

Colin MacLeod

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8333647/colin-macleod-publications-by-year.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
176	Gamification of cognitive bias modification for interpretations in anxiety increases training engagement and enjoyment.. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2022 , 76, 101727	2.6	1
175	Enhanced capacity to switch but not to maintain: The basis of attentional bias to high calorie foods in restrained eaters.. <i>Appetite</i> , 2022 , 172, 105969	4.5	0
174	The attenuation of spider avoidance action tendencies in spider-fearful individuals and its impact on explicit evaluation of spider stimuli.. <i>Behaviour Research and Therapy</i> , 2022 , 151, 104052	5.2	0
173	Healthiness matters: Approach motivation for healthy food in overweight and obese individuals. <i>Appetite</i> , 2022 , 168, 105760	4.5	1
172	Attentional Bias to Alcohol Information: a Novel Dual-Probe Task.. <i>International Journal of Behavioral Medicine</i> , 2022 , 1	2.6	
171	EXPRESS: Do the eyes have it? A comparison of eye-movement and attentional-probe based approaches to indexing attentional control within the anti-saccade paradigm.. <i>Quarterly Journal of Experimental Psychology</i> , 2022 , 17470218221083556	1.8	
170	The independent roles of attentional engagement with, and disengagement from, negative information in intrusive re-experiencing of negative events.. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2021 , 75, 101722	2.6	
169	Two probes and better than one: Development of a psychometrically reliable variant of the attentional probe task. <i>Behaviour Research and Therapy</i> , 2021 , 138, 103805	5.2	6
168	Emotional mental imagery generation during spontaneous future thinking: relationship with optimism and negative mood. <i>Psychological Research</i> , 2021 , 1	2.5	0
167	The relationship between worry and attentional bias to threat cues signalling controllable and uncontrollable dangers. <i>PLoS ONE</i> , 2021 , 16, e0251350	3.7	0
166	Attentional processes and contamination-related intrusion distress. <i>Behaviour Research and Therapy</i> , 2021 , 140, 103833	5.2	0
165	Effectiveness of attentional bias modification training as add-on to regular treatment in alcohol and cannabis use disorder: A multicenter randomized control trial. <i>PLoS ONE</i> , 2021 , 16, e0252494	3.7	2
164	Emotion-in-Motion: An ABM Approach that Modifies Attentional Disengagement from, Rather than Attentional Engagement with, Negative Information. <i>Cognitive Therapy and Research</i> , 2021 , 45, 90-98	2.7	2
163	Change in Attentional Control Predicts Change in Attentional Bias to Negative Information in Response to Elevated State Anxiety. <i>Cognitive Therapy and Research</i> , 2021 , 45, 111-122	2.7	4
162	The Role of Facial Appearance Concern and Appraisal Perspective in the Experience of Task-Irrelevant Intrusions. <i>Cognitive Therapy and Research</i> , 2021 , 45, 450-455	2.7	1
161	Craving mediates the association between attentional bias to alcohol and in vivo alcoholic beverage consumption in young social drinkers. <i>Psychology of Addictive Behaviors</i> , 2021 , 35, 895-900	3.4	0
160	Attentional control moderates the relationship between social anxiety and selective attentional responding to negative social information: evidence from objective measures of attentional processes. <i>Cognition and Emotion</i> , 2021 , 35, 1440-1446	2.3	0

159	Selective attention to threat, anxiety and glycaemic management in adolescents with type 1 diabetes. <i>Comprehensive Psychoneuroendocrinology</i> , 2021 , 7, 100065	1.1	
158	The role of biases in the judgement processing of (un)attractive faces in body dysmorphic symptomatology. <i>Behaviour Research and Therapy</i> , 2021 , 144, 103919	5.2	0
157	Are avoidance biases in social anxiety due to biases in stimulus coding or in post-coding behavioral tendencies?. <i>Behaviour Research and Therapy</i> , 2020 , 132, 103656	5.2	2
156	A Cross-Cultural Study of Justice Sensitivity and Its Consequences for Cooperation. <i>Social Psychological and Personality Science</i> , 2020 , 11, 899-907	4.3	7
