citing authors

#	ARTICLE	IF	CITATIONS
1	The carbon footprint of water treatment as well as sewer and sanitation utilities of Pamplona in Colombia. <i>Environment, Development and Sustainability</i> , 2022, 24, 3982-3999.	2.7	5
2	Packaging environmental impact on seafood supply chains: A review of life cycle assessment studies. <i>Journal of Industrial Ecology</i> , 2022, 26, 1961-1978.	2.8	11
3	Life cycle inventory of plastics losses from seafood supply chains: Methodology and application to French fish products. <i>Science of the Total Environment</i> , 2022, 804, 150117.	3.9	13
4	Linkage of impact pathways to cultural perspectives to account for multiple aspects of mineral resource use in life cycle assessment. <i>Resources, Conservation and Recycling</i> , 2022, 176, 105912.	5.3	10
5	Supply risk evolution of raw materials for batteries and fossil fuels for selected OECD countries (2000â€“2018). <i>Resources Policy</i> , 2022, 75, 102465.	4.2	22
6	Evaluating the environmental impacts of analytical chemistry methods: From a critical review towards a proposal using a life cycle approach. <i>TrAC - Trends in Analytical Chemistry</i> , 2022, 147, 116525.	5.8	11
7	Life cycle assessment of sample preparation in analytical chemistry: a case study on SBSE and SPE techniques. <i>Advances in Sample Preparation</i> , 2022, 1, 100009.	1.1	4
8	Implementing Artificial Intelligence Techniques to Predict Environmental Impacts: Case of Construction Products. <i>Sustainability</i> , 2022, 14, 3699.	1.6	10
9	An improved resource midpoint characterization method for supply risk of resources: integrated assessment of Li-ion batteries. <i>International Journal of Life Cycle Assessment</i> , 2022, 27, 457-468.	2.2	9
10	Achieving Sustainability of the Seafood Sector in the European Atlantic Area by Addressing Eco-Social Challenges: The NEPTUNUS Project. <i>Sustainability</i> , 2022, 14, 3054.	1.6	12
11	The influence of market factors on the potential environmental benefits of the recycling of rare earth elements. <i>Clean Technologies and Recycling</i> , 2022, 2, 64-79.	1.3	1
12	Losses and lifetimes of metals in the economy. <i>Nature Sustainability</i> , 2022, 5, 717-726.	11.5	36
13	Nexus between nature-based solutions, ecosystem services and urban challenges. <i>Land Use Policy</i> , 2021, 100, 104898.	2.5	150
14	How recycling mitigates supply risks of critical raw materials: Extension of the geopolitical supply risk methodology applied to information and communication technologies in the European Union. <i>Resources, Conservation and Recycling</i> , 2021, 164, 105108.	5.3	37
15	How to account for plastic emissions in life cycle inventory analysis?. <i>Resources, Conservation and Recycling</i> , 2021, 168, 105331.	5.3	8
16	Life cycle assessment of fish and seafood processed products â€“ A review of methodologies and new challenges. <i>Science of the Total Environment</i> , 2021, 761, 144094.	3.9	58
17	Design of an endpoint indicator for mineral resource supply risks in life cycle sustainability assessment: The case of Li-ion batteries. <i>Journal of Industrial Ecology</i> , 2021, 25, 1051-1062.	2.8	16
18	The ABCâ€”LCA method for the integration of activityâ€”based costing and life cycle assessment. <i>Business Strategy and the Environment</i> , 2021, 30, 1735-1750.	8.5	10

#	ARTICLE	IF	CITATIONS
19	Environmental Trade-Offs of Downcycling in Circular Economy: Combining Life Cycle Assessment and Material Circularity Indicator to Inform Circularity Strategies for Alkaline Batteries. Sustainability, 2021, 13, 1040.	1.6	24
20	Material Flow Analysis to Evaluate Supply Chain Evolution and Management: An Example Focused on Maritime Pine in the Landes de Gascogne Forest, France. Sustainability, 2021, 13, 4378.	1.6	3
21	“Allocation at the point of substitution” applied to recycled rare earth elements: what can we learn?. International Journal of Life Cycle Assessment, 2021, 26, 1403-1416.	2.2	2
