#	ARTICLE	IF	CITATIONS
1	Out-of-body memory encoding causes third-person perspective at recall. <i>Journal of Cognitive Psychology</i> , 2022, 34, 160-178.	0.4	13
2	Limits of cross-modal plasticity? Short-term visual deprivation does not enhance cardiac interoception, thermosensation, or tactile spatial acuity. <i>Biological Psychology</i> , 2022, 168, 108248.	1.1	5
3	No specific relationship between hypnotic suggestibility and the rubber hand illusion. <i>Nature Communications</i> , 2022, 13, 564.	5.8	21
4	Perceptual illusion of body-ownership within an immersive realistic environment enhances memory accuracy and re-experiencing. <i>IScience</i> , 2022, 25, 103584.	1.9	12
5	Predictive attenuation of touch and tactile gating are distinct perceptual phenomena. <i>IScience</i> , 2022, 25, 104077.	1.9	23
6	Interoception as independent cardiac, thermosensory, nociceptive, and affective touch perceptual submodalities. <i>Biological Psychology</i> , 2022, 172, 108355.	1.1	29
7	The contribution of stimulating multiple body parts simultaneously to the illusion of owning an entire artificial body. <i>PLoS ONE</i> , 2021, 16, e0233243.	1.1	18
8	The Relationship Between Referral of Touch and the Feeling of Ownership in the Rubber Hand Illusion. <i>Frontiers in Psychology</i> , 2021, 12, 629590.	1.1	14
9	The supernumerary rubber hand illusion revisited: Perceived duplication of limbs and visuotactile events. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2021, 47, 810-829.	0.7	10
10	Integration of predictions and afferent signals in body ownership. <i>Cognition</i> , 2021, 212, 104722.	1.1	11
11	No evidence for somatosensory attenuation during action observation of self-touch. <i>European Journal of Neuroscience</i> , 2021, 54, 6422-6444.	1.2	15
12	Little evidence for an effect of the rubber hand illusion on basic movement. <i>European Journal of Neuroscience</i> , 2021, 54, 6463-6486.	1.2	9
13	Predicting pain: differential pain thresholds during self-induced, externally induced, and imagined self-induced pressure pain. <i>Pain</i> , 2021, 162, 1539-1544.	2.0	11
14	Perception of Our Own Body Influences Self-Concept and Self-Incoherence Impairs Episodic Memory. <i>IScience</i> , 2020, 23, 101429.	1.9	31
15	Fluidity of gender identity induced by illusory body-sex change. <i>Scientific Reports</i> , 2020, 10, 14385.	1.6	32
16	Which hand is mine? Discriminating body ownership perception in a two-alternative forced-choice task. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 4058-4083.	0.7	39
17	Efference Copy Is Necessary for the Attenuation of Self-Generated Touch. <i>IScience</i> , 2020, 23, 100843.	1.9	52
18	Functional Connectivity between the Cerebellum and Somatosensory Areas Implements the Attenuation of Self-Generated Touch. <i>Journal of Neuroscience</i> , 2020, 40, 894-906.	1.7	72

#	ARTICLE	IF	CITATIONS
19	Duplication of the bodily self: a perceptual illusion of dual full-body ownership and dual self-location. Royal Society Open Science, 2020, 7, 201911.	1.1	12
20	Weakening the subjective sensation of own hand ownership does not interfere with rapid finger movements. PLoS ONE, 2019, 14, e0223580.	1.1	12
21	Multisensory correlationsâ€”Not tactile expectationsâ€”Determine the sense of body ownership. PLoS ONE, 2019, 14, e0213265.	1.1	19
22	Premotor cortex implements causal inference in multisensory own-body perception. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 19771-19773.	3.3	41
23	Direct Electrophysiological Correlates of Body Ownership in Human Cerebral Cortex. Cerebral Cortex, 2019, 29, 1328-1341.	1.6	44
24	Full-body ownership illusion elicited by visuo-vestibular integration.. Journal of Experimental Psychology: Human Perception and Performance, 2019, 45, 209-223.	0.7	21
25	Rapid learning and unlearning of predicted sensory delays in self-generated touch. ELife, 2019, 8, .	2.8	50
26	Short-term visual deprivation boosts the flexibility of body representation. Scientific Reports, 2018, 8, 6284.	1.6	14
27	Motor imagery involves predicting the sensory consequences of the imagined movement. Nature Communications, 2018, 9, 1617.	5.8	173
28	Mental Imagery Induces Cross-Modal Sensory Plasticity and Changes Future Auditory Perception. Psychological Science, 2018, 29, 926-935.	1.8	15
29	Body ownership shapes self-orientation perception. Scientific Reports, 2018, 8, 16062.	1.6	11