155	Effects of cognitive load during interpretation bias modification on interpretation bias and stress reactivity. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2020 , 68, 101561	2.6	7
154	The Role of Fear of Fatness and Avoidance of Fatness in Predicting Eating Restraint. <i>Cognitive Therapy and Research</i> , 2020 , 44, 196-207	2.7	1
153	The effect of varying danger controllability on attention to threat messages. <i>Applied Cognitive Psychology</i> , 2020 , 34, 425-433	2.1	2
152	Potions for Emotions: Do self-reported individual differences in negative-emotional drinking predict alcohol consumption in the laboratory following exposure to a negative experience?. <i>Addictive Behaviors Reports</i> , 2020 , 11, 100243	3.7	2
151	Anxiety & inhibition: dissociating the involvement of state and trait anxiety in inhibitory control deficits observed on the anti-saccade task. <i>Cognition and Emotion</i> , 2020 , 34, 1746-1752	2.3	8
150	Causal underpinnings of working memory and Stroop interference control: Testing the effects of anodal and cathodal tDCS over the left DLPFC. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2020 , 20, 34-48	3.5	12
149	Trait anxiety and the alignment of attentional bias with controllability of danger. <i>Psychological Research</i> , 2020 , 84, 743-756	2.5	7
148	Cognitive bias modification to prevent depression (COPE): results of a randomised controlled trial. <i>Psychological Medicine</i> , 2020 , 50, 2514-2525	6.9	3
147	GIVE me your attention: Differentiating goal identification and goal execution components of the anti-saccade effect. <i>PLoS ONE</i> , 2019 , 14, e0222710	3.7	2
146	Biased interpretation in perfectionistic concerns: an experimental investigation. <i>Anxiety, Stress and Coping</i> , 2019 , 32, 259-269	3.1	0
145	Effects of interpretation bias modification on unregulated and regulated emotional reactivity. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2019 , 64, 123-132	2.6	7
144	Mental imagery in psychiatry: conceptual & clinical implications. <i>CNS Spectrums</i> , 2019 , 24, 114-126	1.8	19
143	Spontaneous cognition in dysphoria: reduced positive bias in imagining the future. <i>Psychological Research</i> , 2019 , 83, 817-831	2.5	9
142	A new approach to facilitating attentional disengagement from food cues in unsuccessful dieters: The bouncing image training task. <i>Behaviour Research and Therapy</i> , 2019 , 120, 103445	5.2	9

141	The effects of attentional bias modification on emotion regulation. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2019 , 62, 38-48	2.6	13
140	Anxiety-Linked Attentional Bias: Is It Reliable?. <i>Annual Review of Clinical Psychology</i> , 2019 , 15, 529-554	20.5	47
139	Anxiety-linked attentional bias: backward glances and future glimpses. <i>Cognition and Emotion</i> , 2019 , 33, 139-145	2.3	3
138	Food healthiness versus tastiness: Contrasting their impact on more and less successful healthy shoppers within a virtual food shopping task. <i>Appetite</i> , 2019 , 133, 405-413	4.5	1
137	Trait Anxiety and Biased Prospective Memory for Targets Associated with Negative Future Events. <i>Cognitive Therapy and Research</i> , 2019 , 43, 550-560	2.7	2
136	High Spider-Fearful and Low Spider-Fearful Individuals Differentially Perceive the Speed of Approaching, but not Receding, Spider Stimuli. <i>Cognitive Therapy and Research</i> , 2019 , 43, 514-521	2.7	7
135	Authors' reply. <i>British Journal of Psychiatry</i> , 2018 , 212, 246-247	5.4	1
134	Attentional Avoidance is Associated With Increased Pain Sensitivity in Patients With Chronic Posttraumatic Pain and Comorbid Posttraumatic Stress. <i>Clinical Journal of Pain</i> , 2018 , 34, 22-29	3.5	8
133	Can training change attentional breadth? Failure to find transfer effects. <i>Psychological Research</i> , 2018 , 82, 520-534	2.5	2
132	Emotion-in-Motion, a Novel Approach for the Modification of Attentional Bias: An Experimental Proof-of-Concept Study. <i>JMIR Serious Games</i> , 2018 , 6, e10993	3.4	12
131	Follow-up magnetic resonance imaging in spine infection: details which matter most. <i>Infectious Diseases</i> , 2018 , 50, 463-467	3.1	