22	Life cycle impact assessment methods for estimating the impacts of dissipative flows of metals. Journal of Industrial Ecology, 2021, 25, 1177-1193.	2.8	17
23	An axiomatic method for goal-dependent allocation in life cycle assessment. International Journal of Life Cycle Assessment, 2021, 26, 1223-1235.	2.2	7
24	Development of Eco-Efficient Smart Electronics for Anticounterfeiting and Shock Detection Based on Printable Inks. ACS Sustainable Chemistry and Engineering, 2021, 9, 11691-11704.	3.2	27
25	Principles for the application of life cycle sustainability assessment. International Journal of Life Cycle Assessment, 2021, 26, 1900-1905.	2.2	53
26	A Review on the Use of Life Cycle Methodologies and Tools in Sustainable Regional Development. Sustainability, 2021, 13, 10881.	1.6	8
27	Teaching life cycle assessment in higher education. International Journal of Life Cycle Assessment, 2021, 26, 511-527.	2.2	16
28	Greening Pathways for Synthetic Talc Production Based on the Supercritical Hydrothermal Flow Process. ACS Sustainable Chemistry and Engineering, 2021, 9, 16597-16605.	3.2	5
29	A detailed quantitative comparison of the life cycle assessment of bottled wines using an original harmonization procedure. Journal of Cleaner Production, 2020, 250, 119472.	4.6	23
30	Archetypes of Goal and Scope Definitions for Consistent Allocation in LCA. Sustainability, 2020, 12, 5587.	1.6	37
31	Updating and Road-testing Life Cycle Inventory Data Review Criteria: Toward Global Consensus and Guidance On Data Quality Assessment. Integrated Environmental Assessment and Management, 2020, 16, 517-524.	1.6	1
32	Space debris through the prism of the environmental performance of space systems: the case of Sentinel-3 redesigned mission. Journal of Space Safety Engineering, 2020, 7, 198-205.	0.5	2
33	Mineral resources in life cycle impact assessment: part II “ recommendations on application-dependent use of existing methods and on future method development needs. International Journal of Life Cycle Assessment, 2020, 25, 798-813.	2.2	84
34	Addressing challenges and opportunities of the European seafood sector under a circular economy framework. Current Opinion in Environmental Science and Health, 2020, 13, 101-106.	2.1	45
35	A review of methods and data to determine raw material criticality. Resources, Conservation and Recycling, 2020, 155, 104617.	5.3	137
36	Application of environmental life cycle assessment (LCA) within the space sector: A state of the art. Acta Astronautica, 2020, 170, 122-135.	1.7	20

#	ARTICLE	IF	CITATIONS
37	Mineral resources in life cycle impact assessmentâ€”part I: a critical review of existing methods. <i>International Journal of Life Cycle Assessment</i> , 2020, 25, 784-797.	2.2	95
38	Do we have enough natural sand for lowâ€”carbon infrastructure?. <i>Journal of Industrial Ecology</i> , 2020, 24, 1004-1015.	2.8	24
39	Greater circularity leads to lower criticality, and other links between criticality and the circular economy. <i>Resources, Conservation and Recycling</i> , 2020, 159, 104718.	5.3	19
40	Life cycle assessment of emerging Niâ€”Co hydroxide charge storage electrodes: impact of graphene oxide and synthesis route. <i>RSC Advances</i> , 2019, 9, 18853-18862.	1.7	10
41	A necessary step forward for proper non-energetic abiotic resource use consideration in life cycle assessment: The functional dissipation approach using dynamic material flow analysis data. <i>Resources, Conservation and Recycling</i> , 2019, 151, 104449.	5.3	9
42	To what extent can agent-based modelling enhance a life cycle assessment? Answers based on a literature review. <i>Journal of Cleaner Production</i> , 2019, 239, 118123.	4.6	26
43	Positioning supercritical solvolysis among innovative recycling and current waste management scenarios for carbon fiber reinforced plastics thanks to comparative life cycle assessment. <i>Journal of Supercritical Fluids</i> , 2019, 154, 104607.	1.6	47
