#	ARTICLE	IF	CITATIONS
1	Experimental study on gasketed bell-and-spigot joint behaviour of lined-corrugated HDPE pipe subjected to normal fault. <i>Geotechnique</i> , 2023, 73, 798-810.	2.2	3
2	Laboratory investigation of backfill erosion around rigid pipes with defective joints. <i>Geotechnique</i> , 2022, 72, 847-859.	2.2	8
3	Stress concentrations due to simulated corrosion pits in buried metal pipes under longitudinal bending. <i>Journal of Civil Structural Health Monitoring</i> , 2022, 12, 785-796.	2.0	9
4	Use of optical fibers to investigate the performance of pressure pipe liners spanning across a ring fracture. <i>Tunnelling and Underground Space Technology</i> , 2022, 119, 104229.	3.0	4
5	Testing and analysis of PVC liners under simulated grouting pressure. <i>Engineering Structures</i> , 2022, 250, 113496.	2.6	3
6	Preventing Joint Leakage in Pipelines Subjected to Differential Settlement. , 2022, , .		0
7	Evaluation and comparison of different detection technologies on simulated voids near buried pipes. <i>Tunnelling and Underground Space Technology</i> , 2022, 123, 104440.	3.0	5
8	New design equation for maximum allowable mud pressure in sand during horizontal Directional drilling. <i>Tunnelling and Underground Space Technology</i> , 2022, 126, 104543.	3.0	3
9	Experimental investigation examining influence of pump rates on horizontal borehole stability in sand. <i>Tunnelling and Underground Space Technology</i> , 2022, 127, 104608.	3.0	2
10	Steel buried structures: condition of Ontario structures and review of deterioration mechanisms and rehabilitation approaches. <i>Canadian Journal of Civil Engineering</i> , 2021, 48, 159-172.	0.7	5
11	Flow Properties of Fresh Mud (Drilling Fluid) Used in Horizontal Directional Drilling. <i>Journal of Pipeline Systems Engineering and Practice</i> , 2021, 12, 04020063.	0.9	3
12	Use of Optical Fibers to Investigate Strength Limit States for Pressure Pipe Liners Spanning across Circular Perforations. <i>Journal of Pipeline Systems Engineering and Practice</i> , 2021, 12, .	0.9	6
13	Laboratory Investigation of the Structural Performance of a Corrugated Steel Culvert under Increasing Cover Depth. <i>Journal of Bridge Engineering</i> , 2021, 26, .	1.4	6
14	Experimental Study of a Noncircular Corrugated Steel Culvert at Different Shallow Cover Depths. , 2021, , .		1
15	Effect of Erosion Voids on Rigid Sewers of Non-Circular Shape. , 2021, , .		1
16	Response of a polymer liner passing across a pressure pipeline joint opening under axial ground movements. <i>Computers and Geotechnics</i> , 2021, 139, 104429.	2.3	7
17	Structural Performance of In-Service Corrugated Steel Culvert under Vehicle Loading. <i>Journal of Bridge Engineering</i> , 2020, 25, .	1.4	21
18	Laboratory Study on Effect of Grout Choice on Culvert Rehabilitation Using Sliplining. <i>Journal of Pipeline Systems Engineering and Practice</i> , 2020, 11, .	0.9	7

#	ARTICLE	IF	CITATIONS
19	Measured Responses of a Corrugated Steel Ellipse Culvert at Different Cover Depths. Journal of Bridge Engineering, 2020, 25, .	1.4	12
20	Experimental Evaluation of Internally Pressurized GFRP Pipes Subjected to Vertical Ground Slip. Journal of Composites for Construction, 2020, 24, .	1.7	5
21	Analysis of a cured-in-place pressure pipe liner spanning circular voids. Tunnelling and Underground Space Technology, 2020, 101, 103424.	3.0	15
22	Field Monitoring of a Corrugated Steel Culvert Using Multiple Sensing Technologies. Journal of Pipeline Systems Engineering and Practice, 2020, 11, .	0.9	5
