#	ARTICLE	IF	CITATIONS
1	Early regular egg exposure in infants with eczema: A randomized controlled trial. <i>Journal of Allergy and Clinical Immunology</i> , 2013, 132, 387-392.e1.	1.5	287
2	The importance of early complementary feeding in the development of oral tolerance: Concerns and controversies. <i>Pediatric Allergy and Immunology</i> , 2008, 19, 375-380.	1.1	220
3	Randomized controlled trial of early regular egg intake to prevent egg allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2017, 139, 1600-1607.e2.	1.5	169
4	Cord Blood 25-Hydroxyvitamin D3 and Allergic Disease During Infancy. <i>Pediatrics</i> , 2012, 130, e1128-e1135.	1.0	129
5	Dietary factors during pregnancy and atopic outcomes in childhood: A systematic review from the European Academy of Allergy and Clinical Immunology. <i>Pediatric Allergy and Immunology</i> , 2020, 31, 889-912.	1.1	95
6	Prebiotics: Mechanisms and Preventive Effects in Allergy. <i>Nutrients</i> , 2019, 11, 1841.	1.7	51
7	Maternal Folic Acid Supplementation during Pregnancy and Childhood Allergic Disease Outcomes: A Question of Timing?. <i>Nutrients</i> , 2017, 9, 123.	1.7	50
8	Effects of maternal dietary egg intake during early lactation on human milk ovalbumin concentration: a randomized controlled trial. <i>Clinical and Experimental Allergy</i> , 2016, 46, 1605-1613.	1.4	47
9	Maternal dietary intake in pregnancy and lactation and allergic disease outcomes in offspring. <i>Pediatric Allergy and Immunology</i> , 2017, 28, 135-143.	1.1	47
10	Prenatal Fish Oil Supplementation and Allergy: 6-Year Follow-up of a Randomized Controlled Trial. <i>Pediatrics</i> , 2016, 137, .	1.0	45
11	Direct infant UV light exposure is associated with eczema and immune development. <i>Journal of Allergy and Clinical Immunology</i> , 2019, 143, 1012-1020.e2.	1.5	44
12	In-utero exposures and the evolving epidemiology of paediatric allergy. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2015, 15, 402-408.	1.1	28
13	Nutritional Influences on Epigenetic Programming. <i>Immunology and Allergy Clinics of North America</i> , 2014, 34, 825-837.	0.7	27
14	Nutrition in early life, immune-programming and allergies: the role of epigenetics. <i>Asian Pacific Journal of Allergy and Immunology</i> , 2013, 31, 175-82.	0.2	27
15	Maternal Fiber Dietary Intakes during Pregnancy and Infant Allergic Disease. <i>Nutrients</i> , 2019, 11, 1767.	1.7	25
16	Taking a prebiotic approach to early immunomodulation for allergy prevention. <i>Expert Review of Clinical Immunology</i> , 2018, 14, 43-51.	1.3	23
17	Elevated IL-5 and IL-13 responses to egg proteins predate the introduction of egg in solid foods in infants with eczema. <i>Clinical and Experimental Allergy</i> , 2016, 46, 308-316.	1.4	21
18	Food Proteins in Human Breast Milk and Probability of IgE-Mediated Allergic Reaction in Children During Breastfeeding: A Systematic Review. <i>Journal of Allergy and Clinical Immunology: in Practice</i> , 2022, 10, 1312-1324.e8.	2.0	21

#	ARTICLE	IF	CITATIONS
19	Ovalbumin in breastmilk is associated with a decreased risk of IgE-mediated egg allergy in children. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2020, 75, 1463-1466.	2.7	19
20	Vitamin D and the Development of Atopic Eczema. <i>Journal of Clinical Medicine</i> , 2015, 4, 1036-1050.	1.0	18
21	A role for early oral exposure to house dust mite allergens through breast milk in IgE-mediated food allergy susceptibility. <i>Journal of Allergy and Clinical Immunology</i> , 2020, 145, 1416-1429.e11.	1.5	18
22	High-Fiber Diet during Pregnancy Characterized by More Fruit and Vegetable Consumption. <i>Nutrients</i> , 2021, 13, 35.	1.7	18
23	In "High-Risk" Infants with Sufficient Vitamin D Status at Birth, Infant Vitamin D Supplementation Had No Effect on Allergy Outcomes: A Randomized Controlled Trial. <i>Nutrients</i> , 2020, 12, 1747.	1.7	17
24	Nutritional approaches for the primary prevention of allergic disease: An update. <i>Journal of Paediatrics and Child Health</i> , 2015, 51, 962-969.	0.4	16