44	Assessing habitat loss, fragmentation and ecological connectivity in Luxembourg to support spatial planning. <i>Landscape and Urban Planning</i> , 2019, 189, 335-351.	3.4	71
45	Potential for industrial ecology to support healthcare sustainability: Scoping review of a fragmented literature and conceptual framework for future research. <i>Journal of Industrial Ecology</i> , 2019, 23, 1344-1352.	2.8	22
46	Life cycle assessment of organic photovoltaic charger use in Europe: the role of product use intensity and irradiation. <i>Journal of Cleaner Production</i> , 2019, 233, 1088-1096.	4.6	10
47	Raw material criticality assessment as a complement to environmental life cycle assessment: Examining methods for productâ€”level supply risk assessment. <i>Journal of Industrial Ecology</i> , 2019, 23, 1226-1236.	2.8	50
48	Social life cycle assessment framework for evaluation of potential job creation with an application in the French carbon fiber aeronautical recycling sector. <i>International Journal of Life Cycle Assessment</i> , 2019, 24, 1729-1742.	2.2	14
49	Assessing the impact of space debris on orbital resource in life cycle assessment: A proposed method and case study. <i>Science of the Total Environment</i> , 2019, 667, 780-791.	3.9	17
50	Evaluating the risks in the construction wood product system through a criticality assessment framework. <i>Resources, Conservation and Recycling</i> , 2019, 146, 68-76.	5.3	9
51	The future in and of criticality assessments. <i>Journal of Industrial Ecology</i> , 2019, 23, 751-766.	2.8	14
52	Anticipating in-use stocks of carbon fibre reinforced polymers and related waste generated by the wind power sector until 2050. <i>Resources, Conservation and Recycling</i> , 2019, 141, 30-39.	5.3	89
53	Life cycle assessment of the production of surface-active alkyl polyglycosides from acid-assisted ball-milled wheat straw compared to the conventional production based on corn-starch. <i>Green Chemistry</i> , 2018, 20, 2135-2141.	4.6	12
54	Supercritical Fluid Flow Synthesis to Support Sustainable Production of Engineered Nanomaterials: Case Study of Titanium Dioxide. <i>ACS Sustainable Chemistry and Engineering</i> , 2018, 6, 5142-5151.	3.2	28

#	ARTICLE	IF	CITATIONS
55	Preface: Recognizing management in LCM. <i>International Journal of Life Cycle Assessment</i> , 2018, 23, 1351-1356.	2.2	3
56	Geopolitical-related supply risk assessment as a complement to environmental impact assessment: the case of electric vehicles. <i>International Journal of Life Cycle Assessment</i> , 2017, 22, 31-39.	2.2	52
57	LCA mainstreaming conditions in Latin America—based on learnings from 2005 to 2014. <i>International Journal of Life Cycle Assessment</i> , 2017, 22, 485-491.	2.2	8
58	Probabilistic risk assessment of emerging materials: case study of titanium dioxide nanoparticles. <i>Nanotoxicology</i> , 2017, 11, 558-568.	1.6	18
59	Circular economy, resource efficiency, life cycle innovation: same objectives, same impacts?. <i>International Journal of Life Cycle Assessment</i> , 2017, 22, 1327-1328.	2.2	9
60	Medellin Declaration on Marine Litter in Life Cycle Assessment and Management. <i>International Journal of Life Cycle Assessment</i> , 2017, 22, 1637-1639.	2.2	42
61	An analysis to understand how the shape of a concrete residential building influences its embodied energy and embodied carbon. <i>Energy and Buildings</i> , 2017, 154, 1-11.	3.1	38
62	Evaluating nanotechnology opportunities and risks through integration of life-cycle and risk assessment. <i>Nature Nanotechnology</i> , 2017, 12, 734-739.	15.6	46
63	Is gravel becoming scarce? Evaluating the local criticality of construction aggregates. <i>Resources, Conservation and Recycling</i> , 2017, 126, 25-33.	5.3	83
64	Anticipating in-use stocks of carbon fiber reinforced polymers and related waste flows generated by the commercial aeronautical sector until 2050. <i>Resources, Conservation and Recycling</i> , 2017, 125, 264-272.	5.3	101