30	Implicit and explicit changes in body satisfaction evoked by body size illusions: Implications for eating disorder vulnerability in women. PLoS ONE, 2018, 13, e0199426.	1.1	23
31	Tool use changes the spatial extension of the magnetic touch illusion.. Journal of Experimental Psychology: General, 2018, 147, 298-303.	1.5	12
32	Sensorimotor predictions and tool use: Hand-held tools attenuate self-touch. Cognition, 2017, 165, 1-9.	1.1	58
33	Ownership of an artificial limb induced by electrical brain stimulation. Proceedings of the National Academy of Sciences of the United States of America, 2017, 114, 166-171.	3.3	81
34	Body ownership determines the attenuation of self-generated tactile sensations. Proceedings of the National Academy of Sciences of the United States of America, 2017, 114, 8426-8431.	3.3	106
35	The Content of Imagined Sounds Changes Visual Motion Perception in the Cross-Bounce Illusion. Scientific Reports, 2017, 7, 40123.	1.6	16
36	Dissociating the Neural Basis of Conceptual Self-Awareness from Perceptual Awareness and Unaware Self-Processing. Cerebral Cortex, 2017, 27, 3768-3781.	1.6	26

#	ARTICLE	IF	CITATIONS
37	Body ownership promotes visual awareness. <i>ELife</i> , 2017, 6, .	2.8	14
38	Auditory Motion Elicits a Visual Motion Aftereffect. <i>Frontiers in Neuroscience</i> , 2016, 10, 559.	1.4	14
39	The magnetic touch illusion: A perceptual correlate of visuo-tactile integration in peripersonal space. <i>Cognition</i> , 2016, 155, 44-56.	1.1	22
40	Illusions of having small or large invisible bodies influence visual perception of object size. <i>Scientific Reports</i> , 2016, 6, 34530.	1.6	41
41	Illusory Obesity Triggers Body Dissatisfaction Responses in the Insula and Anterior Cingulate Cortex. <i>Cerebral Cortex</i> , 2016, 26, 4450-4460.	1.6	76
42	No causal link between changes in hand position sense and feeling of limb ownership in the rubber hand illusion. <i>Attention, Perception, and Psychophysics</i> , 2016, 78, 707-720.	0.7	148
43	Owning the body in the mirror: The effect of visual perspective and mirror view on the full-body illusion. <i>Scientific Reports</i> , 2015, 5, 18345.	1.6	57
44	Decoding illusory self-location from activity in the human hippocampus. <i>Frontiers in Human Neuroscience</i> , 2015, 9, 412.	1.0	22
45	Patterns of neural activity in the human ventral premotor cortex reflect a whole-body multisensory percept. <i>NeuroImage</i> , 2015, 109, 328-340.	2.1	58
46	Posterior Cingulate Cortex Integrates the Senses of Self-Location and Body Ownership. <i>Current Biology</i> , 2015, 25, 1416-1425.	1.8	174
47	Illusory ownership of an invisible body reduces autonomic and subjective social anxiety responses. <i>Scientific Reports</i> , 2015, 5, 9831.	1.6	97
48	Illusory Changes in Body Size Modulate Body Satisfaction in a Way That Is Related to Non-Clinical Eating Disorder Psychopathology. <i>PLoS ONE</i> , 2014, 9, e85773.	1.1	109
49	Neural correlates of the rubber hand illusion in amputees: A report of two cases. <i>Neurocase</i> , 2014, 20, 407-420.	0.2	48
50	The Fusion of Mental Imagery and Sensation in the Temporal Association Cortex. <i>Journal of Neuroscience</i> , 2014, 34, 13684-13692.	1.7	34
51	Out-of-body-induced hippocampal amnesia. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 4421-4426.	3.3	145
52	The spatial distance rule in the moving and classical rubber hand illusions. <i>Consciousness and Cognition</i> , 2014, 30, 118-132.	0.8	105
53	Body ownership affects visual perception of object size by rescaling the visual representation of external space. <i>Attention, Perception, and Psychophysics</i> , 2014, 76, 1414-1428.	0.7	53
54	The moving rubber hand illusion revisited: Comparing movements and visuotactile stimulation to induce illusory ownership. <i>Consciousness and Cognition</i> , 2014, 26, 117-132.	0.8	274

#	ARTICLE	IF	CITATIONS
55	The Invisible Hand Illusion: Multisensory Integration Leads to the Embodiment of a Discrete Volume of Empty Space. <i>Journal of Cognitive Neuroscience</i> , 2013, 25, 1078-1099.	1.1	164
56	Disintegration of Multisensory Signals from the Real Hand Reduces Default Limb Self-Attribution: An fMRI Study. <i>Journal of Neuroscience</i> , 2013, 33, 13350-13366.	1.7	174
57	An Alternative to Traditional Mirror Therapy. <i>Clinical Journal of Pain</i> , 2013, 29, e10-e18.	0.8	43
58	That's Near My Hand! Parietal and Premotor Coding of Hand-Centered Space Contributes to Localization and Self-Attribution of the Hand. <i>Journal of Neuroscience</i> , 2012, 32, 14573-14582.	1.7	232