130	Age differences in negative and positive expectancy bias in comorbid depression and anxiety. <i>Cognition and Emotion</i> , 2018 , 32, 1531-1544	2.3	2
129	Inhibitory attentional control in anxiety: Manipulating cognitive load in an antisaccade task. <i>PLoS ONE</i> , 2018 , 13, e0205720	3.7	9
128	Heightened ruminative disposition is associated with impaired attentional disengagement from negative relative to positive information: support for the "impaired disengagement" hypothesis. <i>Cognition and Emotion</i> , 2017 , 31, 422-434	2.3	30
127	Does anxiety-linked attentional bias to threatening information reflect bias in the setting of attentional goals, or bias in the execution of attentional goals?. <i>Cognition and Emotion</i> , 2017 , 31, 538-551	2.3	8
126	A Positive Perspective on Attentional Bias: Positive Affectivity and Attentional Bias to Positive Information. <i>Journal of Happiness Studies</i> , 2017 , 18, 1029-1043	3.7	4
125	Prediction of pre-exam state anxiety from ruminative disposition: The mediating role of impaired attentional disengagement from negative information. <i>Behaviour Research and Therapy</i> , 2017 , 91, 102-110	5.2	7
124	Attention bias modification training under working memory load increases the magnitude of change in attentional bias. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2017 , 57, 25-31	2.6	12

123	When a Bad Bias Can Be Good: Anxiety-Linked Attentional Bias to Threat in Contexts Where Dangers Can Be Avoided. <i>Clinical Psychological Science</i> , 2017 , 5, 485-496	6	8
122	Attentional bias mediates the effect of neurostimulation on emotional vulnerability. <i>Journal of Psychiatric Research</i> , 2017 , 93, 12-19	5.2	20
121	Referential focus moderates depression-linked attentional avoidance of positive information. <i>Behaviour Research and Therapy</i> , 2017 , 93, 47-54	5.2	9
120	When children forget to remember: Effects of reduced working memory availability on prospective memory performance. <i>Memory and Cognition</i> , 2017 , 45, 651-663	2.2	8
119	Anxiety-Linked Differences in Older Adults' Interpretation of Ambiguous Information. <i>Cognitive Therapy and Research</i> , 2017 , 41, 508-517	2.7	
118	A Question of Control? Examining the Role of Control Conditions in Experimental Psychopathology using the Example of Cognitive Bias Modification Research. <i>Spanish Journal of Psychology</i> , 2017 , 20, E54 ¹		28
117	Confusing procedures with process when appraising the impact of cognitive bias modification on emotional vulnerability. <i>British Journal of Psychiatry</i> , 2017 , 211, 266-271	5.4	105
116	Integrating Personality Structure, Personality Process, and Personality Development. <i>European Journal of Personality</i> , 2017 , 31, 503-528	5.1	205
115	Direction of stimulus movement alters fear-linked individual differences in attentional vigilance to spider stimuli. <i>Behaviour Research and Therapy</i> , 2017 , 99, 117-123	5.2	9
114	Internet-based attentional bias modification training as add-on to regular treatment in alcohol and cannabis dependent outpatients: a study protocol of a randomized control trial. <i>BMC Psychiatry</i> , 2017 , 17, 193	4.2	16
113	The sky is falling: evidence of a negativity bias in the social transmission of information. <i>Evolution and Human Behavior</i> , 2017 , 38, 92-101	4	76
112	One small step towards the spider, but a giant leap in anxiety: Biased attentional responding to spider stimuli causally contributes to the rate of growth in state anxiety during spider approach. <i>Australian Journal of Psychology</i> , 2016 , 68, 178-190	2.3	1
111	Does attentional bias to threat ameliorate or exacerbate the detrimental effect of trait anxiety on behavioural preparedness for real-world danger?. <i>Australian Journal of Psychology</i> , 2016 , 68, 166-177	2.3	6
110	The Potential Benefits of Targeted Attentional Bias Modification on Cognitive Arousal and Sleep Quality in Worry-Related Sleep Disturbance. <i>Clinical Psychological Science</i> , 2016 , 4, 1015-1027	6	10
109	Emotional Mental Imagery as Simulation of Reality: Fear and Beyond-A Tribute to Peter Lang. <i>Behavior Therapy</i> , 2016 , 47, 702-719	4.8	82