65	Modeling human health characterization factors for indoor nanomaterial emissions in life cycle assessment: a case-study of titanium dioxide. <i>Environmental Science: Nano</i> , 2017, 4, 1705-1721.	2.2	11
66	Extension of geopolitical supply risk methodology: Characterization model applied to conventional and electric vehicles. <i>Journal of Cleaner Production</i> , 2017, 162, 754-763.	4.6	59
67	Towards the integration of orbital space use in Life Cycle Impact Assessment. <i>Science of the Total Environment</i> , 2017, 595, 642-650.	3.9	9
68	Review of LCA datasets in three emerging economies: a summary of learnings. <i>International Journal of Life Cycle Assessment</i> , 2017, 22, 1658-1665.	2.2	4
69	Identification of Key Sustainability Performance Indicators and related assessment methods for the carbon fiber recycling sector. <i>Ecological Indicators</i> , 2017, 72, 833-847.	2.6	20
70	Abiotic Raw-Materials in Life Cycle Impact Assessments: An Emerging Consensus across Disciplines. <i>Resources</i> , 2016, 5, 12.	1.6	30
71	Life-cycle assessment of cradle-to-grave opportunities and environmental impacts of organic photovoltaic solar panels compared to conventional technologies. <i>Solar Energy Materials and Solar Cells</i> , 2016, 156, 37-48.	3.0	65
72	Critical review of guidelines against a systematic framework with regard to consistency on allocation procedures for recycling in LCA. <i>International Journal of Life Cycle Assessment</i> , 2016, 21, 994-1008.	2.2	69

#	ARTICLE	IF	CITATIONS
73	Extending the geopolitical supply risk indicator: Application of life cycle sustainability assessment to the petrochemical supply chain of polyacrylonitrile-based carbon fibers. <i>Journal of Cleaner Production</i> , 2016, 137, 1170-1178.	4.6	57
74	Developing a systematic framework for consistent allocation in LCA. <i>International Journal of Life Cycle Assessment</i> , 2016, 21, 976-993.	2.2	114
75	Anticipatory life-cycle assessment of supercritical fluid synthesis of barium strontium titanate nanoparticles. <i>Green Chemistry</i> , 2016, 18, 4924-4933.	4.6	31
76	Preparation of hierarchical porous carbonaceous foams from Kraft black liquor. <i>Materials Today Communications</i> , 2016, 7, 108-116.	0.9	30
77	A comparative human health, ecotoxicity, and product environmental assessment on the production of organic and silicon solar cells. <i>Progress in Photovoltaics: Research and Applications</i> , 2016, 24, 645-655.	4.4	34
78	Comparative environmental life cycle assessment of materials in wooden boat ecodesign. <i>International Journal of Life Cycle Assessment</i> , 2016, 21, 265-275.	2.2	20
79	LCA (Life Cycle Assessment) of EVP "engineering veneer product: plywood glued using a vacuum moulding technology from green veneers. <i>Journal of Cleaner Production</i> , 2016, 124, 383-394.	4.6	25
80	Importance-based Indicator for the Geopolitical Supply Risk of Raw Materials in Life Cycle Sustainability Assessments. <i>Journal of Industrial Ecology</i> , 2016, 20, 154-165.	2.8	85
81	Life cycle assessment of producing emulsion-templated porous materials from Kraft black liquor "comparison of a vegetable oil and a petrochemical solvent. <i>Journal of Cleaner Production</i> , 2015, 91, 180-186.	4.6	15
82	From a critical review to a conceptual framework for integrating the criticality of resources into Life Cycle Sustainability Assessment. <i>Journal of Cleaner Production</i> , 2015, 94, 20-34.	4.6	89
83	Critical review of life cycle assessment (LCA) for the built environment at the neighborhood scale. <i>Building and Environment</i> , 2015, 93, 165-178.	3.0	156
84	The potential of Kraft black liquor to produce bio-based emulsion-templated porous materials. <i>Reactive and Functional Polymers</i> , 2015, 90, 15-20.	2.0	14
85	Mainstreaming Life Cycle Sustainability Management in Rapidly Growing and Emerging Economies Through Capacity-Building. <i>LCA Compendium</i> , 2015, , 263-277.	0.8	4
