#	ARTICLE	IF	CITATIONS
1	Pyviniun Pamoate and Structural Analogs Are Early Macrophilicidal Leads. <i>Pharmaceuticals</i> , 2022, 15, 189.	3.8	4
2	Advancing a Human Onchocerciasis Vaccine From Antigen Discovery to Efficacy Studies Against Natural Infection of Cattle With <i>Onchocerca ochengi</i> . <i>Frontiers in Cellular and Infection Microbiology</i> , 2022, 12, 869039.	3.9	5
3	Co-Administration of Adjuvanted Recombinant Ov-103 and Ov-RAL-2 Vaccines Confer Protection against Natural Challenge in A Bovine <i>Onchocerca ochengi</i> Infection Model of Human Onchocerciasis. <i>Vaccines</i> , 2022, 10, 861.	4.4	5
4	Aspartyl Protease Inhibitors as Anti-Filarial Drugs. <i>Pathogens</i> , 2022, 11, 707.	2.8	4
5	Drugs that target early stages of <i>Onchocerca volvulus</i> : A revisited means to facilitate the elimination goals for onchocerciasis. <i>PLoS Neglected Tropical Diseases</i> , 2021, 15, e0009064.	3.0	10
6	Development of a recombinant vaccine against human onchocerciasis. <i>Expert Review of Vaccines</i> , 2021, 20, 1459-1470.	4.4	6
7	An Integrated Approach to Identify New Anti-Filarial Leads to Treat River Blindness, a Neglected Tropical Disease. <i>Pathogens</i> , 2021, 10, 71.	2.8	16
8	<i>Onchocerca volvulus</i> bivalent subunit vaccine induces protective immunity in genetically diverse collaborative cross recombinant inbred intercross mice. <i>Npj Vaccines</i> , 2021, 6, 17.	6.0	11
9	Integrating Multiple Biomarkers to Increase Sensitivity for the Detection of <i>Onchocerca volvulus</i> Infection. <i>Journal of Infectious Diseases</i> , 2020, 221, 1805-1815.	4.0	23
10	Short-course quinazoline drug treatments are effective in the <i>Litomosoides sigmodontis</i> and <i>Brugia pahangi</i> jird models. <i>International Journal for Parasitology: Drugs and Drug Resistance</i> , 2020, 12, 18-27.	3.4	10
11	Macrophilicidal Benzimidazole-Benzoxaborole Hybrids as an Approach to the Treatment of River Blindness: Part 2. Ketone Linked Analogs. <i>ACS Infectious Diseases</i> , 2020, 6, 180-185.	3.8	14
12	Macrophilicidal Benzimidazole-Benzoxaborole Hybrids as an Approach to the Treatment of River Blindness: Part 1. Amide Linked Analogs. <i>ACS Infectious Diseases</i> , 2020, 6, 173-179.	3.8	11
13	Oxfendazole mediates macrophilicidal efficacy against the filarial nematode <i>Litomosoides sigmodontis</i> in vivo and inhibits <i>Onchocerca spec.</i> motility in vitro. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0008427.	3.0	31
14	Nearly Complete Genome Sequence of <i>Brugia malayi</i> Strain FR3. <i>Microbiology Resource Announcements</i> , 2020, 9, .	0.6	13
15	Prediction pipeline for discovery of regulatory motifs associated with <i>Brugia malayi</i> molting. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0008275.	3.0	46
16	The Potency of an Anti-MERS Coronavirus Subunit Vaccine Depends on a Unique Combinatorial Adjuvant Formulation. <i>Vaccines</i> , 2020, 8, 251.	4.4	9
17	Sex chromosome evolution in parasitic nematodes of humans. <i>Nature Communications</i> , 2020, 11, 1964.	12.8	38
18	Preliminary evaluations of 3-dimensional human skin models for their ability to facilitate in vitro the long-term development of the debilitating obligatory human parasite <i>Onchocerca volvulus</i> . <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0008503.	3.0	6

#	ARTICLE	IF	CITATIONS
19	Vaccination with novel low-molecular weight proteins secreted from <i>Trichinella spiralis</i> inhibits establishment of infection. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0008842.	3.0	5
20	Title is missing!. , 2020, 14, e0008503.		0
21	Title is missing!. , 2020, 14, e0008503.		0
22	Title is missing!. , 2020, 14, e0008503.		0
23	Title is missing!. , 2020, 14, e0008503.		0
24	Development and validation of an <i>Onchocerca ochengi</i> adult male worm gerbil model for macrofilaricidal drug screening. <i>PLoS Neglected Tropical Diseases</i> , 2019, 13, e0007556.	3.0	8
