#	ARTICLE	IF	CITATIONS
1	Cognitive flexibility, central coherence, and quality of life in anorexia nervosa. <i>Journal of Eating Disorders</i> , 2022, 10, 22.	1.3	7
2	No effect of very brief exposure to masked food pictures on fear of food in anorexia nervosa. <i>European Eating Disorders Review</i> , 2021, 29, 645-656.	2.3	1
3	Approach avoidance training to curb consumption of sugar-sweetened beverages – A pilot randomized controlled trial in healthy volunteers. <i>Appetite</i> , 2021, 162, 105194.	1.8	1
4	Reduced emotion recognition from nonverbal cues in anorexia nervosa. <i>European Eating Disorders Review</i> , 2021, 29, 868-878.	2.3	2
5	Participants' experience of approach bias modification training with transcranial Direct Current Stimulation as a combination treatment for binge eating disorder. <i>European Eating Disorders Review</i> , 2021, 29, 969-984.	2.3	11
6	Cognitive remediation therapy in anorexia nervosa – A randomized clinical trial. <i>Journal of Consulting and Clinical Psychology</i> , 2021, 89, 805-815.	1.6	13
7	Measuring approach – avoidance tendencies towards food with touchscreen-based arm movements. <i>Psychological Research</i> , 2020, 84, 1789-1800.	1.0	19
8	Confirmatory factor analysis of the Barratt Impulsiveness Scale – short form (BIS – 15) in patients with mental disorders. <i>Psychiatry Research</i> , 2020, 284, 112665.	1.7	9
9	Interpretation bias modification to reduce body dissatisfaction – a randomized controlled pilot study in women with elevated weight and shape concerns. <i>Journal of Eating Disorders</i> , 2020, 8, 34.	1.3	3
10	Approach and avoidance bias for thin – ideal and normal – weight body shapes in anorexia nervosa. <i>European Eating Disorders Review</i> , 2020, 28, 536-550.	2.3	6
11	Time to make a change: A call for more experimental research on key mechanisms in anorexia nervosa. <i>European Eating Disorders Review</i> , 2020, 28, 361-367.	2.3	33
12	Approach bias modification training to increase physical activity: A pilot randomized controlled trial in healthy volunteers. <i>Journal of Health Psychology</i> , 2020, 26, 135910532091393.	1.3	6
13	Improving emotion recognition in anorexia nervosa: An experimental proof – of – concept study. <i>International Journal of Eating Disorders</i> , 2020, 53, 945-953.	2.1	11
14	Risk for psychotherapy drop-out in survival analysis: The influence of general change mechanisms and symptom severity. <i>Journal of Counseling Psychology</i> , 2020, 67, 712-722.	1.4	6
15	Approach bias modification training in bulimia nervosa and binge – eating disorder: A pilot randomized controlled trial. <i>International Journal of Eating Disorders</i> , 2019, 52, 520-529.	2.1	38
16	Blunted emotion – modulated startle reflex in anorexia nervosa. <i>International Journal of Eating Disorders</i> , 2019, 52, 270-277.	2.1	12
17	Sudden Gains in Cognitive Behavioural Therapy and Focal Psychodynamic Therapy for Anorexia Nervosa: Findings from the ANTOP Study. <i>Psychotherapy and Psychosomatics</i> , 2019, 88, 241-243.	4.0	5
18	Sample size in clinical trials on anorexia nervosa: a rejoinder to Jenkins. <i>Psychological Medicine</i> , 2019, 49, 1581-1582.	2.7	3

#	ARTICLE	IF	CITATIONS
19	Combining cognitive bias modification training (CBM) and transcranial direct current stimulation (tDCS) to treat binge eating disorder: study protocol of a randomised controlled feasibility trial. <i>BMJ Open</i> , 2019, 9, e030023.	0.8	11
20	Measurement of food-related approach-avoidance biases: Larger biases when food stimuli are task relevant. <i>Appetite</i> , 2018, 125, 42-47.	1.8	45
21	Body image related negative interpretation bias in anorexia nervosa. <i>Behaviour Research and Therapy</i> , 2018, 104, 69-73.	1.6	28
22	Advances in the treatment of anorexia nervosa: a review of established and emerging interventions. <i>Psychological Medicine</i> , 2018, 48, 1228-1256.	2.7	124
23	Food cue-induced craving in individuals with bulimia nervosa and binge-eating disorder. <i>PLoS ONE</i> , 2018, 13, e0204151.	1.1	44
24	Psychotherapeutic Treatment for Anorexia Nervosa: A Systematic Review and Network Meta-Analysis. <i>Frontiers in Psychiatry</i> , 2018, 9, 158.	1.3	135
25	First-person Pronoun Use in Spoken Language as a Predictor of Future Depressive Symptoms: Preliminary Evidence from a Clinical Sample of Depressed Patients. <i>Clinical Psychology and Psychotherapy</i> , 2017, 24, 384-391.	1.4	60
26	Emotional Expression Predicts Treatment Outcome in Focal Psychodynamic and Cognitive Behavioural Therapy for Anorexia Nervosa: Findings from the ANTOP Study. <i>Psychotherapy and Psychosomatics</i> , 2017, 86, 108-110.	4.0	15