86	Life Cycle Management: Implementing Sustainability in Business Practice. <i>LCA Compendium</i> , 2015, , 7-21.	0.8	17
87	Communication and Collaboration as Essential Elements for Mainstreaming Life Cycle Management. <i>LCA Compendium</i> , 2015, , 279-291.	0.8	3
88	How to Implement Life Cycle Management in Business?. <i>LCA Compendium</i> , 2015, , 35-50.	0.8	3
89	Life Cycle Management Responsibilities and Procedures in the Value Chain. <i>LCA Compendium</i> , 2015, , 195-212.	0.8	2
90	Introducing a multi-criteria indicator to better evaluate impacts of rare earth materials production and consumption in life cycle assessment. <i>Journal of Rare Earths</i> , 2014, 32, 288-292.	2.5	26

#	ARTICLE	IF	CITATIONS
91	Global guidance on environmental life cycle impact assessment indicators: findings of the scoping phase. International Journal of Life Cycle Assessment, 2014, 19, 962-967.	2.2	62
92	Environmental Feasibility of the Recycling of Carbon Fibers from CFRPs by Solvolysis Using Supercritical Water. ACS Sustainable Chemistry and Engineering, 2014, 2, 1498-1502.	3.2	90
93	The UNEP/SETAC Life Cycle Initiative. LCA Compendium, 2014, , 107-144.	0.8	5
94	A UNEP/SETAC approach towards a life cycle sustainability assessmentâ€”our contribution to Rio+20. International Journal of Life Cycle Assessment, 2013, 18, 1673-1685.	2.2	157
95	Life Cycle Impact Assessmentâ€”where we are, trends, and next steps: a late report from a UNEP/SETAC Life Cycle Initiative workshop and a few updates from recent developments. International Journal of Life Cycle Assessment, 2013, 18, 1413-1420.	2.2	21
96	Global guidance principles for life cycle assessment databases: development of training material and other implementation activities on the publication. International Journal of Life Cycle Assessment, 2013, 18, 1169-1172.	2.2	17
97	Toward Meaningful End Points of Biodiversity in Life Cycle Assessment. Environmental Science & Technology, 2011, 45, 70-79.	4.6	173
98	What Do We Know About Metal Recycling Rates?. Journal of Industrial Ecology, 2011, 15, 355-366.	2.8	476
99	Process on â€œglobal guidance for LCA databasesâ€• International Journal of Life Cycle Assessment, 2011, 16, 95-97.	2.2	23
100	Operational energy in the life cycle of residential dwellings: The experience of Spain and Colombia. Applied Energy, 2010, 87, 673-680.	5.1	37
101	ILCD Handbook Public Consultation Workshop. International Journal of Life Cycle Assessment, 2010, 15, 231-237.	2.2	17
102	Life cycle assessment of two dwellings: One in Spain, a developed country, and one in Colombia, a country under development. Science of the Total Environment, 2010, 408, 2435-2443.	3.9	103
103	Managing sustainability performance through the valueâ€•chain. Corporate Governance (Bingley), 2010, 10, 46-58.	3.2	33
104	Sustainability in the construction industry: A review of recent developments based on LCA. Construction and Building Materials, 2009, 23, 28-39.	3.2	956
105	New activities launched in Warsaw and consultations on emerging ideas. International Journal of Life Cycle Assessment, 2008, 13, 371-373.	2.2	0
106	Corner: UNEP/SETAC life cycle initiative. International Journal of Life Cycle Assessment, 2007, 12, 544-545.	2.2	4
107	Corner: UNEP/SETAC Life Cycle Initiative. International Journal of Life Cycle Assessment, 2007, 12, 544-545.	2.2	0
108	Key Observations Arising from Papers on Sustainable Production, Use and Recycling of Natural Resources. International Journal of Life Cycle Assessment, 2006, 11, 75-76.	2.2	3

#	ARTICLE	IF	CITATIONS
109	Life Cycle Management in Developing Countries: State of the Art and Outlook. International Journal of Life Cycle Assessment, 2006, 11, 123-126.	2.2	16
110	International Conference on Life Cycle Assessment 2005 (ICLCA 2005), 25-28 April 2005, San Jose, Costa Rica Guido Sonnemann (on behalf of the International Organising Committee: Ana Quiros, Sergio Tj ETQq0 0 0 rgBT/Overlock 10 Tf 50 163-163.	2.2	2