25	Does Early Feeding Promote Development of Oral Tolerance?. <i>Current Allergy and Asthma Reports</i> , 2012, 12, 321-331.	2.4	15
26	Preventing disease in the 21st century: The importance of maternal and early infant diet and nutrition. <i>Journal of Allergy and Clinical Immunology</i> , 2012, 130, 733-734.	1.5	13
27	Pediatric Burn Survivors Have Long-Term Immune Dysfunction With Diminished Vaccine Response. <i>Frontiers in Immunology</i> , 2020, 11, 1481.	2.2	13
28	The challenges of developing and optimising an assay to measure 25-hydroxyvitamin D in saliva. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2019, 194, 105437.	1.2	12
29	<i>In utero</i> and postnatal vitamin D exposure and allergy risk. <i>Expert Opinion on Drug Safety</i> , 2014, 13, 1601-1611.	1.0	11
30	The Influence of Sunlight Exposure and Sun Protecting Behaviours on Allergic Outcomes in Early Childhood. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 5429.	1.2	11
31	Early introduction of food reduces food allergy " Pro and Con. <i>Pediatric Allergy and Immunology</i> , 2017, 28, 214-221.	1.1	10
32	PrEggNut Study: protocol for a randomised controlled trial investigating the effect of a maternal diet rich in eggs and peanuts from 23 weeks gestation during pregnancy to 4 months lactation on infant IgE-mediated egg and peanut allergy outcomes. <i>BMJ Open</i> , 2022, 12, e056925.		10
33	Randomized controlled trials investigating the role of allergen exposure in food allergy. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2013, 13, 296-305.	1.1	9
34	Maternal Late-Pregnancy Serum Unmetabolized Folic Acid Concentrations Are Not Associated with Infant Allergic Disease: A Prospective Cohort Study. <i>Journal of Nutrition</i> , 2021, 151, 1553-1560.	1.3	8
35	Low allergen content of commercial baby foods. <i>Journal of Paediatrics and Child Health</i> , 2020, 56, 1613-1617.	0.4	6
36	Longitudinal egg-specific regulatory T and B cell development: Insights from primary prevention clinical trials examining the timing of egg introduction. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2021, 76, 1385-1397.	2.7	6

#	ARTICLE	IF	CITATIONS
37	Association Between Family Characteristics and the Effect of Timing of Regular Egg Introduction in Infant Egg Allergy. <i>JAMA Pediatrics</i> , 2017, 171, 489.	3.3	3
38	In infants with sufficient vitamin D status at birth, vitamin D supplementation does not impact immune development. <i>Pediatric Allergy and Immunology</i> , 2020, 31, 686-694.	1.1	3
39	Pre- and Postnatal Vitamin D Status and Allergy Outcomes in Early Childhood. <i>Biomedicines</i> , 2022, 10, 933.	1.4	3
40	Reply. <i>Journal of Allergy and Clinical Immunology</i> , 2013, 132, 1454-1456.	1.5	2
41	Analytical Bias in the Measurement of Plasma 25-Hydroxyvitamin D Concentrations in Infants. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 412.	1.2	2
42	Study Protocol for a Randomised Controlled Trial Investigating the Effects of Maternal Prebiotic Fibre Dietary Supplementation from Mid-Pregnancy to Six Months Post-Partum on Child Allergic Disease Outcomes. <i>Nutrients</i> , 2022, 14, 2753.	1.7	2
43	Reply. <i>Journal of Allergy and Clinical Immunology</i> , 2014, 133, 601-602.	1.5	0
44	Timing of Introduction of Solids and Early-Onset Allergic Disease. <i>Current Pediatrics Reports</i> , 2016, 4, 147-154.	1.7	0
45	Update on Timing and Source of 'Allergenic' Foods. <i>Nestle Nutrition Institute Workshop Series</i> , 2017, 87, 39-48.	1.5	0
46	Invited commentary in response to PUFA status at birth and allergy-related phenotypes in childhood: a pooled analysis of the Maastricht Essential Fatty Acid Birth and Rhea birth cohorts. <i>British Journal of Nutrition</i> , 2018, 119, 119-120.	1.2	0
47	Reply. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 141, 460-461.	1.5	0
48	Infant Egg Allergy Is Associated With Maternal Permeability Of The Mammary Epithelium. <i>Journal of Allergy and Clinical Immunology</i> , 2019, 143, AB69.	1.5	0