23	Experimental Investigation Examining Influence of Burial Depth on Stability of Horizontal Boreholes in Sand. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2020, 146, .	1.5	11
24	Modelling and parametric study of a gasketed bell and spigot joint in a buried high density polyethylene pipeline. Tunnelling and Underground Space Technology, 2020, 98, 103325.	3.0	5
25	Distributed Strain Sensing to Study a Composite Liner for Cast Iron Water Pipe Rehabilitation. Journal of Testing and Evaluation, 2020, 48, 4283-4303.	0.4	4
26	Numerical techniques for design calculations of longitudinal bending in buried steel pipes subjected to lateral Earth movements. Royal Society Open Science, 2019, 6, 181550.	1.1	4
27	Experimental Study of Structural Response of Lined-Corrugated HDPE Pipe Subjected to Normal Fault. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2019, 145, 04019117.	1.5	11
28	Acoustic Emission Sensing of Pipe-Soil Interaction: Full-Scale Pipelines Subjected to Differential Ground Movements. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2019, 145, .	1.5	23
29	Effects of Erosion Void on Deteriorated Metal Culvert before and after Repair with Grouted Slip Liner. Journal of Pipeline Systems Engineering and Practice, 2019, 10, .	0.9	10
30	Design of Sprayed Cementitious Liners within Corrugated Steel Pipes. , 2019, , .		3
31	Modeling and Parametric Study of Gasketed Bell and Spigot Joint in Buried RC Pipeline. Journal of Pipeline Systems Engineering and Practice, 2019, 10, .	0.9	2
32	Use of Optical Fibers to Investigate Strength Limit States for Pressure Pipe Liners. , 2019, , .		3
33	Leakage Performance of Joints in Gravity Flow Pipes Subjected to Shear Force, Angular Misalignment, and Diameter Deformation. Journal of Testing and Evaluation, 2019, 47, 2808-2826.	0.4	5
34	Development of a Sustainability Evaluation System for Culvert Replacement and Rehabilitation Projects. Journal of Pipeline Systems Engineering and Practice, 2018, 9, 04018004.	0.9	2
35	Remaining Strength of Deteriorated Corrugated Steel Culverts. Journal of Pipeline Systems Engineering and Practice, 2018, 9, .	0.9	22
36	Lateral resistance of pipes and strip anchors buried in dense sand. Canadian Geotechnical Journal, 2018, 55, 1812-1823.	1.4	19

#	ARTICLE	IF	CITATIONS
37	Pre- and post-rehabilitation behaviour of a deteriorated horizontal ellipse culvert. Canadian Geotechnical Journal, 2018, 55, 329-342.	1.4	26
38	Uplift Failure Mechanisms of Pipes Buried in Dense Sand. International Journal of Geomechanics, 2018, 18, .	1.3	41
39	Numerical evaluation of a deeply buried pipe testing facility. Advances in Structural Engineering, 2018, 21, 2571-2588.	1.2	11
40	New Deep Burial Testing Facility at Queen's University. , 2018, , .		0
41	Results of a Full-Scale Fault-Offset Test on a Glass Fiber Reinforced Polymer Pipe. , 2018, , .		0
42	Practical criteria for assessment of horizontal borehole instability in saturated clay. Tunnelling and Underground Space Technology, 2018, 75, 21-35.	3.0	8
43	Upward Pipe-Soil Interaction for Shallowly Buried Pipelines in Dense Sand. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2018, 144, .	1.5	29
44	Impact of soil erosion voids on reinforced concrete pipe responses to surface loads. Tunnelling and Underground Space Technology, 2018, 82, 111-124.	3.0	40
45	State-of-the-art review of water pipe failure prediction models and applicability to large-diameter mains. Urban Water Journal, 2017, 14, 173-184.	1.0	65
46	Numerical Study of Longitudinal Bending in Buried GFRP Pipes Subjected to Lateral Earth Movements. Journal of Pipeline Systems Engineering and Practice, 2017, 8, .	0.9	15