108	The pulling power of chocolate: Effects of approach-avoidance training on approach bias and consumption. <i>Appetite</i> , 2016 , 99, 46-51	4.5	73
107	Selective attention in perfectionism: Dissociating valence from perfectionism-relevance. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2016 , 51, 100-8	2.6	8
106	Engaging With the Wrong People: The Basis of Selective Attention to Negative Faces in Social Anxiety. <i>Clinical Psychological Science</i> , 2016 , 4, 793-804	6	17

105	A FISTful of Emotion: Individual Differences in Trait Anxiety and Cognitive-Affective Flexibility During Preadolescence. <i>Journal of Abnormal Child Psychology</i> , 2016 , 44, 1231-42	4	10
104	Controlling the Bias: Inhibitory Attentional Control Moderates the Association between Social Anxiety and Selective Attentional Responding to Negative Social Information in Children and Adolescents. <i>Journal of Experimental Psychopathology</i> , 2016 , 7, 423-436	2.3	4
103	Introduction to the Special Issue: Understanding the Role of Attentional Control in the Development of Anxiety in Childhood, Adolescence and across the Lifespan. <i>Journal of Experimental Psychopathology</i> , 2016 , 7, 277-295	2.3	7
102	It's all about Control: Memory Bias in Anxiety is Restricted to Threat Cues that Signal Controllable Danger. <i>Journal of Experimental Psychopathology</i> , 2016 , 7, 190-204	2.3	5
101	Aberrant Gaze Patterns in Social Anxiety Disorder: An Eye Movement Assessment during Public Speaking. <i>Journal of Experimental Psychopathology</i> , 2016 , 7, 1-17	2.3	16
100	Assessing the Therapeutic Potential of Targeted Attentional Bias Modification for Insomnia Using Smartphone Delivery. <i>Psychotherapy and Psychosomatics</i> , 2016 , 85, 187-9	9.4	23
99	Stuck in a sad place: Biased attentional disengagement in rumination. <i>Emotion</i> , 2016 , 16, 63-72	4.1	38
98	Anxiety-linked attentional bias and its modification: Illustrating the importance of distinguishing processes and procedures in experimental psychopathology research. <i>Behaviour Research and Therapy</i> , 2016 , 86, 68-86	5.2	59
97	To risk or not to risk: Anxiety and the calibration between risk perception and danger mitigation. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2016 , 42, 985-95	2.2	9
96	For Ruminators, the Emotional Future Is Bound to the Emotional Past: Heightened Ruminative Disposition Is Characterized by Increased Emotional Extrapolation. <i>Clinical Psychological Science</i> , 2015 , 3, 648-658	6	7
95	Attentional bias modification facilitates attentional control mechanisms: evidence from eye tracking. <i>Biological Psychology</i> , 2015 , 104, 139-46	3.2	32
94	The Attentional Bias Modification Approach to Anxiety Intervention. <i>Clinical Psychological Science</i> , 2015 , 3, 58-78	6	207
93	Validation of a novel attentional bias modification task: the future may be in the cards. <i>Behaviour Research and Therapy</i> , 2015 , 65, 93-100	5.2	37
92	How Victim Sensitivity leads to Uncooperative Behavior via Expectancies of Injustice. <i>Frontiers in Psychology</i> , 2015 , 6, 2059	3.4	12
91	Absence of evidence or evidence of absence: reflecting on therapeutic implementations of attentional bias modification. <i>BMC Psychiatry</i> , 2014 , 14, 8	4.2	132
90	Psychometric properties of reaction time based experimental paradigms measuring anxiety-related information-processing biases in children. <i>Journal of Anxiety Disorders</i> , 2014 , 28, 97-107	10.9	97
89	Enhanced probing of attentional bias: the independence of anxiety-linked selectivity in attentional engagement with and disengagement from negative information. <i>Cognition and Emotion</i> , 2014 , 28, 1287-302	2.3	91
88	Examining attentional biases underlying trait anxiety in younger and older adults. <i>Cognition and Emotion</i> , 2014 , 28, 84-97	2.3	6

87	Topical application of the bee hive protectant propolis is well tolerated and improves human diabetic foot ulcer healing in a prospective feasibility study. <i>Journal of Diabetes and Its Complications</i> , 2014 , 28, 850-7	3.2	44