25	Antibody responses against the vaccine antigens Ov-103 and Ov-RAL-2 are associated with protective immunity to <i>Onchocerca volvulus</i> infection in both mice and humans. <i>PLoS Neglected Tropical Diseases</i> , 2019, 13, e0007730.	3.0	18
26	Pyruvate produced by <i>Brugia</i> spp. via glycolysis is essential for maintaining the mutualistic association between the parasite and its endosymbiont, <i>Wolbachia</i> . <i>PLoS Pathogens</i> , 2019, 15, e1008085.	4.7	20
27	Emodepside has sex-dependent immobilizing effects on adult <i>Brugia malayi</i> due to a differentially spliced binding pocket in the RCK1 region of the SLO-1 K channel. <i>PLoS Pathogens</i> , 2019, 15, e1008041.	4.7	30
28	Development of a preliminary in vitro drug screening assay based on a newly established culturing system for pre-adult fifth-stage <i>Onchocerca volvulus</i> worms. <i>PLoS Neglected Tropical Diseases</i> , 2019, 13, e0007108.	3.0	24
29	Efficacy of subcutaneous doses and a new oral amorphous solid dispersion formulation of flubendazole on male jirds (<i>Meriones unguiculatus</i>) infected with the filarial nematode <i>Brugia pahangi</i> . <i>PLoS Neglected Tropical Diseases</i> , 2019, 13, e0006787.	3.0	13
30	<i>Onchocerca volvulus</i> : The Road from Basic Biology to a Vaccine. <i>Trends in Parasitology</i> , 2018, 34, 64-79.	3.3	36
31	Development of a toolkit for piggyBac-mediated integrative transfection of the human filarial parasite <i>Brugia malayi</i> . <i>PLoS Neglected Tropical Diseases</i> , 2018, 12, e0006509.	3.0	25
32	Development of <i>Onchocerca volvulus</i> in humanized NSG mice and detection of parasite biomarkers in urine and serum. <i>PLoS Neglected Tropical Diseases</i> , 2018, 12, e0006977.	3.0	21
33	Ligand binding properties of two <i>Brugia malayi</i> fatty acid and retinol (FAR) binding proteins and their vaccine efficacies against challenge infection in gerbils. <i>PLoS Neglected Tropical Diseases</i> , 2018, 12, e0006772.	3.0	16
34	Cysteine proteases during larval migration and development of helminths in their final host. <i>PLoS Neglected Tropical Diseases</i> , 2018, 12, e0005919.	3.0	27
35	The parasite-derived rOv-ASP-1 is an effective antigen-sparing CD4 + T cell-dependent adjuvant for the trivalent inactivated influenza vaccine, and functions in the absence of MyD88 pathway. <i>Vaccine</i> , 2018, 36, 3650-3665.	3.8	7
36	Lessons from the genomes and transcriptomes of filarial nematodes. <i>Molecular and Biochemical Parasitology</i> , 2017, 215, 23-29.	1.1	14

#	ARTICLE	IF	CITATIONS
37	Response to the Letter to the Editor by Eberhard et al.. Parasites and Vectors, 2017, 10, 240.	2.5	0
38	The genome of <i>Onchocerca volvulus</i> , agent of river blindness. Nature Microbiology, 2017, 2, 16216.	13.3	107
39	Defining the target and the effect of imatinib on the filarial c-Abl homologue. PLoS Neglected Tropical Diseases, 2017, 11, e0005690.	3.0	12
40	Defining <i>Brugia malayi</i> and <i>Wolbachia</i> symbiosis by stage-specific dual RNA-seq. PLoS Neglected Tropical Diseases, 2017, 11, e0005357.	3.0	43
41	The role of 'omics' in the quest to eliminate human filariasis. PLoS Neglected Tropical Diseases, 2017, 11, e0005464.	3.0	11
42	Vaccination of Gerbils with Bm-103 and Bm-RAL-2 Concurrently or as a Fusion Protein Confers Consistent and Improved Protection against <i>Brugia malayi</i> Infection. PLoS Neglected Tropical Diseases, 2016, 10, e0004586.	3.0	25
43	Modelling Neglected Tropical Diseases diagnostics: the sensitivity of skin snips for <i>Onchocerca volvulus</i> in near elimination and surveillance settings. Parasites and Vectors, 2016, 9, 343.	2.5	28
44	Stage-Specific Transcriptome and Proteome Analyses of the Filarial Parasite <i>Onchocerca volvulus</i> and Its <i>Wolbachia</i> Endosymbiont. MBio, 2016, 7, .	4.1	45
45	The Immunomodulatory Role of Adjuvants in Vaccines Formulated with the Recombinant Antigens Ov-103 and Ov-RAL-2 against <i>Onchocerca volvulus</i> in Mice. PLoS Neglected Tropical Diseases, 2016, 10, e0004797.	3.0	20