47	Rehabilitated reinforced concrete culvert performance under surface loading. Tunnelling and Underground Space Technology, 2017, 69, 52-63.	3.0	26
48	Using sensitivity analysis to identify the critical factors that lower the factor of safety of large-diameter cast iron mains. Urban Water Journal, 2017, 14, 685-693.	1.0	3
49	Laboratory Study on the Behavior of a Horizontal-Ellipse Culvert during Service and Ultimate Load Testing. Journal of Bridge Engineering, 2017, 22, .	1.4	31
50	Numerical Investigation of the Circumferential Stresses around Boreholes during Horizontal Directional Drilling. International Journal of Geomechanics, 2017, 17, .	1.3	9
51	A Comparative Study Between Lateral and Upward Anchor-Soil and Pipe-Soil Interaction in Dense Sand. , 2016, , .		1
52	Beam-on-Springs Modeling of Jointed Pipe Culverts. Journal of Performance of Constructed Facilities, 2016, 30, .	1.0	4
53	Response of pipelines of differing flexural stiffness to normal faulting. Geotechnique, 2016, 66, 275-286.	2.2	89
54	Parametric study of frost-induced bending moments in buried cast iron water pipes. Tunnelling and Underground Space Technology, 2016, 51, 291-300.	3.0	20

#	ARTICLE	IF	CITATIONS
55	Rotational Characteristics of a Gasketed Bell and Spigot Joint in a Pressurized Reinforced Concrete Pipeline. Journal of Pipeline Systems Engineering and Practice, 2016, 7, .	0.9	15
56	Evaluation and Application of the Flexural Rigidity of a Reinforced Concrete Pipe. Journal of Pipeline Systems Engineering and Practice, 2016, 7, .	0.9	7
57	Finite element modeling of lateral pipeline-soil interactions in dense sand. Canadian Geotechnical Journal, 2016, 53, 490-504.	1.4	66
58	Experimental Investigation of Rehabilitated Steel Culvert Performance under Static Surface Loading. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2016, 142, .	1.5	29
59	Measured load capacity of buried reinforced concrete pipes. ACI Structural Journal, 2016, 113, .	0.3	18
60	Ultimate Strength Testing of Two Deteriorated Metal Culverts Repaired with Spray-On Cementitious Liners. Transportation Research Record, 2015, 2522, 139-147.	1.0	24
61	Identifying Factors that Influence the Factor of Safety and Probability of Failure of Large-diameter, Cast Iron Water Mains with a Mechanistic, Stochastic Model: A Case Study in the City of Hamilton. Procedia Engineering, 2015, 119, 130-138.	1.2	8
62	Closure to "Behavior of Coupling Band Joints in Buried Corrugated Steel Pipelines" by David Becerril Garca and Ian D. Moore. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2015, 141, 07014043.	1.5	0
63	Simplified design model for rigid pipe joints based on the two-pipe approximation. Canadian Geotechnical Journal, 2015, 52, 626-637.	1.4	18
64	Performance of deteriorated corrugated steel culverts rehabilitated with sprayed-on cementitious liners subjected to surface loads. Tunnelling and Underground Space Technology, 2015, 47, 222-232.	3.0	52
65	Joint Response of Existing Pipe Culverts under Surface Live Loads. Journal of Performance of Constructed Facilities, 2015, 29, .	1.0	25
66	Kinematics of jointed pipes and design estimates of joint rotation under differential ground movements. Canadian Geotechnical Journal, 2015, 52, 1714-1724.	1.4	26
67	Post-failure fracture angle of brittle pipes subjected to differential ground movements. Tunnelling and Underground Space Technology, 2015, 49, 114-120.	3.0	15
68	Distributed Sensing of Circumferential Strain Using Fiber Optics during Full-Scale Buried Pipe Experiments. Journal of Pipeline Systems Engineering and Practice, 2015, 6, .	0.9	59