86	Behavioral management of the triggers of recurrent headache: a randomized controlled trial. <i>Behaviour Research and Therapy</i> , 2014 , 61, 1-11	5.2	75
85	Cognitive bias modification to prevent depression (COPE): study protocol for a randomised controlled trial. <i>Trials</i> , 2014 , 15, 282	2.8	8
84	When Ignorance is Bliss: Explicit Instruction and the Efficacy of CBM-A for Anxiety. <i>Cognitive Therapy and Research</i> , 2014 , 38, 172-188	2.7	31
83	Modifying social anxiety related to a real-life stressor using online Cognitive Bias Modification for interpretation. <i>Behaviour Research and Therapy</i> , 2014 , 52, 45-52	5.2	24
82	The causal role of the dorsolateral prefrontal cortex in the modification of attentional bias: evidence from transcranial direct current stimulation. <i>Biological Psychiatry</i> , 2014 , 76, 946-52	7.9	128
81	Cognitive Bias Modification Training 2014 , 1325-1342		1
80	Expectancy bias in anxious samples. <i>Emotion</i> , 2014 , 14, 588-601	4.1	16
79	The effect of approach/avoidance training on alcohol consumption is mediated by change in alcohol action tendency. <i>PLoS ONE</i> , 2014 , 9, e85855	3.7	24
78	Biased saccadic responses to emotional stimuli in anxiety: an antisaccade study. <i>PLoS ONE</i> , 2014 , 9, e86434	3.4	15
77	Is Selective Attention in Anxiety Characterised by Biased Attentional Engagement with or Disengagement from Threat: Evidence from a Colour-Naming Paradigm. <i>Journal of Experimental Psychopathology</i> , 2014 , 5, 38-51	2.3	5
76	Anxiety reactivity and anxiety perseveration represent independent dimensions of anxiety vulnerability: an in vivo study. <i>Anxiety, Stress and Coping</i> , 2014 , 27, 361-75	3.1	5
75	RANdomised controlled trial to imPROve depression and the quality of life of people with Dementia using cognitive bias modification: RAPID study protocol. <i>BMJ Open</i> , 2014 , 4, e005623	3	3
74	Biased attentional engagement with, and disengagement from, negative information: independent cognitive pathways to anxiety vulnerability?. <i>Cognition and Emotion</i> , 2014 , 28, 245-59	2.3	61
73	Simply Imagining Sunshine, Lollipops and Rainbows Will Not Budge the Bias: The Role of Ambiguity in Interpretive Bias Modification. <i>Cognitive Therapy and Research</i> , 2014 , 38, 120-131	2.7	20
72	When we should worry more: using cognitive bias modification to drive adaptive health behaviour. <i>PLoS ONE</i> , 2014 , 9, e85092	3.7	7
71	Anxiety reactivity and anxiety perseveration represent dissociable dimensions of anxiety vulnerability: A replication and extension. <i>Australian Journal of Psychology</i> , 2013 , 65, 232-235	2.3	4
70	Integrating cognitive bias modification into a standard cognitive behavioural treatment package for social phobia: a randomized controlled trial. <i>Behaviour Research and Therapy</i> , 2013 , 51, 207-15	5.2	76

69	Anxiety-linked expectancy bias across the adult lifespan. <i>Cognition and Emotion</i> , 2013 , 27, 345-55	2.3	17
68	Alcohol-related biases in selective attention and action tendency make distinct contributions to dysregulated drinking behaviour. <i>Addiction</i> , 2013 , 108, 1758-66	4.6	24
67	Assessing the role of spatial engagement and disengagement of attention in anxiety-linked attentional bias: a critique of current paradigms and suggestions for future research directions. <i>Anxiety, Stress and Coping</i> , 2013 , 26, 1-19	3.1	80
66	The interaction of approach-alcohol action tendencies, working memory capacity, and current task goals predicts the inability to regulate drinking behavior. <i>Psychology of Addictive Behaviors</i> , 2013 , 27, 649-61	3.4	28
65	Don't start what you can't stop: differentiating individual differences in ruminative onset and ruminative persistence, and their contributions to dysphoria. <i>Emotion</i> , 2013 , 13, 1080-5	4.1	5
64	Internet-based attention bias modification for social anxiety: a randomised controlled comparison of training towards negative and training towards positive cues. <i>PLoS ONE</i> , 2013 , 8, e71760	3.7	71
63	Attentional bias to negative information and 5-HTTLPR genotype interactively predict students' emotional reactivity to first university semester. <i>Emotion</i> , 2012 , 12, 460-9	4.1	26
