#	ARTICLE	IF	CITATIONS
1	Emergence of AmpC-producing <i>Escherichia coli</i> in the broiler production chain in a country with a low antimicrobial usage profile. <i>Veterinary Microbiology</i> , 2014, 171, 315-320.	0.8	65
2	Integron, Plasmid and Host Strain Characteristics of <i>Escherichia coli</i> from Humans and Food Included in the Norwegian Antimicrobial Resistance Monitoring Programs. <i>PLoS ONE</i> , 2015, 10, e0128797.	1.1	42
3	Plasmid and Host Strain Characteristics of <i>Escherichia coli</i> Resistant to Extended-Spectrum Cephalosporins in the Norwegian Broiler Production. <i>PLoS ONE</i> , 2016, 11, e0154019.	1.1	37
4	<i>Staphylococcus cornubiensis</i> sp. nov., a member of the <i>Staphylococcus intermedius</i> Group (SIG). <i>International Journal of Systematic and Evolutionary Microbiology</i> , 2018, 68, 3404-3408.	0.8	31
5	Clonal spread of <i>Escherichia coli</i> resistant to cephalosporins and quinolones in the Nordic broiler production. <i>Veterinary Microbiology</i> , 2018, 213, 123-128.	0.8	22
6	Further Diversity of the <i>Staphylococcus Intermedius</i> Group and Heterogeneity in the <i>Mbo</i> Restriction Site Used for <i>Staphylococcus Pseudintermedius</i> Species Identification. <i>Journal of Veterinary Diagnostic Investigation</i> , 2010, 22, 756-759.	0.5	19
7	Occurrence and characterization of quinolone resistant <i>Escherichia coli</i> from Norwegian turkey meat and complete sequence of an <i>IncX1</i> plasmid encoding <i>qnrS1</i> . <i>PLoS ONE</i> , 2019, 14, e0212936.	1.1	18
8	Dissemination of Quinolone-Resistant <i>Escherichia coli</i> in the Norwegian Broiler and Pig Production Chains and Possible Persistence in the Broiler Production Environment. <i>Applied and Environmental Microbiology</i> , 2020, 86, .	1.4	16
9	Occurrence of quinolone resistant <i>E. coli</i> originating from different animal species in Norway. <i>Veterinary Microbiology</i> , 2018, 217, 25-31.	0.8	12
10	Comparative Genome Analyses of Wild Type- and Quinolone Resistant <i>Escherichia coli</i> Indicate Dissemination of QREC in the Norwegian Broiler Breeding Pyramid. <i>Frontiers in Microbiology</i> , 2020, 11, 938.	1.5	5
11	<i>Actinobacillus pleuropneumoniae</i> Eradication with Enrofloxacin May Lead to Dissemination and Long-Term Persistence of Quinolone Resistant <i>Escherichia coli</i> in Pig Herds. <i>Antibiotics</i> , 2020, 9, 910.	1.5	4
12	Complete Genome Sequences of 12 Quinolone-Resistant <i>Escherichia coli</i> Strains Containing <i>qnrS1</i> Based on Hybrid Assemblies. <i>Microbiology Resource Announcements</i> , 2021, 10, .	0.3	1
13	Closed Genome Sequences of <i>Providencia alcalifaciens</i> Isolates from Dogs. <i>Microbiology Resource Announcements</i> , 2022, 11, e0095521.	0.3	1
14	Longitudinal Sampling Reveals Persistence of and Genetic Diversity in Extended-Spectrum Cephalosporin-Resistant <i>Escherichia coli</i> From Norwegian Broiler Production. <i>Frontiers in Microbiology</i> , 2021, 12, 795127.	1.5	1
15	A European multicenter evaluation study to investigate the performance on commercially available selective agar plates for the detection of carbapenemase producing <i>Enterobacteriaceae</i> . <i>Journal of Microbiological Methods</i> , 2022, 193, 106418.	0.7	0