69	Closure to "Effect of Deterioration on the Performance of Corrugated Steel Culverts" by Van Thien Mai, Neil A. Houtt, and Ian D. Moore. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2015, 141, 07014041.	1.5	0
70	Role of Grout Strength and Liners on the Performance of Slip-Lined Pipes. Journal of Pipeline Systems Engineering and Practice, 2015, 6, .	0.9	30
71	Behaviour of bell and spigot joints in buried reinforced concrete pipelines. Canadian Geotechnical Journal, 2015, 52, 609-625.	1.4	30
72	Development of a Methodology to Predict the Failure of Large-Diameter Cast Iron Water Mains. , 2014, , .		0

#	ARTICLE	IF	CITATIONS
73	Effect of truck position and multiple truck loading on response of long-span metal culverts. Canadian Geotechnical Journal, 2014, 51, 196-207.	1.4	22
74	Behavior of Coupling Band Joints in Buried Corrugated Steel Pipelines. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2014, 140, .	1.5	12
75	Experimental Investigation of Longitudinal Bending of Buried Steel Pipes Pulled through Dense Sand. Journal of Pipeline Systems Engineering and Practice, 2014, 5, .	0.9	15
76	Performance of two-dimensional analysis: Deteriorated metal culverts under surface live load. Tunnelling and Underground Space Technology, 2014, 42, 152-160.	3.0	26
77	Performance of a cured-in-place pressure pipe liner passing through a pipe section without structural integrity. Tunnelling and Underground Space Technology, 2014, 42, 87-95.	3.0	20
78	Effect of Deterioration on the Performance of Corrugated Steel Culverts. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2014, 140, .	1.5	42
79	Simplified Design Equations for Joints in Buried Flexible Pipes Based on HetÁ©nyi Solutions. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2014, 140, .	1.5	16
80	Mechanistic, Probabilistic Model to Estimate the Factor of Safety of Large-diameter Cast Iron Water Mains: Sensitivity Analysis. Procedia Engineering, 2014, 89, 1390-1396.	1.2	3
81	Modeling the Effects of Backfilling and Soil Compaction beside Shallow Buried Pipes. Journal of Pipeline Systems Engineering and Practice, 2013, 4, .	0.9	44
82	Study of non-uniform bedding support under continuous PVC water distribution pipes. Tunnelling and Underground Space Technology, 2013, 35, 99-108.	3.0	26
83	Response of Bell and Spigot Joints in Culverts under Vehicle Load. , 2013, , .		2
84	Structural Design Equations for Bell and Spigot Joints in Culverts under Vehicle Load. , 2013, , .		2
85	Longitudinal Bending and Failure of GFRP Pipes Buried in Dense Sand under Relative Ground Movement. Journal of Composites for Construction, 2013, 17, 702-710.	1.7	15
86	Behavior of Bell and Spigot Joints in Buried Thermoplastic Pipelines. Transportation Research Record, 2013, 2332, 29-40.	1.0	14
87	Testing and Analysis of a Deep-Corrugated Large-Span Box Culvert prior to Burial. Journal of Bridge Engineering, 2012, 17, 81-88.	1.4	19
88	Analysis for Long-Term Response of Pipes Installed Using Horizontal Directional Drilling. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2012, 138, 432-440.	1.5	3
89	The Flexural Behavior of Buried Steel and Composite Pipes Pulled Relative to Dense Sand: Experimental and Numerical Investigation. , 2012, , .		7
90	Large-Scale Laboratory Experiments to Advance the Design and Performance of Buried Pipe Infrastructure. , 2012, , .		11

#	ARTICLE	IF	CITATIONS
91	Study of Nonuniform Bedding Support Because of Erosion under Cast Iron Water Distribution Pipes. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2012, 138, 1247-1256.	1.5	29
