| #  | ARTICLE                                                                                                                                                                                                  | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Endovascular Therapy for Thoracic Aortic Aneurysms: State of the Art in 2012. Current Treatment Options in Cardiovascular Medicine, 2012, 14, 149-163.                                                   | 0.9 | 14        |
| 2  | Percutaneous Impella RP use for refractory right heart failure in adolescents and young adultsâ€”A multicenter U.S. experience. Catheterization and Cardiovascular Interventions, 2020, 96, 376-381.     | 1.7 | 14        |
| 3  | Long-term outcomes of elderly patients receiving continuous flow left ventricular support. Journal of Cardiac Surgery, 2020, 35, 3405-3408.                                                              | 0.7 | 6         |
| 4  | The Multicenter Collaborative to Enhance Biologic Understanding, Quality, and Outcomes in Cardiogenic Shock (VANQUISH Shock): Rationale and Design. Canadian Journal of Cardiology, 2022, 38, 1286-1295. | 1.7 | 6         |
| 5  | CASE 3â€”2014. Journal of Cardiothoracic and Vascular Anesthesia, 2014, 28, 408-416.                                                                                                                     | 1.3 | 5         |
| 6  | Heart and kidney transplant from donor with recent venoarterial extracorporeal cardiopulmonary resuscitationâ€”Journal of Cardiac Surgery, 2020, 35, 2814-2816.                                          | 0.7 | 5         |
| 7  | Successful mobile extracorporeal membrane oxygenator for COVID-19 severe respiratory failure. Journal of Cardiac Surgery, 2020, 35, 3655-3657.                                                           | 0.7 | 5         |
| 8  | Prognostic value of patient-reported outcome measures in adult heart-transplant patients: a systematic review. Journal of Patient-Reported Outcomes, 2022, 6, 23.                                        | 1.9 | 5         |
| 9  | Combined off-pump coronary bypass grafting without heparin and liver transplantation: A novel approach to a complex dilemma. Journal of Cardiac Surgery, 2020, 35, 450-453.                              | 0.7 | 3         |
| 10 | Transition to heart transplantation in post-myocardial infarction ventricular septal rupture: a systematic review. Heart Failure Reviews, 2023, 28, 217-227.                                             | 3.9 | 3         |
| 11 | GoogleTrends as a patient therapeutic education resource on extracorporeal life support: What do patients want to know?. Journal of Cardiac Surgery, 2022, 37, 2000-2005.                                | 0.7 | 3         |
| 12 | Aorto-pulmonary bypass shunt for intraoperative right ventricular support during LVAD implantation. Journal of Cardiac Surgery, 2020, 35, 188-190.                                                       | 0.7 | 2         |
| 13 | Application of total artificial heart in patients with primary malignant cardiac tumorsâ€”current treatment strategies. Annals of Cardiothoracic Surgery, 2020, 9, 113-115.                              | 1.7 | 2         |
| 14 | Cardiogenic shock and machine learning: A systematic review on prediction through clinical decision support softwares. Journal of Cardiac Surgery, 2021, 36, 4153-4159.                                  | 0.7 | 2         |
| 15 | Advanced heart failure therapies in patients with stable HIV infection. Journal of Cardiac Surgery, 2020, 35, 908-911.                                                                                   | 0.7 | 1         |
| 16 | Shifting surgical archetypes of ICG fluorescent angiography for bowel perfusion assessment in cardiogenic shock under ECMO support. Journal of Cardiac Surgery, 2022, , .                                | 0.7 | 1         |
| 17 | Invited Commentary. Annals of Thoracic Surgery, 2014, 97, 765-766.                                                                                                                                       | 1.3 | 0         |
| 18 | Off-pump CABG with lower sternotomy in a patient with dialysis access graft crossing the sternum. Journal of Cardiac Surgery, 2017, 32, 642-643.                                                         | 0.7 | 0         |

| #  | ARTICLE                                                                                                                                                                                                                                                                                                                                                  | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | 2395. Mechanism-Based-Susceptibility Testing (MBST) Using Disc Diffusion Assays (DDA) to Guide Treatment of Multidrug- and Extensively Drug-Resistant Pseudomonas aeruginosa (MDR-XDR-Pa) in a Cystic Fibrosis (CF) Lung Transplant Recipient; Are We Ready for Combination Therapy vs. MDR-XDR-Pa?. Open Forum Infectious Diseases, 2018, 5, S714-S714. | 0.9 | 0         |
| 20 | Heparineless off-pump coronary artery bypass in a patient with gunshot wound to chest and heart. Journal of Cardiac Surgery, 2019, 34, 632-634.                                                                                                                                                                                                          | 0.7 | 0         |
| 21 | Preservation of aortic leaflets during rapid deployment valve implantation in patients with aortic insufficiency. Journal of Cardiac Surgery, 2019, 34, 158-160.                                                                                                                                                                                         | 0.7 | 0         |
| 22 | Is it safe to remove an infected cardiac implantable electronic device at the time of heart transplantation? Report of two cases. Journal of Cardiac Surgery, 2020, 35, 226-228.                                                                                                                                                                         | 0.7 | 0         |
| 23 | Horner's syndrome following single lung transplantation. Journal of Cardiac Surgery, 2020, 35, 258-259.                                                                                                                                                                                                                                                  | 0.7 | 0         |
| 24 | Traumatic Tracheal Injury and Pulmonary Contusions. American Surgeon, 2021, 87, 2006-2008.                                                                                                                                                                                                                                                               | 0.8 | 0         |
| 25 | Invited commentary: "Adapting technology and rapid transitions to optimize management outcomes in mechanical circulatory support". Journal of Cardiac Surgery, 2021, 36, 1572-1573.                                                                                                                                                                      | 0.7 | 0         |
| 26 | Hemodynamic-based Assessment and Management of Cardiogenic Shock. US Cardiology Review, 0, 16, .                                                                                                                                                                                                                                                         | 0.5 | 0         |