46	Glucose and Glycogen Metabolism in <i>Brugia malayi</i> Is Associated with <i>Wolbachia</i> Symbiont Fitness. PLoS ONE, 2016, 11, e0153812.	2.5	31
47	Repurposing Auranofin as a Lead Candidate for Treatment of Lymphatic Filariasis and Onchocerciasis. PLoS Neglected Tropical Diseases, 2015, 9, e0003534.	3.0	88
48	The Onchocerciasis Vaccine for Africaâ€™ TOVAâ€™ Initiative. PLoS Neglected Tropical Diseases, 2015, 9, e0003422.	3.0	35
49	The case for vaccine development in the strategy to eradicate river blindness (onchocerciasis) from Africa. Expert Review of Vaccines, 2015, 14, 1163-1165.	4.4	20
50	Human Onchocerciasis: Modelling the Potential Long-term Consequences of a Vaccination Programme. PLoS Neglected Tropical Diseases, 2015, 9, e0003938.	3.0	28
51	Potential involvement of <i>Brugia malayi</i> cysteine proteases in the maintenance of the endosymbiotic relationship with <i>Wolbachia</i> . International Journal for Parasitology: Drugs and Drug Resistance, 2014, 4, 267-277.	3.4	17
52	Vaccination with recombinant <i>Brugia malayi</i> cystatin proteins alters worm migration, homing and final niche selection following a subcutaneous challenge of Mongolian gerbils (<i>Meriones</i>) Tj ETQq0 0 0 rgBT /Overlck 10 Tf 50 137 Td (3.1	10
53	Vaccination with a genetically modified <i>Brugia malayi</i> cysteine protease inhibitor-2 reduces adult parasite numbers and affects the fertility of female worms following a subcutaneous challenge of Mongolian gerbils (<i>Meriones unguiculatus</i>) with <i>B. malayi</i> infective larvae. International Journal for Parasitology, 2014, 44, 675-679.	3.1	21
54	Vaccines to combat river blindness: expression, selection and formulation of vaccines against infection with <i>Onchocerca volvulus</i> in a mouse model. International Journal for Parasitology, 2014, 44, 637-646.	3.1	36

#	ARTICLE	IF	CITATIONS
55	A Potential Role for the Interaction of Wolbachia Surface Proteins with the <i>Brugia malayi</i> Glycolytic Enzymes and Cytoskeleton in Maintenance of Endosymbiosis. <i>PLoS Neglected Tropical Diseases</i> , 2013, 7, e2151.	3.0	38
56	A Research Agenda for Helminth Diseases of Humans: Towards Control and Elimination. <i>PLoS Neglected Tropical Diseases</i> , 2012, 6, e1547.	3.0	76
57	A Research Agenda for Helminth Diseases of Humans: Intervention for Control and Elimination. <i>PLoS Neglected Tropical Diseases</i> , 2012, 6, e1549.	3.0	163
58	A Research Agenda for Helminth Diseases of Humans: Basic Research and Enabling Technologies to Support Control and Elimination of Helminthiases. <i>PLoS Neglected Tropical Diseases</i> , 2012, 6, e1445.	3.0	27
59	A Research Agenda for Helminth Diseases of Humans: The Problem of Helminthiases. <i>PLoS Neglected Tropical Diseases</i> , 2012, 6, e1582.	3.0	250
60	A Research Agenda for Helminth Diseases of Humans: Diagnostics for Control and Elimination Programmes. <i>PLoS Neglected Tropical Diseases</i> , 2012, 6, e1601.	3.0	138
61	Repositioning of an existing drug for the neglected tropical disease Onchocerciasis. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2010, 107, 3424-3429.	7.1	91
62	The <i>Onchocerca volvulus</i> Cysteine Proteinase Inhibitor, Ov-CPI-2, Is a Target of Protective Antibody Response That Increases with Age. <i>PLoS Neglected Tropical Diseases</i> , 2010, 4, e800.	3.0	19
63	Functional Analysis of the Cathepsin-Like Cysteine Protease Genes in Adult <i>Brugia malayi</i> Using RNA Interference. <i>PLoS Neglected Tropical Diseases</i> , 2009, 3, e377.	3.0	58
64	Helminth Genomics: The Implications for Human Health. <i>PLoS Neglected Tropical Diseases</i> , 2009, 3, e538.	3.0	86
65	<i>Brugia malayi</i> Gene Expression in Response to the Targeting of the Wolbachia Endosymbiont by Tetracycline Treatment. <i>PLoS Neglected Tropical Diseases</i> , 2009, 3, e525.	3.0	40
66	Recombinant <i>Ov</i> -ASP-1, a Th1-Biased Protein Adjuvant Derived from the Helminth <i>Onchocerca volvulus</i> , Can Directly Bind and Activate Antigen-Presenting Cells. <i>Journal of Immunology</i> , 2009, 182, 4005-4016.	0.8	35