92	Study of non-uniform bedding due to voids under jointed PVC water distribution pipes. <i>Geotextiles and Geomembranes</i> , 2012, 34, 39-50.	2.3	56
93	Earth pressure measurements on buried HDPE pipe. <i>Geotechnique</i> , 2011, 61, 721-732.	2.2	34
94	Axial Stress-Strain Response of HDPE from Whole Pipes and Coupons. <i>Journal of Materials in Civil Engineering</i> , 2011, 23, 1377-1386.	1.3	5
95	Validation of boundary PIV measurements of soil-pipe interaction. <i>International Journal of Physical Modelling in Geotechnics</i> , 2011, 11, 23-32.	0.5	16
96	Axial Response of HDPE Pipes as a Result of Installation by Directional Drilling. <i>Journal of ASTM International</i> , 2011, 8, 1-10.	0.2	0
97	Ultimate Limit State of Deep-Corrugated Large-Span Box Culvert. <i>Transportation Research Record</i> , 2010, 2201, 55-61.	1.0	22
98	Stress-strain measurements for HDPE pipe during and after simulated installation by horizontal directional drilling. <i>Tunnelling and Underground Space Technology</i> , 2010, 25, 773-781.	3.0	6
99	Parametric study examining the short and long term response of HDPE pipes when installed by horizontal directional drilling. <i>Tunnelling and Underground Space Technology</i> , 2010, 25, 782-794.	3.0	11
100	Effect of Wrinkles on the Circumferential Strength of a Cast-in-Place Composite Polymer Liner Used in Retrofitting Pressure Pipes. <i>Journal of Materials in Civil Engineering</i> , 2010, 22, 1304-1314.	1.3	15
101	Effectiveness of Viscoelastic Models for Prediction of Tensile Axial Strains during Cyclic Loading of High-Density Polyethylene Pipe. <i>Journal of Pipeline Systems Engineering and Practice</i> , 2010, 1, 77-83.	0.9	5
102	Three-dimensional ground displacements from static pipe bursting in stiff clay. <i>Canadian Geotechnical Journal</i> , 2010, 47, 439-450.	1.4	21
103	Pipe-soil shear interaction stiffness in horizontal directional drilling and pipe bursting. <i>Geomechanics and Geoengineering</i> , 2010, 5, 69-77.	0.9	5
104	Response of a polyvinyl chloride water pipe when transverse to an underlying pipe replaced by pipe bursting. <i>Canadian Geotechnical Journal</i> , 2009, 46, 1258-1266.	1.4	13
105	Laboratory Testing to Examine Deformations and Moments in Fiber-Reinforced Cement Pipe. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2009, 135, 1722-1731.	1.5	26
106	Ground Displacements from a Pipe-Bursting Experiment in Well-Graded Sand and Gravel. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2009, 135, 1713-1721.	1.5	14
107	Analysis of a Gasketed Polyvinyl Chloride Pipe Joint. <i>Transportation Research Record</i> , 2009, 2131, 113-122.	1.0	16
108	Material characterization of components and assembled behavior of a composite liner for rehabilitation of cast iron pressure pipes. <i>Polymer Engineering and Science</i> , 2008, 48, 1231-1239.	1.5	20

#	ARTICLE	IF	CITATIONS
109	Finite Element Study of Stability of Corroded Metal Culverts. Transportation Research Record, 2008, 2050, 157-166.	1.0	38
110	Installed Geometry of Cast-in-Place Polymer Sewer Liners. Journal of Performance of Constructed Facilities, 2007, 21, 172-176.	1.0	4
111	Three-Dimensional Response of Buried Pipes under Circular Surface Loading. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2007, 133, 219-223.	1.5	25
112	Longitudinal Progression of Burst Head during Pipe Bursting. Transportation Research Record, 2007, 2028, 203-210.	1.0	4
113	Response to overburden pressure of an HDPE pipe pulled in place by pipe bursting. Canadian Geotechnical Journal, 2007, 44, 957-965.	1.4	7
