

# Helen E Wilcox

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/8342527/helen-e-wilcox-publications-by-year.pdf>

**Version:** 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

17  
papers

816  
citations

13

#	Paper	IF	Citations
17	The effect of decellularisation on the real time mechanical fatigue of porcine aortic heart valve roots.. <i>PLoS ONE</i> , <b>2022</b> , 17, e0265763	3.7	1
16	Decellularization of human donor aortic and pulmonary valved conduits using low concentration sodium dodecyl sulfate. <i>Journal of Tissue Engineering and Regenerative Medicine</i> , <b>2018</b> , 12, e841-e853	4.4	28
15	In vitro biomechanical and hydrodynamic characterisation of decellularised human pulmonary and aortic roots. <i>Journal of the Mechanical Behavior of Biomedical Materials</i> , <b>2018</b> , 79, 53-63	4.1	7
14	Decellularization and Characterization of Porcine Superflexor Tendon: A Potential Anterior Cruciate Ligament Replacement. <i>Tissue Engineering - Part A</i> , <b>2017</b> , 23, 124-134	3.9	29
13	Comparison of the biomechanical tensile and compressive properties of decellularised and natural porcine meniscus. <i>Journal of Biomechanics</i> , <b>2015</b> , 48, 1389-96	2.9	47
12	Regenerative potential of low-concentration SDS-decellularized porcine aortic valved conduits in vivo. <i>Tissue Engineering - Part A</i> , <b>2015</b> , 21, 332-42	3.9	38
11	Assessment of the antimicrobial activity of acellular vascular grafts. <i>European Journal of Vascular and Endovascular Surgery</i> , <b>2012</b> , 43, 573-81	2.3	8
10	Development and characterization of acellular allogeneic arterial matrices. <i>Tissue Engineering - Part A</i> , <b>2012</b> , 18, 471-83	3.9	39
9	The use of acellular matrices for the tissue engineering of cardiac valves. <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , <b>2008</b> , 222, 129-43	1.7	74
8	Resolution of inflammatory acne vulgaris may involve regulation of CD4+ T-cell responses to Propionibacterium acnes. <i>British Journal of Dermatology</i> , <b>2007</b> , 156, 460-5	4	12
7	Biocompatibility of acellular human pericardium. <i>Journal of Surgical Research</i> , <b>2007</b> , 143, 407-14	2.5	69
6	Development and characterization of an acellular human pericardial matrix for tissue engineering. <i>Tissue Engineering</i> , <b>2006</b> , 12, 763-73		120
5	Biocompatibility and recellularization potential of an acellular porcine heart valve matrix. <i>Journal of Heart Valve Disease</i> , <b>2005</b> , 14, 228-36; discussion 236-7		27
4	In-vitro assessment of the functional performance of the decellularized intact porcine aortic root. <i>Journal of Heart Valve Disease</i> , <b>2005</b> , 14, 408-21; discussion 422		36
3	Tissue engineering of cardiac valves: re-seeding of acellular porcine aortic valve matrices with human mesenchymal progenitor cells. <i>Journal of Heart Valve Disease</i> , <b>2005</b> , 14, 806-13		40
2	Tissue engineering of cardiac valve prostheses I: development and histological characterization of an acellular porcine scaffold. <i>Journal of Heart Valve Disease</i> , <b>2002</b> , 11, 457-62		144
1	Tissue engineering of cardiac valve prostheses II: biomechanical characterization of decellularized porcine aortic heart valves. <i>Journal of Heart Valve Disease</i> , <b>2002</b> , 11, 463-71		97
