	ARTICLE	IF	CITATIONS
19	The Feeding Practices and Structure Questionnaire (FPSQ-28): A parsimonious version validated for longitudinal use from 2 to 5 years. <i>Appetite</i> , 2016, 100, 172-180.	1.8	53
20	Maternal feeding practices and fussy eating in toddlerhood: a discordant twin analysis. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2016, 13, 81.	2.0	53
21	Breastfeeding Duration and Authoritative Feeding Practices in First-Time Mothers. <i>Journal of Human Lactation</i> , 2016, 32, 498-506.	0.8	11
22	The Relationship between Number of Fruits, Vegetables, and Noncore Foods Tried at Age 14 Months and Food Preferences, Dietary Intake Patterns, Fussy Eating Behavior, and Weight Status at Age 3.7 Years. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2016, 116, 630-637.	0.4	65
23	The relationship between appetite and food preferences in British and Australian children. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 116.	2.0	62
24	Extending the validity of the Feeding Practices and Structure Questionnaire. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 90.	2.0	20
25	The timing of solid introduction in an "obesogenic" environment: a narrative review of the evidence and methodological issues. <i>Australian and New Zealand Journal of Public Health</i> , 2015, 39, 366-373.	0.8	48
26	Relationships between maternal overweight prior to pregnancy, feeding mode and infant feeding beliefs and practices. <i>Journal of Paediatrics and Child Health</i> , 2015, 51, 913-919.	0.4	14
27	Association between maternal depressive symptoms in the early postnatal period and responsiveness in feeding at child age 2 years. <i>Maternal and Child Nutrition</i> , 2015, 11, 926-935.	1.4	18
28	An Early Feeding Practices Intervention for Obesity Prevention. <i>Pediatrics</i> , 2015, 136, e40-e49.	1.0	120
29	Food neophobia and its association with diet quality and weight in children aged 24 months: a cross sectional study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 13.	2.0	75
30	Association between Australian-Indian mothers' controlling feeding practices and children's appetite traits. <i>Appetite</i> , 2015, 84, 188-195.	1.8	27
31	Are two threats worse than one? The effects of face race and emotional expression on fear conditioning. <i>Psychophysiology</i> , 2014, 51, 152-158.	1.2	9
32	Child eating behavior outcomes of an early feeding intervention to reduce risk indicators for child obesity: The NOURISH RCT. <i>Obesity</i> , 2014, 22, E104-11.	1.5	87
33	Child feeding practices of Indian and Australian-Indian mothers. <i>Nutrition and Dietetics</i> , 2014, 71, 276-283.	0.9	2
34	An exploratory study of associations between Australian-Indian mothers' use of controlling feeding practices, concerns and perceptions of children's weight and children's picky eating. <i>Nutrition and Dietetics</i> , 2014, 71, 28-34.	0.9	21
35	The influence of maternal infant feeding practices and beliefs on the expression of food neophobia in toddlers. <i>Appetite</i> , 2014, 82, 36-42.	1.8	36
36	The relationship between controlling feeding practices and boys' and girls' eating in the absence of hunger. <i>Eating Behaviors</i> , 2014, 15, 519-522.	1.1	42

#	ARTICLE	IF	CITATIONS
37	Confirmatory factor analysis of the Baby Eating Behaviour Questionnaire and associations with infant weight, gender and feeding mode in an Australian sample. <i>Appetite</i> , 2014, 82, 43-49.	1.8	36
38	The feeding practices and structure questionnaire: construction and initial validation in a sample of Australian first-time mothers and their 2-year olds. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2014, 11, 72.	2.0	92
39	Satiety responsiveness in toddlerhood predicts energy intake and weight status at four years of age. <i>Appetite</i> , 2014, 74, 79-85.	1.8	55
40	Dads at the dinner table. A cross-sectional study of Australian fathers' child feeding perceptions and practices. <i>Appetite</i> , 2014, 73, 40-44.	1.8	41
41	Feeding beliefs and practices of Chinese immigrant mothers. Validation of a modified version of the Child Feeding Questionnaire. <i>Appetite</i> , 2014, 80, 55-60.	1.8	30
42	Emotional expressions preferentially elicit implicit evaluations of faces also varying in race or age.. <i>Emotion</i> , 2014, 14, 865-877.	1.5	15
43	Associations between infant temperament and early feeding practices. A cross-sectional study of Australian mother-infant dyads from the NOURISH randomised controlled trial. <i>Appetite</i> , 2013, 60, 239-245.	1.8	64
44	Maternal report of young children's eating styles. Validation of the Children's Eating Behaviour Questionnaire in three ethnically diverse Australian samples. <i>Appetite</i> , 2013, 64, 48-55.	1.8	81
45	Slithering snakes, angry men and out-group members: What and whom are we evolved to fear?. <i>Cognition and Emotion</i> , 2013, 27, 1168-1180.	1.2	39
46	Contemporary Research on Parenting: Conceptual, Methodological, and Translational Issues. <i>Childhood Obesity</i> , 2013, 9, S-87-S-94.	0.8	56
47	Outcomes of an Early Feeding Practices Intervention to Prevent Childhood Obesity. <i>Pediatrics</i> , 2013, 132, e109-e118.	1.0	136
48	The effect of poser race on the happy categorization advantage depends on stimulus type, set size, and presentation duration.. <i>Emotion</i> , 2012, 12, 1303-1314.	1.5	32
49	Recruiting and engaging new mothers in nutrition research studies: lessons from the Australian NOURISH randomised controlled trial. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012, 9, 129.	2.0	46
50	Toddlers' food preferences. The impact of novel food exposure, maternal preferences and food neophobia. <i>Appetite</i> , 2012, 59, 818-825.	1.8	112
51	On the resistance to extinction of fear conditioned to angry faces. <i>Psychophysiology</i> , 2012, 49, 375-380.	1.2	34
52	The role of anxiety and perspective-taking strategy on affective empathic responses. <i>Behaviour Research and Therapy</i> , 2011, 49, 852-857.	1.6	21
53	No evidence for subliminal affective priming with emotional facial expression primes. <i>Motivation and Emotion</i> , 2011, 35, 33-43.	0.8	23
54	The relationship between self-reported animal fear and ERP modulation: Evidence for enhanced processing and fear of harmless invertebrates in snake- and spider-fearful individuals. <i>Motivation and Emotion</i> , 2011, 35, 474-483.	0.8	1

#	ARTICLE	IF	CITATIONS
55	Electro-cortical implicit race bias does not vary with participants'™ race or sex. <i>Social Cognitive and Affective Neuroscience</i> , 2011, 6, 591-601.	1.5	7
56	The effects of verbal instruction on affective and expectancy learning. <i>Behaviour Research and Therapy</i> , 2010, 48, 203-209.	1.6	18
57	The effect of emotional and attentional load on attentional startle modulation. <i>International Journal of Psychophysiology</i> , 2009, 74, 266-273.	0.5	7
58	Verbal instruction abolishes fear conditioned to racial out-group faces. <i>Journal of Experimental Social Psychology</i> , 2009, 45, 1303-1307.	1.3	33
59	Affect, attention, or anticipatory arousal? Human blink startle modulation in forward and backward affective conditioning. <i>International Journal of Psychophysiology</i> , 2008, 69, 9-17.	0.5	20
60	Does emotion modulate the blink reflex in human conditioning? Startle potentiation during pleasant and unpleasant cues in the picture?picture paradigm. <i>Psychophysiology</i> , 2007, 44, 737-748.	1.2	20