67	Characterisation of novel protein families secreted by muscle stage larvae of <i>Trichinella spiralis</i> . <i>International Journal for Parasitology</i> , 2009, 39, 515-524.	3.1	15
68	Draft Genome of the Filarial Nematode Parasite <i>Brugia malayi</i> . <i>Science</i> , 2007, 317, 1756-1760.	12.6	571
69	Ivermectin Resistance in <i>Onchocerca volvulus</i> : Toward a Genetic Basis. <i>PLoS Neglected Tropical Diseases</i> , 2007, 1, e76.	3.0	62
70	In a bovine model of onchocerciasis, protective immunity exists naturally, is absent in drug-cured hosts, and is induced by vaccination. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2006, 103, 5971-5976.	7.1	47
71	Characterization of a Novel Filarial Serine Protease Inhibitor, Ov-SPI-1, from <i>Onchocerca volvulus</i> , with Potential Multifunctional Roles during Development of the Parasite. <i>Journal of Biological Chemistry</i> , 2005, 280, 40845-40856.	3.4	66
72	A gene family of cathepsin L-like proteases of filarial nematodes are associated with larval molting and cuticle and eggshell remodeling. <i>Molecular and Biochemical Parasitology</i> , 2004, 136, 227-242.	1.1	94

#	ARTICLE	IF	CITATIONS
73	RNA interference targeting cathepsin L and Z-like cysteine proteases of <i>Onchocerca volvulus</i> confirmed their essential function during L3 molting. <i>Molecular and Biochemical Parasitology</i> , 2004, 138, 165-170.	1.1	145
74	CD4+-dependent immunity to <i>Onchocerca volvulus</i> third-stage larvae in humans and the mouse vaccination model: common ground and distinctions. <i>International Journal for Parasitology</i> , 2003, 33, 1161-1171.	3.1	29
75	Cathepsin L Is Essential for Embryogenesis and Development of <i>Caenorhabditis elegans</i> . <i>Journal of Biological Chemistry</i> , 2002, 277, 3477-3486.	3.4	104
76	Differential Cytokine and Antibody Responses to Adult and Larval Stages of <i>Onchocerca volvulus</i> Consistent with the Development of Concomitant Immunity. <i>Infection and Immunity</i> , 2002, 70, 2796-2804.	2.2	44
77	Towards a recombinant antigen vaccine against <i>Onchocerca volvulus</i> . <i>Trends in Parasitology</i> , 2002, 18, 135-141.	3.3	78
78	Development of a Recombinant Antigen Vaccine against Infection with the Filarial Worm <i>Onchocerca volvulus</i> . <i>Infection and Immunity</i> , 2001, 69, 262-270.	2.2	62
79	Immunity to Onchocerciasis: Cells from Putatively Immune Individuals Produce Enhanced Levels of Interleukin-5, Gamma Interferon, and Granulocyte-Macrophage Colony-Stimulating Factor in Response to <i>Onchocerca volvulus</i> Larval and Male Worm Antigens. <i>Infection and Immunity</i> , 2000, 68, 1905-1911.	2.2	56
80	Characterization of an <i>Onchocerca volvulus</i> L3-specific larval antigen, Ov-ALT-11. Note: Nucleotide sequence data reported in this paper is available in the GenBank database under the accession numbers U96176 and AF044952.1. <i>Molecular and Biochemical Parasitology</i> , 1998, 96, 177-183.	1.1	49
81	Immune responses to third stage larvae of <i>Onchocerca volvulus</i> in interferon- γ and interleukin-4 knockout mice. <i>Parasite Immunology</i> , 1998, 20, 319-324.	1.5	38
82	Cloning of a Cysteine Protease Required for the Molting of <i>Onchocerca volvulus</i> Third Stage Larvae. <i>Journal of Biological Chemistry</i> , 1996, 271, 30181-30189.	3.4	92
83	Identification and characterization of an <i>Onchocerca volvulus</i> cDNA clone encoding a microfilarial surface-associated antigen. <i>Molecular and Biochemical Parasitology</i> , 1992, 50, 79-93.	1.1	40
84	Characterization of an <i>Onchocerca volvulus</i> cDNA clone encoding a genus specific antigen present in infective larvae and adult worms. <i>Molecular and Biochemical Parasitology</i> , 1991, 45, 65-75.	1.1	79
85	<i>Onchocerca volvulus</i> : Biochemical and morphological characteristics of the surface of third- and fourth-stage larvae. <i>Experimental Parasitology</i> , 1990, 71, 489-495.	1.2	43