59	Disowning one's seen real body during an out-of-body illusion. <i>Consciousness and Cognition</i> , 2012, 21, 1037-1042.	0.8	98
60	Phantom digit somatotopy: a functional magnetic resonance imaging study in forearm amputees. <i>European Journal of Neuroscience</i> , 2012, 36, 2098-2106.	1.2	40
61	Rubber Hands Feel Touch, but Not in Blind Individuals. <i>PLoS ONE</i> , 2012, 7, e35912.	1.1	42
62	The Perspective Matters! Multisensory Integration in Ego-Centric Reference Frames Determines Full-Body Ownership. <i>Frontiers in Psychology</i> , 2011, 2, 35.	1.1	225
63	Experimental Induction of a Perceived "Telescoped" Limb Using a Full-Body Illusion. <i>Frontiers in Human Neuroscience</i> , 2011, 5, 34.	1.0	23
64	"Pulling telescoped phantoms out of the stump": Manipulating the perceived position of phantom limbs using a full-body illusion. <i>Frontiers in Human Neuroscience</i> , 2011, 5, 121.	1.0	35
65	Being Barbie: The Size of One's Own Body Determines the Perceived Size of the World. <i>PLoS ONE</i> , 2011, 6, e20195.	1.1	285
66	From Part- to Whole-Body Ownership in the Multisensory Brain. <i>Current Biology</i> , 2011, 21, 1118-1122.	1.8	261
67	fMRI Adaptation Reveals a Cortical Mechanism for the Coding of Space Near the Hand. <i>Journal of Neuroscience</i> , 2011, 31, 9023-9031.	1.7	145
68	Integration of Visual and Tactile Signals From the Hand in the Human Brain: An fMRI Study. <i>Journal of Neurophysiology</i> , 2011, 105, 910-922.	0.9	222
69	The Illusion of Owning a Third Arm. <i>PLoS ONE</i> , 2011, 6, e17208.	1.1	196
70	When Right Feels Left: Referral of Touch and Ownership between the Hands. <i>PLoS ONE</i> , 2009, 4, e6933.	1.1	84
71	Inducing illusory ownership of a virtual body. <i>Frontiers in Neuroscience</i> , 2009, 3, 214-220.	1.4	450
72	Referral of sensation to an advanced humanoid robotic hand prosthesis. <i>Scandinavian Journal of Plastic and Reconstructive Surgery and Hand Surgery</i> , 2009, 43, 260-266.	0.6	96

#	ARTICLE	IF	CITATIONS
73	How Many Arms Make a Pair? Perceptual Illusion of Having an Additional Limb. <i>Perception</i> , 2009, 38, 310-312.	0.5	103
74	On the other hand: Dummy hands and peripersonal space. <i>Behavioural Brain Research</i> , 2008, 191, 1-10.	1.2	462
75	Upper limb amputees can be induced to experience a rubber hand as their own. <i>Brain</i> , 2008, 131, 3443-3452.	3.7	385
76	If I Were You: Perceptual Illusion of Body Swapping. <i>PLoS ONE</i> , 2008, 3, e3832.	1.1	693
77	Towards a digital body: The virtual arm illusion. <i>Frontiers in Human Neuroscience</i> , 2008, 2, 6.	1.0	402
78	Threatening a rubber hand that you feel is yours elicits a cortical anxiety response. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007, 104, 9828-9833.	3.3	312
79	The Experimental Induction of Out-of-Body Experiences. <i>Science</i> , 2007, 317, 1048-1048.	6.0	736
80	Neural Substrate of Body Size: Illusory Feeling of Shrinking of the Waist. <i>PLoS Biology</i> , 2005, 3, e412.	2.6	114
81	Touching a Rubber Hand: Feeling of Body Ownership Is Associated with Activity in Multisensory Brain Areas. <i>Journal of Neuroscience</i> , 2005, 25, 10564-10573.	1.7	727
82	That's My Hand! Activity in Premotor Cortex Reflects Feeling of Ownership of a Limb. <i>Science</i> , 2004, 305, 875-877.	6.0	1,261
83	Imagery of Voluntary Movement of Fingers, Toes, and Tongue Activates Corresponding Body-Part-Specific Motor Representations. <i>Journal of Neurophysiology</i> , 2003, 90, 3304-3316.	0.9	525
84	Differential Fronto-Parietal Activation Depending on Force Used in a Precision Grip Task: An fMRI Study. <i>Journal of Neurophysiology</i> , 2001, 85, 2613-2623.	0.9	293
85	Human brain activity in the control of fine static precision grip forces: an fMRI study. <i>European Journal of Neuroscience</i> , 2001, 14, 382-390.	1.2	167
86	Simultaneous movements of upper and lower limbs are coordinated by motor representations that are shared by both limbs: a PET study. <i>European Journal of Neuroscience</i> , 2000, 12, 3385-3398.	1.2	89
87	Perception of One's Own Body within an Immersive Realistic Environment Enhances Accuracy and Re-Experiencing During Memory Retrieval. <i>SSRN Electronic Journal</i> , 0, , .	0.4	0
88	Multisensory Integration Dominates Hypnotisability and Expectations in the Rubber Hand Illusion. <i>Frontiers in Human Neuroscience</i> , 0, 16, .	1.0	16