27	Meaningful Memory in Acute Anorexia Nervosa Patients-Comparing Recall, Learning, and Recognition of Semantically Related and Semantically Unrelated Word Stimuli. <i>European Eating Disorders Review</i> , 2017, 25, 89-97.	2.3	11
28	Reward-related decision making and long-term weight loss maintenance. <i>Physiology and Behavior</i> , 2017, 181, 69-74.	1.0	17
29	Social cognition in anorexia nervosa: Specific difficulties in decoding emotional but not nonemotional mental states. <i>International Journal of Eating Disorders</i> , 2016, 49, 883-890.	2.1	41
30	The ABBA study - approach bias modification in bulimia nervosa and binge eating disorder: study protocol for a randomised controlled trial. <i>Trials</i> , 2016, 17, 466.	0.7	11
31	Inhibitory Control and Hedonic Response towards Food Interactively Predict Success in a Weight Loss Programme for Adults with Obesity. <i>Obesity Facts</i> , 2016, 9, 299-309.	1.6	24
32	Brain effects of computer-assisted cognitive remediation therapy in anorexia nervosa: A pilot fMRI study. <i>Psychiatry Research - Neuroimaging</i> , 2016, 249, 52-56.	0.9	11
33	Reward-related decision making in eating and weight disorders: A systematic review and meta-analysis of the evidence from neuropsychological studies. <i>Neuroscience and Biobehavioral Reviews</i> , 2016, 61, 177-196.	2.9	102
34	Approach Bias Modification in Food Craving-A Proof-of-Concept Study. <i>European Eating Disorders Review</i> , 2015, 23, 352-360.	2.3	59
35	Me, myself, and I: self-referent word use as an indicator of self-focused attention in relation to depression and anxiety. <i>Frontiers in Psychology</i> , 2015, 6, 1564.	1.1	87
36	Preliminary Evidence for a Nexus between Rumination, Behavioural Avoidance, Motive Satisfaction and Depression. <i>Clinical Psychology and Psychotherapy</i> , 2015, 22, 232-239.	1.4	21

#	ARTICLE	IF	CITATIONS
37	Differentiating early-onset chronic depression from episodic depression in terms of cognitive-behavioral and emotional avoidance. <i>Journal of Affective Disorders</i> , 2015, 175, 418-423.	2.0	32
38	The Temporal Dynamics of Cognitive Reactivity and Their Association with the Depression Risk: An Exploratory Study. <i>Psychopathology</i> , 2015, 48, 114-119.	1.1	2
39	Mood-incongruent processing during the recall of a sad life event predicts the course and severity of depression. <i>Journal of Affective Disorders</i> , 2015, 187, 91-96.	2.0	4
40	Approach bias and cue reactivity towards food in people with high versus low levels of food craving. <i>Appetite</i> , 2015, 95, 197-202.	1.8	122
41	Impaired Cross-Talk between Mesolimbic Food Reward Processing and Metabolic Signaling Predicts Body Mass Index. <i>Frontiers in Behavioral Neuroscience</i> , 2014, 8, 359.	1.0	25
42	Set-shifting ability across the spectrum of eating disorders and in overweight and obesity: a systematic review and meta-analysis. <i>Psychological Medicine</i> , 2014, 44, 3365-3385.	2.7	145
43	Training cognitive flexibility in patients with anorexia nervosa: A pilot randomized controlled trial of cognitive remediation therapy. <i>International Journal of Eating Disorders</i> , 2014, 47, 24-31.	2.1	73
44	Difficulties in emotion regulation across the spectrum of eating disorders. <i>Comprehensive Psychiatry</i> , 2014, 55, 565-571.	1.5	206
45	The Thinner the Better: Self-Esteem and Low Body Weight in Anorexia Nervosa. <i>Clinical Psychology and Psychotherapy</i> , 2013, 20, 394-400.	1.4	30
46	Ambivalence over emotional expression in major depression. <i>Personality and Individual Differences</i> , 2013, 54, 862-864.	1.6	25
47	Lower body weight is associated with less negative emotions in sad autobiographical memories of patients with anorexia nervosa. <i>Psychiatry Research</i> , 2013, 210, 548-552.	1.7	37
48	Interpersonal Motives in Anorexia Nervosa: The Fear of Losing One's Autonomy. <i>Journal of Clinical Psychology</i> , 2013, 69, 278-289.	1.0	14
49	Anxiety-increasing effects of mindful eating exercises may be of benefit" comment on Marek et al. (2013). <i>International Journal of Eating Disorders</i> , 2013, 46, 875-876.	2.1	1
50	Mood Regulation and Cognitive Reactivity in Depression Vulnerability. <i>Cognitive Therapy and Research</i> , 2012, 36, 634-642.	1.2	12
51	Specific emotion regulation impairments in major depression and anorexia nervosa. <i>Psychiatry Research</i> , 2012, 200, 550-553.	1.7	61
52	Starvation and emotion regulation in anorexia nervosa. <i>Comprehensive Psychiatry</i> , 2012, 53, 496-501.	1.5	105
53	Mood regulation expectancies and emotion avoidance in depression vulnerability. <i>Personality and Individual Differences</i> , 2012, 53, 351-354.	1.6	19