62	A critical review of the influence of oxytocin nasal spray on social cognition in humans: evidence and future directions. <i>Hormones and Behavior</i> , 2012 , 61, 410-8	3.7	301
61	Erratum to A critical review of the influence of oxytocin nasal spray on social cognition in humans: Evidence and future directions [Horm. Behav. 61 (2012) 410-8]. <i>Hormones and Behavior</i> , 2012 , 61, 773	3.7	20
60	Cognitive bias modification approaches to anxiety. <i>Annual Review of Clinical Psychology</i> , 2012 , 8, 189-217	20.5	386
59	Non-threatening other-race faces capture visual attention: evidence from a dot-probe task. <i>PLoS ONE</i> , 2012 , 7, e46119	3.7	14
58	Always Look on the Bright Side of Life: The Attentional Basis of Positive Affectivity. <i>European Journal of Personality</i> , 2012 , 26, 133-144	5.1	47
57	Cognitive bias modification procedures in the management of mental disorders. <i>Current Opinion in Psychiatry</i> , 2012 , 25, 114-20	4.9	78
56	Biased attentional processing of positive stimuli in social anxiety disorder: an eye movement study. <i>Cognitive Behaviour Therapy</i> , 2012 , 41, 96-107	4.4	55
55	Attachment insecurity as a predictor of obsessive-compulsive symptoms in female children. <i>Counselling Psychology Quarterly</i> , 2012 , 25, 403-415	2.5	8
54	The ups and downs of cognitive bias: Dissociating the attentional characteristics of positive and negative affectivity. <i>Journal of Cognitive Psychology</i> , 2012 , 24, 33-53	0.9	19
53	Anxiety reactivity and anxiety perseveration represent dissociable dimensions of trait anxiety. <i>Emotion</i> , 2012 , 12, 903-7	4.1	18
52	The contribution of attentional bias to worry: distinguishing the roles of selective engagement and disengagement. <i>Journal of Anxiety Disorders</i> , 2011 , 25, 272-7	10.9	46

51	Negative emotional processing induced by spoken scenarios modulates corticospinal excitability. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2011 , 11, 404-12	3.5	7
50	Emotion Regulation and the Cognitive-Experimental Approach to Emotional Dysfunction. <i>Emotion Review</i> , 2011 , 3, 62-73	4.6	18
49	Current directions at the juncture of clinical and cognitive science: A commentary on the special issue. <i>Applied Cognitive Psychology</i> , 2010 , 24, 450-463	2.1	7
48	Anxiety-linked task performance: Dissociating the influence of restricted working memory capacity and increased investment of effort. <i>Cognition and Emotion</i> , 2009 , 23, 753-781	2.3	20
47	Behavioral management of headache triggers: Avoidance of triggers is an inadequate strategy. <i>Clinical Psychology Review</i> , 2009 , 29, 483-95	10.8	116
46	The reduction of anxiety vulnerability through the modification of attentional bias: a real-world study using a home-based cognitive bias modification procedure. <i>Journal of Abnormal Psychology</i> , 2009 , 118, 65-75	7	162
45	Introduction to the special section on cognitive bias modification in emotional disorders. <i>Journal of Abnormal Psychology</i> , 2009 , 118, 1-4	7	188
44	Whither cognitive bias modification research? Commentary on the special section articles. <i>Journal of Abnormal Psychology</i> , 2009 , 118, 89-99	7	181
43	Prepared for the worst: readiness to acquire threat bias and susceptibility to elevate trait anxiety. <i>Emotion</i> , 2008 , 8, 47-57	4.1	41
42	Distinguishing Cognitive and Somatic Dimensions of State and Trait Anxiety: Development and Validation of the State-Trait Inventory for Cognitive and Somatic Anxiety (STICSA). <i>Behavioural and Cognitive Psychotherapy</i> , 2008 , 36,	2.1	141
41	Internet-delivered assessment and manipulation of anxiety-linked attentional bias: validation of a free-access attentional probe software package. <i>Behavior Research Methods</i> , 2007 , 39, 533-8	6.1	48
40	Methods for Studying Cognitive Aspects of Emotion. 2007 , 81-100		2
39	Facilitated cognitive disengagement in depression. <i>Behavior Therapy</i> , 2006 , 37, 304-13	4.8	9
38	The causal role of interpretive bias in anxiety reactivity. <i>Journal of Abnormal Psychology</i> , 2006 , 115, 103-111		180
